Shop Timekeeping and Labor Distribution.

By E. E. Lloyd, Chief Clerk Office of Auditor of Stores and Mechanical Accounts, C.P.R.

Before endeavoring to illustrate the methods necessary for the proper handling of shop timekeeping, it will be well to enquire briefly into the theory of the subject, and by so doing better fit ourselves to understand the matter in detail. The latest report of the Interstate Commerce Commission shows that in the year 1906 railways paid out in wages $950,000,000, and of this amount the shop pay rolls represented $220,000,000, or about 23%. These figures will, no doubt, impress you with the necessity for extreme accuracy in the matter of shop timekeeping, whether the work be paid for by the hour, day, month, or piece. Any carelessness or inaccuracy in the method of compilation will, necessarily, result in injustice, either to the employe or to the company, and, it might be noted, involves also something far beyond the amount a company may lose through particular errors or omissions. It means dissatisfaction with the company if an employe loses the just return for his labor. It means the building up of an improper spirit if he gains something that does not belong to him, and the question of method by which the recording of time may be kept is of secondary importance to the knowledge that accuracy and truthfulness are enforced and a fair and just return is made to the employes for services performed, coupled with a correct distribution to the company for the money expended. There can be no chance hazards in this matter any more than in the matter of a company's traffic or the care of its monies. It must be known that the men have worked as represented, and that the rate paid is correct, also that the amount of money shown on the pay roll is charged to the accounts upon which the labor has been expended. These are the vital features of shop timekeeping, and whether a company shall have an efficient or an inefficient shop management, whether there shall be economy or extravagance, responsibility or irresponsibility, largely depends upon these features being properly appreciated. It can be stated as a general proposition that shop timekeeping should be taken care of under the direction of an officer acting independently of the person who hires or the official who directs. The officer to whom is assigned the charge of the timekeeping and labor accounts should, by performing his duty faithfully, protect the interests of the employer and employe by preventing the introduction or growth of irregular or improper practices, and by affording the management accurate information of the extent and purpose of expenditures for labor and the measure of economy that has characterized such expenditures, and by formulating such a system as will insure the payment to employes every cent earned. To obtain these results calls for indefatigable watchfulness and the exercise of much skill and integrity, and he must be upheld in the exercise of the prerogatives of his office, allowed to go ahead untrammelled in the performance of his duty, and at the same time receive the most hearty co-operation of all with whom he comes in touch.

S. J. HUNGERFORD
Superintendent Shops, Canadian Pacific Railway, Winnipeg.

Various systems have been introduced with a view of bringing about these most desirable results. In days gone by, when shops were small, men reported directly to their leader or boss, and there was neither roll-call nor checking in or out, but as time progressed and shops grew, and the number of employes outstripped the immediate supervision of the boss, the necessity of some system of checking the employes on and off duty became evident. As stated the systems devised varied considerably, each, no doubt, having its redeeming features, and one cannot overlook the fact that it is necessary to study the physical conditions of the immediate surroundings before the most suitable, efficient, and economical method can be decided upon. My first experience was with the metal check system, a system which, to-day, boasts many advocates. Each employe is designated by a number upon the staff record of the time office, and upon passing in to work through the check office is given a metal check number to correspond with his number upon the staff record. This check he retains until passing out from work, when it is deposited with the check clerk, and so on. This method, however, proved to have its weak spots. For instance, it was virtually impossible to detect an employe depositing more than one check, thereby leaving a loophole by which he might assist a co-employe residing in the opposite direction to the check office or defraud the company by depositing the check of an employe who had decamped. But the most serious objection arises from the fact that, in the case of a dispute regarding the allowance or disallowance of certain time, which disputes, as a rule, come up some little time after the occurrence, the evidence available, when boiled down, resolves itself into a deadlock of one man's word against another's.

As the shop buildings or repair yards became more dispersed and grew, the distance from the check office to the immediate location of the work also became greater, and, as a consequence, resulted in the loss of valuable time to both the employer and employe. Some measures were, therefore, necessary to overcome these weak spots. To establish a record of evidence by which to satisfactorily dispose of the question of disputes, and to overcome the loss of time between check office and work, or vice versa, by inaugurating some system of time registration right at the job. Hence the adoption of mechanical time registers or time clocks. These registers or clocks are of various capacities, i.e., 50, 100, 150, 200, and 250 numbers, but for big shops and large staffs the most convenient register is one of 150 capacity. Each register is designated by a number, although in some plants the registration numbers of the clocks run in sequence from one up. The system of registering, assembling, and accounting for the time recorded on the registers is as follows: A successful applicant for work is given an order by the shop superintendent upon the timekeeper for a number upon the

Galena-Signal Oil Company

CHARLES MILLER,

PRESIDENT

register. This order is made out, giving the man's name in full, his occupation, and the name of the foreman under whose immediate jurisdiction he is to work. Upon presenting this order at the time office he is called upon to endorse it, so that there shall be no question as to the correct manner of spelling his name, and as a means of subsequent identification, if necessary. The order is taken up by the timekeeper and entered on the staff record and in the time-book of the register to which he is assigned. The timekeeper then gives the man a slip, carrying reference to the register number, and his number upon such register, and instructs him as to the correct methods of recording his time. The registration or punching of the clock on and off duty by the men at the regular starting and quitting hours is supervised by a clock watcher, an employe who is selected for integrity and satisfactory service, and his ability to identify each and every man recording upon his particular register. As each employe registers himself on duty at one of the regular starting hours, he is handed a day time-card (see exhibit A) by the clock watcher upon which to record a statement of the various jobs upon which he is engaged. The clock watcher checks up the clock record, commonly known as a clock slip, with the list of employes assigned to his register, immediately after starting time, morning and noon, and makes a list of the absentees or possible late arrivals for the foreman's information, thus enabling the foreman to lay out his work to meet such conditions. Immediately before the men punch off duty finally at the regular shop closing hour, they deposit their day time cards, carrying a full distribution of their time, into locked metal boxes placed immediately adjacent to each register and in the commanding view of the clock watcher. A late arrival wishing to start at an irregular hour must first report to his foreman, at whose discretion he will be allowed to start

or otherwise. If allowed to start he punches the clock and receives from his foreman a time-card, upon which the foreman has entered the starting hour. Should an employe desire to quit work at an irregular hour, he must first obtain the permission of his foreman, who, in giving him permission, takes up the time-card and enters upon it the hour at which the man quits and instructs him to punch the clock, after which he gives him a pass-out order carrying reference to the permitted quitting hour, which order is delivered up to the

gate watchman, who again records the time of delivery, and turns the order into the time office. By these methods the possibilities of an employe omitting to register himself on or off duty, at the regular shop hours or at an irregular hour, are practically eliminated. Should an omission occur, however, it is promptly detected in the time office, where the clock slips and the time-cards are compared, and any inconsistencies are immediately reported to the shop superintendent on a form specially provided for the purpose. The matter of the omission is then taken up by the shop superintendent with the foreman, and he in turn with the employe, for an explanation as to his violation of the regulations. If satisfactory, the foreman is then required to make a declaration (see exhibit B) that, to his personal knowledge, the said employe was on duty between stated hours; the allowance of the unrecorded time is recommended or disallowed at the discretion of the shop superintendent, based upon the facts and conditions of the case. Each omission, however, if allowed, calls for the application of shop discipline, and should an employe become a frequent offender, he is dismissed.

In the event of it being necessary to work any portion of the staff overtime, the respective foremen make requisition upon the shop superintendent for the required number of overtime cards, which, on receipt, are distributed to the men. The overtime card is printed in red ink in order that it can be readily distinguished from the day time-card, which is printed in black ink. The register is punched upon starting to work overtime and upon quitting, in the regular manner. The overtime card, upon which is recorded the distribution of the time to the work performed, instead of being deposited in the metal boxes, is handed in to the gate watchman, thereby serving the purpose of a pass-out order. The gate watchman records upon the card the time at which the man passes out and turns the cards over to the time office.

The clock slips upon which the time is recorded are changed at a specified hour each day by the timekeepers, who at the same time collect the time-cards deposited in the boxes. The hours recorded opposite each number on the clock slip are then extended into the right hand margin of the slip, and the hours on the day and overtime cards compared with the slip to see that a full distribution has been given, the time keepers at the same time checking the wage rate as entered on the cards by the employes with the official list. Should there be any discrepancies in the distribution, the card is immediately returned to the foreman for an explanation and full report as to what correction is necessary. All the cards that check out correctly are then returned to the respective foremen for their signature as a verification of the accuracy of the time distribution as given. The overtime cards have to be further approved by the general foreman or shop superintendent. Should the foreman detect any disparity in the distribution, he must make a notation across the card, "Distribution Incorrect," and return the card unsigned to the time office. The matter is then taken up with the shop superintendent, and each case thoroughly investigated. Under no circumstances is a foreman allowed to change the distribution on a time card.

The clock slips are then turned over to the time checkers who, after checking the extensions, cut the slips into 50 number sections, each section dated, and paste them into the time-book, overlapping each other in such a manner as to leave the outside edge on which the total number of hours worked is shown, exposed, under the day of the month represented by the clock slip, so that at the close of the month the timebooks themselves show the complete record of each man's time as well as the total hours' labor performed. The old method of taking the clock slips and entering from these into the time book gave opportunity for errors in posting time to the wrong man, and when it came to the settling of any dispute with an employe, the clock slips had to be located and comparison made with the entries in the time book. Much loss of time is obviated by the method now adopted, and it is absolutely impossible for any time to be credited to the wrong employe or to those not properly entitled thereto as shown by the clock records.

The time of men working away from their home station or temporarily transferred to another station is taken care of on a specially prepared form, the handling of which is as follows: The foreman, on issuing this form, enters the time thereon and instructs the man to punch the clock, and to report at the time office of his home station in order to obtain the signature of the timekeeper. The timekeeper, after checking the time, signing the form, makes entry in the time book opposite the man's number of his transfer to the point stated on the form. This with the object of putting the timekeeper on the lookout for the man's time before closing the check book at the month end. Upon the man's arrival at the point to which he is temporarily transferred, he must immediately report himself to the timekeeper, but in the event of arriving after the timekeeper is off duty, he must report himself to the foreman in charge, who will take up the form, recording upon the same the hour of arrival, and turning the form over to the timekeeper at the first opportunity. On receipt of the form by the timekeeper, the hours of departure and arrival are checked up to see that no unnecessary time has been occupied on the journey, and after entering the travelling time on the form, the man is given a number on the local register and must record himself on and off duty and deposit time-cards, the same as the regular shop employes. Upon the completion of the work, and his return to his home station, the timekeeper will transfer from the time book to the form a daily record of the hours worked,

MONTREAL LOCOMOTIVE WORKS LIMITED

BANK OF OTTAWA BUILDING, MONTREAL, CANADA

making notation in the time book, "Time transferred to (home station) on transfer form," at the same time instructing the employe to report himself to the home station timekeeper immediately on arrival. The timekeeper at home station takes up the form, checks up the departure and arrival hours, records the travelling time and transfers all the time from the form to the time book. The time-cards, representing a distribution of this time, are promptly forwarded to the home station time office and taken to account in the labor accounts of that office. This form permits of a proper supervision over an employe whilst travelling, eliminates the possibility of his time overlapping, and removes the necessity of reporting an employe more than once upon the same set of pay rolls, which is very desirable. All certificates, etc., covering time not recorded on the clocks are numbered in consecutive rotation and entered into the time voucher register before being credited to the employe affected in the time book, after which they are fyled away in numerical order.

From the foregoing the advantages of the mechanical register in the settlement of disputes arising in regard to the allowance or disallowance of time, are, I think, evident. Every employe becomes his own timekeeper; you have his registration upon the clock borne out by his signed declaration on his time-card, and the check of the clock watcher, which is verified by the timekeeper.

As in the case of time registration, there are various methods in vogue of taking up and distributing shop labor to the accounts upon which it is expended. The first method that I experienced was that of time distribution clerks making the rounds of the shops with the time distribution books once per day and taking up the distribution of the time worked the previous day; a page was assigned to each man, the description of the work performed and number of hours, etc., recorded in the column headed up for the purpose. By this method a competent distribution clerk could take up the distribution of, on an average, 250 men. Barring clerical errors and lapses of memory on the part of employes, this method should give a correct distribution of the pay roll, but to draw off the distribution and assemble it to the individual jobs entailed a great deal of clerical work at the close of the month or at any time when it might be required to know the cost of any specific job to date. By a reversal in the headings of the time distribution book, that of assigning a page or pages to the job instead of the man, the distribution clerks' capacity was increased about 100%, and the assembling operation decreased 50%, and the aforementioned difficulty regarding cost of any job to date was largely obviated. Still, these methods were not altogether satisfactory; whenever the question of apparent excessive shop costs came up, the opportunity to excuse the shop management at the expense of the distribution clerks was always open, and in some instances the excuse was probably well founded.

By the time-card system the responsibility cannot be conscientiously shifted. The approval by the foreman of the distribution given by the men upon their time-cards must be considered binding, also the capacity of the distribution clerks is increased so that they can handle the distribution cards of from 1,200 to 1,500 men. I have explained the method of collecting the time-cards from the boxes, how the hours and rates are checked, and how the verification as to the accuracy of the distribution is obtained. Upon the cards being returned to the time office, after receiving the signature of the foreman, they are handed over to the distribution clerks, who compute the value of the distributed hours by the wage rate on the card, transferring the distribution in dollars and cents into distribution sheets to the various jobs. This method removes the necessity of drawing off and assembling the distribution; as a matter of fact, a weekly progress report, or, in other words, a daily or weekly distribution of the pay roll, can be reported inside of 24 hours after the completion of the period, providing, of course, that there are no delays in the handling of the cards to and from the shops. Further, by following out the system in all its details, an absolute distribution can be obtained barring the possible value of cards delayed under investigation or the changing of an employe's rate during a broken period, and of which change the time office has not received the necessary approval. Periodical checks are made upon the distribution clerk's work by tabulating the value of the cards against the sum total of the entries upon the distribution sheet for any given period. At the large plants a check of the men at their work is taken care of by shop constables or watchmen, whilst at the smaller plants where the distribution clerk's time is not entirely occupied with the cards, he makes the rounds of the shops.

It is argued that the system of the workman writing up his own card is more costly than that of the distribution clerk making the rounds of the shops, and that too much time is lost. If time is never lost to a better advantage than in giving a company an accurate accounting for the wages paid, there might be grounds for the contention. From my own personal experience I question very much if any more time is taken up by the men in making up their cards than in giving their time verbally to a timekeeper, and the incidental delays thereto. For instance, in the machine shop it very often necessitates the stopping of a machine; in the blacksmith shop the smith will let his heat cool or fire die down, whilst in the boiler shop it often happens that a whole gang has to be silenced before a timekeeper can get a hearing, and so on. This, coupled with the discussion of various matters of mutual interest, causes a loss of time over which the shop management has little or no control.

The method by which employes doing contract work record themselves on and off duty, and that of reporting the distribution of their time, is the same as if working day work with the additional check of the contract timekeeper. Whilst it is very undesirable that an employe should work both day and contract work, it cannot always be avoided, and to meet this contingency the foreman is required to initial the time-card at the time the change is made from contract to day work, or vice versa.

The foregoing paper was read at a meeting of the Canadian Railway Club recently.

Recent British Columbia Legislation.

The B.C. Legislature at its current session has passed the following acts affecting railways:

Flathead Valley Ry.—Act of incorporation.

Meadow Creek Ry.—Act of incorporation.

South-east Kootenay Ry.—Extending the time for construction.

Victoria and Barclay Sound Ry.—Act of incorporation.

We are advised that the Temiskaming and Northern Ontario Ry. officials, though keeping in touch with the matter of dispatching trains by telephone, have not as yet decided to supersede the telegraph system.

Government Expenditures on Railways.

During the year ended Mar. 31, 1908, the total railway expenditure made by the Department of Railways and Canals was $35,495,196.37; of which $23,684,005.25 was charged to capital, $2,215,895.69 to income, and $9,595,295.43 to revenue. The expenditure on capital included $18,910,449.41 for the National Transcontinental Ry.; the expenditure on income included $2,037,629.30 paid as subsidies to railways other than Government roads, and $123,679.22 for the Board of Railway Commissioners. The expenditure on the Intercolonial Ry. was $13,597,491.55, of which $4,328,494.01 was on capital account, and $9,157,435.53 on revenue account. On the maintenance of the Windsor branch $37,912.11 was expended on revenue account. The expenditure on the Prince Edward Island Ry. aggregated $700,409.62, of which $390,461.83 was charged to capital, and $399,947.79 to revenue. The revenue from the Government railways was $9,534,569.04. The total Government expenditure on railways prior to and since Confederation up to Mar. 31, 1908, on capital account was $185,734,462.04, which includes $25,000,000 granted to the C.P.R. for its main line. In addition there has been expended from the consolidated fund $179,021,681.56, which includes $37,616,131.84 paid as subsidies to railways in addition to the above for the C.P.R., making a total expenditure of $364,756,143.00. Of this amount $13,881,460.55 was expended prior to Confederation on the construction of portions of what is now the Intercolonial Ry. system.

The total revenue derived from Government railways from July 1, 1867, to Mar. 31, 1908, was $128,614,808.72. The gross earnings of the Government railways for the year ended Mar. 31, 1908, was $9,534,569.04; and the working expenses $9,595,295.43, showing a loss of $60,726.39. The I.C.R. working expenses were $9,157,435.53, and earnings $9,173,558.80, showing a profit of $16,123.27. The Windsor branch maintenance expenditure was $37,912.11, and the Government earnings $56,430.41, leaving a profit of $18,518.30. The Prince Edward Island Ry. working expenditure was $399,947.79, and its earnings $304,579.83, the loss being $95,367.96.

The subsidies paid to railways on account of construction during the fiscal year were:

Atlantic and North West Ry.	$ 186,000 00
Atlantic, Quebec and Western Ry.	64,000.00
Canadian Northern Ontario Ry.	244,224.00
Canadian Northern Quebec Ry.	256,870.40

The Intercolonial in Parliament.

The annual statement of the Minister of Railways with regard to the Government railways was made in the House of Commons Mar. 16. He said the I.C.R. gross revenue for the year ended Mar. 31, 1908, was $9,173,558.80, and working expenses $9,157,435.53, leaving a surplus of $16,123.27. The earnings from passenger traffic were $2,711,416.98; from freight, $6,054,493.55; and from mails and express, $407,648.37. The expenditure included the purchase of a considerable quantity of rolling stock, and increases of wages aggregating $205,989. The capital expenditure for the year was $4,382,494.01.

The gross revenue of the Prince Edward Island Ry. was $304,579.83, and working expenses $399,947.79, a deficit of $95,367.96. The earnings from passengers were $132,382.76; from freight, $146,280.99; and from mails and express, $25,916.08. The capital expenditure was $390,461.83, and the expenses included $11,322 on account of increased wages.

The Minister then proceeded to take up the question of cost of operation and argued that the I.C.R. was economically managed, the average cost of operation (wages and material) of the line for 1908 being 1.295, against 1.364, the average rate for all Canada; 1.493 for the C.P.R., 1.480 for the Canadian Northern Ry., and 1.154 for the G.T.R. The cost of the maintenance of rolling stock per mile run shows that while the I.C.R. kept up the standard well, it was not extravagantly run. In regard to maintenance of way and structures, the G.T.R. was the only line in the Dominion which showed less than the I.C.R. In regard to loaded and empty car mileage, the I.C.R. did not show to any disadvantage in comparison with other Canadian railways. In regard to earnings per train mile there was a marked difference, the I.C.R. having a smaller earning power than the other lines. His own opinion was that the railways covering practically the same territory as the I.C.R. had not made a dollar in the last ten years on their lines. The I.C.R. is a detached piece of line, a line covering part of a territory, a line without feeders from the west, simply a long railway feeding itself, though getting what traffic it can from other lines.

After having referred to certain difficulties in the way of the operation of the line, and the different method which had to be pursued in purchasing supplies, owing to the fact that all prices were published in the Auditor-General's report, and that many of them had to be purchased from firms which did not bring any freight to the road, the Minister proceeded to ask the question: What are we going to do with the road? A good deal of discussion, he said, has taken place as to what we are going to do with regard to its management. "My proposition is this: Not to establish a commission. I have studied that a good deal; and if I do not favor that solution, it is not at all because Mr. Borden advocates it. I have gone into the question of the management of Australian railways, and I came to the conclusion that, as a minister of the Crown, with a railway under government supervision and management, two conditions confronted me. In the first place, I was not prepared to admit that the Crown itself, through proper means, could not manage a government railway. In the second place, I did not think the country would be prepared to say that the government ought to divest itself of the responsibility which the people had entrusted to its hands. Having that view, I made up my mind to make this proposition and give it a fair trial. That proposition is to establish a board, not responsible to Parliament—that is, not directly responsible—but responsible to the government of the day, whatever government that may be—responsible to the government through a Minister of the Crown, because after all we may say about commissions, this fact remains that the people will hold whatever government is in power responsible for the management of the I.C.R. so long as it is owned by the government. There is no use in our trying to get away from the inevitable. Any government must retain the responsibility, and any Minister of Railways must accept full responsibility. On that board I propose to retain two of the officials, now on the I.C.R., in very high places. I propose also to allow the Deputy Minister of Railways to act on that board, and I would call it, not a commission, not an advisory board, but a board of management. I propose, as well, to appoint on that board a man, whom I have not selected, from one or the other of the great railways—not an over expensive man, but a man with a good, practical, level head, who would bring with him the knowledge and experience he had acquired on one of the great lines and add these to the knowledge and experience possessed by the officials on our line of railway. This board would have the management of the road and be responsible, as a general manager would be, to the government. My idea was that this board would have to meet my deputy at least every thirty days and give a full and complete report and information of everything done on the line, so that the Minister would know at all times what was going on and what was being done. Would this relieve the Minister of the responsibility? Not of one iota. The Minister must retain all responsibility, but it would relieve him and his deputy of a multitude of details which now come here and which ought never to get beyond the head office at Moncton. We have to-day details coming to the department at Ottawa which never go to the president of a railway company, which never get by the general manager, and three-fourths of which never get to the general manager. But a condition has grown up on the government-owned railway for which nobody is to blame; and little details, instead of being settled on the spot by men detailed and paid for that purpose, keep filtering through by some means to the head office and to the Minister, until our department is at present flooded by these matters, which ought never to reach it. This board would be given power to settle these minor affairs without reference to the department at all. This would be a good thing for the railway, it would be a good thing for the men, and a great relief to the department."

Temiskaming and Northern Ontario Ry.

The report of the operations of the T. and N.O.R. for the year 1908 has been presented to the Ontario Legislature. The mileage operated during the year averaged 191. The total revenue was $973,065.61, made up as follows: From freight, $471,203.41; from passengers, $366,504.53; from other freight and passenger train revenue, $45,501.06; from telegraph and telephone services, $27,950.22; from miscellaneous revenue, $61,906.39. The operating expenses were $688,397.43, or 70.8%. The distribution of the operating expenses was as follows: Maintenance of way and structures, $125,563.45; maintenance of equipment, $119,565.01; traffic expenses, $12,499.96; transportation expenses, $405,907.58; general expenses, $24,863.45. The net earnings were $284,668.18, and the revenue from ore royalties, $134,820.27, a total of $419,486.45. The Commissioners paid the Treasurer of Ontario $350,000, the balance of $69,488.45 being carried to profit and loss account. The cost of road and equipment to Dec. 31 was $13,441,704.89, the cost of the 191 miles operated being $9,651,751.43, or $50,532.73 per mile. The interest on the cost of this mileage at 3.8% was $366,866.55.

The operating statistics show: Passengers carried earning revenue, 479,005; passengers carried one mile, 15,252,710; passengers carried one mile per mile of road, 79,857; freight carried earning revenue, 484,444 tons; freight carried one mile, 34,279,838 tons; freight carried one mile per mile of road, 179,475 tons; average distance each passenger carried, 32.05 miles; average distance haul of one ton of freight, 70.7 miles. Passenger earnings per mile of road, 2.43 cents; freight earnings per mile of road, 1.37 cents; gross earnings per mile of road, $5,094.58; gross expenses per mile of road, $3,604.17; net earnings per mile of road, $1,490.41.

Chateau Frontenac Extension.

The C.P.R. has in course of construction a wing to the Chateau Frontenac, Quebec, which carries out the architectural design of the original building, and with it will form one harmonious whole. Owing to the fact that the site of the new wing is not level, it has been found necessary to build the additions considerably higher than the original building, and the work of grouping the new, so that it would be strictly in accord with the old, was one of exceptional difficulty. To ensure a uniformity of material and coloring between the two parts, it was decided to use the same materials for the exterior of the additions as had been used in the original building—Terrebonne stone and Scotch fire-brick. To provide a sufficient area for the additions it was found necessary to construct arches over two highways, in order to connect the new erection with the original work.

The new building is 155 by 55 ft., and the tower, which is at the end furthest from the old building, has a height of 175 ft. from grade. The main part of the building has nine floors and the tower extends four storeys higher. The construction throughout is of reinforced concrete. With the exception of the attic floors, which, like the roof, are of solid concrete slab construction, the floor system in general is a combination of concrete and hollow tile; this method giving flat ceilings of large span. The columns along the corridors in the lower stories of the main portion of the building are of structural steel, to economize space. These columns are fireproofed with concrete, the outside diameter of the finished columns being 18 inches. The structural steel columns do not extend above the sixth storey, while all other columns are hooped concrete. In the lower portion of the building, which is 55 ft. higher than the main part, the concrete columns start at the footings, where they have a diameter of 34 inches. The concrete skeleton is enclosed with brick and stone masonry, these walls being carried on reinforced concrete beams at each storey, these beams framing generally into wall columns and in some cases into cantilever brackets. In order to economize all the space within the enclosure, two living floors, besides an attic floor, are taken care of in the roof portion of the main addition. In the tower roof there are four floors, one for water tanks and one for general storage. The roof of the main building has a pitch of 60 degrees, and the tower roof a pitch of 75 degrees. They are of concrete slabs and will be finished off with copper in conformity with the roof of the original building. The stairs throughout the building are of cast iron and steel, and are covered with marble. In connection with the heating apparatus it was found necessary to construct a smoke flue underground for a distance of 100 ft. to the end of the building, where the chimney stack is. The plumbing is of the most modern type, the pipes being laid in specially built flues, to which access can be readily had to effect repairs.

ASTORIA LIGHT, HEAT & POWER CO., ASTORIA, N.Y. SHOWING BRIDGE TRAMWAY.

THE BROWN HOISTING MACHINERY CO.

Engineers, designers and builders of hoisting machinery of all descriptions.

Main Office and Works:

CLEVELAND, OHIO

Branch Offices:

PITTSBURG AND NEW YORK

Victoria Rolling Stock Co. of Ontario.

The directors' report for the year ended Feb. 15 states that during the year the company has not issued any new debentures, and outstanding debentures against leases were reduced by $282,000. All payments maturing during the year were promptly met.

The directors wrote off the balance at debit of discount and commission account in connection with Series S lease, $16,000. The profit on the year's business, after charging up directors' fees, expense account and $16,000 for discount and commission on debentures sold, is $18,280.42; out of which a dividend of 12% for the year on the paid-up capital stock, amounting to $14,400, was paid, leaving $3,880.42 carried forward to profit and loss account, which now stands at $121,599.01.

ASSETS.

Obligations on leases	$1,725,441.06
Debentures held by company and accrued interest	168,451.39
Cash in bank	36,169.89
Call loans	100,000.00
	$2,030,062.34

LIABILITIES.

Capital stock subscribed.. $600,000.00	
Capital stock paid up	$ 120,000.00
Debentures outstanding	1,772,000.00
Interest accrued on same	16,463.33
Balance at credit of profit and loss	121,599.01
	$2,030,062.34

PROFIT AND LOSS ACCOUNT.

Interest paid and accrued on debentures	$ 78,541.14
Discount and commission on debentures sold, Series S	16,000.00
Expense account	972.82
Directors' fees last year	1,300.00
Dividend account	14,400.00
Balance carried forward	121,599.01
	$ 232,812.97
Balance at credit profit and loss, Feb. 15, 1908	$ 117,718.59
Rents received and accrued on leases, and interest on advances and debentures held by company	115,094.38
	$ 232,812.97

MEMORANDUM RE ROLLING STOCK.

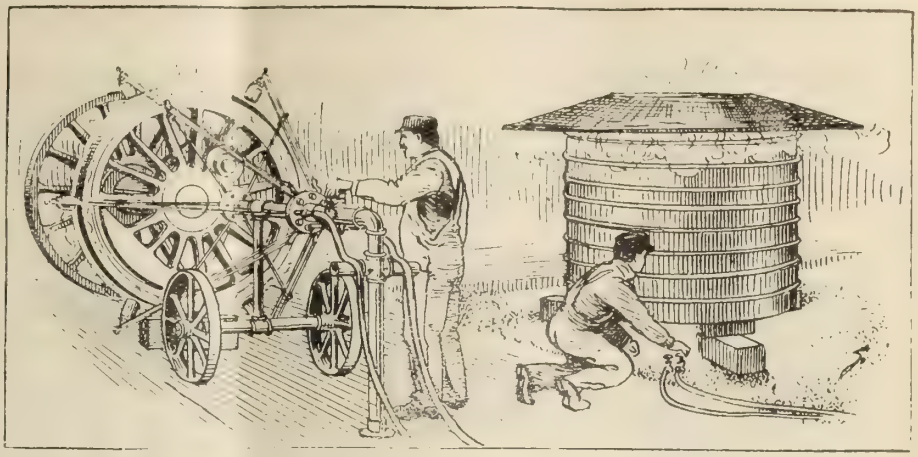
Original cost of rolling stock held under existing leases	$4,439,802.53
Amount paid in on account by railway companies in addition to interest	2,668,108.88
	$1,771,693.65
Total amount of the company's debentures outstanding	$1,772,000.00

The officers and directors for the current year are: President, E. B. Osler, M.P.; Vice-President, W. D. Matthews; Managing Director, R. A. Smith; other directors, D. Coulson, Hon. J. S. Hendrie, H. Pellatt, D. R. Wilkie; Secretary, G. T. Chisholm.

Railway Taxation in Ontario.

The Ontario Government collected from railways operating in the province taxes amounting to $400,902.71 during the year ended Dec. 31, 1908. Following are details:

Algoma Central and Hudson Bay Ry	$ 1,365.00
Brockville, Westport and N.W. Ry	675.00
" " " for 1907	675.00
Bay of Quinte Ry	1,405.12
Canada Atlantic Ry	20,666.08
Canadian Pacific Ry	136,945.98
Canadian Northern Ry	14,140.00
Canada Southern Ry	27,791.00
Central Ontario Ry	2,233.50
Grand Trunk Ry	168,638.80
James Bay Ry	8,808.00
Kingston and Pembroke Ry	1,546.50
Lake Erie and Detroit River Ry	13,348.20
Manitoulin and North Shore Ry	137.78
Niagara, St. Catharines and Toronto Ry	289.70
Nosbonsing and Nipissing Ry	55.00
Ottawa and New York Ry	853.50
Thousand Islands Ry	63.30
Toronto, Hamilton and Buffalo Ry	1,265.25



Crude Oil Tire Heaters For Railway Shops.

The Lehigh Valley Rd. has recently introduced crude oil tire heaters at its shops at Sayre, Pa., which have been found far superior to the former method of using gasolene and perforated rings for the application and removal of tires.

The heater for removing tires consists of six oil burners mounted on an adjustable frame, being able to adjust the burners to any desired diameter. The frame consists of an arrangement of wrought-iron pipe mounted on a pair of wheels. On the main part of the frame a combination air and oil chamber is arranged to slide forward and back, and, in conjunction with a six-point star, the various adjustments of the burners are produced. On the front side of the supply chamber six ball-joint connections are made to the oil supply, also six connections are made to connect the air supply with the burners and piping arranged to connect the burners with the supply chamber.

When using gasolene for removing tires two men would use from 20 to 50 minutes in removing a tire, while with this heater from 7 to 11 minutes are required. While the old tires are being removed new ones are piled up on three cast-iron blocks and a large crude oil burner is placed underneath, the burner having the capacity to fill the inside of eight tires with flame and heat them for application in 20 minutes. Inasmuch as both heaters are comparatively smokeless, there is perfect satisfaction. During a test, six old tires were removed and six new tires were applied in 1 hour and 52 minutes.

G.T. Pacific Ry. Gradients.

A. J. Anderson writes us from Winnipeg: "In your Feb. issue you copied an interview some New York paper had with C. M. Hays, President G.T.P.R., in which he tabulated a statement or comparison with five other railways of their maximum gradients and gross capacity of locomotives in tons. You published a foot-note showing the statement was not fair to the C.P.R., as the new cut-off being built between Field and Hector, B.C., will place the C.P.R. in the same position as the G.N.R., N.P.R. and U.P.R., as to gross capacity of engines in tons. Mr. Hays' statement in a very important point is not correct. He says the maximum gradient between Prince Rupert and Winnipeg (going east) is 21 ft. to the mile. This is certainly an error, because descending from the Yellow Head Pass westerly, they have a continuous 1% gradient for 20 miles, and some shorter stretches before Tete Jaune Cache is reached. This, of course, will be a pusher grade, but, just the same, in his tabulated statement, if correctly put, it would show the G.T.P. gross capacity of locomotives in tons 1,020 instead of 2,041, as published. Enquiries in the proper quarter, the Department of Railways, Ottawa, will show you this is correct."

On receipt of the above letter, we communicated its contents to Mr. Hays, who has written us as follows: "While it is a fact that we have a 1% gradient for a distance of 20 miles easterly from Tete Jaune Cache, this is but a temporary gradient, and will only be in existence until such time as the traffic available will justify the additional expenditure of reducing it to our maximum of 4/10 of 1%. This 20 miles, however, does not constitute a serious break in the ruling conditions, as, owing to the shortness of the distance, that particular division must always be operated as a 0.4% gradient, entailing only the additional expense of an additional engine for 20 miles, until such time as the expense of the additional engine service would equal the interest on the additional cost of eliminating this stretch of 1% gradient, a survey for which is already made. Your correspondent is also in error in stating that there are other short stretches of 1% gradient; there is not a foot of gradient more than 0.4% on the line outside of this 20 miles of temporary gradient."

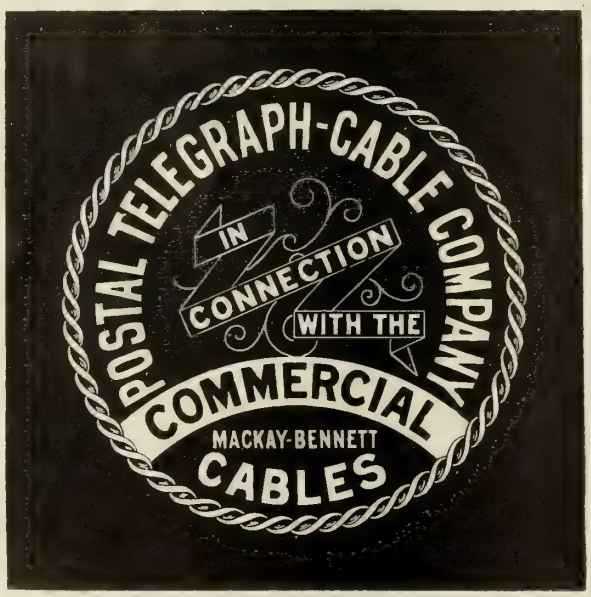
Automatic Signalling on Railways.—The Board of Railway Commissioners' Secretary has issued the following circular to railway companies: "For some time past the destruction of life and property resulting from accidents caused by main line switches being left open, has been so great that the Board is of the opinion that some action must be taken to secure better protection of trains against danger from this cause. The Board has been informed that it is possible to install, at moderate cost, an electro-mechanical device which would indicate by a signal suitable for both day and night use, that a main line switch was open; the said device to be connected with the switch-lever and act so that the opening of the switch would automatically give the danger signal. Such a device being installed, a rule could be issued prohibiting engineers from passing such a signal at danger, and requiring them to call for the closing of the switch before proceeding further towards the yard or siding. The Board will be pleased to have from your company, as soon as possible, an expression of opinion as to what it regards as proper and practicable in the premises."

The Cuban Government has signed a contract with the Cuba Ry. for the construction of a railway from Marti to Manzanillo, by way of Bayamon. The contract carries a subsidy of $6,000 a kilometre.

ENAMELED IRON TELEGRAPH SIGNS.

The only signs that are absolutely impervious to the weather.

No. 1.—Double, 19 x 13 ins., including flange, white letters on blue ground.



No. 2.—Single, 30 x 30 ins., white letters on blue ground.

No. 3.—Double, 21½ x 10 ins., including flange, white letters on blue ground.

No. 4.—Double, 22 x 8 ins., including flange, white letters on blue ground.

No. 5.—Single, 24 x 12 ins., white letters on blue ground.

Enameled Iron Signs can be made in any shape, size or colors. Blue and white make the most striking contrast.

Prices and further particulars supplied on application.

Acton Burrows Limited, 157 Bay Street, Toronto.

STEAM RAILWAY STATISTICS FOR YEAR ENDED JUNE 30, 1908.

The table given in our last issue showed the financial results of the operations of steam railways for the year ended June 30, 1908. The following table gives the percentages and the principal statistical information compiled by the companies. The table published last issue and the one given below contain all the information given in our compilation of these statistics published last year, but the columns have been rearranged so as to combine in the first table the financial and in the second the statistical information.

Name of Railway	Proportion of Earnings to working expenses	Revenue Train Mileage	Mileage of Non-Revenue Trains	Earnings per Train Mile	Operating Expenses per Train Mile	Passengers Carried	Passengers Carried one Mile	Passenger Earnings per Train Mile	Tons of Freight Carried	Tons of Freight Carried one Mile	Freight Earnings per Train Mile
Alberta Ry. & Irrigation Co.	87	70,950	5,011	$2.87	$2.50	32,374	1,393,388	$0.94	96,183	4,356,277	$1.89

Inverness Railway and Coal Co.

Following are extracts from the annual report for the year ended June 30, 1908: "In the face of prevailing conditions, your Board considers the result fairly satisfactory. The total output for the year is the largest in the company's history, totalling 282,639 tons, an increase of 23,914 over the preceding year. Your colliery and railway departments each show substantial increases in gross as well as net earnings. The gross earnings of your colliery were $509,336.82, an increase of $87,-531.21, while your railway earned $210,112.94, an increase of $24,726.20 compared with the preceding year. With a materially reduced deficit in the operation of the boats under charter, the net figures from operation show encouraging increases, amounting to $133,-268.34, an improvement of $87,359.15 over the previous year.

"The report of the company's General Manager, Mr. W. D. Barclay, dated July 15, 1908, herewith submitted, shows in detail the progress made in the development of the company's properties during the past fiscal year. Your directors believe that the output your mines are capable of producing with the plant available is estimated at a minimum amount by Mr. Barclay. Your directors are pleased to report, from recent advices received from your mines, that the new angle slope has been completed to the seventh level, and the first coal was hoisted on this slope on Feb. 15; that the coal, on analysis, is of better quality than that produced from the old workings; all of which indicates satisfactory working conditions during the balance of the current fiscal year, having in view the fact that a large proportion of the output during the coming season will be taken from the new slope.

"The issue of prior lien bonds, of which mention was made in your directors' last report, has not been consummated, other financial arrangements having been concluded to temporarily take care of the capital expenditure then proposed. Your directors have set aside, as a contingency account, out of the net profits for the past year, $30,000, to meet any losses unprovided for in the nature of bad and doubtful debts."

General Manager Barclay reports on the colliery at length, and says that with the completion of the 13-ft. seam tunnel and the new angle slope, the output should reach between 30,000 and 35,000 tons a month. In regard to the railway he says: "The purchase of 50 hopper coal cars this year has helped out the operation of the railway considerably. We have now sufficient rolling stock to take care of any increased output we will get next year. The balance of the rolling stock has been maintained in good condition. There has been considerable improvement made to the track this season, without any appreciable extra expense. It is now in good condition. The pier at Port Hastings is in good order."

The annual meeting was held in Toronto Mar. 12. Following are the directors for the current year: President, Wm. Mackenzie; Vice-President, D. D. Mann; other directors, Z. A. Lash, D. B. Hanna, L. Lukes, E. Bristol, Toronto; R. M. Horne-Payne, London, Eng.

The Secretary of the Board of Railway Commissioners has issued a circular stating that railway companies subject to its jurisdiction which have not complied with the provisions of the Board's orders 3238, July 3, 1907, and 4685, May 5, 1908, relative to placing fire extinguishers in passenger cars, will be required to show cause, at the sittings of the Board in Ottawa on May 4, why proceedings should not be taken against them by the Board for non-compliance with its orders.

During February 22 railway employes were killed and 17 injured in the course of their work on Canadian railways. Of the fatalities, 10 were due to explosions of dynamite; 3 each to collisions, to being run over and to falling material; 2 by falls and one to being caught between cars. Of the other accidents, 4 were due to being caught between cars; 3 each to derailments and to explosions of steam; 2 each to falls, to falling material and to being run over, and one to a collision.

300,000 CARS IN THE STATES

DOUBLE HANDLE CALLED FOR "Where a coupler couples by impact, but cannot be uncoupled unless the brakeman or switchman goes between, or over, or under the cars or around the end of the train, IN ORDER TO REACH THE APPLIANCE ON THE CONNECTING CAR, such a coupling is DEFECTIVE AND PROHIBITED BY LAW."—*Judge McPherson, Des Moines, Iowa.*

THE ELECTRIC HEADLIGHT

The following letter was received under date of May 8, 1908, from Mr. J. W. Cleary, Travelling Engineer Pyle-National Electric Headlight Co.:

"I learn from_____the Master Mechanic here, that an engineer running between_____ and_____discovered a broken rail with the Pyle-National Electric Headlight and made the stop without ditching his train. One or two pairs of wheels got off, but that was a small affair to what it would have been where a foot of the rail was broken off. Also an engineer running east of here found some cars shoved out on the main line. He saw them with the 'Electric' and made the stop without hitting them."

PYLE-NATIONAL ELECTRIC HEADLIGHT CO.

MONADNOCK, CHICAGO

Kenora Railway Y. M. C. A.

The Railway Y.M.C.A. building at Kenora, Ont., which has been erected by the C.P.R., and furnished by the company's employes and by citizens, was opened recently, J. J. Scully, the company's local Superintendent, presiding. W. Whyte, Second Vice-President C.P.R., in turning the building over to the Y.M.C.A. management, said;

"I assure you it is a very great pleasure for me to be here this evening at the formal opening of this handsome, commodious and well-laid-out building, and I sincerely trust that the objects sought to be obtained through the medium of this building by the Y.M.C.A., the C.P.R., and all others who are interested in the welfare of men, may realized. The aim and object of the Y.M.C.A. is to do good to mankind by providing the members of the Association with means for clean, healthy amusements, recreations and with athletic games and exercises, believing that after the body has been got into a clean and healthy condition, the mind will then be in a better condition to receive and digest secular, moral and spiritual food. The Y.M.C.A. has demonstrated, to my mind, at all events, that they are a great power and influence for the uplifting of humanity, and railway companies and other corporations who employ large numbers of men, have realized that it is a good investment to subscribe towards the building, operating and maintenance of edifices for the Y.M.C.A., and it is my earnest hope that this institution may be productive of much benefit to its members by making better citizens of them, and thereby benefitting the community in which they live, and giving to their employers better and safer men.

"A railway club was recently inaugurated in Winnipeg, and at its first regular meeting I was asked to deliver a short address to its members. I spoke a few words on that occasion on what I consider the essentials that lead to success, and as this audience is largely composed of railway employes and young men, it might not be out of place to repeat some of the remarks I made on that occasion. I have spent the whole of my life in the railway service, starting when in my teens and beginning at or very close to the lowest rung of the railway ladder, and I have filled a number of different positions in the railway, therefore, my remarks are based upon actual experience. The railway service, to my mind, is one, if not the most, important of all businesses. In fact, it is becoming, if it has not already become, a profession, by reason of the high qualifications which are necessary to fill any position of importance. It is also exacting by reason of the attention and application necessary to meet the requirements of well-managed, up-to-date systems. Therefore, application is one of the essentials. The man who is a plodder, even though he may not be gifted with the ability that some of his fellow-employes possess but who are lacking in application, will succeed when the others fail. Reliability is another important essential. The man of clean habits, who can be depended upon at all times, will not pass unnoticed. Education, I place behind application and reliability, not because I do not believe in higher education, but that is not an absolute necessity to success. The young man starting out in life with clean habits, a fair education and who will apply himself wholeheartedly to what he is given to do is bound to succeed. I know of no power or influence to keep him back. That young man will also find the time to improve his mind, because he will realize that in order to reach the higher and the highest positions it will be necessary for him to improve his mind. I have said that the railway service is exacting, and the officers of the company who are here will agree with me that the nature of the work has to be most accurate. This remark has special reference to the issuing, handling and executing of train orders, because human life and valuable property are at stake. At the same time, the field for advancement is larger and more open than in, I believe, any other commercial pursuit. I have endeavored to point out the necessity of clean habits, and I would like to still further emphasize this point by stating that day by day civilization is demanding more of each one of us. No man of bad habits can do good work—every one's work speaks for or against him—no man with bad habits can do much work of any kind, or any work of a good kind—look at a man's work if you would know his habits—a man's habits are known by the work he does. If you desire to keep your habits clean, carefully watch the beginning of bad habits, for a bad habit has a velvet foot. It steals upon one softly unawares——first it charms—next masters—then destroys you. In the moral philosophy one studies at college, this illustration is given, 'Neglect your conscience for only two weeks and it begins to disappear; obey its faintest whisper for two weeks and it becomes as delicate as a woman's blush.'

"I thank you for the kind attention you have given my remarks, and before resuming my seat I wish to say that I sincerely trust that the management of this institution will at no time weary in well-doing, but will continue from the evidences of the good results to carry on the good work with renewed energy and interest.

"A previous speaker has pointed out the harm carping criticism may do the institution by any of its members who have a cause for complaint talking it aloud on the street corners to all and sundry. He should make known his complaint to the Secretary or the executive and lay the case clearly before them, and if there is a good ground for complaint I feel certain the management will remove it. No matter how much may be spent on the architectural effect of a building, or the facilities for comfort and amusement, if the management is not of the proper kind it will not be a success. Therefore, the success of this institution depends almost entirely upon the management of it. I take great pleasure in turning this building over to the Y.M.C.A."

The building, which is 45x120 ft., is of white brick and stone. There is a basement and three floors. The building is well constructed and splendidly finished, being of the best. The building and furnishings cost upwards of $40,000. On the main floor on entering is the lobby which is very spacious and is provided with a large fireplace. It is used as a smoking and lounging room and in one corner is located the Secretary's office. About one-third of the main floor is taken up with a large social and game room, and a reading room where are found a piano, checkers, chess and dominoes, also being provided. The reading room is thoroughly furnished with the best in the line of daily and weekly papers and monthly periodicals, including the Railway and Marine World, special attention being given to the needs of the employes. At the other end of the main floor is a dining room with a seating capacity of 50. It is kept open day and night, meals being served at the lowest possible rates. Bowling alleys and pool tables are located in the basement, and are very popular with the members. Shower baths and lavatories occupy one corner of the basement with an abundance of hot water, where the men enjoy cleaning up. The two top floors are entirely devoted to dormitories, which, when fully completed, will accommodate 65 men. When this was written (April 5) one floor only was completed. It accommodated 32. Lavatories and bathrooms are also provided on the sleeping floors. The building is heated with steam and brilliantly lighted with electricity.

RAILWAY Y.M.C.A. BUILDING, KENORA, ONT.

Within one week after the opening of the building 250 applications were received for membership, which indicates the appreciation on the part of the men of the comforts and conveniences so amply provided.

It is reported that Russian laborers are being taken to Prince Rupert, B.C., to work on G.T.P. Ry. construction.

The C.P.R. placed a special train at the disposal of the Canadian Press Association, for a trip from Toronto to Peterboro recently. At the conclusion of the trip the newspaper men gave G. H. Ham, of the C.P.R. head office staff, a case of cutlery; R. L. Thompson, District Pasenger Agent, and D. Carmichael, Assistant Superintendent, cut glass berry bowls.

An order-in-Council has been passed bringing into operation on the Intercolonial and the Prince Edward Island Rys. new regulations for the transportation of explosives and inflammable articles. The new rules are the same as are in force on the G.T.R. and C.P.R. and are in accordance with the rules adopted by U.S. lines, and approved by the Inter-State Commerce Commission.

Railway Commissioners' Traffic Orders.

6612 and 6613. Feb. 23.—In the matter of the complaint of J. A. Meddaugh, of Vancouver, B.C., respecting the Vancouver, Westminster & Yukon Ry's rates on lumber from B.C. to Manitoba, and of the complaint of the B.C. Mills, Lumber & Trading Co., of Burnaby, B.C., alleging excessive rates charged by the V.W. & Y.R. from Vancouver to Burnaby, B. C. Upon hearing the applications and what was alleged on behalf of the applicants as well as the railway company, and the parties agreeing, as appears by a memorandum attached to the file, it is ordered that the Great Northern Ry. Co., operating the Vancouver, Westminster & Yukon Ry., shall forthwith file and publish rates on lumber, shingles, and articles taking the same rates via New Westminster or Vancouver in connection with the C.P.R. Co., as follows: From points on the Vancouver, Victoria & Eastern Ry. & Navigation Co.'s line between Vancouver and New Westminster, not inclusive, to points on the C.P.R. west of Winnipeg, except such points as may be routed direct by the G.N.R. Co. and its connections; rates based upon 1c per 100 lbs. higher than rates maintained from Vancouver by the C.P.R. Co.; the Vancouver, Victoria & Eastern Ry. & Navigation Co. to be allowed 2 1-2c per 100 lbs.

SLEEPING AND PARLOR CAR TARIFFS.

6689. Mar. 29.—Whereas, by order 6196, dated Feb. 9, 1909, the Board prescribed a uniform size and numbering of sleeping and parlor car tariffs; and it appears that the tariffs already filed with the Board do not in all cases comply with the provisions of the order and with the requirements of secs. 330 and 331 of the Railway Act; It is ordered that every railway company subject to the legislative authority of the Parliament of Canada file for the approval of the Board a tariff of additional maximum tolls, no greater than tolls now being charged, to be charged for the carriage of passengers in sleeping or parlor cars on its railway, to be entitled "Standard Tariff of Maximum Sleeping and Parlor Car Tolls," and numbered C.R.C. No. S.1. That the said tariff specify the standard maximum tolls to be charged for each seat, berth, section, compartment, and drawing-room for all distances covered by the company's railway; but that such distances may be expressed in blocks or groups, which may include relatively greater distances for the longer than for the shorter hauls. That the said standard tariffs, if and when approved by the Board, be published in The Canada Gazette, in the manner prescribed for standard passenger tariffs in sec. 331 of the Railway Act. That special tariffs of sleeping and parlor car tolls may be published and filed in the manner prescribed for special passenger tariffs in secs. 330, 331, 332 and 339 of the Railway Act. That under sec. 338 of the Railway Act, the filing and publication of joint tariffs of sleeping and parlor car tolls by foreign railway companies not operating in Canada, be, and they are hereby, excepted. That the said standard tariffs of sleeping and parlor car tolls be filed for the approval of the Board not later than June, 1909.

PAYMENT FOR COAL CAR DOORS.

6701. Feb. 19.—In the matter of the complaint of J. J. Denman and others of the Province of Alberta, complaining of unjust treatment accorded to them by the Canadian Northern and the C.P.R. Co's. in compelling complainants to furnish doors or boards for interior of doorways of cars supplied to them for shipments of coal: Upon hearing the complaint in the presence of counsel for the complainants and the railway companies; and upon hearing what was alleged by counsel aforesaid, it is ordered that where shippers upon all or any railways subject to the jurisdiction of the Parliament of Canada, are compelled to furnish car doors to enable cars to be used for traffic, allowance be made upon the following basis: (1) Lower car door, $1; (2) Upper car door, 50c, and adjustment upon the above basis shall be made by the agent at or nearest to the point of shipment by (a), at the time of shipment, payment to the shipper of the account out of funds of the railway company of which he is agent, in his hands; or (b) the shipper may deduct from the freight charges (if any) payable by him upon the shipment in such car, for which the said door or doors were so supplied, the amount of such bill upon the foregoing basis, receipting the same, and turning the account into the agent as so much cash.

RATES ON TELEGRAPH, TELEPHONE AND TROLLEY POLES.

6702. Mar. 25.—In the matter of the complaint of J. McKenzie of Ormsby, J. A. Scobell of Kingston, the Rideau Lumber Co. of Ottawa, and others, complaining that the freight rates charged by railway companies on telegraph, telephone, and trolley poles are unjustly discriminatory with respect to the rates charged on lumber and other forest products, the Board's Chief Traffic Officer made the following report;—

"Prior to the issue of order of July 30, 1904, Scobell vs. Kingston & Pembroke Ry. Co., telegraph poles were not rated in the Canadian Freight Classification, but were specified for carriage by special contract only. By that order wooden telegraph, telephone, and trolley poles were added to the list of commodities which are included in the Canadian Classification under the heading of 'lumber.' The classification now reads as follows:—

	L.C.L.	C.L.
Logs, masts, piles, spars, telegraph, telephone and trolley poles, timber and traverses	4	10

"Under the classification, the minimum carload weight for 10th class traffic is 30,000 lbs. per car of not over 36½ ft. inside or platform length, and that is the minimum charged for short poles on single cars; on long poles rule 1 (c) provides that long poles requiring two or more cars for carriage are charged the 10th class minimum of 30,000 lbs. for the first car, and two-thirds of the classification minimum, or 20,000 lbs., for each additional car over which the poles extend. That order did not mean that the companies were to charge 10th class rates and none other on poles, any more than on lumber and other forest products which are generally carried at commodity rates; the intention was to abolish the special contract privilege as tending to variation and discrimination. Whether or not, as a result of that order, taken in connection with the remark of the Chief Commissioner in the judgment that the second ground of complaint that the rates upon telegraph poles were excessive in that they were higher than the rates on ordinary lumber, the Board was not satisfied that this matter of complaint had been fully and sufficiently argued, the companies, in the following November, issued new tariffs on forest products, in which the ordinary 10th class rates, under the Canadian Classification, were substituted for the special mileage scale which had previously been in force. That old mileage scale, applicable, by the way, between the stations of one company only, made the rates on telegraph, telephone, and trolley poles 20 per cent. higher than the rates on common lumber; also, under that scale, the minimum weights for long poles requiring two or more cars were 30,000 lbs. on the first car, or the same as for single cars, and 20,000 lbs. for each additional car, so that the carload minimum weights then were practically the same as they are now.

"It was stated at the hearing, by Superintendent Donaldson of the G.T.R. that on his division (the old Canada Atlantic and O.A. & P.S.) the pole shipments numbered probably 1,500 cars a year, and that about 85 per cent. were short poles carried on single cars. It also appeared from the evidence that the risks of transportation which the companies considered entitled them to higher rates on poles than on lumber pertained to the long poles rather than to the short ones. These risks, however, seem to be attributable very largely to the lack of inspection and the non-observance of the M.C.B. Association rules governing the loading of lumber, logs, poles, etc., on open cars, No. 30 of which reads as follows:—

"'All material carried on two or three cars must always be examined by a competent inspector before the cars are moved from the loading point. If an inspector is not stationed at the loading point, the agent must give notice to the proper authority when the cars are loaded, so that proper inspection may be arranged for. The object of such inspection is to see that these regulations have been complied with.'

"The M.C.B. rules give detailed instructions as to the loading of logs, poles, etc., the size of stakes, tie wires, etc., and are accompanied by explanatory diagrams, and if these rules are strictly complied with, there would seem to be no reason why telegraph poles, under ordinary conditions, should not be safely carried. Similar risks are incurred with respect to improperly staked lumber, and the evidence seemed to me to prove that the difficulties complained of should be preventable by rigid inspection rather than by the imposition of higher rates. Whether the rate be low or high, the risk exists—possibly the higher the rate the greater the risk, as shippers would probably be inclined to greater carelessness on the theory that they were paying the companies well for any extra duties thrown upon them. It was also stated, as a reason for the higher rates, that empty cars had often to be hauled considerable distances for loads, whereas box cars may be immediately available for lumber shipments; but this same empty movement of flat cars is frequently necessary in the case of lumber and machinery shipments, racked cars for bark, flats for logs or square timber, etc.

"As regards the practice elsewhere; the C.P.R. carries both long and short poles on its main and branch lines in British Columbia, at the same rates as charged for lumber, but the minimum carload weights are not so favorable as in the east. These minimums are somewhat variable, but in most cases the long poles are carried at a minimum of 30,000 lbs. for each car used. It is true that the rates in B.C. are greater than in eastern Canada, but so also is the cost

of haulage. As the companies do not file their local tariffs with this Commission, I have not the means of knowing what the local rates of the companies operating in the United States may be, except in the case of the Michigan Central, whose local commodity tariff on lumber and forest products, G.F.D. No. 7576, effective July 7, 1908, I have before me. This tariff applies between all stations on the Mackinaw Division and branches north of Bay City, Mich., and it applies on telegraph and telephone poles, as well as on lumber and the other forest products which are usually carried at lumber rates. The minimum weight is in accordance with the Official Classification, which provides a minimum of 34,000 lbs. for single cars, and only 50 per cent. or 17,000 lbs. for each additional car. The rates also are lower than charged by the same company between its stations in Canada, and by the other Canadian companies. I have examined a number of joint tariffs on forest products between two or more companies within the U.S., and these cover telegraph poles also.

"In my opinion, taking into consideration the fact that lumber rates are applied on short timber, logs, ties, fence posts, and the like; the evidence and the practice elsewhere; the rates charged on short poles in eastern Canada are unjustly discriminatory with respect to the rates charged on other forest products loaded on single cars, and that the companies in eastern Canada should be required to carry wooden telegraph, telephone, electric light, and trolley poles, on single cars, at the same local and joint rates as lumber, when not subject to uncontrollable competition; or, in the words of the Board's order in the case of Gillies Bros. and the Rideau Lumber Co., dated Aug. 1, 1906, that the tolls 'shall not be higher than the tolls provided in the special (local and joint) tariffs of the companies to apply on common lumber; except that it shall not be obligatory on the companies to charge thereon such tolls as may be made necessary by the competition of carriers not subject to The Railway Act when such competitive tolls are lower than the lowest special tariff of tolls between the same points on common lumber issued under ordinary transportation and trade conditions.' I think also that the phraseology of that order should apply with respect to shipments of poles from points in Canada to points in the U.S. between which joint rail rates on general traffic are, or may be, made by the Canadian railway companies with the concurrence of their U.S. connections.

"As regards poles too long for a single car and requiring more than one car for their carriage, I believe the companies are reasonably entitled to higher rates than for single cars, and I would recommend that the scale used by the companies themselves prior to Nov., 1904, be prescribed, namely 20 per cent. higher than for single cars, the minimum weights to be in accordance with rule 1 (c) of the Canadian Classification, and in the computation of the additional rate the fractions to be disposed of as follows, namely:—.25 and under, nil; .26 to .75 equal ½c.; .76 and over equal 1c.; the rates in no case to exceed the 10th class rates between the same points."

In commenting on the above the Chief Commissioner said:—"The impression I formed at the hearing was that, although there was some extra risk in the carriage of poles, yet that no reason existed why they could not be safely loaded if proper care were exercised. I think an order should issue embodying the recommendations of the Chief Traffic Officer."

The order was therefore made as follows:—

1. That the tolls and minimum carload weight charged by railway companies subject to the legislative authority of the parliament of Canada and operating lines of railway in Canada east of Port Arthur, Ont., on wooden telegraph, telephone, electric light, and trolley poles loaded on single cars, be not greater than the tolls and minimum carload weight provided in the special (local and joint) tariffs of the companies to apply on common lumber; except that it shall not be obligatory on the companies to charge thereon such tolls as may be made necessary by the competition of carriers not subject to the Railway Act, when such competitive tolls are lower than the lowest special tariff of tolls between the same points on common lumber issued under ordinary transportation and trade conditions.

2. That, with respect to poles too long for a single car and requiring more than one car for their carriage, the said companies be authorized to charge not more than 20 per cent. higher than for single cars and not more than the 10th class rates; the minimum weight for the first car to be the same as herein prescribed for single cars, and for each additional car over which the load extends two-thirds of the single car minimum, the longest car in the series to be considered the first car.

3. That in the computation of the additional rate on long poles, the fractions be disposed of as follows, namely; .25 and under, nil; .26 to .75 equal ½ cent; .76 and over equal 1 cent.

4. That the provisions of this order apply also to shipments of poles from points in Canada to points in the United States, between which joint rail rates for general traffic are, or may be, made by the Canadian railway companies with the concurrence of their U.S. connections; the minimum weights to be in accordance with rule 7 of the "Official" Classification, or as it may be modified by the joint tariffs, if any, on lumber between the same points, and the 6th class rates to be the maxima.

The Board has signified its desire that the provisions of the order be made effective on traffic between points in Canada not later than May 1, and on traffic to the U.S. not later than June 1, and that tariffs be so amended.

COAL RATES FROM BIENFAIT, SASK.

6749. Feb. 11.—In the matter of the complaint of the Board of Trade of Alameda, Sask., complaining that the rate charged by the C.P.R. Co. on coal shipments from Bienfait to Alameda is excessive; and that the carload minimum of 20 tons is unreasonable: Upon hearing the complaint in the presence of counsel for the complainant and the railway company, and what was alleged; and upon the report of the Chief Traffic Officer of the Board, it is ordered that the railway company be directed to substitute for its present rates on coal, in carloads, from Bienfait, Sask., to the points named, the rates per ton of 2,000 lbs. following, namely:

To Hirsch, Sask.	$ .50
" Frobisher, Sask.	.60
" Alameda, Sask.	.70
" Oxbow, Sask.	.75
" Glen Ewen, Sask.	.80
To Carnduff, Sask	.85
" Carievale, Sask.	.85
" Gainsborough, Sask.	.90
" Pierson, Man.	.90
" Elva, Man.	.95
" Melita, Man.	.95
" Napinka, Man.	1:00
" Lauder, Man.	1.05

And it is further ordered that the rates from other stations or collieries contiguous to Bienfait, and to all other stations where dislocation of customary bases may ensue from the changes ordered, be graduated proportionately to those from Bienfait and to the points of consumption herein designated. And it is further ordered that the application for a reduction in the minimum weight of 20 tons per car be dismissed.

PLANKING OF LIVE STOCK SHIPMENTS.

6763. Feb. 19.—In the matter of the complaint of the Live Stock Commissioner of Edmonton, Alta., and shippers of live stock, that where they are unable to secure from the railway companies stock cars for the movement of stock, box cars are supplied and planking has to be placed across the doorways, which the companies' agents refuse to supply and which entails an expense to the shippers of $2 a car for planking: Upon hearing the complaint in the presence of counsel for the C.P.R., the C.N.R., and the G.T.P.R. Cos. the complainants being represented at the hearing, and what was alleged: It is ordered that where shippers have ordered stock cars for the shipment of live stock and are supplied with box cars, and are obliged to furnish lumber for temporary doors thereof, the shipper may deduct and retain $1.25 from the freight charges, if any, payable by him upon the shipment in each such car, for which the said lumber is so furnished, receipting the same and turning the account in to the agent as so much cash; or he may render to the agent of the company at or nearest to the point of shipment, an account for the actual outlay for the said lumber, which account the said agent shall pay at the time of shipment, out of the funds of the company in his hands.

GRAIN RATES FROM PRINCE ALBERT TO B.C.

Chief Commissioner Mabee gave the following judgment April 6 in the case of the Prince Albert Board of Trade vs. the Canadian Northern and Canadian Pacific Railway Companies: The question in this case is whether the joint tariff of these companies from Prince Albert to British Columbia points of 50c per 100 lbs. upon grain and grain products is unreasonable. Prior to the acquisition of the Q'Appelle, Long Lake & Saskatchewan Ry. by the Canadian Northern, it was controlled by the C.P.R. Co. and a through rate was given via Regina from Prince Albert to B.C. points of 45c per 100 lbs. upon grain and grain products. The route now is via Strathcona, and the combination of the locals of the two companies is 56½c, the Canadian Northern local to Strathcona being 24c, and the C.P.R. from that point 32½c; the through joint rate, therefore, is 6½c less than the sum of the locals. The proportion of the through 50c rate which the C.N.R. receives is 20c, which is 4c less than its local to Strathcona; so gauged by these standards the existing through rate can hardly be considered unreasonable. The further and larger question remains for consideration, whether, without more, the former rate of 45c should be restored. This feature was not argued in this case, and it is better, perhaps, that no opinion be now

expressed. Much can be said both for and against the proposition that upon a change of ownership or control of a connecting line joint rates should be established which should not be higher than the through rates existing prior to the change of ownership or control. This matter, however, may for the present remain for future consideration. The application must be refused.

RATE FOR BLANKETS TO WINNIPEG.

6815. Feb. 1.—In the matter of the application of the Winnipeg Jobbers and Shippers' Association for an order directing the railway companies to provide carload rating on blankets from points in Eastern Canada to Winnipeg. Upon hearing the application in the presence of counsel for the C.P.R. and the C.N.R. Companies the applicants being represented at the hearing, and what was alleged; it is ordered that the application be dismissed.

GRAIN RATES TO FORT WILLIAM AND PORT ARTHUR.

6834. Feb. 3.—In the matter of the complaint of the Manitoba Grain Growers' Association, alleging that the C.P.R. and C.N.R. Companies charge excessive freight rates on bulk headed cars of grain going to Fort William and Port Arthur, Ont.; and applying for an order directing the said railway companies to reduce their charges on the said shipments: Upon hearing the application in the presence of counsel for applicants and the railway companies, the evidence adduced, and what was alleged—it is ordered that the application be dismissed.

LUMBER RATES, BRITISH COLUMBIA TO EDMONTON.

6835. April 6.—In matter of complaint of Fullerton Lumber & Shingle Co. of Vancouver, complaining against rate of $10 a car charged in addition to rate to Strathcona, Alta., on lumber shipments from British Columbia mills to Edmonton; Upon hearing complaint at sittings of Board held at Edmonton, Vancouver, and Ottawa, in presence of counsel for applicant, C.P.R. and C.N.R. Co's., the evidence adduced, and what was alleged; and upon report and recommendation of Board's Chief Traffic Officer; It is ordered that C.P. and C.N.R. Companies be directed to publish and file joint class and commodity tariffs of rates on freight traffic in classes 6 to 10, inclusive, of Canadian Classification, between Edmonton and all points on C.P.R. except Strathcona, via Strathcona Jct., on basis of 1c per 100 lbs. over and above C.P.R. class and commodity rates to or from Strathcona; and that in the divison thereof, the C.N.R. Co. be allowed a proportional rate of $10 a carload, regardless of weight, between Strathcona Jct. and any or all sidings in Edmonton, including those owned by C.P.R., but excepting the Griffin packing house, to or from which the C.N.R. be allowed $12 a carload, regardless of weight; provided that in no case shall proportion allowed the C.N.R. exceed joint rates charged for local traffic between Strathcona and Edmonton.

WIRE FENCING RATES.

6844. Apr. 6.—In matter of application of Canadian Freight Association for order granting permission to substitute for existing commodity rates on wire fencing and netting, in carloads, from Hamilton, Windsor, and Walkerville to points east of Toronto, the class tariff rates thereon, subject to existing commodity rates to Montreal and Ottawa as maximum, viz., 18½c per 100 lbs. from Hamilton and 22c per 100 lbs. from Windsor and Walkerville; and to substitute class tariff rates for remainder of existing commodity rates on wire fencing and netting from Hamilton, Welland, Stratford, Owen Sound, Windsor and Walkerville; Upon hearing application, and what was alleged by counsel for C.P.R. and representatives of Canadian Freight Association and Canadian Manufacturers' Association; and upon report and recommendation of Board's Chief Traffic Officer, it is ordered that the application be granted, except that carload commodity rates from Hamilton, Windsor and Walkerville to points east of Toronto, be scaled as follows:

To G.T.R. Points	To C.P.R. Points.	From Windsor and Walkerville.	From Hamilton.
Scarboro Junction to Whitby	Agincourt to Myrtle	19	10
East of Whitby to Port Hope	East of Myrtle To Peterboro	19	12
East of Port Hope to Belleville	East of Peterboro to Ivanhoe	20	14
East of Belleville to Kingston	East of Ivanhoe to Sharbot Lake	20	16
East of Kingston to Cornwall	East of Sharbot Lake to Finch, Prescott, and Brockville	21	17
East of Cornwall to Montreal, Valleyfield and Ottawa	East of Finch to Montreal, and north of Smiths Falls and Kemptville to Ottawa	22	18½

cents per 100 lbs.

The said carload commodity rates to take effect not later than April 26, 1909.

TIME FOR UNLOADING CHARCOAL.

6849. Dec. 22, 1908.—In the matter of the application of McDiarmid & Gall, of Montreal, for an order directing railway companies to make an allowance of 72 hours for unloading charcoal in carloads, instead of 48 hours allowed by the Canadian Car Service Bureau rules. Upon hearing application in presence of counsel for applicants, the C.P.R. and the G.T.R., the Canadian Car Service Bureau being represented at the hearing; and upon the evidence adduced, and what was alleged; it is ordered that the application be refused.

GRAIN SWITCHING, ST. BONIFACE TO WINNIPEG.

6859. Feb. 6.—In the matter of the complaints of the Northern Elevator Co., Ltd., and the Anchor Elevator & Warehousing Co., Ltd., of Winnipeg, alleging excessive charges made by C.P.R. for switching "in transitu" grain from St. Boniface transfer track to applicants' elevators on the C.P.R. at Winnipeg and return to same transfer track for re-delivery to C.N.R. Upon hearing complaint in presence of complainants and counsel for the railway companies, and what was alleged; it is ordered that on grain carried via Winnipeg at the lawfully published and filed through rate, with the privilege of stopping in transitu for the purpose of manufacture, storage, or treatment, on the tracks of another railway company within its yard limits at Winnipeg, and on which the additional "stop-over" charge, duly published and filed (if any be made), does not exceed 1c per 100 lbs., the further additional tolls collectible by the company on whose tracks the industry or warehouse is situated, for switching the said grain from the point of interchange at Winnipeg or St. Boniface to the proper unloading tracks, and for reswitching the said grain, or the product thereof, back to the said point of interchange, shall not exceed $5 per carload, regardless of weight, in each direction; the said tolls to become effective at Winnipeg not later than May 17 next, and to be shown in the grain tariffs which provide for "stoppage in transitu" at Winnipeg for the purposes herein indicated, as well as in the tariffs of interswitching tolls.

A Railway to Hudson Bay

Among the votes on capital account passed by the Dominion Parliament is one of $65,000 to provide for survey and location of a line from the Saskatchewan River to Hudson Bay. The Minister of Railways explained that all the information as to the progress of surveys already made had been laid before the House. The main question raised by this information was as to whether Fort Nelson was not a more favorable harbor than Fort Churchill. The Government desired that the best possible harbor should be utilized, and the present vote of $65,000 was to have further surveys made at Fort Nelson and Fort Churchill. The preliminary report of the survey showed that the route to Fort Nelson was 60 miles shorter than that to Fort Churchill, while the country through which the lines would pass were about equal in point of quality. If the harbor at Fort Nelson was as good or better than that at Fort Churchill, it would be foolish to construct the additional 60 miles of line. The Government had no idea of abandoning the project, and would proceed with construction at the earliest possible moment that the conditions would warrant.

In connection with the suggestion to develop Fort Nelson as a possible terminus of the railway to Hudson bay, an Order-in-Council has been passed reserving a strip of land two miles deep along the northwest side of Nelson River, and its estuary, between Seal Island and Black Creek, a distance of about 15 miles.

In reply to questions as to the money available for construction, which is to be provided out of a fund created by the sale of pre-emptions the Minister of Interior said the payments on these did not become due for three years, so that no money had been received. There had been about 2,000,000 acres taken as pre-emptions. Whatever had been paid in on account of purchased homesteads, upon which the first payments are made with the entry, will be in the Treasury, and could not be considered as available for construction purposes, but what the amount was, he could not say. (Apr., pg. 251.)

The G.T.R. on April 1, placed a third-class car on one of its daily trains each way between Montreal and Toronto, thus complying with the Privy Council's judgment that it must, as its charter provides, give "a penny a mile" rate between Toronto and Montreal. On several occasions the cars started out without passengers, and on no occasion have they been largely patronized.

The Dominion WIRE ROPE Co., Limited
MONTREAL

C. P. R. Betterments, Construction, Etc.

Place Viger Extensions.—The merging of Montreal breweries, with C. R. Hosmer, one of the C.P.R. directors, as a director, may have some effect upon the company's plans for the extension of the yards at Place Viger, Montreal. The properties purchased by the C.P.R. adjoining the Place Viger yard practically surrounded the property of one of the breweries, and it is understood that the merger will bring about the transfer of the property in question to the C.P.R.

Prescott Round House.—Considerable damage was done by fire to the company's round-house at Prescott, Ont., recently, and two, out of the three locomotives in it, were burned.

Brockville Improvements.—Press reports state that C.P.R. engineers were in Brockville, Ont., April 10, taking measurements and levels in the tunnel which runs under the city, connecting the upper yards with those on the water front. It is said that the work is being done with a view to submitting a plan for its enlargement, so as to permit the largest locomotives and cars in the service to pass through it.

Campbellford, Lake Ontario and Western Ry.—A meeting of representatives of municipalities through which this projected line will pass was held at Cobourg, recently, when a resolution was passed appointing a deputation to wait on C.P.R. officials to urge the necessity of undertaking the construction of this line at an early date.

West Toronto.—The question of the closing of the bridge over the Weston Rd., West Toronto, is under consideration by the Council. General Superintendent Oborne stated to the Council it was the company's intention to build a station between Bruce St. and Royce Ave., and in order to do this it was necessary to close up the bridge. The company proposed to construct a foot subway from Cawthra Ave. to Union St. and a foot bridge at Pacific Ave., and to close up the Jane St. crossing. Objection was made to the closing of the bridge, as it was very largely used for vehicle traffic, and it was a curiosity to see a foot passenger going over it.

Guelph and Goderich Ry.—The Dominion Parliament has extended the time for the construction of branch lines.

Tillsonburg, Lake Erie and Pacific Ry.—The C.P.R. has withdrawn plans filed showing the location of this projected line through Stratford. With the withdrawal of the plans the company's application to the Dominion Parliament for an extension of time for the construction of the line is being proceeded with.

Walkerton and Lucknow Ry.—The Dominion Parliament has extended the time within which the company may construct its projected railway.

Fort William Lines.—The Dominion Parliament has confirmed an agreement between the company and the G.T. Pacific Ry., respecting the joint use of certain lines already constructed or to be constructed at Fort William, Ont., by the two companies.

Western Lines Construction.—Contracts are reported to have been let to Foley, Welsh and Stewart for the construction of 40 miles northerly of Cheadle, Alta.; for 28.5 miles northerly from Kipp to Little Bow River, Alta.; and for 35.5 miles easterly from near Lacombe, Alta. A contract is also reported to have been let to Dutton and Finson for the construction of 20 miles westerly from Weyburn, Sask.

Kootenay Central Ry.—The Dominion Parliament has granted an extension of time for the construction of this projected railway.

Kootenay and Arrowhead Ry.—In the course of the discussion before the Railway Committee of the House of Commons, recently, it was stated that as soon as the act granting an extension of two years for the construction of the Kootenay Central Ry. had been passed, the men employed upon its construction had been taken off, and put to work on the K. & A. Ry. The portion of the company's line to be constructed is about 40 miles long, and when completed it will provide an improved connection between the C.P.R. main line and the Crow's Nest branch, as well as tap the Lardeau district, B.C. (Apr., pg. 255.)

G.T.R. Betterments, Construction, Etc.

Portland Wharves.—Plans are being prepared for the reconstruction of the company's wharf and sheds at Portland, Me., which were burned some time ago. The wharf will be rebuilt on the old lines.

Freight Yards at St. Lambert, Que.—Plans have been filed for the laying out of freight yards covering an area of about 100 acres at St. Lambert. No decision has been announced as to when work will be started on the laying out of the yards. The plans for the layout show a general yard a short distance from the end of Victoria bridge, just beyond St. Lambert station, covering about 25 acres. This yard will be used for storing purposes. Beyond this to the east will be situated the westbound sorting yard and the eastbound receiving yard, alongside each other, with the caboose tracks between them, while further along the main line will be the eastbound sorting and departure yard and the westbound receiving yard arranged in a similar manner. Between the general yard and the westbound sorting and departure and the eastbound receiving yards, will be space for stores and supplies, while the space between the second and third groups will be employed for scales and cinder pits. The various yards will be well equipped with tracks, and a run-around track will encircle the whole series of yards. Along the southern side of the yards will run the G.T.R. main lines towards Portland, while a proposed easterly cut-off may be constructed from this line to the line leading to Rouse's Point. It is also proposed to construct another westerly cut-off to the Rouse's Point line from the southern extremity of the bridge. It is likely that a round-house with turntables and other facilities for handling locomotives will be built at St. Lambert.

Ottawa Station and Hotel.—A press report states that the company has given up its project to erect an hotel on Major's Hill Park, Ottawa. The Ottawa City Council, Apr. 5, passed a resolution asking the Dominion Government to cancel the proposed sale of the site to the G.T.R., that the fence be removed, and the park thrown open as formerly.

We were officially advised, Apr. 22, that there was no intention of the company giving up the project, and that plans are being made for the building, the construction of which will be undertaken and completed as soon as possible.

Garden Hill-Cobourg Cut-off.—Arrangements are reported to have been completed for making a survey during April and May, for a cut-off from Garden Hill, on the Midland Division, to Cobourg, Ont., as a continuation of the proposed short line from Lindsay to the main line. The report further states that a new station and freight shed will be constructed at Cobourg, and the yards modernized.

Kingston Subway.—H. E. Whittenberger, Superintendent G.T.R., has asked the City Council of Kingston, Ont., to appoint representatives to meet the company's engineers and go over the ground in the vicinity of the G.T.R. junction, and try to settle on some plan for crossing protection that will be satisfactory to all concerned. The company has prepared plans for an overhead bridge which would involve the closing of two public highways. Meetings of farmers and others interested have been held to protest against the divergence of Perth Rd. and Montreal St., which the carrying out of this proposal would necessitate.

London Improvements.—The question of track elevation in London, Ont., was not dealt with on the occasion of the visit of the Board of Railway Commissioners to the city recently. Certain questions in connection with level crossings were considered, not only in London, but at other nearby points. The Mayor of London said he had been informed that the company's engineers were busy with the plans, but it would be some time before they were finished. It is said that all preliminary arrangements will be completed so that negotiations can be reopened June 1.

Point Edward Improvements.—General Transportation Manager Brownlee and Superintendent Gillen were at Sarnia and Point Edward recently, and inspected the company's properties there. It is said that considerable improvements are contemplated at both places. Mr. Brownlee said definitely that it was the intention of the company to erect a new station at Point Edward.

Sarnia Tunnel.—Preparatory work is reported to be in progress at Sarnia, Ont., and Port Huron, Mich., for the relaying of the track in the Sarnia tunnel with 100-lb. rails. Track-laying will occupy, it is anticipated, about two months, two gangs being employed, one in the early morning and a second after the 3 p.m. train has passed through.

Chicago and Kalamazoo Terminal Co.—The property of this company has been acquired by the G.T.R., which thus secures an entrance into Kalamazoo, Mich. It is said that a spur line will be constructed from the main line, nine miles south of the city, to establish a connection with the terminals. (Mar., pg. 199.)

Ontario Railway Subsidies

An act has been passed by the Ontario Legislature providing for the granting of the following cash and land subsidies in aid of railways.

Bruce Mines and Algoma Ry.—For an extension from present terminus at Rock Lake, northerly for not exceeding six miles, a cash subsidy of $3,000 a mile, and 1,000 acres of land a mile.

Central Ontario Ry.—Cash subsidy of $3,000 a mile for extension of 15 miles northerly from junction with the Canada Atlantic Ry., between Whitney and Madawaska, Ont.

Lac Seul, Rat Portage & Keewatin Ry.—For 20 miles through Kenora northerly to National Transcontinental Ry., land grant of 1,000 acres a mile.

Superior & Western Ontario Ry.—For seven miles from near Waco station on G.T.P.R., Lake Superior branch, land grant of 1,000 acres a mile.

The land grant to the Canadian Northern Ontario Ry. is dealt with in a separate act.

National Transcontinental Railway.

Replying to a question in the House of Commons, April 1, the Minister of Railways said there had been paid on account of construction and equipment of the N.T.R. between Moncton and Winnipeg to Feb. 28, $48,372,560.01, and it was estimated that $66,021,206 further would be required to finish it and put it in order ready to hand over to the Grand Trunk Pacific Ry., exclusive of the amounts required for the Quebec bridge, the Quebec terminals and lines thereto, and the Winnipeg terminals and the large shops in that vicinity.

The members of the N.T.R. Commission and H. D. Lumsden, Chief Engineer, visited Quebec recently in connection with the construction of docks and railway terminals. The Commissioners had a conference with the Mayor and the Civic Finance Committee, with a view to purchasing the Champlain Market property, on which it is proposed to erect the union station to accommodate all railways coming into Quebec after the completion of the Quebec bridge. The city representatives expressed a willingness to sell at a suitable price, and at a subsequent meeting the City Finance Committee directed the employment of a valuator to fix a price.

The Commissioners have under consideration tenders for the supply of rail fastenings necessary for the laying of 5,154 gross tons of soft steel rails, for delivery at West Fort William, Ont.; and also for the erection of station buildings, section and tool houses as follows: Four No. 2 stations, two No. 3 stations, and five section houses between Lake Superior Jct. and Wabigoon River; one No. 1 station building, two No. 2 station buildings, three No. 3 station buildings and four section houses between Wabigoon River and northeast of Rennie; two No. 1 station buildings, two No. 2 station buildings, four No. 3 station buildings and three section houses from northeast of Rennie to St. Boniface, Man.

Haney, Quinlan and Robertson's tender for the construction of the terminal shops at St. Boniface, Man., has been accepted.

Quebec Bridge and Ry. Co.—A further amount of $10,500 has been voted by Parliament to provide for expenses of preparing plans for the reconstruction of the Quebec bridge.

GRAND TRUNK PACIFIC RAILWAY.

During the discussion in the House of Commons of the Government proposal to lend the G.T.P.R. $10,000,000, the Minister of Finance stated that the estimated cost by the company of the prairie division of the line was $34,059 a mile, while the Government Engineer's estimate was $34,943. The provision made for financing the construction of the 916 miles of the prairie division was $23,482 a mile, so that owing to the high cost of construction it was necessary to provide, according to the company's estimate, $9,688,425, additional, or according to the Government estimate, $10,497,522. Although the company was strictly liable for all the cost of the line above the Government guarantee on bonds to the extent of $13,000 a mile, in the interests of the country as well as of the company, he was of opinion that the Government should step in with the necessary assistance to prevent the company being compelled to sell below 90, securities which would eventually be worth par or over. The resolution granting the loan was adopted, and the bill giving effect to it is under consideration. At a meeting of G.T.R. shareholders in London, Eng., April 21, a resolution was submitted authorizing the necessary guarantee of G.T.P.R. bonds to be issued to secure the loan of $10,000,000.

In connection with the discussion in Parliament the following figures were submitted to the Government by C. M. Hays, President G.T.P. Ry.

Total expenditure to Sept. 30, 1908, including interest on bonds, less interest on proceeds.	$24,037,743.70
Estimated cost to fully complete work from Oct. 1, 1908, including bond interest payable up to and on Jan. 1, 1910.....	8,110,607.60
Total	$32,198,351.30
RESOURCES.	
Proceeds series A bonds.....	$9,601,926.30
Received from Government on account proceeds of bonds guaranteed by Government to extent of $13,000 a mile for 916 miles.	10,335,482.91
Due from Government balance on account of proceeds of bonds guaranteed by Government to extent of $13,000 a mile.....	1,572,517.09
Estimated value of construction equipment to be transferred to mountain section on completion of prairie section.....	1,000,000.00
Balance to be provided.....	9,688,425.00
Total	$32,198,351.30

The Dominion Parliament has approved of an act respecting the subsidy from the Ontario Government for the construction of the Lake Superior branch. The formal inspection of the last 66 miles of the branch is being made by the Ontario Government Engineer preparatory to handing over the 198,000 acres of land granted as a subsidy.

The Dominion Parliament has passed an act approving of the agreement with the C.P.R. for the use jointly of certain lines belonging to the C.P.R., or to be hereafter constructed in Fort William, Ont.

An act has been passed by the Dominion Parliament approving of an agreement with the Midland Ry. of Manitoba, with respect to the provision of a union station and other joint facilities at Portage la Prairie, Man.

The company has ordered from the Dominion Iron & Steel Co. 13,000 tons of steel rails for delivery at Prince Rupert during the summer. They are for the first 100 miles easterly from Prince Rupert, and on the line being constructed as a branch under the Pacific, Northern and Omineca Ry. Co.'s charter.

A Winnipeg dispatch dated Apr. 21, said, E. J. Chamberlin Vice-President and General Manager, had returned from the West, and stated that construction would begin during the next few days on branch lines north and south from Melville, Sask., and that the company would lose no time in building a through line from the U.S. boundary to Hudson Bay, providing the farmers with a short wheat route to Europe. We are officially advised that it is the intention this year to proceed with the construction of the following branch lines: From Melville to Yorkton, Sask.; from Melville to Regina, Sask., with an extension to Moose Jaw to follow; from Redgar, Sask, to Battleford, Sask.; from at or near Wainwright, Alta., to Calgary, Alta., with a projected extension later on to Coutts on the International Boundary and another to the Crow's Nest Pass Coal Fields in B.C.; from near the McLeod River on the main line west of Edmonton, in Alberta, to the coal fields. We are also advised that the Hudson Bay branch is one of the lines the company is chartered to build and that it will no doubt be undertaken later on.

PACIFIC NORTHERN AND OMINECA RY.

The British Columbia Legislature has extended the time for the construction of the lines authorized by previous acts, and granted permission for the construction of a line from the junction of the Skeena and Copper rivers to the junction of the Bulkley and Telkwa rivers. (April, pg. 277.)

May Birthdays

Many happy returns of the day to—

W. R. Baker, Secretary, and Assistant to President C.P.R., Montreal, born at York, Eng., May 25, 1852.

G. S. Cantlie, General Superintendent Car Service, C.P.R., Montreal, born there May 2, 1867.

M. Donaldson, Superintendent Ottawa Division G.T.R., Ottawa, Ont., born near Edinburgh, Scotland, May 1, 1851.

G. C. Gunn, Divison Engineer, G.T.P.R., St. ohn, N.B., born at Quebec, May 13, 1862.

Hon. W. C. Edwards, Temiskaming Steamboat Co., Rockland, Ont., born at Clarence, Ont., May 7, 1844.

J. D. Evans, Chief Engineer Central Ontario Railway, Trenton, Ont., born at Goderich, Ont., May 27, 1843.

E. T. Galt, President Alberta Railway and Irrigation Co., Montreal, born at Sherbrooke, Que., May 24, 1850.

C. M. Hays, 2nd Vice-President and General Manager G.T.R., and President G.T. Pacific Railway, Montreal, born at Rock Island, Ill., May 16, 1856.

G. H. Hedge, Assistant Master Mechanic, C.N.R., Winnipeg, born at Neath, Wales, May 26, 1865.

R. B. Hepburn, President and General Manager Ontario and Quebec Navigation Co., Picton, Ont., born there May 27, 1876.

W. T. Huggan, Accountant and Auditor, Prince Edward Island Railway, Charlottetown, P.E.I., born at Halifax, N.S., May 24, 1851.

W. S. Kinnear, Assistant General Manager Michigan Central Rd., and Chief Engineer Detroit River Tunnel, Detroit, Mich., born at Circleville, Ohio, May 25, 1864.

M. Neilson, C.E., Consulting Engineer, Montreal Street Railway, born at Almonte, Ont., May 26, 1852.

A. L. Ogilvy, General Purchasing Agent, National Transcontinental Railway Commission, Ottawa, Ont., born at Richwood, Oxford County, Ont., May 23, 1868.

Hayter Reed, Manager-in-Chief C.P.R. hotels, Montreal, born at L'Orignal, Ont., May 26, 1849.

H. B. Sherwood, Superintendent Bay of Quinte Railway, Napanee, Ont., born at Auburn, N.Y., May 25, 1847.

E. Tiffin, General Traffic Manager, I.C.R., Moncton, N.B., born at Hamilton, Ont., May 5, 1849.

J. H. Walsh, General Manager Quebec Central Railway, Sherbrooke, Que., born at Quebec, May 12, 1860.

H. K. Wicksteed, Chief Engineer of Location, Mackenzie, Mann & Co., Ltd., Toronto, born at Quebec, May 25, 1855.

James Yeo, ex-Roadmaster Intercolonial Railway, Riviere du Loup, Que., born at Bideford, Devonshire, Eng., May 1, 1830.

J. A. Yorick, Canadian Passenger Agent, Chicago, Burlington and Quincy Rd. at Toronto, born at London, Ont., May 7, 1872.

Orders by the Railway Commissioners.

Beginning with June, 1904. we have published in each issue summaries of orders passed by the Board of Railway Commissioners, so that subscribers who have filed our paper have a continuous record of the Board's proceedings. No other paper his done this.

The dates given of orders, immediately following the numbers, are those on which the hearings took place and not those on which the orders were issued. In many cases orders are not issued for a considerable time after the date assigned to them.

6538. Mar. 3.—Directing V.V. & E. Ry. & Nav. Co. to construct fences and gates at farm crossings on Mrs. H. M. Milstead's lands at Abbotsford, B.C.

6539. Feb. 25.—Dismissing complaint of A. F. Latta, Port Moody, B.C., re damages for cow killed.

6540. Mar. 3.—Directing G.N. Ry. & V. V. & E. Ry. & Nav. Co. to erect crossings, gates, fences and cattle guards where it affects property of Messrs. Murphy, Mackenzie, Milton, Armstrong and Shannon, near Cloverdale, B.C.

6541. Feb. 25.—Dismissing complaint of F. Allan and others regarding extension of railway siding now terminating at western boundary of Pacific Coast Mill Co.'s premises, Coal Harbor, Vancouver, B.C.

6542. Feb. 25.—Dismissing complaint of Burnaby & Coquitlam municipalities, B.C., regarding defective cattle guards on V.W. & Y. Ry. or V.V. & E. Ry. & Nav. Co.'s line.

6543. Feb. 25.—Dismissing application of Vancouver Board of Trade for refund under order of Aug. 11, 1906, in the "Transcontinental rate case."

6544. Feb. 23.—Dismissing application of V.W. & Y. Ry. for authority to construct branch line in Vancouver, B.C., from the main line north of False Creek.

6545. Feb. 25.—Directing V.W. & Y. Ry. to join its tracks with the C.P.R. tracks, operated by the B.C. Electric Ry. at or near junction of Columbia and Front sts. Vancouver, B.C., within two months from date.

6546. Feb. 25.—Dismissing complaint of Trades and Labor Council of Vancouver, B.C., that the C.P.R. is running trains from Vancouver without proper inspection.

6547. Feb. 25.—Dismissing complaint of R. Robertson & Co, Vancouver, B.C., respecting C.P.R. rates to Ladysmith, B.C.

6548. Feb. 25.—Authorizing Vancouver Power Co. to erect wires across C.P.R. at the second narrows, Burrard Inlet, Vancouver, B.C.

6549. Feb. 23.—Dismissing application of V.W. & Y. Ry. for authority to cross C.P.R. by its branch line from False Creek to Burrard Inlet, Vancouver.

6550. Feb. 23.—Dismissing application of V.W. & Y. Ry. for authority to cross with its branch line No. 2 from False Creek to Burrard Inlet over lane between Parker and Napier Sts., in Vancouver, B.C.

6551. Mar. 18.—Extending until May 18, time during which C.N.O. Ry. may use for construction purposes crossing of G.T.R. spur line to Edwards' Mills, Rockland, Ont.

6552 to 6577. Feb. 23.—Dismissing 26 applications of V.W. & Y.R. for authority to cross with branch line over various lanes and streets in Vancouver, B.C.

6578. Mar. 20.—Authorizing Sunderland Telephone Co. to erect wires across G.T.R. in Brock tp., Ont.

6579. Mar. 18.—Authorizing Bell Telephone Co. to lay conduits under Fortification Lane to Victoria Sq. and under Victoria Sq., Montreal.

6580. Mar. 18.—Authorizing C.P.R. to use bridge at mileage 4.2, Guelph branch, Ont.

6581. Mar. 18.—Authorizing C.P.R. to use certain bridges on its Havelock section, Ont.

6582. Mar. 23.—Authorizing Hamiota municipality, Man., to erect wires across C.P.R.

6583. Mar. 18.—Authorizing G.T.R. to construct spur to the Stratford Mill Bld. Co. and Ballantyne's cheese warehouse, Stratford, Ont.

6584. Feb. 25.—Dismissing application of Vancouver and Lulu Island Ry. for order authorizing proposed deviation from plan of branch line on south side of False Creek, Vancouver, B.C.

6585. Mar. 15.—Dismissing application of Canada West Coal Co. for authority to construct tunnels and work in connection therewith under C.P.R. Crow's Nest branch at Taber, Alta.

6586. Feb. 18.—Authorizing C.P.R. to open for passenger traffic its Moose Jaw branch from mileage 14.5 to 118.75 and to operate trains over mileage 14.5 to 113.0, at a speed of 25 miles an hour.

6587. Feb. 25.—Authorizing City of Vancouver, B.C., to construct a highway bridge over C.P.R. at intersection of northerly shore of False Creek and Granville St. and at intersection of False Creek and Fourth Ave.

6588. Mar. 19.—Directing C.N.R. to properly fence its right of way where it crosses s.e. ¼ sec. 21, tp. 19, range 21, west 2nd. mer.

6589. Mar. 16.—Refusing petition of residents of Sinclair, Man., for order directing C.P.R. to provide a side track between Reston and Sinclair.

6590. Mar. 22.—Authorizing Cardoc-Ekfried Telephone Co. to erect wires across C.P.R. north of Appin, Ont.

6591. Mar. 22.—Authorizing Canadian Northern Telegraph Co. to erect wires across C.P.R. Wolseley-Reston branch, and Brandon-Regina branch, at Kaiser, Man.

6592. Mar. 22.—Authorizing Bell Telephone Co. to erect wires over G.T.R. near Sprucedale station, Ont.

6593 to 6596 inc—Authorizing Hamiota & Miniota municipalities, Man., to erect telephone wires across C.P.R. at four points.

6597. Mar. 10.—Dismissing application of E. D. Coffey, Dauphin, Man., F. L. Merritt, Winnipegosis, Man., and Canadian Lakes Fishing Co. for order directing C.N.R. to put into immediate and continuous operation its railway now constructed from Etiomami to the Pas, Sask.

6598. Mar. 15.—Dismissing application of M. McGregor, Tilston, Man. and other residents of Tilston, alleging unsatisfactory train service furnished by C.P.R. between Lauder and Tilston, Man.

6599. Mar. 15.—Authorizing the C.N.R. to operate temporarily, until further ordered by Board, its spur from connection of C.N.R. near Smith's Packing Co., Edmonton, Alta., to Clover Bar Coal Co.'s property.

6600. Mar. 22.—Dismissing complaint of Nipigon Bay Fish Co. of refusal by C.P.R. to carry, on passenger trains, fish offered for carriage at Rossport, Jackfish and Coldwell, Ont.

6601. Mar. 22.—Dismissing complaint of C. N. Cobett, Edmonton, Alta., alleging exorbitant rates charged in the west by express companies.

6602. Mar. 12.—Amending order 6320, of Feb. 13, in complaint of Nelson-Ford Lumber Co. and International Elevator Co. as to service furnished to them by C.P.R. over spur track in Estevan, Sask.

6603. Feb. 23.—Dismissing application of C. T. W. Piper, Vancouver, B.C., for order directing G.N.R. to construct spur to Britannia Trading & Lumber Co.'s premises, Burnaby Lake, B.C.

6604. Mar. 5.—Dismissing complaint of F. W. Godsal, Cowley, Alta., alleging unsatisfactory train service between Cowley, Alta., and Nelson, B.C.

6605. Mar. 5.—Dismissing application of residents of Westbank, B.C., for order directing C.P.R| mail boats to call at Hall's Landing at least three times a week to deliver mails and passengers.

6606. Mar. 5.—Dismissing complaint of R. G. Sidley, Sidley, B.C., that V.V. & E. R. unjustly discriminates against settlers in and around Sidley in the matter of railway facilities and in favor of points in United States.

6607. Mar. 5.—Dismissing complaint of Vernon Fruit Co., Vernon, B.C., alleging excessive freight rates charged by C.P.R. from Peachland to Victoria, B.C., and complaining against minimum carload weight on such shipment.

6608. Mar. 5.—Dismissing application of V.V. & E.R. for authority to construct branch line to connect with its main line at the International Boundary near Myncaster, B.C.

6609. Mar. 5.—Dismissing complaint of R. Robson, Mayook, B.C., alleging unsatisfactory train service on the C.P.R. Crow's Nest branch between Mayook and Cranbrook, B.C.

6610. Mar. 5.—Dismissing application of City of Revelstoke, B.C., for order directing C.P.R. to provide a traffic bridge in connection with its proposed new railway bridge across Columbia River.

6611. Mar 22.—Authorizing C.P.R. to use bridges on its Esquimalt & Nanaimo branch at four points.

6612-6613. Feb. 23.—Directing G.N.R. to file and publish tariffs on lumber, shingles, etc. These orders are given fully on page 329.

6614.—Feb. 25.—Dismissing application of V.V. & E.Ry. & Nav. Co. for order sanctioning placing of crossings over lot 23, group 2, New Westminster, B.C.

6615. Feb. 25.—Dismissing application of V.W. & Y. Ry. for order approving place and mode of crossing of its branch line No. 2 from False Creek to Burrard Inlet, over Powell, Vancouver, B.C.

6616. Mar. 22.—Directing C.P.R. to construct and operate spur to the Okotoks Milling Co. and the Electric Light Co.'s premises, Okotoks, Alta.

6617. Mar. 22.—Directing C.P.R. to construct spur to Western Canada Pressed Brick & Tiles Co. and Pugh & Livingstone Lumber Co.'s premises at Okotoks, Alta.

6618. Mar. 18.—Dismissing application of J. G. Wilson, Dana, Sask., for order directing C.N.R. to pay $95 damages for cattle killed on tracks.

6619. Mar. 8.—Dismissing complaint of F. W. Godsal, Cowley, Alta., alleging excessive passenger rates on C.P.R. steamboats on Kootenay and Arrow Lakes, B.C.

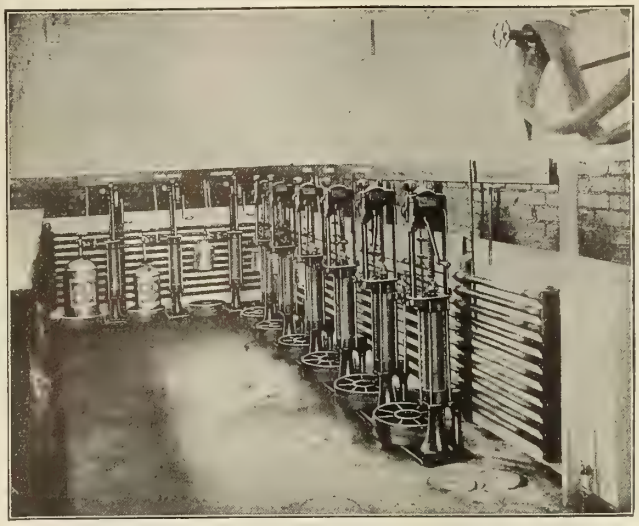
6691. Mar. 26.—Authorizing C.P.R. to use certain bridges on its Smith's Falls section.

6692. Feb. 27.—Authorizing B.C. Dept. of Lands & Works to construct highway



Bowser Pumps in a Railway Storehouse

Greater Net Earnings

A big gross income is a good thing, but it is what is left after all expenses are deducted that counts.

Reduce your operating expenses, and thereby increase your net income by installing

The Bowser System of Oil Storage

The BOWSER reduces the cost of labor involved in handling the oil 75 per cent. It reduces the oil bills 10 to 25 per cent. It also reduces the insurance rate by decreasing the fire hazard.

Bulletin 18 tells all about it. Sent upon request to those interested.

Repairing Heavy Steel Sections

For welding locomotive frames, driving wheel spokes, mud rings, gear wheels, crank shafts, sternposts of steamships, rudder stocks, anchors, and other steel sections, the Thermit Process offers the only method by which the repair may be made without removing the broken part. Heavy steel sections of all kinds may be welded IN PLACE. Simply send us a blue print of the parts to be repaired and we will submit an estimate immediately.

A large number of Thermit repairs are described in "REACTIONS," the Thermit Quarterly. Copies will be sent free on request. Write also for Pamphlet No. 20-N illustrating over 30 important Thermit welding operations.

MAINLY ABOUT PEOPLE

R. B. Angus, C.P.R. director, recently sailed for Great Britain.

Jas. Holway, formerly agent, M.C. Rd., Windsor, Ont., died there, Apr. 2, aged 56.

A. O. Sager, formerly M.C. Rd. agent at Welland, Ont., died there Apr. 3, aged 52.

Lady Shaughnessy and Miss Shaughnessy will, it is said, remain some time in England.

Hon. G. A. Cox, director G.T.P.R., was married at Toronto, Apr. 14, to Miss A. G. Sterling.

B. M. Armstrong, Controller Dominion Railway Mail Service, celebrated his 60th birthday Mar. 31.

Mrs. Mary Montgomery, niece of W. Mackenzie, President, C.N.R., died at Prince Albert, Sask., Apr. 14.

H. McD. Stevens, of the Intercolonial Ry. engineering staff, was married at Moncton, N.B., Mar. 24, to Miss N. G. Tidd.

M. K. Cowan, Assistant Solicitor, G.T.R., left Montreal recently on a southern trip to recuperate after an attack of typhoid fever.

The engagement of Miss M. Haney, daughter of M. J. Haney, railway and general contractor, Toronto, to Dr. H. Spohn is announced.

W. Stitt, General Passenger Agent, C.P.R., who has been recuperating at Atlantic City, N.J., after an attack of erysipelas, returned to Montreal, Apr. 21.

Archer Baker, European Manager, C.P.R., London, Eng., who was recently confined to his home with an attack of pneumonia, is reported to have resumed his duties.

F. W. Peters, Assistant to Second Vice-President C.P.R., returned to Winnipeg about the middle of Apr., after a business trip along the Pacific coast to Mexico.

Lieut.-Col. T. T. Turnbull, who was one of the promoters of the Hudson Bay and Pacific Ry., which is yet in the organization stage, died at Winnipeg, recently, aged 68.

Miss Amy P. Sinclair, daughter of Angus Sinclair, railway contractor, Toronto, is announced as being engaged to G. S. Stairs, of Halifax, N.S.

Lord Strathcona recently forwarded $250,000 to the Minister of Militia, in accordance with his offer to provide a fund for the provision of physical and military drill in Public Schools.

The late H. C. Hammond, President Northern Navigation Co., provided in his will for the payment of legacies to Osler & Hammond's employes of sums of from $500 to $1,000 each.

Mrs. Alex. Mackenzie, widow of the late Treasurer Canadian Northern Ry., has returned to Toronto from France, accompanied by her mother and her children.

Miss Crossen, only daughter of W. J. Crossen, President of the Crossen Car Mfg. Co., Ltd., of Cobourg, Ont., was married there Apr. 21 to Dr. L. E. Jordan, of Ottawa, Ill.

T. Grimes, General Yardmaster, C.P.R., West Toronto, was arrested recently on charges of forgery, whereby it is alleged he obtained almost $800 from the C.P.R. He has been remanded from time to time on bail.

J. Sieveright, formerly Master Mechanic, Quebec Central Ry., Sherbrooke, Que., died there recently, aged 73. He had been in the company's employ 33 years, and only retired from active service in Dec., 1908.

Mrs. Carter, wife of Capt. J. N. Carter, of Toronto, and formerly of Picton, Ont., and youngest daughter of M. C. Dickson, G.T.R. station agent, Woodstock, Ont., died suddenly at Toronto General Hospital, Apr. 25.

T. K. Bremner, who has been transferred from Stratford, Ont., to Toronto as Chief Clerk in G.T.R. division freight office, was presented with a gold watch by the members of the Congregational Church, Stratford, recently.

F. A. Gascoigne, Superintendent Car Service, C.P.R. Eastern Lines, Montreal, was recently presented with a travelling bag and gold mounted umbrella by the staff over which he presided as Car Accountant for six years.

Jas. Mills, Dominion Railway Commissioner, underwent an internal operation at Miss Lash's Cottage Hospital, Toronto, April 7. He is making good progress towards recovery, and it is hoped he will be able to resume his duties early in May.

E. H. Fitzhugh, Third Vice-President G.T.R., returned to Montreal in the middle of April from Texas, where he left Mrs. and Miss Fitzhugh with his son Earl Fitzhugh, whose health is reported to have been much improved by his residence there.

Hon. J. M. Gibson, Lieutenant-Governor of Ontario, Lieutenant-Colonel of the 15th Infantry Brigade (Western Ontario Command), and formerly President of the Dominion Power & Transmission Co., has been placed on the retired list of the Canadian Militia.

C. R. Hosmer, C.P.R. director, is a director of the new brewery company formed in Montreal with the title of the Eastern Breweries, to take over a number of the breweries in Montreal and other places in Quebec Province. The capital of the company is $12,000,000.

F. W. Jones, at one time Assistant to the Manager C.P.R., Western Lines, Winnipeg, who has been living in Victoria, B.C., since he sold out his interests in the Columbia River Lumber Co., intends to leave Victoria in August to spend two years in Europe.

E. A. Williams, who recently resigned the position of Special Agent, I.C.R., to enter the Thiel Detective Agency's service at Montreal, was presented with an address and a case of pipes by the members of the 19th Field Battery, of which he was an officer, on his leaving Moncton.

W. H. Allan, of Allan, Lang, Killam & McKay, general insurance agents, Winnipeg, who is also Canadian Northwest General Agent for the Allan Line Steamships, and is a son of the late Andrew Allan, of H. & A. Allan, Montreal, will be married shortly to Mrs. A. C. Killam, widow of the late Chief Railway Commissioner for Canada.

S. B. Clement, whose appointment as Chief Engineer, T. & N.O.R., was announced in our Apr. issue, was an honor graduate in civil engineering of McGill University, and has served as an engineer of construction, C.P.R., on survey work, T. & N.O.R., and prior to his appointment as Assistant Engineer, T. & N.O.R., in July, 1906, was Assistant Engineer of the Ontario Government Hydro Electric Power Commission.

J. E. McLurg, who has been appointed Superintendent Algoma Central Steamship Line, Sault Ste. Marie, Ont., was born at St. Mary's, Ont., Apr. 12, 1875, and entered transportation service Nov., 1903, since when he has been to June 15, 1904, in audit office, Algoma Central and Hudson Bay Ry.; June 15 to Oct. 20, 1904, purser, s.s. King Edward, Algoma Central Steamship Line; Oct. 20, 1904, to Apr. 1, 1905, in audit office, A.C. & H.B.R.; Apr. 1, 1905, to Apr. 1, 1909, Chief Clerk to Superintendent, Algoma Central Steamship Line.

F. A. Gascoigne, whose appointment as Superintendent, Car Service, C.P.R. Eastern Lines, was announced in our Apr. issue, was born at Gosport, Hants, Eng., Apr. 2, 1866, and entered Canadian railway service, May 18, 1883, since when he has been, to Aug., 1884, car checker and general clerk, C.P.R., Brockville, Ont.; Aug., 1884, to Dec., 1891, record clerk, foreign mileage clerk and statistical clerk, Car Accountant's Office, Montreal, successively; Dec., 1891, to Feb., 1903, Chief Clerk, Car Service Superintendent's office, Montreal; Feb. 1903, to Mar. 18, 1909, Car Accountant, Montreal.

F. J. Mahon, who has been appointed Superintendent Atlantic Division, C.P.R. Telegraph, was born at Montreal, Sept. 18, 1865, and entered C.P.R. telegraph service Aug. 15, 1886, since when he has been, to 1887, operator; 1887 to Dec., 1889, night chief operator, Montreal; Dec., 1889, to Feb., 1893, chief operator, St. John, N.B.; Feb., 1893, to Oct., 1906, local manager, Quebec; Oct., 1906, to Aug., 1908, chief operator, Montreal; Aug., 1908, to Feb., 1909, inspector, Eastern Division, Montreal. In Feb., 1909, he was appointed acting Superintendent, Atlantic Division, St. John, N.B., owing to the illness of the late P. W. Snider.

J. D. Murray, who was for some years in the Dominion Ex. Co.'s service, at Winnipeg, and who has latterly been in the Phosphate Co.'s employ at Christmas Island, in the Polynesian Archipelago, was married at St. George's, Hanover Sq., London, Eng., recently, to Miss E. M. McMicken, daughter of H. G. McMicken, European Traffic Agent, Great Northern Ry. (U.S.). Mr. Murray is a son of the late J. Murray, at one time C.P.R. Superintendent, Winnipeg; and a nephew of Sir John Murray, the eminent scientist, who was in charge of the Challenger expedition. Notwithstanding reports to the contrary, it is said that the newly-married couple will leave England for Christmas Island, in May.

W. P. Fitzsimons, who has been appointed Commissioner of Industries, G.T.R., Montreal, was born in Detroit, Mich., Oct. 27, 1868, and entered railway service as messenger in Assistant General Freight Agent's office, G.T.R., at Detroit, April 15, 1884, since when he has been consecutively to Feb. 10, 1896, in various positions general freight department same road at Detroit; Feb., 1896, to Jan., 1897, Travelling Freight Agent same road; Jan., 1897, to Nov., 1898, secretary to General Freight Agent same road, Montreal; Nov., 1898, to May, 1900, chief clerk General Freight Agent's office, same road, Montreal; May, 1900, to April, 1902, Division Freight Agent, same road, Detroit, Mich., and Manager Grand Trunk Despatch Fast Freight Line; May,

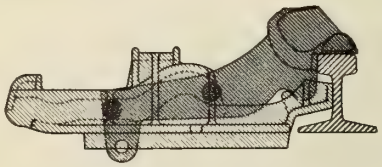
MANUFACTURERS OF

High Explosives and Blasting Powder, and Dealers in Safety Fuse Detonators, Batteries, Electrical Fuses, Etc.

OFFICE: BOARD OF TRADE BUILDING - - MONTREAL
Works: L'ISLE PERROT, NEAR VAUDREUIL, P.Q.



When used in signaling plants both the operating and locking connections of Hayes Derails are attached direct to the moving piece. The pull of the operating pipe is in line with the motion of the derail block and the force required to throw the derail is small. The locking rod is attached to a second lug on the derail block rendering the indication of the lock simple and positive. Fine adjustment of the locking mechanism, such as is required in the closed position of a split switch derail, is unnecessary in either direction.

They are made in Canada at Hamilton, Ontario.

Address: Hayes Track Appliance Co., Geneva, N.Y.

Sole Canadian Agent—MR. GEORGE HOLLAND, M.C. Soc. C.E., P.O. Box 529, MONTREAL

1902, to Sept., 1907, Manager, Lackawanna-Grand Trunk Line, Buffalo, N.Y.; Sept., 1907, to Apr., 1909, Manager, Bureau of Transportation and Manufacturers, Detroit, Mich. Board of Commerce.

W. P. Hinton, who has been appointed General Passenger Agent. G.T.P.R., Winnipeg, was born at Hintonburg, Ont., Aug. 30, 1871. He entered railway service May, 1887, since when he has been, to Aug., 1891, clerk, freight, passenger, and car accounts and travelling auditor, Canada Atlantic Ry.; Aug., 1891, to Mar., 1898, rate clerk, general freight and passenger departments, same road, and accountant, Canada Atlantic Fast Freight Line; Mar., 1898, to June 30, 1901, Assistant General Freight Agent, same road, and Canada Atlantic Transit Co.; June 30, 1901, to Jan. 30, 1903, General Freight Agent, same road, Jan. 30, 1903, to Oct., 1905, General Passenger and Freight Agent, Canada Atlantic Ry.; Oct. 1905, to Jan., 1907, General Agent Passenger Department, G.T.R., Ottawa; Jan., 1907, to Apr., 1909, Assistant General Passenger and Ticket Agent, same road, Montreal.

E. F. Tarbox, Travelling Passenger Agent, Halifax and Southwestern Ry., Boston, Mass., whose additional appointment as Travelling Passenger Agent, Canadian Northern Quebec, and Quebec and Lake St. John Rys., was announced in our Apr. issue, was born at Lynn, Mass., Jan. 4, 1881, and entered railway service in 1900. Since when he has been to 1901, stenographer, Chicago, Rock Island and Pacific Ry., Boston, Mass.; 1901, to Apr., 1905, clerk and ticket agent, New England Passenger Agent's office, Rutland Rd., and Canadian Government Railways. He was for a short time in 1905, in the U.S. Light House Service, and subsequently, to Mar., 1906, in the employ of the Beekman Tourist Agency; Mar., 1906, he was appointed Travelling Passenger Agent, H. & S.W. Ry., which position he still holds, in connection with a similar one on the Mackenzie-Mann Quebec Lines.

F. P. Brady, who has been appointed as one of the members of the Board to manage the I.C. Ry., was born at Haverhill, N.H., June 22, 1853, and entered railway service 1869, as station baggagemaster Passumpsic Ry., since which he has been consecutively: 1873 to 1880, train dispatcher Northern Rd., at Concord, N.H.; 1880 to 1888, Chief Train Dispatcher Southeastern Ry., at Richford, Vt.; 1888 to 1889, Trainmaster C.P.R.; 1889 to 1898, Assistant Superintendent same road; 1898 to May, 1901, Superintendent same road at Smith's Falls, Ont.; May, 1901, to Sept., 1902, Superintendent districts 10 and 11 same road at Toronto; Sept., 1902, to May, 1903, Superintendent district 19 same road at Fort William, Ont.; June 1, 1903, to Feb., 1904, Assistant General Superintendent Central Division, Winnipeg, Man.; Feb., 1904, to Sept. 16, 1908, General Superintendent Lake Superior Division, C.P.R., North Bay, Ont.

G. T. Bell, who has been appointed Assistant Passenger Traffic Manager G.T.R., and G.T.P.R., was born at Montreal Sept. 7, 1861. He entered railway service in 1878, since when he has been consecutively, to Nov., 1880, clerk, car mileage office, Great Western Ry.; Nov., 1880, to Nov., 1882, stenographer, General Passenger Agent and Rate Clerk's Office; same road; Nov., 1882, to Jan. 1, 1884, Chief Clerk, Assistant Passenger Agent's Office, G.T.R.; Jan. 1, 1884, to Apr., 25, 1892, Chief Clerk, General Passenger Agent's Office, same road; Apr. 25, 1892, to Apr., 1896, Assistant General Passenger Agent, same road, Montreal; Apr., 1896, to Aug., 1899, Assistant General Passenger and Ticket Agent, same road, Montreal; Aug., 1899, to May, 1900, First Assistant General Passenger and Ticket Agent, same road, Chicago, Ill.; May, 1900, to Aug., 1908, General Passenger and Ticket Agent, same road, Montreal; Aug., 1908, to Apr., 1909, General Passenger and Ticket Agent, G.T.R., and G.T.P.R., Montreal.

F. H. Phippen, who has been appointed General Counsel Canadian Northern Ry., with office at Toronto, was born at Belleville, Ont., Aug. 26, 1862. He studied law in the office of R. C. Clute, now one of the Judges of the Exchequer Division of the High Court of Justice of Ontario, and afterwards in Blake, Lash & Cassels and Barwick & Aylesworth's offices, Toronto. He was called to the Ontario bar Feb., 1885, passing first out of 60 candidates and to the Manitoba bar in Aug., 1885, again passing first. He entered Macdonald & Tupper, McArthur & Dexter's firm in Winnipeg in May, 1885, and on its dissolution became a partner in Macdonald, Tupper & Phippen, which firm, with additions to its membership, continued until Mr. Phippen was appointed a judge of the Manitoba Court of Appeal in July, 1906, which position he resigned April 12, 1909, to enter the C.N.R. service. He was formerly counsel for the Manitoba and Southwestern Ry. Co., and for the C.P.R. Land Department. His practice was almost entirely devoted to corporation work.

Canadian Patent Laws

A correspondent in the United States wrote us recently as follows: "If a firm has taken out a patent in Canada, I understand that the manufacturer is allowed to ship into Canada for two years, and after that must manufacture in Canada. To-day I heard that manufacturing must be begun in Canada one year after patent is issued. In the case of having a patent in Canada and two or more years have expired and they are manufacturing in Canada, may they send part of the machine or tool for putting the whole of it together in Canada, and if so, what percentage of the machine, tool or any article may be sent? If a U.S. manufacturer has arranged to allow a Canadian railway company or manufacturer to make its patented article on a royalty basis, does this protect the U.S. manufacturer in the same way as if he had himself been manufacturing in Canada?

We referred this inquiry to Fetherstonhaugh & Co., patent barristers and solicitors, Royal Bank Building, Toronto, who advise us as follows: "A patented article may be imported into Canada for one year from the date of the patent and must be manufactured within two years from the date of the patent. All parts of the invention must be manufactured in Canada and none of the parts can be imported and assembled in Canada after the one year allowed for importation has lapsed. If the article has been licensed to a railway company in Canada which manufactures the same within the time limit such manufacture protects the patent just as much as if the inventor had manufactured it himself in Canada."

Recent Ontario Legislation

The Ontario Legislature at its recent session passed the following acts dealing with transportation interests:

Algoma Central and Hudson Bay Ry.—Affecting the land grant.

Belleville Radial Ry.—Act of incorporation.

Burlington Beach.—Amending acts relating thereto.

Canada Central Ry.—Extending time for construction.

Canadian Northern Ontario Ry.—Voting land in aid of construction of Sudbury-Port Arthur line.

Cobourg, Port Hope and Havelock Electric Ry.—Act of incorporation.

Cobourg Radial Ry.—Act of incorporation.

Collingwood.—Confirming agreement with regard to shipbuilding.

Dunnville, Wellandport and Beamsville Electric Ry.—Extending time for construction.

Eastern Ontario Electric Ry.—Act of incorporation.

Farrar Transportation Co.—Respecting finances.

Ferries.—Act respecting ferries.

Fort William.—Act affecting city and street railway, etc.

Hamilton.—Act respecting city and its relation to, among other things, the street railway.

Lake Superior and Northern Ry. and Transportation Co.—Act of incorporation.

Manitoulin and North Shore Ry.—Respecting the land grant.

Midland.—Respecting the town of Midland.

Morrisburg Electric Ry.—Amending act of incorporation.

Niagara Peninsular Ry.—Authorizing extension of line.

Ontario Interurban Ry.—Act respecting the company.

Ontario West Shore Electric Ry.—Granting additional powers.

Ottawa and St. Lawrence Electric Ry.—Act of incorporation.

People's Ry.—Act of incorporation.

Peterboro Radial Ry. — Extending time for construction.

Port Arthur.—Act respecting the city and the street railway.

Railway.—Amending the Ontario Railway Act.

Railways.—Granting aid to certain railways.

Sault Ste. Marie.—Confirming an agreement with reference to bonus for dry dock.

Sault Ste. Marie and St. Joseph Island Ry.—Act of incorporation.

Simcoe Ry. and Power Co.—Act of incorporation.

Southwestern Traction Co.—Granting additional bonding power.

Stratford and St. Joseph Radial Ry.—Granting extension of time for construction.

Temiskaming and Northern Ontario R.—Authorizing construction of extension to Gowganda.

Tillsonburg and Southern Counties Radial Ry.—Act of incorporation.

Toronto.—Respecting the city and its relation to the street railway, among other things.

Toronto Suburban Ry.—Extending time for construction.

The T. & N.O. Ry. is in the market for two 10-wheel passenger and four 10-wheel freight locomotives.

RAILWAY DEVELOPMENT

Projected Lines, Surveys, Construction, Betterments, Etc.

Abitibi and Hudson Bay Ry.—The Dominion Parliament has granted the company a further extension of time within which it may commence and complete the various lines of railway which it is authorized to construct. (Feb., pg. 101.)

Alberta Central Ry.—An act has been passed by the Dominion Parliament authorizing the construction of an extension of the previously authorized line terminating at Rocky Mountain House, Alta., to the G.T. Pacific Ry., near Yellowhead Pass, and easterly from Battle River to Saskatoon or Warman, Sask., and from near Red Deer, Alta., southerly to Moose Jaw, Sask. An extension of time for the construction of the Battle River-Rocky Mountain House line is also granted. (Mar., pg. 171.)

Algoma Central and Hudson Bay Ry.—The Ontario Legislature has granted an extension of time to Dec. 31, 1911, to earn the land grant voted in 63 Victoria, chap. 30. The conditions provide that the Lake Superior Corporation, which owns the railway, commence work forthwith on the extension and betterment of the plants of the various subsidiary companies at Sault Ste. Marie, Ont., and expends $1,500,000 upon such betterments before Dec. 31, 1910; that surveys be started at once upon the railway extension, that construction be started before May 1, 1910, and that thereafter not less than $25,000 a month be expended upon such work until the railway has been extended, including the main line and the Michipicoten branch, to a connection with the C.P.R. main line, such extension to be completed by Dec. 31, 1911; that the Crown shall have the right to throw open the 1,439,300 acres of land set aside in respect of such land grant by Order-in-Council of Feb. 4, 1905, to prospectors until Dec. 31, 1910, or such earlier date as the railway has been completed; that the Crown shall have the right to permit settlers to enter upon the lands and to grant patents in respect of such settlement. The money received in respect of any grants under these two conditions is to be placed in a separate fund and paid over to the company on completion of the railway within the date named. Under the first of these two conditions all discoveries of iron, coal, iron pyrites or nickel are reserved for the company, and under the second all minerals are reserved. (Mar., pg. 171.)

Alsek and Yukon Ry.—The Dominion Parliament has granted an extension of time within which the authorized lines of railway may be constructed. (Jan., pg. 17.)

Athabasca Ry.—The Dominion Parliament has granted an extension of time for two years within which construction work may be started on its authorized line of railway. (Jan., pg. 17.)

Atlantic, Quebec and Western Ry.—C. B. K. Carpenter, General Manager of the company concerned in financing the construction of this railway, stated in Montreal, April 16, that the line will be completed from Port Daniel to Pabos, Que., by June 30, and the whole line to Gaspe by Aug., 1910.

Blind River Colonization Ry.—The application to the Ontario Legislature for an act incorporating a company with this title was not proceeded with. (Mar., pg. 171.)

Brandon Transfer Ry.—The Dominion Parliament has granted an extension of time within which construction may be started upon the authorized line of railway in Brandon, Man. (Mar., pg. 171.)

British Columbia and Manitoba Ry.—The Dominion Parliament has changed the title of the Crawford Bay and St. Mary's Ry. Co. to the British Columbia and Manitoba Ry. Co. It has also granted an extension of time for construction, and given power to enter into agreements with the Northern Empire Ry.

The C.B. & St. Mary's Ry. Co. was incorporated in 1904 with power to construct a railway, to be operated by steam or electricity, from Crawford Bay, on Kootenay Lake, to Fort Steele, B.C., and by an act passed in 1906, it was authorized to extend its railway from Fort Steele, easterly to Lethbridge, Alta. (Mar., pg. 171.)

Bruce Mines and Algoma Ry.—A subsidy of $3,000 and 1,000 acres of land per mile has been voted by the Ontario Legislature in aid of the construction of an extension of this railway from its present terminus at Rock Lake, northerly for six miles. Construction of the extension has to be commenced within one year and completed within two years of the passing of the act. (Feb., pg. 101.)

Burk's Falls Ry.—A deputation from Burk's Falls district, Ont., waited on the Premier at Toronto, Mar. 31, to ask for a subsidy towards the construction of this projected railway from Burk's Falls to the French River, about 80 miles. It was stated that the line was to be constructed by interests allied to the G.T.R. as a colonization railway. Consideration of the project was promised, but the Government subsequently decided not to make any grant. (Sept., 1908, pg. 613.)

Burrard, Westminster, Boundary Ry. & Navigation Co.—The Dominion Parliament has granted a further extension of time for the constructing of the authorized line of railway, and permitting the company to enter into agreements of various kinds with the Vancouver, Westminster and Yukon Ry. Co. (Feb., pg. 101.)

Canada Central Ry.—The Ontario Legislature has extended the time within which the company may start construction upon its projected railway. (Apr., pg. 247.)

The Canadian Western Ry. Co. has been incorporated by the Dominion Parliament. (Mar., pg. 171.)

Central Ontario Ry.—The Ontario Legislature has voted a cash subsidy of $3,000 a mile in aid of construction of the northerly extension for 15 miles of the line now terminating at a junction with the Canada Atlantic Ry. between Whitney and Madawaska stations. Construction has to be started within three months and completed within two years of the passing of the act. (Feb., pg. 101.)

The Chicago, Milwaukee & Puget Sound Ry. is the title under which the Chicago, Milwaukee and St. Paul Ry. is constructing its western extension to Tacoma, Wash. Construction was commenced about three years ago, and it is expected that the line will be completed by May 1. The new line begins at Mobridge, S.D., and crosses the Rocky Mountains summit in Pipestone Pass, at an elevation of 6,350 ft., where there are two tunnels respectively 2,268 and 1,148 ft. long. At the summit of the Bitter Root Mountains, which are crossed at an elevation of 4,160 ft., there is an 8,751 ft. tunnel, and the line is carried over the Cascade Mountains by the Susqualine Pass. (See also Canadian Western Ry., Mar., pg. 171, and pg. 173.)

The Cobalt Range Ry. Co.'s bill for extension of time has been approved by the Commons Railway Committee. (Feb., pg. 101.)

Collingwood Southern Ry.—The Dominion Parliament has granted an extension of time within which this projected railway may be constructed. (Mar., pg. 173.)

Crawford Bay & St. Mary's Ry.—See British Columbia and Manitoba Ry.

Elkhorn Northern Ry.—Application will be made to the Manitoba Legislature for an act incorporating a company with this title, with power to construct and operate railway of standard or other gauge, and to use steam, electric or other motive power, from range 27, 28 or 29 at the International boundary, easterly, westerly and northerly to Elkhorn, and to the northern boundary of the province; also branch lines, bridges, etc., and to operate ferries, hotels, pleasure parks, etc. J. Carse, Elkhorn, Man., is acting for the applicants.

The Excelsior Coal Mining Co. has been incorporated under the Manitoba Companies Act, with a capital of $300,000 and office at Winnipeg for the purpose of mining coal, oil and metals, and in connection therewith to construct and operate railways, switches and sidings, and to use steam or electricity as a motive power. The provisional directors are: J. S. Douglas, A. Douglas, A. B. Wooldridge, F. Ashford, J. Malcolm, and D. W. McKerchar, Winnipeg.

Farmers' Ry.—D. W. Hines, of Hannah, Sask., has been spending some time in North Dakota, advocating the construction of a railway from Duluth, Minn., via Regina, Sask., to Hudson Bay. He says he has secured a charter covering the construction of a line from Regina to Melfort, Sask., and that as soon as he can get sufficient support for his project he will make application to the Dominion Parliament for authority to extend the line from Regina to the International boundary. He proposes to finance construction by securing as shareholders, the farmers along the route, each of them subscribing in cash for one share of $100 and undertaking to do so much grading on the line in their vicinity, receiving scrip in payment therefor.

Halifax and Southwestern Ry.—In reply to a question in the N.S. Legislature recently, the Premier said it was the company's intention to erect a shipping pier at Port Wade, N.S., the Middleton and Victoria Beach branch terminus without delay. (Sept., 1908, pg, 615.)

Hudson's Bay and Pacific Ry.—The Dominion Parliament has granted a further extension of time for the construction of the projected line of railway from Hudson Bay to the Pacific coast.

A company with the title of the Hudson Bay and Pacific Development Co. has been incorporated in London, Eng., with a capital of £150,000. It has for its object the construction and operation of railways, tramways, telegraph and telephone lines in Canada and elsewhere. (Mar., pg. 173.)

Intercolonial Ry.—The Dominion Parliament has voted the following addition-

New Ways To The Woods

The six railways of the Canadian Northern Railway system offer the widest choice of new territories for the fisherman, canoeist, camper and hunter.

IN NOVA SCOTIA the Halifax and Southwestern Railway, from Halifax to Yarmouth, serves seven hundred miles of ocean shore; two score generous trout streams and the famous Rossignol lake system.

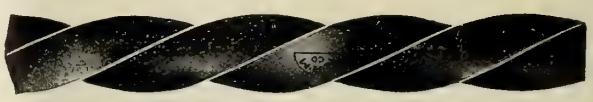
IN CAPE BRETON, sixty miles of the Gulf of St. Lawrence shore is skirted by the Inverness Railway, which gives easy access to the Margaree valley—far-famed for its salmon fishing.

IN QUEBEC, the Canadian Northern, Quebec and Quebec, and Lake St. John Railways give easy access to the Saguenay, Upper St. Maurice, the Batiscan, the La Tuque game and fish preserve, and the valleys of the St. Lawrence and Ottawa. All good fishing waters, abounding with ouananiche, trout and bass.

IN ONTARIO, the entire range of the Muskokas, the Georgian Bay hinterland, the French, Pickerel, Still and Maganetawan rivers—well stocked with bass, mascalonge, and pickerel, are best reached by the Canadian Northern Ontario Railway.

IN WESTERN ONTARIO and the prairie provinces, the Canadian Northern Railway serves over three thousand miles of splendid territory. The Rainy River section follows the old Dawson fur trail, which is the finest canoe trip on the continent. There is an amplitude of sporting opportunities for the camera hunter, the fisherman and canoeist.

For literature and general or special information inquire of the information Bureau, Canadian Northern Railway System, Toronto.



COLD TWISTED STEEL BARS

FOR CONCRETE REINFORCEMENT

For this class of work there is a demand for a bar possessing a high elastic limit, and great tensile strength, also of such shape as to permit of close bond with the concrete.

Our Cold Twisted Steel Bars by reason of their meeting these requirements have been found to give entire satisfaction.

We make all sizes from 1-4 in. to 1 1-4 in., lengths 6 to 38 ft.

Maintenance Windsor branch line	7,000

The Minister of Railways, in speaking of the votes stated that since the I.C.R. got into Halifax there had been expended in that city upon capital account, $4,155,000. The present vote of $180,000 would include the following works: Track, ballast and ties, west side Water St., $20,000; heating and piping building, Kempt yard, $5,000; boilers for power plant, $15,000; double tracking cotton factory branch, grading and subway, and grading new yard, $40,000; land and legal expenses, right of way, cotton factory branch, $7,000; track, ballast, ties, $15,000; engine house, $50,000; rails and fastenings and ties for engine house, $6,000; tracks, Richmond yard, $2,000; water supply, $5,000; land at Richmond, $10,000; electric lighting, $5,000. The estimated cost of the line from Sydney Mines to River George is $394,135, the distance being 8.75 miles. It was hoped to have gone on with the construction this year, but owing to the financial conditions it had been deferred; a vote of $50,000 being asked on account of the right of way. The same remark applied to the cut off at Moncton, the estimated cost of which is $374,000. The total estimated cost of the shops at Moncton was $2,000,000, and there had been already expended $1,351,446.76. With respect to the Windsor Branch line the Minister stated that the present 56-lb. rails were being replaced with 67-lb. rails. (Apr., pg. 247.)

Lac Seul, Rat Portage and Keewatin Ry.—The Ontario Legislature has granted 1,000 acres of land a mile in aid of the construction of a railway through Kenora, northerly to the National Transcontinental Ry., by this company. Construction has to be started within two years and completed within three years of the passing of the act. (Sept., 1903, pg. 617.)

Lake Superior and Northern Ry.—The Ontario Legislature has incorporated a company with this title instead of the Lake Superior and Long Lake Ry. and Transportation Co. applied for in the application to construct a railway, and to operate car ferries so as to effect a connection between Thunder Bay and the C.P.R. near the mouth of Black River, to the northeast angle of Long Lake, and a junction with the National Transcontinental Ry. The provisional directors are: M. Patrick, W. P., W. T., M. Phillip and J. T. Davis, who form the firm of M. P. and W. T. Davis, who have a contract for the construction of a 200-mile section of the National Transcontinental Ry. in districts D and E. The immediate object of the construction of the railway is to enable the contractors to take in supplies to their camps, but it was stated, when the bill was before the Legislature, that at some future date the company might seek power to extend the line to James Bay. (Apr., pg. 247.)

Liverpool and Milton Ry.—In reply to questions in the Nova Scotia Legislature recently, the Premier said the total sum paid by the Government on account of this railway was $48,000, which was paid Dec. 28, 1907. There was no agreement in writing with the Halifax and Southwestern Ry. in respect to the L. and M.R., that company had not acquired the undertaking of the L. and M.R., and had not executed a mortgage to the Government in compliance with chap. 14 of the statutes of 1907. The balance to be paid by the Government on account of the railway was $23,500. All construction on the line had been completed. (May, 1908, pg. 331.)

Manitoulin and North Shore Ry.—The Ontario Legislature has extended to Dec. 31, 1911, the time within which the company may earn the land grant voted by chap. 23, 7th Edward VII, with respect to the portion of the railway from Little Current to Sudbury. The conditions are that surveys shall be started before May 1; that construction be started before June 1; that $15,000 a month be expended until Dec. 31, in actual construction work; that $25,000 a month be expended upon construction from Jan. 1 to Dec. 31, 1910; that at least 36 miles of the line, in addition to the mileage now constructed, be operated by Jan. 31, 1911, and further that the entire line from Sudbury to Little Current be completed by Dec. 31, 1911. A cash subsidy of $5,000 a mile has also been voted to aid in the construction of the line from Little Current on Manitoulin Island, to a point 13 miles from Sudbury. (April, pg. 247.)

The New Brunswick Coal and Ry. Co. Commissioners have completed the ballasting of 20 miles between Norton and Chipman, N.B. In addition many wet cuttings, which had given serious trouble were patched up. It is recommended, in the Commissioners' annual report to the Government, that ballasting be recommenced at an early date and completed during this year. The estimated cost is $20,000. (Sept., 1908, pg. 617.)

Niagara Peninsular Ry.—The Ontario Legislature has extended the time within which this projected railway may be constructed, and authorizing an extension to St. Catharines. (Apr., pg. 249.)

Pincher, Cardston and Montana Ry.—It is reported that the title of the Alberta Oil, Coal and Wheat Ry. has been changed as above. A. J. McGuire, Pincher Creek, Alta., is interested. (Oct., 1908, pg. 711.)

Prince Edward Island Ry.— The following sums have been voted by the Dominion Parliament; Branch line Harmony to Elmira, $50,000; to increase accommodation at Charlottetown, $184,000; extension to wharf at Souris (further amount required), $23,000; to provide for land claims as follows: Montague branch, $6,851.51; Murray Harbour branch, $4,383.77; Vernon River branch, $2,216.69.

With reference to the Harmony-Elmira branch line, the Minister of Railways stated that tenders for construction had been received, and the firm putting in the lowest tender had been asked if they would go as far as the appropriation of $50,000 would carry them this year, on the understanding that Parliament would provide for further expenditure next year. As soon as a reply was received the contract would be let. It was the intention to proceed with the work just as soon as the conditions would permit. The estimated cost of the branch was $380,000. Some objection was made by members from the Island constituencies on the ground that the last surveyed route did not touch at Souris, as did former surveys, and that consequently a good deal of inconvenience would be caused. The Minister promised that the Chief Engineer would go over the route, and look into the matter. (Apr., pg. 249.)

St. John Valley Ry.—A company is being organized at Fredericton, N.B., for the purpose of constructing a railway along the St. John River Valley. The provisional directors are representatives of the Boards of Trade of St. John, Fredericton, Woodstock and other towns interested. A bill for incorporation is before the New Brunswick Legislature, the capital being placed at $1,000,000. The N.B. Premier stated to a deputation Mar. 31, that the Government would, under certain conditions, guarantee bonds to the extent of $25,000 a mile for the 180 miles it was proposed to construct. One of the conditions suggested was that the company should secure an agreement with the I.C.R. for the operation of the line upon a division of the gross revenue in the proportion of 60% to the I.C.R. and 40% to the construction company. A deputation waited upon the Dominion Government April 10 with a view of ascertaining if a Dominion subsidy at the usual rate could be obtained, and an agreement for the operation of the line entered into upon the terms named.

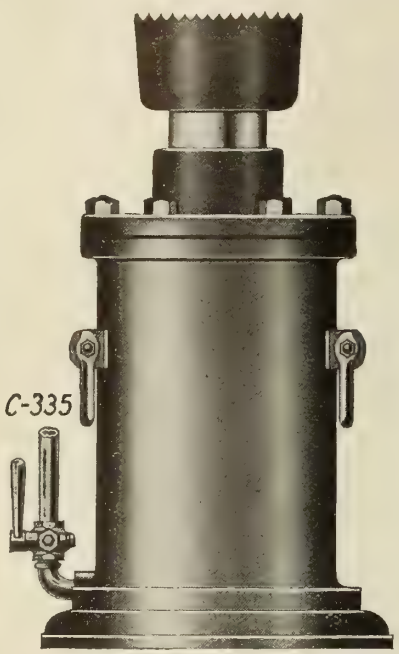
In 1907 the New Brunswick Government had some negotiations with Mackenzie, Mann & Co., Ltd., with a view to the construction of such a line as an extension of the C.N.R. system. This company on July 10, 1907, stated that it would be prepared to construct such a line on the grant of a Dominion subsidy up to $6,400 a mile, and a guarantee of bonds by the Province of $30,000 a mile; the Province to meet any deficiency of interest—outright for seven years, and for three years thereafter any deficiency of interest paid by the Government to be regarded as a debt due by the company, and to be paid by a further issue of bonds.

A deputation from St. John, Fredericton, Woodstock, Andover, Lakeville, Grand Falls and other places in New Brunswick, waited on the Premier, the Minister of Railways and the Minister of Public Works, at Ottawa, April 16, and urged the necessity of the Government aiding in the construction of this projected line. The Premier promised that the application should receive every consideration. (Apr., pg. 249.)

The Salisbury and Albert Ry. Co. is the title of a company which has been incorporated by the Dominion Parliament to take over and operate the Salisbury and Harvey Ry. in New Brunswick. (Apr., pg. 249, and Mar., pg. 175.)

Southern Central Pacific Ry.—The Dominion Parliament has granted an extension of time for the construction of this projected railway from Vancouver, B.C., via Kootenay Pass to Old Man River, and thence to Fort Churchill, Hud-

Compressed Air-Jacks



For short lifting around car and repair shops and manufacturing plants.

Rand Jacks are built in several styles from 4 to 30 thousand pounds capacity.

All of the latest construction, fitted with safety check valves for holding the load if the hose becomes detached or burst.

We carry in stock or can make quick delivery of all compressed air appliances and Rand Air Compressors.

WALKERVILLE, ONTARIO.

son Bay. (Jan., pg. 19, and Sept., 1908, pg. 619.)

Superior and Western Ontario Ry.—A land grant of 1,000 acres of land a mile has been voted by the Ontario Legislature to this company to aid the construction of a line from Waco station, on the Lake Superior branch, G.T.P.R., for a distance seven miles northerly. Construction has to be commenced in one year and completed within two years of the passing of the act. The company's application for incorporation is before the Dominion Parliament. (Feb., pg. 105.)

Temiskaming and Northern Ontario Ry.—The Ontario Legislature has authorized the Commissioners to extend the railway from Charlton to Gowganda. The Premier said it was not the policy of the Government to demand at once a blanket authority for so large a sum as would be required to extend the line from Charlton to Sudbury. In a year's time authority might be asked to extend the line to Sudbury, or further, but at present the Government only desired to have the right to authorize the Commissioners to proceed with construction into the Gowganda district. (Apr., pg. 249.)

Vancouver, Fraser Valley and Southern Ry.—The Dominion Parliament has granted an extension of time within which this projected railway may be constructed. (Mar., pg. 175.)

Vancouver, Westminster and Yukon Ry.—The Dominion Parliament has granted an extension of time within which this projected railway may be constructed and also authorizing it to enter into agreements with the Burrard, Westminster, Boundary Ry. and Navigation Co. (Mar., pg. 175.)

Winnipeg and Northwestern Ry.—The Dominion Parliament has granted an extension of time for the construction of this projected railway, and authorizing the construction of the following branch lines: From narrows of Lake Manitoba westerly to the Assiniboine River, thence northerly to Nut Lake; and from near Good Spirit Lake southeasterly to the G.T.P. Ry., between the Manitoba boundary and the second meridian. (Jan., pg. 19.)

Responsibility for Interlocking Crossing Accidents

In June, 1908, the G.T.R. made an application to the Board of Railway Commissioners for a decison that the senior company should not be responsible for all damages arising from acts of negligence by the man in charge of interlocking plant and that all orders for interlockers should contain a provision that permission for the junior company to cross at grade be upon the express understanding that the junior company assume full responsibility for damages to its employes' person or property or to the person or property of others using its railway and in any wise resulting from accidents occasioned by the negligence of the man in charge of the interlocking plant. The question came before the Board in July, 1908, when it was decided that the electric railway companies be heard. At a hearing on Oct. 6, 1908, the application was opposed by the Canadian St. Railway Association's counsel and also by the Canadian Northern Ry's counsel. It was again before the Board at a sitting in Toronto, Nov. 13, 1908, when judgment was reserved. On April 13, Chief Commissioner Mabee gave the following judgment:

"The senior roads complain that under the practice heretofore in force, an unfair burden is placed upon them when leave is granted to a junior road to cross their right-of-way and tracks. The senior road is in possession of the field, and although it is necessary in the public interest that under proper conditions and at proper points, junior roads should have the privileges of crossing, yet it strikes one at the outset that such privilege should not carry with it any burdens upon the senior company, other than those absolutely necessary as incidental to the crossing. Where an interlocking plant is established, an additional man is required to operate it, and the practice has been for the senior company to appoint this man. This imposes upon the senior company some additional risk that cannot be avoided; there must be at times delays in operation; the crossing itself is an added peril carrying with it dangers of collision and loss to the senior company, that it would not be subject to had the crossing not been permitted; but hitherto in most instances, I think in all cases where the Board has made crossing orders, the man in charge of the interlocker has been regarded as the employe of the senior company only, in which event if through his carelessness or negligence damages arose to the property or employes of the junior company, recovery could be had against the senior company. This seems absurd. The senior company may resist to the utmost the application to cross; this may be forced upon it; then a careful and skilful man may be selected to operate the interlocker, but through some fault or lapse of his, a train on the junior road is derailed, and the senior company is held for all the damage. The injustice of this situation is apparent. Before the establishment of this Board, the companies were fairer than that to one another, and agreements were provided where the junior company recognized that it was unreasonable to impose upon the senior company the liabilities above pointed out.

"When this application came up, I thought the electric railway companies should be notified; this was done, and their views were placed on record. The situation as to these roads is, I think, quite different from that of the steam roads. In most instances where they cross steam railways, these crossings are upon public highways where neither company owns its right-of-way, but as to which each has an easement only. Differences as to result in the event of collisions and many other matters that occur to one, make it necessary to eliminate all electric roads from the consideration of this application, and the conclusions arrived at will have application to the steam roads only. It is quite impossible to say how matters would work out upon the whole if left as they now are; the older roads are continually building new lines, which are junior to other trunk and branch lines, and I suppose all the roads have both senior and junior crossings at various places, but if the loss did in the end even up, it would be by accident only, and this is a risk that should not be permitted to continue.

"The senior company, while appointing the man to operate the plant, recognizes the interest of the junior company in the selection, and the latter company should have the right to require his dismissal for cause. It was suggested upon the argument that the junior company should be given the right to operate the plant. This, of course, would not be reasonable and would be an unjust interference with the property and franchise rights of the senior company. In some existing agreements, the signalman or operator of the interlocker is called a 'joint employe.' Now, if an accident happens upon the junior road, owing to the negligence of this signalman, and he is not a fellow servant of the trainmen upon the junior road, it is likely their damages against the senior company would be measured in a different scale than if the signalman were a joint employe of both companies. These damages should not be borne by the senior company, but should be thrown back upon the junior company, so this anomalous position would be the result. The junior company is paying all the expense of installing and operating a plant to protect its patrons, property and employes; the man in charge causes damage to the latter in permitting two trains to collide, and the junior company is compelled to compensate upon a common law basis, while if this same crossing is sanctioned by the Board without the installation of an interlocker, the employes of the junior road injured in a collision at the crossing, might, in some cases, be without redress. This signalman, although selected by the senior company, is always paid by the junior company; he is performing services for both. Sometimes the greater services are rendered to the junior company; the latter can, under certain circumstances, call for his dismissal; why do not all these elements establish a joint service? The whole situation is an artificial one, arising through terms and conditions imposed by the Board in the interest of the safety of the public, the employes, and the preservation of the property of the railway companies. The senior company is forced, by the necessities of the junior company, to engage this extra man, and if it exercises care in the selection, it seems to me it discharges its duty to the junior company and should not be liable to the latter company for the negligence of the man engaged; it has in addition to bear its chance of loss by reason of the negligence of this man, forced upon it by the junior road. The senior company probably, in most instances, has the most at stake at new crossings, so the engagement of the signalman is left in good hands. The junior company should not be placed in a position where it might be held for greater damages because it is called upon to provide protection, than it would were it at liberty to cross without protection. Again, the junior company should not be subjected to liability upon a higher scale, because it is prevented from selecting the man it has to pay for operating the protective plant it has been compelled to instal.

"I think from every point of view, in fairness to both roads, this signalman should be regarded as a 'joint employe' of each, and that where one steam road applies for leave to cross another at grade, permission for such crossing should be given where an interlocker is required to be installed, only upon condition that the companies placed in charge of the interlocker a competent joint signalman, who shall be the joint employe of both companies, selected by the senior company and liable to dismissal for cause upon complaint or objection by the junior company, and that then each company shall be liable for all the loss or damage suffered or sustained on its own lines by its patrons or employes, or to its property, caused by the negligence of the joint signalman, and in no event shall the companies, as between themselves, be liable for any loss or damage

of any nature or kind whatsoever happening upon the line or lines of the other, and caused by or arising from the negligence of such signalman.

"It was understood that the conclusions arrived at in this matter should apply to all interlockers ordered or established since Oct. 1, 1908, but, of course, as to any in existence before that time, or as to those covered by agreements between the companies themselves, and continuing upon foot these conditions will have no application.

"If the interested parties desire to speak to the settlement of a permanent and settled form of conditions to go in these orders in the future, it may be taken up at the next meeting. It might be well to embody the conditions that appear in, I think two, former orders regarding interlockers, with those above indicated, so the whole interlocker provisions may appear in each order as it issues."

The Board will hear at its sittings in Ottawa June 1, such representations as the parties interested desire to make in regard to the conditions to be inserted in orders of this nature in future.

Board of Railway Commissioners

The third report of the Board of Railway Commissioners has just been issued by the Dominion Government. In common with the other reports issued it is for the year ended Mar. 31, 1908. According to custom no reports are made public until after they have been presented to Parliament, and it is a regulation, apparently more honored in the breach than in the observance, that all reports shall be ready for presentation to Parliament at the opening of the session. The present session opened Jan. 20, and reports from the various departments have been issued at intervals ever since. The report of the Board of Railway Commissioners was presented to Parliament Mar. 17, fourteen days less than a year after the date of the closing of the report. If this, and any other of the Departmental reports are to be of any real service to the public they should be issued much more promptly. If the staffs in the departments are not sufficiently numerous to compile the reports at an earlier date, they should be increased, and if the delay originates with the printing bureau, then the King's Printer should have sufficient authority given him to do what is necessary in order to have all the reports ready for the opening of Parliament at any rate if the necessity of their being presented to the House before they are issued to the public cannot be dispensed with. This regulation is certainly the cause of ridiculous delay, and it causes a great deal of unnecessary inconvenience to the public who are the persons most directly concerned. Where the public interest and antiquated constitutional factions clash, to the detriment of the former, it is time that the latter were swept away.

The Ontario Government which issues reports about as bulky, and containing as many tables (with one or two exceptions) as those issued by the Dominion Government, manages to get them out much more promptly. The third annual report of the Ontario Railway and Municipal Board, which has also just been issued, is for the year ended Dec. 31, 1908. It contains a great deal of tabular matter with an index, and runs to 560 pages, while the Dominion report only extends to 244 pages.

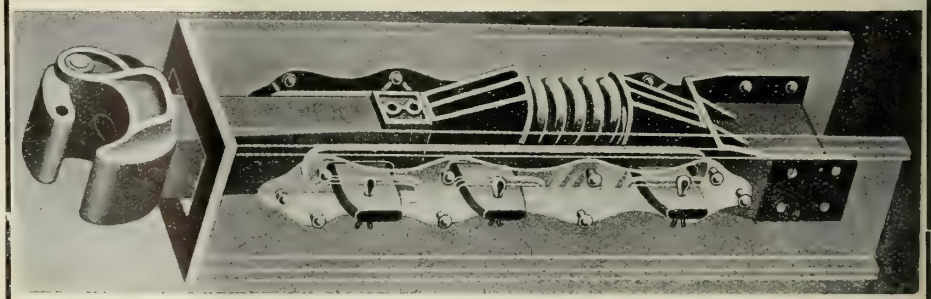
PEERLESS
The Fence that saves Expense

It is the best fence you can buy because it is the cheapest, when measured by the years of good service it will give. PEERLESS FENCING is made of all No. 9 hard, springy wire, which is not easily affected by weather, wear or unruly stock. Just the fence suited to railroads. Neat in appearance—conforms to topography of ground and at the same time upright wires are perpendicular. It will pay you to get the free book we are sending to all who write us. A postal will do.

The
Banwell Hoxie Wire Fence
Company, Limited
Dept. 17 HAMILTON, ONT.
WINNIPEG, MAN.

STRONGER
Than Stock-Weather and Wear

THE
Farlow Twin Spring Draft Gear



Designed for Wooden or Steel Cars and Engines.
Pulling Strains Distributed Equally on the Three Cross Keys.
Buffing Shocks Distributed on End Sill, Three Cross Keys, Filler Block and Body Bolster. Cannot be Pulled Out or Driven Back and Will Not Spread Sills.

FARLOW DRAFT GEAR CO.
Baltimore, Md. Chicago, Ill.

Railway Rolling Stock Notes

The Halifax and Southwestern Ry. has ordered 2 cafe-parlor cars 59 ft. long, from Rhodes Curry & Co., Ltd., Amherst, N.S.

The Canadian Locomotive Co., Ltd., Kingston, Ont., delivered 4 Mogul locomotives to the G.T.P.R., between Mar. 27 and Apr. 19.

The Dominion Parliament has voted $95,800 for new machinery for locomotive and car shops on the line, and $2,500 to provide a 100-ton track scale at Aston Jct., Que., on the Intercolonial Ry.

The Commissioners of the New Brunswick Ry. and Coal Co. are enquiring for a second-hand combination baggage and first-class car. They are also preparing to equip the balance of their freight cars with air brakes.

The C.N.R., between Mar. 15 and Apr. 15, received 25 stock cars from the Crossen Car Mfg. Co., Ltd., Cobourg, Ont.

The I.C.R., between Mar. 15 and Apr. 15, received 3 second-class sleeping cars from the Crossen Car Mfg. Co., Ltd., Cobourg, Ont.

The Montreal Locomotive Works has delivered 2 saddle tank locomotives to Cavecchi and Pagano, N.T.R. contractors, in New Brunswick; 2 Mogul locomotives to the J. D. McArthur Co., contractors, Winnipeg, and 1 locomotive to the Dominion Coal Co.

The C.P.R., between Mar. 15 and Apr. 9, received the following additions to rolling stock: 232 wooden box cars, 49 flat cars, 2 first-class cars and one locomotive, class M4, from its Angus Montreal shops; and 129 steel frame box cars from the Dominion Car and Foundry Co., Montreal.

The Dominion Parliament has voted $170,550 in the supplies for the year for the Intercolonial Ry. It is proposed out of this vote to provide a commissary car; to equip 500 platform cars with racks to carry pulpwood; to increase the size of steam heating pipes in passenger cars; and to equip cars with new gas light apparatus.

The C.P.R., between Mar. 15. and Apr. 9, ordered the following rolling stock: 2 locomotives, class D.10; 1 baggage and express car, 1 mail and express car, 61 box cars and 1 stock car at its Angus, Montreal, shops; 1 van at its Farnham, Que., shops; 1 steel coal car and 1 Hart-Otis ballast car at the Dominion Car and Foundry Co., Montreal, and 3 60-ton cranes and 1 pile driver in the U.S.

The G.T.P.R., between Feb. 15 and Apr. 15, received the following additions to rolling stock: 474 box cars, Nos. 308350 to 308824, from the Canada Car Co., Montreal, and 400 box cars, Nos. 309625 to 310024, from Rhodes, Curry & Co., Amherst, N.S. In our Apr. issue we announced that the G.T.P.R. had ordered 8 sleeping cars from the Canada Car Co. We are advised that this order has been changed to 8 first-class cars, making 24 first-class, instead of 16 as then stated.

The C.P.R. freight locomotive 1850, illustrated on this page, which has just been turned out of the Angus, Montreal, shops, is believed to be the heaviest freight locomotive at present operating in Canada, having a weight of 195,000 lbs. on the drivers, and 25,000 lbs. on the truck, a total of 220,000 lbs. The driving wheels are 63″ diar.; cylinders 24″ by 32″; boiler pressure 180 lbs.; heating surface, flues, 2,630 sq. ft.; firebox, 180 sq. ft.; superheater tubes, 450 sq. ft.; total, 3,260 sq. ft. It is equipped with the C.P.R. type of Vaughan-Horsey superheater, and has a tender capacity of 5,000 gals. water and 10 tons coal. The weight of the tender loaded is 123,000 lbs.

The Montreal Locomotive Works is building two 4-wheel locomotives for the Quebec Contracting Co., of which the following are chief particulars:

Cylinders	10″ by 16″
Drivers, diam.	30″
Boiler, type	Straight top.
" pressure	150 lbs.
Firebox	42″ by 24″
Tubes, no. and diam.	98-1¾″
" length	8′ 2″
Wheel base	5′ 0″
Weight	36,000 lbs.
Capacity, water	600 U. S. galls.
" coal	600 lbs.

The International Ry. of New Brunswick has ordered one, and the Temiscouata Ry., two 10-wheel locomotives from the Montreal Locomotive Works, of which the following are chief particulars:

Cylinders	18″ by 24″
Drivers, diam.	51″
Boilers, type	Extended wagon top.
" pressure	160 lbs.
Firebox	90″ by 33¾″
Tubes, no. and diam.	198-2″
" length	12′ 3″
Wheel base, driving	10′ 6″
" " engine	20′ 8″
" " engine and tender	49′ 0″
Weight on tender truck	25,500 lbs.
" on drivers	83,000 lbs.
" total engine	108,500 lbs.
" total tender	89,000 lbs.
Capacity, water	3,500 imp. galls.
" coal	8 tons.

Following are chief dimensions and details of special equipment of the 500 Otis all steel dumping gondola cars, 1909 design, which the Dominion Car and Foundry Co., Montreal, is building for the C.P.R., as mentioned in our Apr. issue:

Length, inside	36′ 9½″
Width "	9′ 6″
Height "	5′ 0″
Truck centres	26′ 0″
Length over end sills	38′ 10″
Wheel base of truck	5′ 6″
Air-brakes	Westinghouse K. C. 1012
Couplers	Simplex.
Truck bolsters	"
Brake beams	"
Draft Springs	M.C.B. class G tandem.
Trucks	Arch bar.
Journal boxes	McCord malleable.
Wheels	C.P.R. standard.
" weight, each	750 lbs.
Side bearings	Susemihl roller.
Brake shoes	Am. Brake Shoe and Foundry Co.'s steel back.
Dust guards	Harrison.
Capacity	100,000 lbs.

Following are the chief dimensions and details of special equipment of one articulated compound locomtive (0-6-6-0) which the C.P.R. is building at its Angus, Montreal shops;

Total weight	250,000 lbs.
Cylinders	22″ and 33″
Stroke	26″
Drivers, diam.	57″.
Boiler, type	Straight top
" pressure	180 lbs.
Heating surface, total	4,000 sq ft.
Tubes	2″ diam.
" lengths	328, 9′ 3″; 401, 8′ 6″
Firebox	10′ 0″ by 4′ 11¾″

ONE OF THE LATEST CANADIAN PACIFIC RY. FREIGHT LOCOMOTIVES.

Grate area	58.3 sq. ft.
Capacity, water	5,000 imp. galls.
" coal	10 tons.
Air-brakes	Westinghouse.
Axles	Mild steel.
Brake beams	Simplex truss.
" shoes	C.P.R. standard.
Couplers	Tower.
Headlight	Pyle National Electric.
Journal bearings	Canadian Bronze Co.
Springs	C.P.R. standard crucible.
Wheel tires	Krupp crucible.
" centres	Cast steel

and C.P.R. re-heater in centre of boiler.

Following are chief dimensions and special equipment of the ten 10-wheel locomotives for mixed traffic, which the C.P.R. is building at its Angus, Montreal, shops, as mentioned in our Apr. issue:

Weight on drivers	141,000 lbs.
" total	190,000 lbs.
Cylinders	22½″ by 28″
Drivers, diam.	63″
Boiler, type	Wagon top.
" pressure	180 lbs.
Heating surface, total	2,418 sq. ft.
Tubes, no. and diam.	240-2″; 24-5″
" length	14′ 3″
Firebox	8′ 6⅛″ by 5′ 9⅞″
Grate area	49 sq. ft.
Capacity, water	5,000 imp. galls.
" coal	10 tons.
Airbrakes	Westinghouse, No. 6 E. T.
Axles	Mild steel
Brake beams	Single truss.
Brake shoes	C. P. R. standard
Couplers	Tower.
Headlight	Pyle National Electric.
Journal bearings	Canadian Bronze Co.

Springs	C. P. R. standard crucible.
Wheel, tires	Krupp crucible.
" centres	Cast steel.
Wheels, tender	Solid rolled steel.
Superheater	C. P. R.

Following are the chief dimensions and details of special equipment of the ten 10-wheeled simple superheater mixed traffic locomotives, which the C.P.R. is building at its Angus, Montreal shops, as mentioned in our Apr. issue:

Weight on drivers	141,000 lbs.
Total weight	190,000 lbs.
Cylinders	22½" by 28" stroke.
Drivers	63" diam.
Boiler, type	Wagon top.
" working pressure	180 lbs.
Heating surface, total	2,418 sq. ft.
Tubes, no. and diam.	240—2"; 24—5"
" length	14' 3"
Firebox	8' 6⅛" by 5' 9⅞"
" material	Otis steel.
Grate area	49 sq. ft.
Capacity, water	5,000 imp. gals.
" coal	10 tons.
Air brakes	Westinghouse, No. 6 E.T.
Axles	Mild steel.
Brake beams	Simplex Truss.
Brake shoes	C.P.R. standard.
Couplers	Tower.
Headlight	Pyle National Electric.
Journal bearings	Canadian Bronze Co.
Springs	C.P.R. standard crucible
Tires	Krupp crucible
Tender wheels	Solid round steel.
Wheel centres	Cast steel.
Superheater	C.P.R.

Following are chief dimensions and details of special equipment of the two 6-wheeled coupled switching locomotives, which the Canadian Locomotive Co. is building for the Temiskaming & Northern Ontario Ry., as mentioned in our Apr. issue:

Weight, total	128,000 lbs.
Wheel base, engine	11' 0"
" " engine and tender	41' 4"
Length over all, engine and tender	55' 3"
Width over all	10' 0"
Height "	14' 5"
Heating surface, firebox	131 sq. ft.
" " tubes	1,206 sq. ft.
Drivers	51" diam.
Wheel tires	cast steel.
Driving journals	8½" by 10"
Cylinders	19" by 26" stroke.
Boiler, type	Radial stay.
" working pressure	200 lbs.
Tubes	223, 2" diam.
" length	10' 6"
Brakes	Westinghouse E.T.
Tender, weight loaded	90,000 lbs.
" capacity, water	4,500 imp. galls.
" " coal	6 tons.
" truck	4-wheel.
" " bolsters	Simplex.
" " wheels	33" diam.
" " "	cast iron.
" Brake beams	Simplex.

Following are chief dimensions and details of special equipment of the two Pacific type locomotives which the American Locomotive Co. is building for the C.P.R., as mentioned in our Apr. issue:

Weight on leading truck	40,000 lbs.
" " drivers	140,000 lbs.
" " trailing truck	34,000 lbs.
" of engine	214,000 lbs.
" " tender	131,000 lbs.
Wheel base, driving	13' 0"
" " engine	33' 7"
" " " and tender	60' 0"
Cylinders	21" by 28" stroke.
Drivers	69" diam.
Boiler, type	wagon top.
" working pressure	200 lbs.
" outside diam., front end	67½"
Firebox	94" by 70"
Tubes, boiler	193, 2¼" diam.
" superheater	22, 5" diam.
" length	19' 6"
Heating surface, tubes	2,765 sq. ft.
" " firebox	194 sq. ft.
Grate area	45.7 sq. ft.
Maximum tractive power	30,400 lbs.
Factor of adhesion	4.50
Tender	8-wheeled.
Capacity, water	5,000 imp. galls.
" coal	10 tons.
Tender, side bearings	Susemihl roller.
Brake beams	Simplex truss.
Headlight	Pyle National Electric.
Air-brakes	Westinghouse American.
Air-signal	Westinghouse.
Couplers	Washburn, pilot.
"	Tower, tender.

Railway Finance, Meetings, Etc.

Alberta Ry. and Irrigation Co.—Approximate net profits from all sources, exclusive of land sales for Feb., $43,310, against $20,398 for Feb., 1908. Total net profits for 8 months ended Feb. 28, $293,436. Approximate railway traffic receipts for March, $27,627, against $15,746 for March, 1908.

Dominion Atlantic Ry.—Gross earnings for Feb. $59,850, against $60,260 for Feb., 1908. Total earnings for 2 months ended Feb. 28, $129,800, against $130,686 for same period 1908. The total gross earnings for 1908, were $1,259,300, against $1,294,741 for 1907.

Grand Trunk Ry.—The Dominion Parliament has passed the act with respect to the company's debenture and other stocks. (Mar. pg. 179.)

Maritime Coal, Ry. & Power Co.—Following are the officers and directors for the current year: President, Hon. W. Mitchell; Vice-President, A. E. Dyment. Other directors: N. Curry, E. Hanson, W. Ewing, A. McLarin, G. I. McMallory. The financial statement presented was considered satisfactory, and it is proposed to issue more of the company's bonds in order to provide for further development. The company owns about 25 square miles of coal areas in the Cumberland coal fields, collieries at Chignecto, and also on the Bay of Fundy; a railway from Maccan to the Bay of Fundy, and from Maccan to Chignecto, and an electric power plant at Chignecto, which supplies power to Amherst and other places.

Michigan Central Rd.—The report for the year ended Dec. 31, 1908, covers the operation of 1,746.46 miles, divided as follows; Main line, 270.07 miles; proprietary lines, 345.05 miles; leased lines, 1,117.34 miles, and lines operated under trackage rights, 14 miles. The mileage quoted includes the Canada Southern Ry., with 226.18 miles of double tracked main line, with 144.33 miles of sidings, and 153.86 miles of branch lines, of which 16.80 are double tracked, with 44.56 miles of sidings. The total earnings from operation were $24,918,487.95; expenses, $19,005,352.34; net earnings, $5,913,135.61; against, $28,547,109.94 total operating earnings, $23,131,750.65 expenses, $5,415,359.29 net earnings for 1907. There was an increase in the first charges, during the year, of $553,008.06, part of which was due by an increased rate on the Canada Southern Ry. first mortgage bonds. On Jan. 1, 1908, $14,000,000 of Canada Southern first mortgage 5% bonds were extended to Jan. 1, 1913, and the rate increased to 6%. The accounts show $141,291.45 on account of this extension. An agreement was entered into with the Pere Marquette Rd., modifying a previous agreement, reducing the annual rental payable by the latter company on account of its relinquishment of the right to use the St. Clair branch of the Canada Southern Ry., between the junction of the Lake Erie and Detroit River Ry., near Courtright, Ont., and St. Clair Jct.; and also that portion of the main line between St. Clair Jct. and the crossing of the London and Port Stanley Ry. The company's first charges include interest on Canada Southern 6% first mortgage bonds, $840,000; interest on Canada Southern 5% second mortgage bonds, $5,200; rental of Canada Southern leased lines, $375,000; taxes on real estate and property, including leased lines, in Canada, $50,760.61. The general balance sheet shows assets of $73,273,513.49, and liabilities of $64,532,499.43; $8,741,014.06 being taken to profit and loss account. The annual meeting is called for May 6.

Minneapolis, St. Paul & Sault Ste. Marie Ry.—It was reported recently that on the last day for depositing the Wisconsin Central Ry. preferred stock, about 114,000 shares had been handed in, and permanent receipts given. The balance of the stock can only be deposited on payment of a penalty of $1 a share, except where the holders are executors and administrators.

The new stock being issued by the M., St.P., & S.S.M.R. Co. is $2,016,000 preferred and $4,032,000 common, and is being offered to existing holders at par on the basis of 24 shares of new stock for each 100 shares of old capital stock, and the subscription must be for both kinds of stock in the ratio of one share of preferred to two shares of common. The subscription list closed April 30. The payments are 20% on application and instalments of 20% each on June 4, July 15, Aug. 31 and Oct. 15.

New Brunswick Coal & Ry. Co.—The Commissioners for this railway have presented their report on the operations of the line for the year ended Oct. 31, 1908, to the New Brunswick Government. The gross earnings were $61,479.06, and operating expenses $65,391.06, a deficit of $3,912.00. The total cost of the line to June 30, 1908, was $1,940,375.01, since which time there had been expended on ballasting $21,631.10, making a total cost to Oct. 31, of $1,962,012.11. This is an average cost of $30,900.00 a mile, including the 8.7 miles of branches and spurs to the various coal mines. The gross earnings for 1907-08 showed an increase of $18,989.61 over those for 1906-07. This increase is attributed to freight and passenger traffic in connection with the construction of the National Transcontinental Ry. The operating expenses for 1907-08 showed an increase of $24,012.73 over those of 1906-07. The freight carried was 50,821 tons, against 43,521 in 1906-07. During the year the railway paid to the Intercolonial Ry. $1,712.47 for locomotive rental, and $4,718.15 for car rental.

New Brunswick Southern Ry.—In our last issue we stated that this company had passed under C.P.R. ownership. We are advised that although the N.B.S.R. Co.'s securities are held in the C.P.R.'s interest, no transfer or lease of the property to the C.P.R. has yet taken place.

Prince Edward Island Ry.—Parliament has voted $10,000 additional on account of working expenses of the P.E.I.R.

Quebec Central Ry.—Gross earnings for Feb. $61,592.11; expenses, $54,780.52; net earnings, $6,811.59, against $70,419.35, gross earnings; $58,428.77, expenses; $11,990.58 net earnings for Feb., 1908. Aggregate gross earnings for 8 months ended Feb. 28, $668,940.24; expenses, $483,027.99; net earnings, $185,912.25, against $708,426.12 gross earnings; $502,016.00 expenses; $206,410.12 net earnings for same period 1907-08.

Temiscouata Ry.—Approximate gross receipts for Feb. $14,542.88; March, $19,571.74.

White Pass and Yukon Ry.—Gross earnings for Feb. $19,208; total for 8 months ended Feb. 28, $904,214.

Canadian Northern Ry. Construction, &c.

Canadian Northern Ontario Ry.—The new freight shed on the pier at the foot of York St., Toronto, has been completed, but rail connection with it has not been made, as permission will have to be obtained from the Toronto City Council, to carry a line across Lake St. The shed is 440 ft. long, and is metal sheathed with 13 doors on either side.

The Ontario Legislature has made a grant of 4,000 acres of land a mile for the construction of 500 miles of line from Selwood Jct., northerly and westerly towards Port Arthur, Ont. The land is to be granted in alternate blocks of one township of nine miles square, adjoining the line, throughout the clay belt. Any deficiency in acreage is to be set apart in such places and in such areas as may be directed by the Government. Construction is to be started within a year, and completed by Dec. 31, 1913, but the Government may grant an extension of time. The lands are to be sold at such times and prices as may be directed by the Government; the minerals and pine timber are reserved, but settlers should have the right to cut timber for building and fencing. The Government may set apart the lands earned on the completion of every 10-mile section of the line.

A delegation from Port Arthur, Ont., waited on the Dominion Government, Mar. 27, to urge the making of a grant in aid of construction of the 500-mile section between Selwood and Port Arthur.

The company's application to the Dominion Parliament for an act extending the time for the construction of a line from Sudbury to Port Arthur, with a branch from Sudbury to Little Current, is before the Railway Committee of the House of Commons. The proposal to construct the branch was not specified in the original notices, but supplemental notices having been given, the company was allowed to proceed with the bill.

Canadian Northern Ry.—In a discussion in the House of Commons on the Hudson Bay Railway recently the Minister of Railways stated that the C.N.R. to Pas Mission had not been fully inspected by the Government Engineers, and he understood that trains had been run on it. One of the members stated that trains could be run over the line during the winter when the ground was frozen, but that it was practically impossible to run trains over it in summer.

Tenders are being asked for the erection of a passenger station at Saskatoon, Sask. The new building is to be of brick and stone, and will be located at the foot of 21st St., on the same line as the freight sheds.

The company has a large force engaged upon the construction of the big approaches to the traffic part of the bridge on the north side of the river at Prince Albert, Sask. The ground is being blasted so that the piles can be driven, and the traffic part of the bridge was expected to be completed by May 1. The false work under the bridge has been removed, and the rivetting of the superstructure is being pushed forward. The swing span is being erected.

An Edmonton press despatch says: The C.N.R. is preparing to undertake the active construction of a line into Camrose and Calgary this season; that mines will run from Vegreville south, and another branch will be built from Camrose into Strathcona; that the company will also penetrate the northern wilds, and expects to have trains running into Athabasca Landing within a year, and that surveyors are now actively at work in the field.

The indications are that it is the intention in the very near future to complete the C.N.R. as a transcontinental line right through to the Pacific coast. About 1,000 men are already at work clearing right-of-way, grading, etc., from the C.N.O.R.'s Toronto-Sudbury line in the direction of Port Arthur. And while this start has been made on the eastern end preliminary work in British Columbia has also been put in hand. T. H. White, formerly Chief Engineer of Construction for Mackenzie, Mann & Co.'s eastern lines, has gone West to take charge of surveys in B.C., and will probably establish his headquarters at New Westminster. He is accompanied by C. F. Hannington and J. Irving, who will have charge of survey parties. It is probably the intention to make survey to connect the projected Pacific coast terminus with the line, which has been surveyed from present terminus at Edmonton, Alta., to the Rocky Mountains.

Edmonton & Slave Lake Ry.—The Dominion Parliament has been granted an extension of time within which the construction of this railway from Edmonton, Alta., to Slave Lake may be completed.

Railway Fencing and Cattle Guards.

The following memorandum by Chief Railway Commissioner Mabee has been sent to all railway companies under the Board's jurisdiction:

At every sitting of the Board from Winnipeg to Victoria complaints were made against the railway companies in connection with the fencing, or rather the defective and non-fencing of their rights of way, and that the law regarding cattle guards was not complied with. Claims innumerable for stock killed, and refusal to make compensation were disclosed. Many cases appeared where stock had been killed upon the tracks and farmers were afraid to ask for compensation for fear of being involved in endless litigation. It would seem, perhaps, that upon the whole the absence of fences along the right of way is a more fruitful source of loss to the rancher and farmer than defective cattle guards, or of their absence. Cases were given where those in charge of the construction of railways entered upon improved and enclosed land, threw down the fences, made no attempt to enclose the right of way, allowing stock to get out upon the highways, thus injuring crops, and in some instances these cattle were killed upon distant railway tracks. Whether these wrong-doers were independent contractors, or servants or officers of the railways under construction did not appear, but so far as this Board has power, it is determined that such high-handed and unreasonable conduct shall cease. The Railway Act is clear upon the questions of fencing and cattle guards, and the time has arrived when something must be done to compel the observance of its provisions. Sec. 254 provides as follows;

"1. The Company shall erect and maintain upon the railway (a) Fences of a minimum height of 4 ft. 6 in. on each side of the railway; (b) Swing gates in such fences at farm crossings of the minimum height aforesaid, with proper hinges and fastenings, provided that sliding or hurdle gates constructed before Feb. 1, 1904, may be maintained, and (c) Cattle guards on each side of th highway at every highway crossing at rail level with the highway.

"2. The railway fences at every such highway crossing shall be turned into the respective cattle guards on each side of the highway.

3. Such fences, gates, and cattle guards shall be suitable and sufficient to prevent cattle and other animals from getting on the railway.

"4. Wherever the railway passes through any locality in which the lands on either side of the railway are not enclosed and either settled or improved, the company shall not be required to erect and maintain such fences, gates, and cattle guards, unless the Board otherwise orders or directs."

There has been no order of the Board respecting fencing through unenclosed or unimproved lands, and the practice of the companies, so far as I can learn, has been to leave their rights of way entirely unfenced, until the adjacent owner or owners had erected side fences, when such owner or owners would be expected to call upon the company to erect its fences. Cases, however, were presented where the side fences had been long since erected, but yet the railway fences had not been erected. We have been furnished with no information by the railway companies of the amounts paid by them for cattle killed upon their lines, or of the number of claims they have disputed, but from the large number of cases that were brought to the attention of the Board where compensation has not been made, the better opinion perhaps is that the disputed claims vastly exceed those in which settlements have been made, if not, the companies have been paying out very large sums that would have been much better spent in protecting their rights of way. Now the statute defines clearly the kind of fence and cattle guard that must be provided; the fence must be at least 4 ft. 6 in. high, and it and the cattle guards must be "suitable and sufficient to prevent cattle and other animals from getting on the railway." It is just as incumbent upon the companies to fence against hogs as it is against horses, yet it is not pretended that any attempt has been made to do so, and instances were given where farmers had so many hogs killed that they were compelled to abandon any attempt to raise them.

It seems to be the practice in Manitoba, Saskatchewan, some parts of Alberta, and British Columbia to remove the cattle guards entirely in winter. This is done, it was said, to facilitate the operation of the snow ploughs. It was not shown by any railway expert that this practice is necessary, but it was shown by many Saskatchewan farmers that it was more important to them to have the cattle guards in place during winter than any other season, as during the other seasons their cattle were mostly pasturing in the hills in charge of herders. At any rate these cattle guards have been removed during the winter months without authority, and unless a great deal more can be shown than has yet appeared, the practice must cease. Furthermore, the railway companies must establish and maintain cattle guards that will prevent cattle and other animals from getting upon the railways. This is the requirement of the law, and I know

of no reason why it should not be complied with.

The provisions of clause 4 have been abused, and this statutory exemption from fencing has been used by the companies to free themselves from making compensation in innumerable cases of meritorious claims. This condition of affairs cannot be permitted to continue; it works great hardship upon the public, and is of little or no benefit to the railway companies. The conditions in the West have greatly changed since this exemption was granted to the companies, and as they are compelled at some stage of the undertaking to erect fences, I am clearly of the opinion that no hardship will be imposed if that stage is made the initial one. I am aware that in various parts of the country no necessity now exists, and possibly never will, for the erection of fences. The formal order may contain a provision that railway companies, the lines of which have already been constructed, may apply to exempt certain sections of the road from the operation of the order, when, if conditions are shown that such course will entail no hardship upon the public, the Board may so declare. The like course may be taken where railways are in course of construction, and as to such latter, when application is made to open the road for traffic, fences, cattle guards, highway and farm crossings and gates shall all form part of the work necessary to be complete according to the statute and the Board's regulations, before permission is given to operate the road. I am convinced that this course will, in the end, be less expensive for the railway companies, as the erection of fences, gates, etc., can all be carried on at the time of construction at less cost than later on, to say nothing of saving liability for damage claims for stock killed and law costs in defending, even if successful.

Many complaints were made that in the construction of the railway lines the highway crossings were left in an impassible state, causing endless inconvenience and trouble to the public. I confess I am at a loss to understand such disregard of the rights of others, and such selfish and inconsiderate conduct upon the part of those constructing the railways, or responsible for their construction. If these works are let out to contractors, the railway companies may as well at once understand that they must make some provision in their contracts that will compel their contractors to treat the public with ordinary decency. This Board has no control over the contractors and can deal only with the railway companies. These highway crossings can be constructed at less expense when the grading is being done than later on, after the road is completed; and with respect to roads not yet completed, they will not be opened for traffic until every highway crossing opened for travel is put into the condition called for by the Board's regulations. As to these railways now in operation, all highway crossings, opened for travel, must be put into the condition called for by the regulations within one year from this date.

A draft order embodying the foregoing may be sent to all the companies, and its settlement spoken to by them at the May meeting of the Board at Ottawa.

The Canadian Northern Prairie Land Co. has declared a dividend at the rate of 10 per cent. for 1908.

TRANSPORTATION APPOINTMENTS

The information under this head, which is almost entirely gathered from official sources, is compiled with the greatest care, so as to ensure absolute accuracy. Anyone who may notice any error in our announcements will confer a favor by advising us.

Algoma Central Steamship Line.—J. E. McLurg, heretofore chief clerk to Superintendent, has been appointed Superintendent, vice W. C. Barr, resigned. Office, Sault Ste. Marie, Ont.

Canadian Northern Ontario Ry.—See Canadian Northern Ry.

Canadian Northern Ry.—Z. A. Lash, K.C., heretofore General Counsel, has been appointed Consulting Counsel. He is also a director.

F. H. Phippen, who recently resigned his position as one of the judges of the Manitoba Court of Appeal, has been appointed General Counsel. Office, Toronto.

F. A. Young, heretofore Travelling Agent, Northwestern Line, Winnipeg, has been appointed Travelling Passenger Agent, C.N.R. Headquarters, Toronto.

G. W. VAUX,
General Passenger Agent, Grand Trunk Railway.

F. L. Mitchell, heretofore in the Toronto local freight agent's office, has been appointed Contracting Freight Agent, C.N.R. and C.N.O.R., Toronto, vice J. B. Sheppard, transferred.

J. B. Sheppard, heretofore Contracting Freight Agent, Toronto, has been transferred to Winnipeg.

J. M. Horn, heretofore Contracting Freight Agent, Winnipeg, is reported to have been appointed District Freight Agent at Edmonton, Alta.

T. H. White, formerly Chief Engineer of Construction, Mackenzie, Mann & Co's. eastern lines, has been placed in charge of surveys for the C.N.R. from the Pacific Coast to the Rocky Mountains. He has as assistants C. F. Hannington and J. Irving. The surveys office will probably be at New Westminster, B.C.

Canadian Government Railways.—The Secretary of the Railway Department issued the following circular April 21: Notification is hereby given that by an order-in-council dated Apr. 20, the position of General Manager of Government Railways of Canada, on the Intercolonial and P.E.I. Rys., has been abolished, and a Managing Board, entitled The Government Railways Managing Board, has been constituted for the supervision and direction of all departments of the said railways. The members of such board are M. J. Butler, Deputy Minister and Chief Engineer of the Department of Railways and Canals, Chairman of the Board; D. Pottinger, I.S.O.; E. Tiffin, General Traffic Manager; F. P. Brady. The above will come into effect on May 1.

Canadian Pacific Ry.—D. W. Newcombe, heretofore Superintendent, district 2, Atlantic Division, has been appointed agent, West St. John, N.B., vice R. King, transferred.

R. King, heretofore agent, West St. John, N.B., has been appointed Superintendent, district 2, Atlantic Division, vice D. W. Newcombe, appointed agent West St. John. Office, Woodstock, N.B.

W. B. Cronk, heretofore Superintendent, district 2, Eastern Division, has been appointed Superintendent, district 1, Eastern Division, vice T. Williams, assigned to other duties, and will continue to supervise Smith's Falls section, district 2, until further notice. Office, Farnham, Que.

T. Williams, heretofore Superintendent, district 1, Eastern Division, has been appointed in charge of train service on the Nomining section, Que., at present under construction.

V. A. Harshaw, heretofore Assistant Superintendent, district 3, Ontario Division, has been appointed acting superintendent, district 1, Ontario Division, vice J. R. Nelson. Office, Toronto.

H. C. Grout, heretofore Resident Engineer, Ontario Division, Toronto, has been appointed Assistant Superintendent district 3, Ontario Division, vice V. A. Harshaw, appointed acting superintendent district 3. Office, West Toronto, Ont. The position of Resident Engineer has been abolished.

Duluth, Rainy Lake and Winnipeg Ry. M. H. McLeod, General Manager, who is also General Manager of the Canadian Northern Ry., announces that J. R. Cameron, General Superintendent Canadian Northern Ry., has also been appointed General Superintendent D.R.L. & W. Ry. Office, Winnipeg.

M. A. Murphy has been continued in his position as Superintendent. Office, Virginia, Minn.

The following Canadian Northern Ry. officials have had their jurisdiction extended over the D.R.L. & W.R.; A. Shields, Master Mechanic; J. P. Driscoll, Superintendent of Car Service; W. Pratt, Jr., Superintendent of Sleeping and Dining Cars and News Service; H. McConkey, Superintendent of Telegraph Maintenance; C. R. Stovel, Claims Agent. Offices, Winnipeg, Man.

Grand Trunk Pacific Ry.—W. P. Hinton, heretofore Assistant General Passenger and Ticket Agent, G.T.R., Montreal, has been appointed General Passenger Agent, G.T.P.R. Office, Winnipeg.

The position of acting Locomotive foreman, Portage la Prairie, Man., heretofore held by G. Robinson, has been abolished. T. Wooley, machinist, will have charge of such locomotive and car work as is necessary to be done there.

G. Robinson, heretofore acting Locomotive Foreman, Portage la Prairie,

Man., has been appointed Locomotive Foreman, Watrous, Sask., vice C. E. Brooks, assigned to other duties.

See also Grand Trunk Ry.

Grand Trunk Ry.—G. T. Bell, heretofore General Passenger and Ticket Agent, G.T.R. and G.T.P.R., has been appointed Assistant Passenger Traffic Manager of both lines. Office, Montreal. The title of General Passenger and Ticket Agent is abolished.

G. W. Vaux, heretofore Assistant General Passenger and Ticket Agent, Chicago, Ill., has been appointed General Passenger Agent. Office, Montreal.

H. G. Elliott, heretofore Assistant General Passenger and Ticket Agent. Montreal, has been appointed First Assistant General Passenger Agent. Office, Montreal.

H. R. Charlton, heretofore Advertising Agent, G.T.R., has been appointed General Advertising Agent, G.T.R. and G.T.P.R.

W. P. Fitzsimons has been appointed Commissioner of Industries. He will have, in connection with the Freight and Traffic, Express and Transportation Departments, special supervision of the work of locating new industries, and general development of the resources of the territory served by the G.T.R. Office, Montreal.

W. S. Cookson, heretofore Chief Clerk Assistant General Passenger and Ticket Agent's office, Chicago, has been appointed Assistant General Passenger Agent, G.T.R. Office, Chicago, Ill.

The following agents have been appointed: Port Colborne, Ont., F. Lye; St. Polycarpe, Que., A. C. St. Amour; Caldwell, Ont., G. A. Thurston; Barry's Bay, S. N. Milligan.

Quebec Central Ry.—G. M. Robins has been appointed Master Mechanic, vice J. Sievewright, who resigned on account of failing health and has since died. Office, Sherbrooke, Que.

When Railroads Were New

This is the title of a very interesting volume written by C. F. Carter, and published by H. Holt & Co., New York. The book does not profess to be a history of the development of railway transportation on this continent, it is rather the romance of early railway construction. It contains a lot of interesting facts about the struggles of the early railway promoters to get a hearing from financiers and others for their projects; of the development of the old wooden rail gravity lines from quarries and collieries to the wharves, into iron and steel lines operated by steam power; of the importation of locomotives from Great Britain, which were never operated, and of the beginning of the present great locomotives—a distinctive production of the United States; and of a hundred and one stories of the beginnings of railways in the Far West. There are many stories too of the early operation of trains. The last chapter headed, "Romance of a Great Railroad," deals with the construction of the C.P.R., and gives an interesting story of the adventures of E. W. Jarvis, and his party in making a survey between Quesnelle River and Edmonton in 1874-75; and another of the discovery of the Kicking Horse Pass by Major Rogers, together with a rapid survey of the construction. The illustrations are numerous and include the driving of the last spike at Craigalachie, Nov. 7, 1885, which appeared in the Railway and Marine World several years ago. The price of the book is $2, and it may be obtained from the Railway & Marine World's book department.

In his preface, the author says that "it seems as if every statement ever made about the history of the railroad by any one has been disputed by some one else," and as an instance of this adds that "dates that vary a whole year are given for so recent an event as the running of the first through passenger train over the C.P.R." No doubt this is the case, but such sources of information should not be depended on or availed of. It may be added that the first through passenger train on the C.P.R., that is on the whole route from Montreal to Vancouver, left Montreal June 28, 1886, and reached its destination in 5 days and 19 hours. The first through train from Port Moody reached Montreal July 12, 1886.

In the text of the work, referring to the early history of the C.P.R. it is stated that, "W. C. Van Horne, of Illinois, who had risen from telegraph operator to the presidency of the Chicago, Milwaukee and St. Paul, was engaged as General Manager." Mr. Van Horne was General Superintendent of the C., M. & St. P., not President.

W. P. HINTON,

General Passenger Agent, Grand Trunk Pacific Railway.

The B.C. Public Works Department received tenders Apr. 27 for the erection and completion of a reinforced concrete wharf with timber superstructure at Prince Rupert.

During Feb. one navigation employe was killed and 3 were injured in the course of their work. The death was due to a fall into the hold, and of the other accidents, 2 were due to falls and one to falling material.

The House of Commons has voted $55,000 for salaries of the Board of Railway Commissioners, authorized by statute, the actual amount required being $54,500. It has also voted $107,000 for salaries of officials and office expenses of the Commission.

Canadian Northern Ry. Earnings, Etc.

Gross earnings, working expenses, net profits, increases or decreases over 1907-08. from July 1, 1908:

	Earnings.	Expenses.	Net Earnings.	Net Increase or Decrease.
July	$ 728,500	$525,600	$202'900	$159,000 –
Aug.	747,400	561,300	186,100	30,400
Sept.	901,700	650,600	251,100	42,000+
Oct.	1,172,700	752,600	420,100	110,200+
Nov.	1,156,900	744,300	412,600	144,300+
Dec.	927,900	642,800	285,100	42,400+
Jan.	526,200	425,900	100,300	15,400
Feb.	502,100	409,200	93 400	9,700+
	$6,663,900	$4,712,300	$1,951,600	$143,800+
Inc. or Dec.	$ 292,200	$ 148,400	$ 143,800	.....

Approximate earnings for March, $738,700 and for 2 weeks ended April 14, $358,300; against $625,500 and $332,800 for same periods 1908.

C.P.R. Earnings, Expenses, Etc.

Gross earnings, working expenses, net profits, increases or decreases over 1907-8, from July 1, 1908:

	Earnings.	Expenses.	Net Profits.	Net Increase or Decrease.
July	$6,292,889.82	$4,018,207.57	$2,274,573.24	$232,279.41 –
Aug.	6,385,956.69	3,807,057.98	2,578,898.71	8,623.56+
Sept.	6,391,672.48	4,277,064.71	2,114,607.77	36,745.58 –
Oct.	7,381,970.41	4,726,703.70	2,655,266.71	25,050.93 –
Nov.	7,303,303.20	5,082,223.85	2,221,079.35	223,954.86 –
Dec.	6,955,874.11	4,759,122.54	2,196,751.57	119,561.99+
Jan.	4,761,859.93	4,372,110.10	389,749.83	234,241.95 –
Feb.	4,966,208.14	4,204,063.36	762,144.78	405,048.17+
	$50,439,725.78	$35,246,653.81	$15,193,071.97	$219,039.01
Inc. or Dec.	$926,624.82	$1,145,663.83	.....	.....
	.....	.....	$219,039.01	.....

Approximate earnings for March, $6,441,000, and for 2 weeks ended April 14, $3,045,000; against $5,374,000 and $2,621,000 for same periods 1908.

DULUTH, SOUTH SHORE AND ATLANTIC RY.—Gross revenue for Feb., $201,666.19; net, $47,660.36, against $190,613.83 gross, and $41,320.73 net for Feb., 1908. Aggregate gross revenue for 8 months ended Feb. 28, $1,856,668.57; net, $553,042.65, against $2,177,235.92 gross, and $592,089.57 net for same period. 1907-08. Approximate gross earnings for Mar., $216,747, and for 2 weeks ended Apr. 14, $98,898, against $218,698, and $97,283 for same periods, 1908.

MINERAL RANGE RD.—Gross revenue for Feb., $60,756.09; net, $873.32; against $57,600.25 gross revenue, and $786.65 deficit for Feb., 1908. Aggregate gross revenue for 8 months ended Feb. 28, $552,821.67; net, $94,246.82; against $539,675.23 gross revenue, and $93,143.29 net for same period 1907-08. Approximate gross earnings for March, $68,647, and for 2 weeks ended Apr. 14, $28,685, against $65,703, and $28,772 for same periods, 1908.

MINNEAPOLIS, ST. PAUL AND SAULT STE. MARIE RY.—Gross revenue for Feb., $776,653.05; net, $247,287.33, against $680,365.15 gross, and $168,033.06 net for Feb., 1908. Aggregate gross revenue for 8 months ended Feb. 28, $8,578,093.88; net, $3,852,032.46, against $8,215,783.69 gross and $3,241,847.95 net for same period 1907-08. Approximate gross earnings for Mar., $943,096, and for 2 weeks ended Apr. 14, $449,301 against $956,406 and $432,428 for same periods, 1908.

Grand Trunk Ry. Earnings, Expenses, Etc.

The following figures give the earnings of the G.T.R., the C.A.R., the G.T. Western Ry., and the D.G.H. & M. Ry., separately, for Feb., as compared with Feb., 1908:

GRAND TRUNK RAILWAY.

	1909	1908
Earnings	$1,964,900	$1,789,725
Expenses	1,643,800	1,633,885
Net earnings	$ 321,100	$ 155,840

CANADA ATLANTIC RAILWAY.

	1909	1908
Earnings	$106,700	$102,270
Expenses	120,800	143,178
Def.	$ 14,100	$ 40,908

GRAND TRUNK WESTERN RAILWAY.

	1909	1908
Earnings	$351,900	$359,893
Expenses	321,700	311,680
Net earnings	$ 30,200	$ 48,213

DETROIT, GRAND HAVEN & MILWAUKEE RAILWAY.

	1909	1908
Earnings	$105,900	$106,653
Expenses	101,500	104,218
Net earnings	$ 4,400	$ 2,435

Approximate earnings for Mar., $3,167,451, and for 2 weeks ended Apr. 14, $1,462,946.

against $3,016,259 and $1,350,104 for same periods 1908.

TRAFFIC RECEIPTS OF THE SYSTEM

Aggregate from Jan. 1 to Mar. 31.

	1909	1908	Inc.	Decr.
Grand Trunk....	£1,310,610	£1,262,536	£48,074

Total.....	£1,713,151	1,673,109	40,042	

W. W. Williamson, heretofore accountant and Superintendent of Tariffs, Canadian Ex. Co., has been appointed General Auditor, vice R. Burkinshaw, deceased, and will continue to act also as Superintendent of Tariffs. The position of Accountant has been abolished.

The Minister of Railways, in reply to a question in the House of Commons recently, said that up to June 30, 1896, there had been 1,772 miles of railway constructed in Alberta and Saskatchewan, while on Dec. 31, 1908, there were 3,404 miles in these two provinces.

Press reports state that Sir Thomas G. Shaughnessy, in a recent letter to the Premier, pointed out that during the period from 1902 to 1908, the C.P.R. added to its rolling stock at the rate of 14 freight cars a day, 1 passenger car every two days, and 1 locomotive every three days, and yet it had the utmost difficulty in keeping pace with the demands made on it, owing to the increasing volume of traffic offering over its lines. It is said that a calculation has been made showing that the C.P.R. combined freight cars have a deadweight capacity equal to the weight of the population of England.

CANADA SOUTHERN RAILWAY COMPANY

The Annual General Meeting of the Canada Southern Railway Company, for the election of Directors and other general purposes, will be held on Wednesday, the 2nd day of June, 1909, at the hour of eleven o'clock in the forenoon, at the Company's head office, in the City of St. Thomas.

NICOL KINGSMILL,
Secretary, C.S. Ry. Co.

Dated at St. Thomas,
26th April, 1909.

NIAGARA GRAND ISLAND BRIDGE COMPANY

The Annual General Meeting of the Niagara Grand Island Bridge Company, for the election of Directors and other general purposes will be held on Wednesday, the 2nd day of June, 1909, at the hour of eleven o'clock in the forenoon, at the Company's head office in the City of St. Thomas.

NICOL KINGSMILL,
Secretary, N.G.I.B. Co.

April 26th, 1909.

NIAGARA RIVER BRIDGE COMPANY

The Annual General Meeting of the Niagara River Bridge Company, for the election of Directors and other general purposes, will be held on Wednesday, the 2nd day of June, 1909, at the hour of eleven o'clock in the forenoon, at the offices of the Canada Southern Railway Company, in the City of St. Thomas.

NICOL KINGSMILL,
Secretary, N.R.B. Co.,

April 26th, 1909.

N. L. Piper Railway Supply Co.

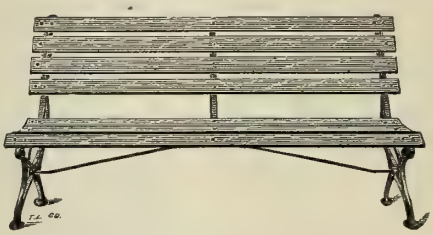
Limited

314 Front St. West

TORONTO

PARK, STATION, DECK OR CABIN SEATS

HARDWOOD BARS. MALLEABLE IRON LEGS.



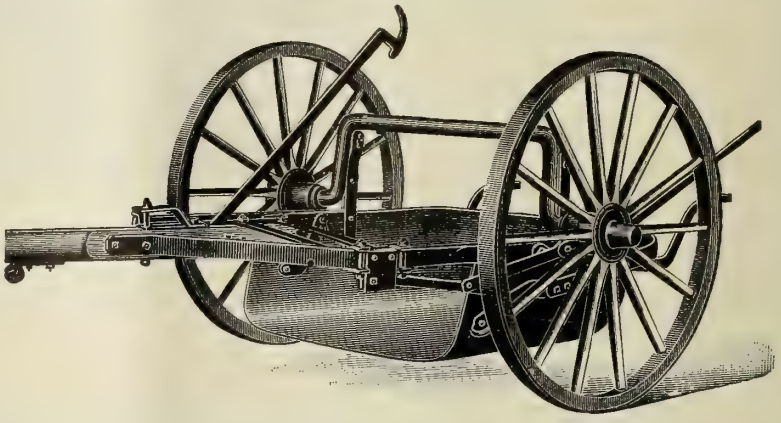
SPECIAL LENGTHS TO ORDER.

Our Station Seats are made of thoroughly seasoned Hardwood and perfectly annealed Malleable Iron Legs. Finished in Natural Wood or painted Red or Green and fastened together with Bolts.

Everlasting Comfortable Good Value

THE TORONTO PRESSED STEEL CO. LIMITED

TORONTO, CANADA



Our SOLID PRESSED BOWL DRAG and WHEEL SCRAPERS are the most satisfactory in the market. They are pressed out of one solid sheet of steel and have no joints or seams.

We manufacture a complete line of Contractors' Supplies including

PLOUGHS DUMP CARS
DUMP WAGONS DUMP CARTS
WHEELBARROWS TRUCKS
CEMENT MIXERS WAGONS
etc., etc.

PROMPT SHIPMENTS SEND FOR CATALOGUE

Canadian Freight Association

At the annual meeting in Montreal Apr. 16, the election of officers and standing committees resulted as follows: President, J. J. Mossman, Wabash Rd., Buffalo, N.Y.; 1st Vice-President, M. H. Brown, C.P.R., Toronto; 2nd Vice-President, C. A. Hayes, G.T.R., Montreal.

Advisory Committee—W. R. MacInnes, J. Pullen, G. C. Ransom.

Executive Committee—W. B. Bulling, C. A. Hayes, F. F. Packus.

Classification Committee—W. B. Bulling, S. P. Howard, C. A. Hayes, W. Phillips, F. J. Watson, W. M. Kirkpatrick, L. Macdonald, H. E. Macdonell, A. E. Rosevear.

Inspection Committee—R. W. Long, G. Tombs, F. Conway, R. W. Youngs, J. Paul, G. T. Pettigrew, M. H. Brown, B. R. Hepburn, S. P. Howard, W. B. Bamford.

It was decided to hold the next quarterly meeting at Halifax, N.S.

Railway Lands Patented.—Letters patent covering lands in Manitoba, Saskatchewan, Alberta and British Columbia were issued to railways during Dec., 1908, as follows:

	Acres.
Alberta Ry. and Irrigation Co.	4,644.00
C.N.R.	206.46
C.P.R. grants.	.07
G.T.P.R.	444.51
Manitoba and Northwestern Ry.	13.89
	5,308.93

Duluth, Winnipeg & Rainy Lake Ry.—The provisional directors of the company which has been incorporated to construct a railway from Virginia Lake, the present southerly terminus of the D.W. & R.L.R., to Duluth, Minn., are W. H. Cook, President; J. L. Washburn, Vice-President; W. D. Bailey, Secretary; L. C. Feetham, Treasurer, and J. F. Walsh. (April, pg. 267.)

A meeting of G.T.R. shareholders was held in London, Eng., April 21, to assent to the Grand Trunk Act, with respect to its debenture and other stock, and to authorize the necessary security being given to G.T.P.R. bonds to be issued to secure the $10,000,000 loan from the Dominion Government.

The Senate for the fourth year in succession has defeated the bill known as the Lancaster bill for the protection of level crossings, by adopting in its stead a bill introduced by Senator Beique, giving authority to our Railway Commission to look after the crossings. The Lancaster bill, which has been regularly passed by the House of Commons, fixes the rate at which trains shall pass over level crossings in cities, towns and villages at 10 miles an hour.

Speaking before the House of Commons Committee on the Preservation of National Resources recently, Hon. C. Sifton, M.P., stated that the railways had been responsible for denuding the country of a great deal of valuable timber, and it was decided that he should see the National Transcontinental Ry. Commissioners with a view of inducing them to clear the right-of-way of all combustible material, so that the danger of forest fires might be eliminated. It was also proposed to apply to the Board of Railway Commissioners for a similar order with respect to the C.P.R., and to confer with the Provincial Governments with a view of securing more adequate and uniform measures for protection against forest fires.

ELECTRIC RAILWAYS

Halifax Electric Tramway Co.

The annual report for the year 1908 shows a net increase in earnings of $13,397.00. The percentage of operating expenses 55.29, compared with 56.54 the previous year, is the most favorable showing for many years past. These economies in operating are largely due to the efficient condition of the plant and rolling stock, on which permanent outlays of $45,563.88 were made during the past year, in addition to which $11,958.42 was expended on track and other necessary improvements. An expenditure of $110,000 in paving, double-tracking and otherwise improving streets, is covered by $60,000 due banks, and the sale of 500 shares of stock at par. Arrangements are being made, on favorable terms, for a "use and occupancy" insurance, whereby, in case of fire, and consequent loss of earning power, the company will receive a sum equivalent to its daily net receipts.

ASSETS.

Property	$2,399,085.95
Accounts receivable	41,357.05

The directors for the current year are: Hon. D. MacKeen, President; J. Y. Payzant and W. B. Ross, Vice-Presidents; A. Kingman, J. Hutchison, J. C. Mackintosh, H. S. Poole, C. C. Blackadar, F. B. McCurdy.

D. Hawthorne has been appointed assistant auditor of receipts; J. R. Brown, assistant auditor of transportation, and W. T. Walmsley, assistant auditor of way-bills, Canadian Ex. Co.

Sandwich, Windsor and Amherstburg Ry.

The annual meeting was held in Windsor, Ont., Mar. 18. Following are the officers and directors for the current year: President, J. C. Hutchins; Vice-President, F. W. Brooks; Secretary, A. E. Peters; Treasurer, J. Bampton; other directors, A. E. Edwards, A. Pack, Detroit, Mich.; E. W. Moore, Cleveland, Ohio; J. Anderson, Windsor. Mr. Anderson, who is Manager of the S.W. & A.R., was elected to succeed H. A. Everett, of Cleveland, who retired owing to ill-health.

The Windsor and Tecumseh Electric Ry. Co., whose line is operated in connection with the S.W. & A.R., held its annual meeting on the same day. Its officers and directors are: President, F. W. Brooks; Vice-President, J. Anderson; Secretary, A. E. Peters; Treasurer, J. Bampton; other director, J. C. Hutchins.

The S.W. & A.R. does not issue a report, its operations being included in those of the Detroit United Ry., by which it is controlled. The following figures respecting it are taken from the D.U.R. report. Mileage Jan. 1, 1908, 35.443 miles; added in 1908, .370 miles, revenue passengers during year, 2,807,766, transfer passengers, 362,493; employe passengers, 23,776; car mileage, 754,495; earnings car mile, .2047; expenses car mile, .1197, net earnings car mile, .850. During the year $16,931 were expended on extension of lighting plant and new paving. In the D.U.R. statement of assets under investments, the S.W. & A.R. is put down for $253,134.91, and under accounts current for $265,015.19. Following are the balance sheets:

SANDWICH, WINDSOR AND AMHERSTBURG RY. CO.

Capital stock		$ 297,000.00
Mortgage bonds		490,000.00

	$ 289,000.00	$ 289,000.00

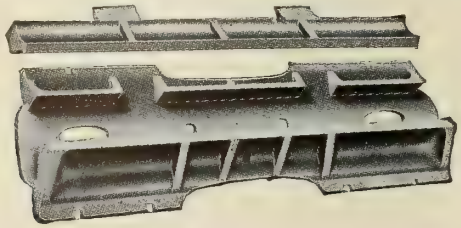
The earnings and expenses of the W. & T.E.R. Co. are included in the operations of the S., W. & A.R., which latter company owns all the capital stock of the W. & T.E.R. Co.

Electric Railways in 1907-08.

On June 30, 1908, there were 992.03 miles of electric railways in the Dominion, against 814.52 on June 30, 1907, the number of reporting lines being 53, against 49. The total paid-up capital was reported to be $87,903,231, against $75,195,475. The capital included $118,400 Dominion subsidies; $306,945.50 Provincial subsidies, and $151,000 municipal subsidies. The floating debt of the various companies totalled $5,363,319.70, against $7,567,024.90 at June 30, 1907. The total receipts were $14,007,049, made up as follows: Passengers, $13,233,724; freight, $346,021; mails and express, $54,883; other sources, $372,421; against a total of $12,630,430 in 1906-07. The operating expenses were $8,695,879.91, against $7,737,251 in 1906-07. The proportion of operating expenses to gross earnings was 62.08%, an in-

Have You Seen Williams Boltless Rail Joint?

The joint was first put in trial service on the Pecos River line of the Santa Fe at Roswell, N. Mex., where it remained for 11 months, and when removed at the end of that time it showed neither corrosion nor bright spots indicating wear. These joints have been in service for 10 months on the Fort Wayne division of the Pennsylvania Lines West, for 9 months in the yards of the St. Paul Union Depot Co., and for 8 months on the Wisconsin division of the Chicago & North Western Ry. in Chicago, where they are carrying the heavy North Shore suburban traffic of the road, as well as the through traffic for



the Wisconsin & Milwaukee division, which amounts to 316 trains every 24 hours.

The joints are made of malleable iron and have on the bottom a series of transverse ribs for strength, the outer ones of which come against the tie and prevent longitudinal movement. To prevent rail creeping, there is a round hole through the joint midway of the outer side, in which a 1-in. round bolt is inserted, the rail flanges being cut away at the adjacent corners the slight amount necessary to permit the insertion of the bolt. The joints weigh the same as a yard of the rail to which applied; the joint for an 80-lb. rail, for example, weighing 80 lbs.

crease of 0.83%. The net earnings of $5,311,169.57 showed a betterment of $412,515,99, and were equal to 6.04% upon the total capital. The number of passengers carried was 299,099,309, an increase of 26,099,905; and the quantity of freight carried was 732,475 tons, against 252,744. The car mileage was 56,964,881 miles, of which 56,412,035 were made by passenger cars and 552,846 by freight cars; there were also 303,391 miles made by locomotives. There were 237 cars added to the rolling stock during the year, 178 of Canadian and 59 of foreign manufacture. The total number of persons employed by the companies was 9,954, and the amount paid in wages was $5,757,578, against 9,031 and $5,291,585 during 1906-07.

The return of accidents show that 67 persons were killed and 1,883 persons injured, a decrease of four in the number killed, but an increase of 147 in the number injured over the year 1906-07. Of those killed, 18 were passengers, and six employes; while of the injured, 1,156 were passengers and 188 employes.

Ontario Electric Railway Taxation.

The Ontario Government collected $11,122.75 taxes from the electric railway companies operating in the province during the year 1908, divided as follows:

Berlin and Bridgeport E. Ry.	$ 23.80
Chatham, Wallaceburg and L.E. Ry. (1907)	215.00
Cornwall St. Ry. L. and P. Co.	40.00

Sunday Electric Car Service

The following act to amend The Ontario Railway Act, 1906, was passed by the Ontario Legislature at its recent session:

1. The Ontario Railway Act, 1906, is amended by adding thereto the following as section 193a:

193a.—(1) Subject to sub-sections 2 and 3 and notwithstanding anything in this act or any other act contained street railways may be operated on Sunday within a city having a population of over 50,000 after a majority of those voting of the electors qualified to vote at municipal elections have voted in the affirmative in answer to the question: "Are you in favor of operating street railways on Sunday?" but no person shall be entitled to vote more than once on such question.

(2) The question shall not be submitted until the Lieutenant Governor in council has declared that the population of the city is over 50,000, and the Lieutenant Governor in council may require a census to be taken and may prescribe the nature of the census and the time and manner of taking the same.

(3) When the Lieutenant Governor in council has declared that the population of the city is over 50,000 the question may be submitted at the annual municipal election, provided the municipal council shall have decided on or before the 1st of December preceding the date of such election to submit the question to the electors, and shall not later than the 15th of December, have given due notice of such decision by public advertisement for at least one week in each issue of some daily newspaper published in the municipality.

(4) All the provisions of The Consolidated Municipal Act, 1903, relating to the imposition of penalties and prevention of corrupt practices in connection with elections shall apply to any vote taken under the provisions of this section. (5) No employe shall be required or permitted to work for more than six days of ten hours each in any one week, nor upon any Sunday when he worked the previous Sunday.

(6) For each day on which a breach of sub-section 5 is committed the city or company shall incur a penalty not less than $25 and not exceeding $100 recoverable at the suit of any person in any court of competent jurisdiction and any judgment for a penalty shall form a first lien on the property, assets, rents and revenues of the street railway.

(7) Nothing in this section contained shall entitle any street railway company, which has entered into an agreement with any municipal corporation not to run cars on Sunday to run any of their cars on any Sunday unless and until such company shall have received permission from the council of such corporation by by-law to run their cars on Sunday, and then only under and subject to such terms, conditions, stipulations, regulations, obligations, provisoes and things as may be contained in such by-law, and also under and subject to such terms, conditions, stipulations, regulations, obligations, provisoes and things as may be contained in an agreement to be first made and entered into by such company with such corporation before such company shall be entitled to run any car on any Sunday.

(8) This section shall apply to all railways operated by electricity and street railways whether they are operated on a highway or on a right of way owned by the company.

Projects, Construction, Betterments, Etc.

The Belleville Radial Ry. Co. has been incorporated by the Ontario Legislature. (Apr., pg. 281.)

British Columbia Electric Ry.—A press report states that the company is preparing plans for an office building and terminal station to be erected on the corner of Hastings and Carroll Sts., Vancouver, and that the building will cost $200,000. (Apr., pg. 281.)

Bullocksville and Alix Electric Ry.—The Alberta Legislature has passed an act authorizing the construction of an electric railway in the districts of Bullocksville and Alix.

Chatham, Wallaceburg and Lake Erie Electric Ry.—A press report states that arrangements are being made for the extension of this railway so as to connect with Blenheim and Ridgetown to the south, and Petrolia and Sarnia to the north.

Cobourg, Port Hope and Havelock Electric Ry.—An act has been passed by the Ontario Legislature incorporating a company with this title, with power to construct an electric railway from Port Hope to Cobourg, thence to Havelock, passing through any or all of the towns and villages lying in its route, with a branch line from Cobourg to Gore's Landing, Rice Lake, and connected with the main line and other branches. The head offices are to be at Cobourg, the capital is fixed at $500,000, and the provisional directors are; W. J. Crossen, B. McAllister, T. C. Clapp, S. Huycke, Cobourg; H. T. Bush, Port Hope; J. Knox, Havelock. Special power is given for the purpose of purchasing land and to erect and operate hotels, parks and sanitariums in connection with the railway and branches. (Apr., pg. 281. See also Cobourg Radial Ry.)

Cobourg Radial Ry.—The Ontario Legislature has passed an act incorporating a company with this title instead of the Cobourg, Peterborough and Kawartha Lakes Ry., as the application read, with power to construct an electric railway from Cobourg to the C.P.R. near Havelock, Ont., passing through the townships of Hamilton, Haldimand, Percy, Seymour and Belmont, and the towns or villages of Campbellford, Trent Bridge, Warkworth, Burnley, Centreton and Baltimore; also a line from Cobourg to Lake Chemong or Stoney Lake, passing through the townships of Hamilton, South Monaghan, Otonabee, Douro and Smith, and the villages of Coldsprings, Plainville, Bewdley, Baillieborough, Centreville and the city of Peterborough; together with a branch line from Burnley to Hastings, passing through the village of Roseneath, and the townships of Haldimand, Alnwick and Percy. The head office of the company is to be at Cobourg, the capital $40,000, and power is asked to issue bonds for $25,000 a mile. The provisional directors are; F. W. Coolbaugh, R. C. Coolbaugh, Philadelphia, Pa.; J. E. Skidmore, A. L. Jex, G. Greer, N. F. MacNachtan, Cobourg. (See Cobourg, Port Hope and Havelock Electric Ry. Apr., pg. 281.)

Comox Harbor District, B.C.—The British Columbia Government is being asked to incorporate a company under the Tramway Co. Incorporation Act, with the object of constructing a tramway from 750 east from the southeast corner of lot 82, Comox harbor, thence northwesterly for about 20 miles, to the northeasterly end of Campbell's Lake, together with such branch lines, spurs, side tracks and feeders to connect with the said tramway as may be necessary in connection with the same. The provisional directors are: A. D. McRae, T. McLarty, R. L. Craig.

Des Jardins Interurban Ry.—Application was made to the Ontario Legislature for an act incorporating a company with this title, for the purpose of constructing an electric railway from Hamilton to Guelph by way of the Des Jardins Canal, through or over the Burlington heights, along the Griffin Road, by the Grindstone Creek, through Waterdown, continuing therefrom in two divisions—one by way of Flamboro Centre, Carlisle and Freelton, the other by way of Kilbride and the C.P.R. Guelph Junction; and from Hamilton to Galt and Guelph, by way of Dundas and Bullocks Corners; from Hamilton to Burlington by a branch from the first section; and from Waterdown to Aldershot by way of the G.T.R. station. The offices of the company were to be at Hamilton; its capital is $100,000, and it asked power to issue bonds to the amount of $25,000 a mile. The provisional directors were to be; J. O. McGregor, W. Attridge, H. Thompson F. J. Shaidle, Waterdown, Ont.; J. A. Griffin, Hamilton, Ont.; J. K. Griffin, Toronto. The application was opposed before the Railway Committee of the Legislature, and was withdrawn. (Jan., pg. 51.)

ATTENTION, MASTER CAR BUILDERS!

The M. C. B. rules of interchange provide for the use of THE STEEL BACK BRAKE SHOE on your freight equipment.

The use of OUR STEEL BACK SHOE will mean a saving in brake shoe maintenance, brake heads and brake beams.

THE STEEL BACK BRAKE SHOE is an economy on all railway equipment.

I. A. YOUNG,
AGENT

Dunnville, Wellandport and Beamsville Electric Ry.—The Ontario Legislature has passed an act authorizing the company to construct an extension of its proposed railway from Beamsville to Jordan Harbor. The company by its original act of incorporation was authorized to construct a railway, to be operated by electricity, from Port Maitland to Beamsville, with a branch through Gainsborough, Clinton and Pelham townships to Fenwick. A by-law granting a bonus of $5,000 to aid in the construction of this railway was lost at Dunnville, Mar. 30, owing to the fact that, although there was a majority of votes cast in its favor, it lacked 15 of the necessary total vote. (Feb., pg. 135.)

The Eastern Ontario Electric Ry. Co.'s application to the Ontario Legislature for an act of incorporation has been passed. (Feb., pg. 135.)

Fundy Tidal Power Co.—Application is being made to the Dominion Parliament for an act incorporating a company with this title, to develop and utilize the tidal power of certain rivers emptying into the Bay of Fundy, and to supply electric energy therefrom. Among the powers asked for in connection with the operation of the company is the right to construct electric tramways and railways.

The Heaps Lumber Co., which has powers under its charter of incorporation to construct tramways, proposes to construct a tramway to be operated by steam, electric power, water, or such other motive power as the company may deem expedient, from lot 438, group 1, New Westminster district, B.C., northerly and easterly to the northeast corner of sec. 25, tp. 15, New Westminster district.

Huron and Ontario Ry.—The Dominion Parliament has granted the company an extension of time within which it may start and complete the construction of the extensive system of electric railways which it is authorized to construct. (Mar., pg. 215.)

Moncton Street Ry., Heat and Power Co.—An agreement between the City Council of Moncton, N.B., and the Moncton Street Ry. Co., with respect to the construction and operation of a street railway in the city has been approved. It is provided that the company is to complete the construction of the line within three years from the date the charter is obtained. For 20 years the company will not pay anything to the city for the use of the streets; for the succeeding 10 years the company will pay 1% of the gross earnings, and for a subsequent period 2% of the gross earnings. The question of whether the city should take over the line at the end of 40 years was not taken into consideration. The N.B. Legislature is being asked to confirm the agreement. (Feb., pg. 135.)

Montreal and Southern Counties Ry.—A number of business men of Montreal were taken over the route of the railway now under construction between Montreal and St. Lambert, Que., April 5. W. B. Powell, on behalf of the company, stated that cars would be running from McGill St., Montreal, to St. Lambert, by July 31. (Apr., pg. 281.)

Montreal St. Ry.—Press reports state that the company is preparing to make a number of additions to its city lines. (Jan., pg. 53.)

Montreal Terminal Ry.—The Dominion Parliament has granted an extension of time within which the company may construct its authorized lines. The sections of the bill asking for power to construct an elevated railway were withdrawn. The company is owned by the Montreal St. Ry. (Apr., pg. 281.)

Morrisburg Electric Ry.—The Ontario Legislature has authorized the company to construct additional lines in extension of those previously authorized. (Apr., pg. 281.)

Niagara Gorge Rd.—Owing to an ice jam in the Niagara River near Lewiston, N.Y., the water has been raised to such a height that the N.G.R. has been seriously damaged at a number of points, and covered with ice to a considerable height. On April 12 a gang of 300 men were set to work clearing the line preparatory to the necessary repairs being undertaken.

It was stated April 13, as a result of a preliminary examination of the line, after the first break-up of the ice jam that considerable portions of the line will have to be entirely reconstructed, and that when the remainder of the ice goes out, it will be found that so much additional damage has been done, that the whole line from just below the whirlpool rapids to the Lewiston bridge will practically have to be reconstructed. It has been found that whole sections of the line, including ties, rails, telegraph lines, and overhead equipment have been carried away. The guard rail at the brink of the chasm, designed to prevent the cars running over the edge, which cost $150,000 to install, will be a total loss. It is estimated that it will take between two and three months to reconstruct the line.

Niagara, Lockport and Ontario Power Co.—A U.S. press report states that this company's right of way will be used for the construction of a railway to connect Canadian railway lines with the Lehigh Valley Rd. The interests said to be cooperating with the N.L. & O.P. Co. in the project are the G.T.R. and the Pere Marquette Rd. The proposal is said to provide for the construction of a double track third rail line.

Nipissing Central Ry.—The Haileybury, Ont., Town Council has granted a franchise to this company to construct an electric line within the town. Construction is to be started by May 15, and the line is to be completed in the fall. The company has secured a franchise in Bucke tp., and is applying for one in Cobalt. The company proposes to construct a line from Cobalt to the head of the lake, viz.; New Liskeard. The other company desirous of obtaining a franchise at Haileybury was the Cobalt Range Electric Ry. J. W. Fitzpatrick and S. A. Jones are interested in the N.C.R. (May, 1908, pg. 353.)

Ontario Interurban Ry.—An extension of time for the construction of the railways authorized to be constructed by 7 Edward VII, chap. 103, has been granted by the Ontario Legislature. A section provides that sub-sec. 1, sec. 8, of its original act shall be repealed, and it is provided that the company shall have and enjoy all the powers and privileges conferred upon companies by the act respecting companies for supplying steam, heat, electricity, or natural gas for light, heat and power, but the powers conferred by this section shall not be exercised after the extension of five years granted by the bill unless at least four miles of the railway shall have been constructed and placed in operation. (Feb., pg. 136.)

Ontario West Shore Ry.—When this company's bill was before the Railway Committee of the Ontario Legislature, it was decided not to give legislative approval of the company's application to confirm an agreement to take over the Maitland Power Co. The name of the company was changed as above, the word "electric" having been struck out of the title previously used. (Feb., pg. 136.)

The Ottawa & St. Lawrence Electric Ry. Co. has been incorporated by the Ontario Legislature. (Apr., pg. 281.)

People's Ry.—The Ontario Legislature has passed an act incorporating a company with this title, with power to construct an electric railway from Woodstock by way of Plattsville, New Hamburg, Baden, Berlin, Guelph, Fergus and Elora to Arthur, with a branch from near New Hamburg, via Tavistock, to Stratford. The head offices are to be at Berlin, Ont.; the capital stock is fixed at $1,000,000, and it asks power to issue bonds for $20,000 a mile. The provisional directors are; W. A. Bugg, A. N. Warfield, J. McNeel, Toronto; J. H. Wood, Hereford, Eng.; J. C. Madden, Calgary, Alta.; N. R. Bugg, Bright, Ont.; R. E. MacNeel, Delphi, Ind.

A plan of the route of the projected line shows a line from Guelph to Stratford, passing through Mosborough, Breslau, Berlin, Petersburg, Baden, New Hamburg and Tavistock, with branches from Petersburg southerly through New Dundee to Ayr; from Baden northerly to Wellesley, and from New Hamburg southerly through Plattsville, Bright and Innerkip to Woodstock. A line is also projected from Guelph northerly through Elora and Fergus to Arthur.

The taxpayers of New Hamburg passed a by-law Mar. 29 to take $20,000 of stock in the company. (Mar., pg. 215.)

Rupert District, B.C.—Application is being made to the British Columbia Government for the incorporation of a company, under the provincial Tramway Co. Incorporation Act, for the purpose of constructing a tramway in Rupert district, Comox Division, Vancouver Island, B.C. The route of the projected line is described as follows: Commencing on the east shore of Nimpkish Lake on sec. 20, thence northerly to May's Bay, on Broughton Straits, in sec. 2, tp. 1, Rupert district, about six miles. The provisional directors are: A. H. Stracy, M. N. Garland and C. F. Dickinson, Vancouver, B.C.

Simcoe Ry. and Power Co.—The Ontario Legislature has incorporated a company with this title with power to construct an electric railway from Penetanguishene through Victoria Harbour, Sturgeon Bay, Tannerville, Waubaushene, Fesserton and Midland to Coldwater, to develop water power at the Big Chute on the Severn River, and to distribute electric energy. The company has secured a lease from the Crown of the water power and the rates to be charged are to be fixed by the Hydro-Electric Commission. The provisional directors are: J. Playfair, D. L. White, W. Finlayson, Midland, Ont.; C. H. Sheppard, W. H. F. Russell, Waubaushene, Ont.; W. J. Lovering, Toronto. (Apr., pg. 283.)

Stratford and St. Joseph Radial Ry.—The Ontario Legislature has extended the time within which this projected electric railway to connect Stratford with St. Joseph, Lake Huron, may be constructed. (Apr., pg. 283.)

Sydney and East Bay Ry.—Application is being made to the Nova Scotia Legislature for an act incorporating a company with this title to construct an elec-

Steam and Electric Railway Cars

tric tramway, or a tramway or railway operated by any other motive power, from Sydney to East Bay, with power to extend through districts eight and 13 of Cape Breton County, and to construct branch lines. The capital is to be $500,000, and power is asked to increase this to $1,000,000; provision is also made so that the County of Cape Breton may grant aid at the rate of $2,000 a mile for 17 miles, in addition to one-half the cost of the right-of-way, when the same is not along the public highway. The provisional directors are: T. Cozzolino, J. C. Larder and J. B. McCormack. (See Dominion Ry. and Plaster Co., Mar., pg. 214.)

Tillsonburg and Southern Counties Radial Ry.—The Ontario Legislature has passed an act incorporating a company with this title, with power to construct an electric railway from Tillsonburg and from Port Burwell, or at one or more of these points simultaneously, and radiate therefrom into and through the townships of Middleton, Houghton, North Walsingham, Bayham, South Dorchester, and Westminster. The railway may also be extended to London, Woodstock and Ingersoll, with the consent of the municipalities, or with the approval of the Ontario Railway and Municipal Board, should the company and the municipalities fail to reach an agreement. The company is authorized to use steam as a motive power for construction purposes. The capital of the company is fixed at $150,000, with power to increase by $15,000 per mile of line constructed, and authority is asked to issue bonds to the amount of $30,000 a mile for the line between Tillsonburg and Port Burwell, and of $25,000 a mile for the other lines. The provisional directors are; W. S. Law, E. Law, J. Smith, Tillsonburg; S. S. Clutton, Vienna, Ont.; C. Law, Toronto. (Mar., pg. 215.)

Toronto and York Radial Ry.—The Legislative Committee of York Township Council passed a resolution April 10, to apply to the T. & Y.R. Co. to ascertain if something could not be done to establish markets at North Toronto, Sunnyside and Kingston Rd., to help producers who claim that the city market is of no benefit to them. (Feb., pg. 137.)

Toronto, Niagara and Western Ry.—The Dominion Parliament has granted an extension of time for the construction of the projected electric railway from Toronto to Niagara and from Niagara westerly to Brantford and other points. (Apr., pg. 283.)

The Toronto Ry. Co. started laying new rails on sections of Yonge St. on April 14, and similar work is in progress on other lines in the city. The question of the new lines to be constructed is still undecided, although the Mayor stated recently, after a conference with the company's officials, that about 15 miles would be constructed this year. The Board of Control decided later to recommend that the city bear the expense of constructing the sub-structures on the streets where new rails are being laid by the company. (Apr., pg. 283.)

Toronto Suburban Ry.—The Ontario Legislature has extended the time within which the company may construct extensions from Weston and Lambton, Ont. The extension of the Weston line will be to Brampton, 13 miles, thence to St. Catharines and Port Colborne, Ont., and the other from Lambton Mills to Niagara Falls. A. H. Royce, President, informed the Railway Committee of the Legislature that the company proposed to erect a bridge at Lambton which would cost $100,000. The committee was also given to understand that the company proposed to proceed with construction on the Weston-Brampton extension this year. (Mar., pg. 215.)

Yarmouth and Digby Electric Ry.—Application is being made to the Nova Scotia Legislature for an act incorporating a company with this title to construct an electric tramway or railway from Yarmouth through the Yarmouth and Digby Counties to Bear River, with all necessary powers incidental to carrying on the business of an electric railway company. The provisional directors are B. G. Burrill, B. B. Law, J. M. Lovett, Yarmouth; J. A. Dickey, F. B. McCurdy, Hon. B. F. Pearson, Halifax; Hon. A. H. Comeau, Meteghan River, N.S.

Yarmouth and Eastern Ry.—The Nova Scotia Legislature has under consideration an act for the incorporation of a company with this title with power to construct a railway, to be operated by steam, electricity or any other motive power, from Yarmouth to Tusket Wedge, with such branch lines as may be necessary. It is provided that the portion of the line in Yarmouth shall be constructed and operated only by permission of, and arrangement with the Yarmouth St. Ry. The company asked power to generate electric energy, and to supply power and light in places along the railway route. The capital is fixed at $100,000, but power is asked to increase it to $250,000. The provisional directors are; B. G. Burrill, B. B. Law, Yarmouth; J. A. Dickie, Halifax, N.S.

Eleetric Ry. Finance, Meetings, Etc.

British Columbia Electric Ry.—Gross earnings for Feb., $181,638; operating expenses, $99,969; net operating earnings, $81,669; renewal funds, $13,958; net earnings, $67,711; approximate income from investments, $13,550; net income, $81,261; against, $163,961 gross earnings; $84,670 operating expenses, $79,291 net operating earnings; $10,750 renewal fund; $68,541 net earnings; $11,036 approximate income from investments, $79,577 net income for Feb., 1908. Aggregate gross earnings for 8 months ended Feb. 28, $1,525,557; net earnings, including approximate income from investments, $711,266, against $1,331,921 gross and $662,619 net for same period, 1907-08.

The Edmonton, Alta., St. Ry. during the three months ended Mar. 31, carried 316,605 passengers, and showed gross earnings of $13,831.30. The line was only opened in Nov., 1908.

Halifax Electric Tramway.—Railway receipts for Mar., $13,558.21, and for 2 weeks ended Apr. 14, $6,686.16, against $12,718.27 and $6,028.71 for similar periods 1908. Total receipts for 3 months ended Mar. 31, $39,880.82 against $37,910.73 for same period 1908.

London St. Ry.—Gross earnings for Mar., $18,080.01; expenses, $13,411.91; net earnings, $4,668.10; against $16,907.90 gross earnings; $13,015.97 expenses; $3,891.93 net earnings for Mar., 1908. Aggregate gross earnings for 3 months ended Mar. 31, $52,314.84; expenses, $39,121.40; net earnings, $13,193.44; against $50,287.14 gross earnings; $38,731.69 expenses; $11,555.45 net earnings for same period 1908.

Montreal St. Ry.—Total earnings for Mar. $298,727.87; expenses $206,832.03; net earnings $91,895.79; city percentage on earnings $20,540.26; interest on bonds and loans $14,861.91; rent leased lines $498.67; surplus $55,994.95; against $288,674.07 total earnings; $202,389.80 expenses; $86,284.27 net earnings; $19,794.64 city percentage on earnings; $17,879.57 interest on bonds and loans; $444.43 rent leased lines; $48,165.63 surplus for Mar., 1908. Aggregate gross earnings for 6 months ended Mar. 31, $1,813,342.55; net $646,958.83; total charges $181,242.58; surplus $465,716.25; against $1,747,136.88 gross earnings; $691,271.15 net earnings; $186,253.32 total charges; $415,017.83 surplus for same period 1907-08.

Quebec Ry. Light and Power Co.—The proposed reorganization of the company, it is stated, will include the introduction of new capital in order to provide for the construction of increased mileage, additional rolling stock, and further developments of power plant. It has been officially stated that although the C.P.R. has an unexpired option on a controlling interest, it is not now negotiating for control, but that the new capital is to be introduced by a syndicate of British and French capitalists.

St. John, N.B., Ry.—Negotiations are in progress between the company and the city council for a new agreement for the operation of the railway.

Toronto Ry.—Gross earnings for Feb. $275,244; expenses $148,950; net earnings $126,294; against $261,234 gross earnings; $150,977 expenses; $110,257 net earnings for Feb., 1908. Aggregate gross earnings for 2 months ended Feb. 28, $563,625; net earnings $262,624; against $530,959 gross, and $222,512 net for same period 1908. Approximate gross earnings for Mar. $297,742.61; against $272,407.85 for March, 1908.

Toronto Suburban Ry.—The Ontario Legislature has approved and confirmed the deed of mortgage to the National Trust Co., to secure a mortgage of $30,000 a mile in respect of additional lines to be constructed from Weston to Brampton, Ont., from Lambton to Hamilton and other points.

Electric Railway Notes

No, the Gorge Railway is not a road solely devoted to dining cars.—Toronto Globe.

The Halifax Electric Tramway Co., recently received from the Ottawa Car Co. two semi-convertible pay-as-you-enter cars, 21 ft. long.

The Hamilton St. Ry. and its employes have arranged a new schedule of hours, and conditions of work, which went into effect, April 1.

The Calgary St. Ry. has ordered 8 semi-convertible pay-as-you-enter, 10 cross seat cars, 40 ft. long, for early delivery, from the Ottawa Car Co., Ltd.

The Ottawa Electric Ry. recently received from the Ottawa Car Co. 6 semi-convertible pay-as-you-enter cars, 21 ft. bodies, and has ordered six more similar cars for early delivery.

The B.C. Electric Ry. has ordered in England three 50-ton locomotives, of 640 h.p., complete with electrical equipment, suitable for operating on a 600-volt circuit, for its Fraser Valley branch.

The Winnipeg Electric Ry.'s employes have asked for the appointment of a conciliation board to enquire into the

claims made by them against the company. They are asking for a 9-hour day, at the same rate of pay as for the present 10-hour day.

The Montreal St. Ry. is enforcing a by-law to prevent spitting on the floor, platform or any part of a car. The by-law provides a fine of $40 for each offence. The first two offenders were each fined $1, with the option of 8 days' imprisonment, Apr. 4.

G. W. Lang, Assistant Superintendent Ottawa Electric Ry., was presented with a purse of gold Mar. 26, on his leaving the company after 18 years' service. He and his family subsequently left for Calgary, Alta., where he intends entering the real estate and insurance business.

The Board of Railway Commissioners has ordered the Grand Valley Ry. Co. to equip all its cars, including electric freight motors, as well as passenger motors and trailers, and the cars of any companies controlled or operated by it, except the Brantford St. Ry., with air brakes by July 1, next.

The campaign against that most objectionable habit of spitting in cars—or elsewhere—is being prosecuted by the London St. Ry., by the handing of a card by the conductor to the offender, reading as follows: "You are violating the law against spitting. You are subject to a fine of $50, by order of the City Council."

The Montreal Recorder in giving judgment, Mar. 31, in the case of the city against the Montreal St. Ry., wherein the city alleged that the company was not giving a satisfactory service in St. Denis St., said the evidence showed that the company was giving a far better service than it was required to under its contract.

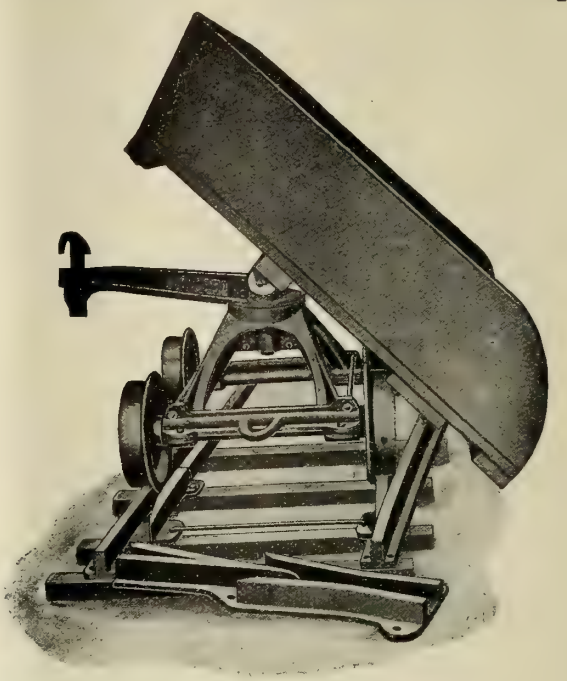
The B.C. Electric Ry., which recently undertook a survey of Sumas district, with the view of dyking the land for reclamation purposes, has decided, in view of the prohibitive cost, to abandon the scheme. This abandonment will not, it is stated, affect the construction of the company's Chilliwack extension which is being pushed to completion.

The Hull Electric Co. has ordered from the Ottawa Car Co. two semi-convertible cars, 21 ft. bodies, of which the principal dimensions are: Length, over all, 30 ft.; over vestibule, 29 ft.; width., inside, 6 ft. 2 in.; over all, 7 ft. 6 in.; height, inside, 8 ft. 2 in.; weight of car body, 13,000 lbs.; wheel base, 8 ft. 0 in.; seating capacity, 28; for delivery in June.

The Winnipeg Electric Ry. has been allowed to amend its statement of defence in the actions brought against it by the City Council. The city seeks to recover penalties alleging that the cars are not being operated in accordance with the agreement, and that the company is distributing electric energy in the city without having obtained Council's consent.

The Toronto and York Radial Ry. has purchased from the Fairmount Transportation Co., of Philadelphia, Pa., eight cars for use on the Glen Grove Division of the Metropolitan Ry., and for other divisions. These cars, which have only been in use about 4 months were built in 1906, are 31 ft. long inside of corner posts, 41 ft. long over all, and have a seating capacity for 44 persons. They are of standard specification and finished in oak, with 18 walk-over seats covered with rattan, and longitudinal seats at each end.

Champion Revolving Dump Car



The CHAMPION CAR is radically different from any now on the market. It is simple, strong, compact and being built entirely of iron except the bed, is extremely durable. The bed revolves and may be dumped on either side or end. Write for catalogue of cars and drums.

Grain Elevator Notes

The Saskatchewan Western Elevator Co., Ltd., is arranging to erect an elevator at Tugaske, Sask.

The work of excavating for the erection of the G.T.P. elevator at Fort William, Ont., is reported to have been nearly completed.

The G.T.R. elevator at Port Colborne, Ont., was damaged during a wind storm, Apr. 7, the north side being blown down.

The Farmers' Elevator Co., Ltd., is said to be arranging to erect a 30,000 bush. elevator at Melita, Man., alongside its present one.

The National Elevator Co., organized in Buffalo, N.Y., is stated to be planning to build a number of elevators throughout the Canadian grain provinces.

J. C. White, of Duluth, Minn., is reported to have purchased about 400 ft. of water frontage at Eburne, B.C., on which he proposes to erect an elevator.

The C.P.R. is reported to be negotiating with T. Henshaw, Vancouver, B.C., for the purchase of a site for the construction of an elevator there during the year.

The Ogilvy Milling Co.'s elevator at Willow Range, Man., together with 13,000 bush. of grain, was destroyed by fire recently. The loss is estimated at $20,000.

The National Elevator Co., Ltd., has been registered under the Northwest Territories Ordinance respecting foreign companies, to carry on business in Saskatchewan.

The Thunder Bay Elevator Co., Ltd., has let a contract to Barnett and McQueen, Fort William, Ont., for the erection of a 1,000,000 bush. elevator at Port Arthur, Ont.

The Thunder Bay Elevator Co., has applied to the Governor-General-in-Council for approval of a plan and site for the construction of a grain elevator, docks and trestle, at Port Arthur, Ont.

A contract has been let to the Barnett and McQueen Co. for the erection of a 600,000 bush. elevator at Fort William, Ont., for the Western Elevator Co. The building, which will comprise a steel working house and tile storage, is to be completed by the fall.

J. E. Dalrymple, Assistant Freight Traffic Manager, G.T.P.R., on his return to Winnipeg from an inspection trip to Battle River, Sask., is reported to have said: "There will be between 30 and 35 new elevators under construction along the G.T.P.R. in a few weeks."

The Alberta Grain Co., which controls 14 elevators in that province, is about to remove its headquarters from Strathcona to Calgary. The company absorbed the old Dominion Elevator Co., some time ago, and is closely allied with the Northern Elevator Co., of Manitoba.

The Thunder Bay Elevator Co., Ltd., incorporated under the Dominion Companies Act, has been licensed under the Act respecting extra provincial corporations, to carry on business in Ontario, with J. P. Jones, Elevator Superintendent, Port Arthur, Ont., as its attorney.

A delegation representing Manitoba, Saskatchewan and Alberta farmers waited on the Minister of Trade and Commerce at Ottawa recently to urge their views regarding Government control of terminal elevators, and also called on the Minister of Railways, respecting some proposed amendments to the Railway Act, regarding car supply, etc.

Government Ownership of Elevators.

The Manitoba Premier moved the following resolution in the Legislature Mar. 4:

"That a memorial be presented to the Governor-General in council setting forth that: Whereas the farmers of Manitoba are dissatisfied with the present arrangements for storing grain at initial points, the elevators being in the hands of the grain dealers; and, whereas farmers believe that it would be in their interests and in the interests of the public generally that the initial elevators be publicly owned and controlled; and whereas, under our constitution, the power to control and regulate the storage and handling of grain, the weights and grades, the power to control and regulate the transportation companies and make the provision for the granting of elevator sites on railways as well as the distribution of cars, and generally all matters relating to the grain trade of Canada, rests in the Federal Parliament and not in the provinces, as provided in the British North America Act. Therefore, this assembly begs to call your Excellency's attention to the desirability of the Government of Canada dealing with the initial elevator situation either by making provision for government ownership and operation of the grain elevators in Manitoba; or, by having conferred upon this province, either by Dominion or Imperial legislation, the power to fully deal with the question of storage, transportation and grading of grain."

After considerable discussion, in the course of which an amendment was ruled out of order, as it was considered as dealing with the expenditure of public money, the resolution was carried without a division.

Grain Elevators and Warehouses.

Following are particulars of the licensed grain elevators and warehouses in the Manitoba Grain Inspection Division, including the provinces of Manitoba, Saskatchewan, Alberta, and British Columbia, with Ontario terminals and eastern transfer elevators on the C.P.R., C.N.R., G.T.P.R., I.C.R. and Alberta Ry. and Irrigation Co.'s Ry.:

MARINE DEPARTMENT

Lake Freight Line Changes

Mackenzie, Mann & Co., Ltd., who hold a controlling interest in the Canadian Lake & Ocean Navigation Co., Ltd., decided recently to take over the management of the company, and the offices have been removed from 10 Wellington St. East, Toronto, to the Canadian Northern building, 9 Toronto St. J. H. Plummer, President, and Frank Plummer, General Manager, have resigned from the board, their places being taken by D. B. Hanna, Third Vice-President, and F. H. Phippen, General Counsel, Canadian Northern Ry., Mr. Hanna succeeding J. H. Plummer as President. The other directors are: Z. A. Lash, Director and Consulting Counsel, C.N.R.; Hugh Sutherland, Executive Agent, C.N.R.; L. Lukes, of Mackenzie, Mann & Co's. staff; F. Nicholls, of the Canadian General Electric Co., and Sir Henry M. Pellatt. F. Plummer has also retired from the General Managership. Capt. J. Foote remains at Marine Department. W. Phillips, General Eastern Agent, C.N.R., has been placed in charge of the C.L. & O.N. Co's. traffic matters, and A. J. Mitchell has been appointed Secretary-Treasurer of the latter company.

As a result of the change in management, the C.L. & O.N. Co's three freight steamships, A. E. Ames, H. M. Pellatt and J. H. Plummer, will not run this season in the Canadian Lakes Line, but will become part of the Merchants' Mutual Line, to which reference is made further on. The C. L. & O. N. Co's other four vessels, the Scottish Hero, Turret Cape, Turret Chief and Turret Court, will continue to run in the bulk ore, coal and grain carrying trade, on the Great Lakes as heretofore.

The Canadian Lake Line will operate this year with seven vessels, instead of nine as heretofore. This line succeeded the Montreal Lake Superior Line, which was organized in 1902, the vessels operated by it being owned by the Canadian Lake & Ocean Navigation Co., R. O. and A. B. Mackay and Capt. Fairgrieve. In 1907 the Mackay boats were withdrawn, and the Canadian Lake Line was formed, comprising boats owned by the Canadian Lake & Ocean Nav. Co., the Canadian Lake Transportation Co. and Capt. Fairgrieve. This year the line will operate the Canadian Lake Transportation Co's. five vessels, the Corunna, Kenora, Nevada, Regina and Tagona, Capt. Fairgrieve's Arabian, and J. B. Miller's Seguin. The Canadian Lake Transportation Co. is managed by C. H. F. Plummer. F. Plummer will retain his connection with that company, and with the Canadian Lake Line. The other officials of the line are H. A. Young, Traffic Manager, Toronto; E. C. Boland, City Freight Agent, Toronto; J. J. Nelligan, General Agent, Montreal; E. J. Jordan, City Freight Agent, Hamilton; E. C. Philpott, General Agent, Cleveland, Ohio; W. Askin, Western Agent, Winnipeg.

The Merchants' Mutual Line will this season comprise the following 11 vessels: Ames, Plummer and Pellatt, owned by Canadian Lake & Navigation Co.; Acadian, Canadian, and Wasaga, owned by Mutual Steamship Co.; Alliance, owned by Montreal Transportation Co.; Beaverton and Mapleton, owned by Merchants' Steamship Co., Edmonton, and Haddington, owned by Mathews' Steam-

FENCE TALK NO. 4

Before you buy or recommend your company to buy any fence wire—even Page Fence—make it prove up its value. Then you'll know what you're getting. Test it two ways, thus:

Insist on being supplied with a piece of high carbon from the horizontal wire from a roll of Page fence and a like piece of hard drawn wire from any other fence. Now for the fire-test. Heat both pieces cherry-red; cool them in cold water, and start to bend them.

The high carbon wire will have taken such a temper that after breaking off a piece the fresh end will cut glass—because it is "high-carbon" steel that takes a temper. That proves its toughness, its hardness, its power to stretch farther, stay tighter, and sag never.

The other wire will bend like copper wire—because it is only hard drawn steel, that won't take a temper. That shows it up as soft, weak—breaks at 1,800 lbs., compared with Page "High Carbon" wire that stands 2,400 lbs. tensile strain. Shows it up, too, as sure to sag, hard to make tight, certain to give out sooner by far.

And then the eye-test—look at the locks of the other fence. Cut one apart. Study it where the wires cross; look for marred surface where the cross comes—that means weakness. Then look at the cut-apart Page lock—positive, cannot slip a little bit, shows no sign of squeezing or pinching.

Look, too, that the running wires are wavy enough to allow amply for expansion and contraction—as the Page does.

Last, the third test—the cost-test. A Page "High Carbon" Fence stands up and stands tight on two posts to any other wire's three. Figure the fence-posts saved, digging labor saved, and the time saved in putting up the fence.

Apply every test—and you will choose Page Fence every time. Send now for valuable free book that teaches how to make sure of fence value before you buy. Write for it to the Page Wire Fence Co., Ltd., Walkerville, Toronto, Montreal, St. John, Vancouver, Victoria, and find out why.

Atlantic and Pacific Ocean Marine

The C.P.R. s.s. Empress of Japan has been equipped with Marconi wireless telegraph apparatus.

The Government s.s. Lady Grey arrived at Montreal Apr. 19, and reported that there was a clear channel in the St. Lawrence River to the sea.

The total value of exports to Mar. 31, for the winter season from St. John, N.B., was $17,393,588, of which Canadian goods were valued at $12,262,582; the remainder being produced in the U.S.

We are officially advised that the statement recently made in the daily press, which we mentioned in our Apr. issue, to the effect that the keels of two vessels had been laid at Govan, Scotland, for the C.P.R., is incorrect.

The Dominion Department of Agriculture, which recently received offers for a steamboat required for the quarantine service at Halifax, N.S., has not accepted any of them, as the vessels offered did not come up to the requirements.

It was recently reported that the R. A. Alley Steamship Co. was about to withdraw its vessels from the route between Vancouver and New Zealand, but this has not been confirmed. The vessels are being operated under a contract, and it is said that no proposal has been made to cancel it.

In the British House of Commons, Apr. 5, in response to questions regarding the progress of the "all red" route scheme, the Parliamentary Secretary to the Board of Trade, referred the questioner to previous replies on the same subject, from which it was gathered that no progress was being made.

Capt. Maas, of the German cadet ship Freya, has been exonerated from all blame for running down the U.S. schooner Mary and May, near Halifax, N.S., in Aug., 1908. The Board of Inquiry at Berlin, Germany, declared that he had manœuvred correctly in all respects and that the accident was unavoidable.

H. Wiegand, General Director, North German Lloyd, died at Hamburg, Prussia, Mar. 29, after a long illness. The North German Lloyd is part proprietor of the Canada Line, which inaugurated its service between Canada and German ports, by the arrival of the s.s. Prinz Oskar, at St. John, N.B., Apr. 5.

It is stated that the first ocean-going vessel to be equipped with a wireless telegraph apparatus was the C.P.R. s.s. Lake Champlain, in 1891, then owned by the Elder Dempster Co., and operated by the Beaver Line. This was probably done for experimental purposes only, as the installation was not maintained.

The Quebec Steamship Co., Ltd., held its annual meeting at Quebec Apr. 5. Following are the officers and directors for the current year; President, W. Price, M.P.; Vice-President, J. T. Ross; Secretary, A. Ahern; other directors, Hon. J. Sharples, G. D. Davie, Sir George Garneau, G. H. Thomson, and H. E. Price.

The C.P.R., which during the past year, has had under charter, the steamships Lennox and Glengarry, will not, it is stated, renew the charters, but has made arrangements with the Bank Line, Ltd., of Seattle, Wash., to operate a service between Vancouver and Hong Kong. The vessels to be used in this service are the Gymeric, Kumeric, Inveric and Suveric.

The Union Steamship Co., which receives a subsidy of about $330,000 a year, contributed by Canada, Australia and Fiji for a mail service, is pressing for an increase of about $95,000 when the present contract expires in July. In return for this, the company would provide a 14-knot service, by which the voyage from Vancouver to Brisbane would take 22½ days.

The White Star-Dominion Line s.s. Laurentic sailed from Liverpool, Eng., Apr. 29, for Quebec and Montreal, thus inaugurating the new service between Great Britain and Canadian ports. This is the Laurentic's maiden trip, the results of which will be of considerable interest owing to the adoption for the first time of the combination of turbine and reciprocating engines on an ocean-going vessel.

The C.P.R. is increasing its harbor accommodation at Vancouver by the construction of four large piers, one of which is nearing completion, being about 600 ft. long. On this pier will be built two freight sheds, with rail tracks between. The other piers will be longer than the first one and will be fully equipped with sheds and tracks, chiefly for handling the increasing through Oriental traffic.

Maritime Provinces and Newfoundland.

The name of the steam tug Planet has been changed by order in council to Racey.

Capt. W. H. Kent, of the Dominion Government fisheries cruiser Petrel, died at Liverpool, N.S., Apr. 4.

The Newfoundland sealing steamer Vanguard was abandoned in the ice near St. John's, Apr. 14, with her main shaft broken. The whole of her season's catch of 9,000 seals went down with her.

The name of the schooner Peerbastah, built at Bath, Me., and purchased from U.S. owners, has been changed by order-in-council to Myrtle Mack, and her registry at Richibucto, N.B., in that name, under No. 116,687, as given in our April issue, has been confirmed.

The port of St. Andrew's, N.B., formerly under the survey of St. Stephen, has been declared a warehousing port, and the outports of Campobello, North Head, and Lord's Cove, and the preventive stations at Grand Harbor and Wilson's Beach, have been detached from St. Stephen and attached to St. Andrew's.

The Dominion Government has erected a lighthouse tower, at Eatonville, Chignecto Channel, in the Bay of Fundy, which will be operated from May 1. The tower, which is placed 85 ft. south of the breakwater on the south side of the Eatonville River mouth, and 132 ft. from the shore at high water, is 22 ft. high, with a fixed red light 24 ft. above high water mark. The illuminating apparatus is dioptric of the fifth order, and the light will be visible at 6 miles from all points.

The Governor-General-in-council has declared Freeport, N.S., to be a public harbor, under the provisions of the Canadian Shipping Act, cap. 113, R.S.C. 1906. The area covered is as follows: All the waters of Grand Passage and its tributary bays and streams east of a line following midchannel between North Point, Brier Island, and Cow Ledge Shoal, between Passage Shoal and Long Island, and between Peter Island and Long Island, south of a line drawn due east from the extremity of North Point, Brier Island; north of a line drawn due east from the north limit of Hog Yard Cove, Brier Island; and continuing up the St. Mary's bay shore of Long Island inside the line of 20 fathoms water to a line drawn due east from the north point of Plumb Cove.

Province of Quebec Marine

The Crown Exploration and Development Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $1,000,000 and office at Montreal, with power, among other things, to build, purchase or otherwise acquire, and operate steam and other vessels. R. Reford and W. I. Gear, steamship agents, are among the provisional directors.

The Fraserville Navigation Co., Ltd., has been incorporated under the Dominion Companies Act with a capital of $50,000, and office at Fraserville, Que., to carry on a general navigation business in Canada and elsewhere. The provisional directors are: A. de St. Aubin, L. Fortin, J. Hamel, C. Boucher, G. G. Grundy, Superintendent, Temiscouata Ry., all of Fraserville, Que.

The Department of Marine has established a lighthouse on the extremity of St. Pancras Point, on the east side of English Bay, north shore of the St. Lawrence. The tower which is erected 120 ft. from the water's edge, is 37 ft. high, exhibiting a fixed white light 82 ft. above high water mark. The illuminating apparatus is dioptric of the fifth order, and the light is visible at 14 miles distance.

The Keystone Transportation Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $100,000 and office at Montreal, to purchase, build, deal in, and operate steam and other vessels, and to carry on the business of ship-owners, wharfingers, etc., and general carriers by land and water. The provisional directors are: R. C. McMichael, R. O. McMurtry, F. G. Bush, M. J. O'Brien, H. H. W. Jackson, Montreal.

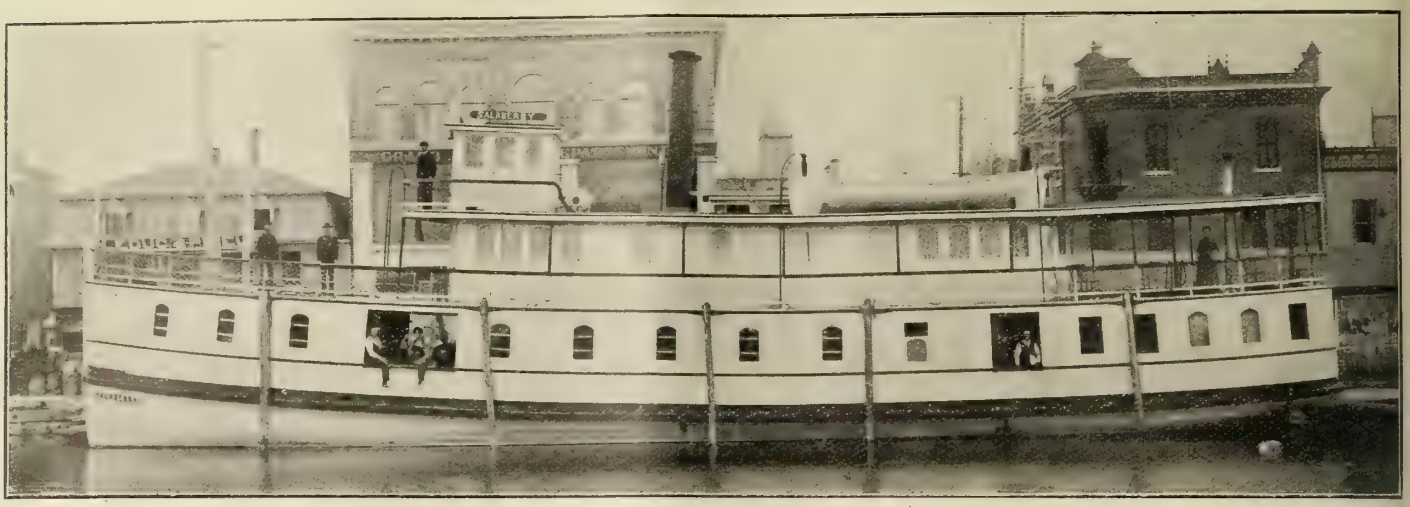
Ontario and the Great Lakes.

A council of the National Association of Marine Engineers of Canada has been formed at Midland.

The Inland Navigation Co.'s steamboat, at present building at Detroit, Mich., will be named Stawacona.

A scheme is on foot in Owen Sound to form a company to construct and operate a drydock there at a cost of about $100,000.

The name of the steamboat D. C. Whitney, No. 122435, Sault Ste. Marie, has been changed by order-in-council to Gargantua.



FOR SALE

Passenger and Freight Steamer in first-class condition, practically new, built of oak

DIMENSIONS:

Length, 99 ft. 5 in.; Breadth, 21 ft. 6 in.; Depth in Hold from tonnage deck to ceiling at amidships, 5 ft. 4 in.; Fitted with compound engine, 13 1-2 N.H.P.; Gross tonnage, 222 tons; Net tonnage, 141.95 tons.

The name of the steamboat Harrison, No. 61,153, registered at Owen Sound, has been changed by order-in-council to Churchill.

Capt. J. McInnes, owner of the fishing tug Primrose, of Meaford, fell overboard, Apr. 10, while bringing the vessel from Owen Sound, and was drowned.

The Northern Navigation Co.'s s.s. Huronic, left Sarnia Apr. 17 and arrived at Port Arthur Apr. 19, this being the earliest opening of navigation in recent years.

The Ontario Government is reported to have acquired the steamboat Navark, owned by A. J. Burge, Windsor, for use in the fishery service in the Bay of Quinte.

The name of the steamboat Brockville, No. 101,254, Montreal, owned by the Richelieu & Ontario Navigation Co., has been changed by order-in-council to Rapids Queen.

J. E. McLurg, heretofore chief clerk to Superintendent, Algoma Central Steamship Line, Sault Ste. Marie, has been appointed Superintendent, vice W. C. Barr, resigned.

A recent press despatch states that J. F. Luncen, formerly mate of the C.P.R. s.s. Manitoba, has been appointed master of the Dominion Government fisheries steamer Bayfield.

The steam barge Capt. Hinckley arrived at Prescott, Ont., from Oswego, N.Y., Apr. 16., being the first boat of the season to come from the St. Lawrence through the islands.

It is announced that 29 vessels will be engaged in the package freight trade between Montreal and Fort William this year, thus being able to perform a daily service between these ports.

The Western Navigation Co.'s s.s. Kaministiquia, recently built in England, is expected on the lakes early in May, being en route, with a cargo of pig iron for Montreal and Fort William.

The name of the steamboat Owen, No. 116,318, registered at Amherstburg, recently purchased from Detroit, Mich., by F. J. Trotter, has been changed by order-in-council to Marion E. Trotter.

The Richelieu and Ontario Navigation Co. is considering the question of equipping its vessels with wireless telegraphy, but no definite decision as to the system to be adopted has been arrived at.

The Niagara Navigation Co. has had the question of installing wireless telegraph apparatus on its vessels under consideration, but we are advised that no steps have been taken in that direction as yet.

L. G. McCarthy, K.C., Toronto, was recently presented with a cabinet of silver and cutlery by members of the National Association of Marine Engineers, for services rendered in the passage of the recent bill through Parliament, benefitting the marine engineers of the Dominion.

It is announced that the Dominion Government proposes to stake the St. Clair River during the present season, thus marking the up and down channels, with a view to the prevention of accidents. Up-bound vessels will pass on the Canadian side and down bound vessells on the U.S. side.

The International Waterways Commission, which has been enquiring into the possibility of raising the levels of the Great Lakes, by the construction of a dam in Lake Erie and piers in the connecting rivers, for the past two years, is preparing a report on the subject, which will be issued shortly.

The Lehigh Portland Cement Co., Ltd., Belleville, Ont., is offering the passenger and freight steamboat Salaberry for sale. Her dimensions are, length 99 ft. 5 in.; breadth, 21½ ft.; depth in hold from tonnage deck to ceiling at amidships 5⅓ ft., fitted with compound engine 13½ n. h.p.; gross tonnage 122 tons, net tonnage 141.95 tons.

Harrison and Sons, Owen Sound, launched the steamboat Harrison, which they are building there, recently. The vessel is 121 ft. long, 23 ft. beam, and 13 ft. deep. She will be equipped with a fore and aft compound engine, with cylinders 19 in. and 32 in. diar., by 26 in. stroke, supplied with steam from a Scotch boiler, 11 ft. by 13 ft., made by Polson Iron Works, Ltd., Toronto.

A U.S. press report states that a company is being formed at Sault Ste. Marie, to purchase the steamboat Minnie M. from the Algoma Central Ry., and to operate her between that port and Munising. She was built at Detroit in 1884, her dimensions being: Length, 140 ft.; breadth, 30 ft.; depth, 10 ft.; tonnage, 613 gross; 276 register, and she is equipped with an engine of 38 h.-p. driving a screw.

The Richelieu and Ontario Navigation Co.'s vessel, at present under construction at Detroit, Mich., some particulars of which were given in our Apr. issue, will be of the following dimensions; Length, over-all, 256 ft.; breadth of beam, over-all, 44 ft.; depth of hull, moulded, 14.9 ft. 2 She will be equipped with 4-cylinder triple expansion engines balanced on the Slick system, developing 2,000 i. h.-p., supplied with steam from four boilers 11.6 ft. by 11.6 ft. fitted with heated draught. The engines will develop a speed of 18 miles an hour.

The Dominion Marine Association has for some years past asked the Department of Marine to provide black spar buoys and red spar buoys with distinctive tops. This year the Association's counsel, F. King, made the suggestion that the Department adopt the simple device of pointing one spar and sawing another square across. The Deputy Minister states that directions have been given to carry out this suggestion in the Montreal-Kingston division. The starboard hand buoys will be pointed to correspond with conical buoys and the port hand buoys will be sawed off square to correspond with can buoys.

B. C. and Pacific Coast Marine.

The name of the steamboat Welcome, No. 126,271, New Westminster, B.C., has been changed by order in council to Velma W.

The Vancouver longshoremen struck work recently, demanding 40c an hour, and 50c for overtime, against 35c and 40c respectively, as before.

The fog horn at Carmanah on the west coast of Vancouver Island, will be discontinued at a date to be announced, in order that the signal may be changed to a more powerful diaphone installation.

Application is being made to the Governor-in-Council for approval of the construction of a wharf at Deep Cove, on the north arm of Burrard Inlet, plans for which have been deposited with the Minister of Public Works.

It is reported that a line of sailing vessels between Vancouver and Great Britain has been inaugurated by the sailing of the ship Wray Castle from Liverpool recently. R. Ward & Co., Victoria, and C. Gardiner Johnson, Vancouver, are said to be interested.

The North British Columbia Navigation Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $35,000, to acquire and operate steam and other vessels for the conveyance of passengers, freight, etc., and for the towing of other vessels, between B.C. ports.

The Okanagan Lake Boat Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $25,000 to carry on the business of public recreation caterers, and in connection therewith to own and operate vessels of all descriptions and to act as carriers of passengers and freight.

We are officially advised that press reports to the effect that the G.T.P.R. had completed arrangements for a strong shipping service between Prince Rupert and Northern Pacific coast ports; and that the company had acquired land for terminal and dock accommodation at Vancouver, are incorrect.

The Fort George Lumber and Navigation Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $50,000, to deal in lumber of all kinds, and to act generally as stevedores, etc., to purchase or otherwise acquire and operate vessels of every description, and to act as carriers by land and water, shipping agents, etc.

The North Coast Towing Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $15,000, to purchase or otherwise acquire from D. M. Moore, C. W., G. L., and H. Peck, of Port Simpson, the steam tugs Topaz and McCulloch and the steam launch Hopewell, with power to acquire and operate steam and other vessels, and to carry on a general business as ship owners and shippers.

W. Moore, a pioneer steamboat man on the B.C. coast, and the founder of Skagway, died recently, aged 85. He arrived at Queen Charlotte Islands in 1852 in the brig Tepic, an old time smuggling vessel, and in 1859 built the steamboat Henriette. In 1869 he made the first trip up the Stikine River in the steamboat Flying Dutchman, which was built in Victoria. He left navigation business several years ago for mining.

We announced in our Mar. issue that the C.P.R. had decided to add another vessel to its B.C. coast service, and since then daily and other papers have published various items to the effect that the company will build two and possibly three vessels, and that contracts for two vessels have been let. The facts are exactly as we have already given. The company has decided to add one vessel for the B.C. coast service, and up to the date of our last advice no decision had been reached as to where the vessel is to be built, nor had the plans been passed.

The Department of Marine is changing the system of lights on the railway swing bridge over the Fraser River at New Westminster to conform to the system generally in use throughout Canada to mark the swing of bridges across navigable rivers. In future a white light will be shown at each end of the swing protection and a similar light on each side of the navigable channel, while the draw will be surmounted by a red light showing up and down the channel, when the passage is closed, and a green one when it is open. The signal to open the draw is three long blasts of the whistle.

Notices to Mariners

The Dominion Department of Marine has issued the following notices;

No. 21. Mar. 25. 45. Ontario, Georgian Bay, west side, Cape Croker light station, new lighthouse, change in character of light. 46. Ontario, River St. Mary, Sault Ste. Marie canal, upper entrance, gas buoy placed. 47.—Ontario, River St. Mary, Vidal shoal, gas buoys established, change in gas buoy light. 48. United States of America, Lake Ontario, Thirty-mile Point light, change in characteristic. 49.—United States of America, Lake Erie, Ashtabula harbor range front light station, change in fog signal.

No. 22. Mar. 27. 50. Quebec, River St. Lawrence, Father Point, new lighthouse, change in character of light. 51. Quebec, River St. Lawrence, Bicquette Island, intended change in character of light. 52. Newfoundland, southwest coast, Cape Ray, temporary light. 53. United States of America, Maine, Portland Harbor, Brooklyn ledge, buoy established.

No. 24.—Apr. 14.—55.—Quebec, River St. Lawrence, entrance to Saguenay River, hydrographic notes.

No. 25.—Apr. 15.—56.—Quebec, River St. Lawrence, chart, White Island to Orignaux Point, issued. 57.—Quebec, River St. Lawrence, chart, Berthierville to Lake St. Peter, issued.

No. 26.—Apr. 15.—58.—Quebec, River St. Lawrence, Lake St. Louis, Chateauguay lightship replaced temporarily by gas buoy. 59.—Ontario, Lake Erie, northeast point of Pelee Island, light to be discontinued. 60.—Ontario, Lake Huron, False Detour Channel, Kitchener Island, light discontinued.

No. 27.—Apr. 17.—61.—Nova Scotia, Bay of Fundy, Cumberland Basin, Amherst Point wharf, light established. 62.—Bay of Fundy, Cumberland Basin, Minudie wharf, light established. 63.—Nova Scotia, Bay of Fundy, Minas Basin, Cobequid Bay, Shubenacadie River, Maitland, light established. 64.—Nova Scotia, Bay of Fundy, Parker Cove, lighthouse established. 65.—Nova Scotia, south coast, Halifax approach, change in color of Devil Island westerly lighthouse for experimental purposes. 66.—Nova Scotia, south coast, Fisherman Harbor lighthouse, dates when light will be shown each year. 67.—Nova Scotia, Cape Breton Island, Great Bras d'Or, McKenzie Point, new lighthouse.

No. 28.—Apr. 20.—68.—Ontario, Lake Huron, south end, Point Edward, front range lighthouse burnt down, temporary light.

No. 29. Apr. 21. 69. Nova Scotia, south coast, Liverpool Bay, gas and bell buoy established. 70. Nova Scotia, north coast, Northumberland Strait, Pictou harbor, change in positions of Fraser Farm range lighthouses.

No. 30. Apr. 22. 71. Quebec, River St. Lawrence, mouth of Saguenay River, Prince shoal, lightship replaced by gas and bell buoy. 72. Quebec, River St. Lawrence below Quebec, Traverse of St. Roch, lower end, lightship replaced. 73. Quebec, River St. Lawrence, Cap Sante, buoyage.

Coast, Lake and River Officers for 1909.

The following appointments have been made by the principal navigation companies engaged in the coast, lake and river routes for their various steam vessels, tugs and barges, for the current year in addition to those published in our April issue. In the first column is given the name of the vessel, in the second that of the captain, and in the third that of the chief engineer:

The Most Economical and Safest Staybolt on Earth

FOR LOCOMOTIVE, MARINE AND STATIONARY BOILERS
DOUBLE THE ENDURANCE OF SOLID STAYS

AN AUTOMATIC INSPECTOR

Checks the broken and partly broken staybolts and crown stays. Positively prevents explosions from broken stays. Assists combustion. Years of hard service have proven their safety and economy.

We furnish full length Hollow Staybolt Bars in the rough, averaging from 8 to 10 ft. long, any size, O.D. & I.D.

We also make solid staybolt bars of the best double refined charcoal iron. Average length, 16 to 20 ft.

Vessels Removed From the Register

During March the following vessels were removed from the register for the reasons assigned: Steam:—Hero, Hamilton, Ont., 37 tons, supposed to be out of existence; John P. Douglass, Vancouver, B.C., 149 tons, burnt; L. Boyer, Halifax, 49 tons, broken up; Lapwing, New Westminster, B.C., 98 tons, dismantled; Otranto, Quebec, 24 tons, lost; Picton, Montreal, 502 tons, burnt; Rheata, Midland, Ont., 18 tons, burnt; Santa Cruz, Owen Sound, Ont., 97 tons, broken up; Tecumseh, Sarnia, Ont., 530 tons, burnt; Varennes, Montreal, 228 tons, broken up. Sailing:—Arabia, Lunenburg, N.S., 80 tons, transferred to Newfoundland; Bobs, Parrsboro, N.S., 97 tons, wrecked; Canning Packet, Annapolis Royal, N.S., 98 tons, broken up; Esperance en Marie, Quebec, 23 tons, broken up; Ethel Blanche, Pictou, N.S., 17 tons, broken up; Grilse, Pictou, N.S., 38 tons, transferred to Newfoundland; Hispaniola, Lunenburg, N.S., 91 tons, transferred to Newfoundland; M. A. Nickerson, Barrington, N.S., 37 tons, transferred to Newfoundland.

Proposed Drydock af Montreal

G. W. Stephens Chairman, Montreal Harbor Commission, who has recently returned to Montreal after an extended trip through Europe, in the course of which he visited many of the more important ports, states that, in order to take full advantage of her waterway, Montreal is confronted with those problems, which were receiving the attention of the Commissioners. He said; "The deepening of the ship channel and the buoying and lighting, has made the St. Lawrence route within the past 5 years a revelation to those in the shipping business. At the same time the commerce has doubled. While it is gratifying to record that the marine insurance rates on ships and cargoes have been halved, yet, despite these improvements and the satisfactory results obtained, the marine insurance rates on Canadian business and the conditions governing marine insurance on the St. Lawrence are not what they should be. There are ships in the St. Lawrence trade that are coming from the ocean to Montreal of such a size that no drydock accommodation in the whole thousand miles of waterway is able to take charge of them. No efficient repair equipment exists from Montreal to the sea, to provide that confidence to the shipping trade that any modern port must supply.

"The third problem is economy in the terminal costs within the port itself. If these three problems can be satisfactorily solved, the prestige of the St. Lawrence route as an international avenue of trade will be unassailable. The safety of the waterway, the reduction of marine insurance rates and economy in terminal charges are the three principal factors in developing the great natural advantages of Canada's waterway.

"The further reduction of marine insurance rates cannot be brought about until the St. Lawrence River is provided with adequate dock accommodation to protect her shipping. Two feasible proposals for supplying drydock facilities to the St. Lawrence will be laid before the commissioners very soon."

Mutual Steamship Company Bonds.

The Mutual Steamship Co., Ltd., Toronto, has issued through Aemelius Jarvis & Co., Toronto, $70,000 1st mortgage 5½% serial gold bonds, dated May 1, 1909, interest payable half yearly. Each bond is for $500. They mature $7,000 a year on May 1, 1910 to 1919, both inclusive and are redeemable on any interest date at the company's office at 102 and interest. They are secured by a first mortgage on the s.s. Acadian. The following facts are also taken from the prospectus. The life of a steel-clad vessel is estimated at 60 years. The classification societies will give such a steamship an A1 rating for 20 years, and upon the observation of certain conditions will renew the rating for a like period. Insurance is carried which amply protects the bondholders against the hazards of navigation, all polices being made payable to the trustee for the bondholders. It covers not only the ordinary marine dangers of fire, collision, stranding, sinking, etc., but also affords protection against claims for damage done to other vessels, to docks, bridges, floating or other property. The insurance also covers any breaking of machinery, or bursting of boilers, and any damage to the vessel or any other thing through the negligence of the master. Besides this full general insurance provision, the vessel carries a heavy "protection and indemnity" insurance against liability for loss of life or personal injury. The Acadian cost about $144,000, and carries $144,000 of general insurance and protection and indemnity insurance. The mortgage provides that the insurance must at all times amount to at least 25% more than the outstanding bonds. The mortgage requires that the vessel be operated on practically a cash basis by providing that it shall not become indebted to an amount more than 5% of the first mortgage bonds.

The Acadian is a steel-clad steamship, completed April, 1908. Her dimensions are as follows: Length, 257 ft.; breadth, 43 ft. 6 in.; depth, 26 ft. 6 in. She has a capacity through to Montreal of 80,000 bush. and a capacity on the Upper Lakes of 120,000 bush. She is also adapted to the carrying of package freight. She is lighted by electricity, steam heated, has a double bottom, and is otherwise thoroughly modern in all equipments. On an economical consumption of coal she can maintain a speed of 13 miles an hour light and 11 miles an hour loaded.

The Mutual Steamship Co. was organized in the fall of 1907, with a paid-up capital of $153,000, to construct steamships and to operate a line between Fort William, Port Arthur and Montreal, or other ports, by way of the Great Lakes and the Welland and St. Lawrence Canals. Owing to the steady growth of the Canadian Northwest, the demand for transportation via the Great Lakes has increased much more rapidly than the facilities. The managers of the company are thoroughly familiar with transportation on the Great Lakes, and are most favorably situated to secure full cargoes in both directions. They estimate the earnings on such a vessel as the Acadian as follows:

Down cargo of wheat to Montreal....	$4,000.00
Up cargo of package freight.....	3,000.00
	$7,000.00
Operating expenses round trip, 24 days	3,000.00
	$4,000.00
About nine trips can be made during the season.	
Total net profit	$36,000.00

Lake Carriers' Grievances

The following memorandum was presented to the Ministers of Trade and Commerce and of the Interior in Ottawa recently, on behalf of the Dominion Marine Association, by A. A. Wright, chairman of the grain section, and F. King, Counsel, the Winnipeg Grain Exchange, Montreal Corn Exchange, Toronto Board of Trade, and Dominion Millers' Association being also represented:

From 1888 to 1898 approximately, a vessel arriving at Fort William, Ont., up to 2 p.m. loaded and left on the same day. Presumably on account of terminal elevators being so profitable to operate, the number has grown steadily until in 1908, there were 11 working houses and three more were either building or projected. The present elevator capacity is over 17,000,000 bush., and although at no time between Sept. 1, 1908, and the close of navigation was there over 5,000,000 bush. distributed among these elevators, yet three more houses are projected with a capacity of about 5,000,000 bush. more. It costs as much to let a steamer lie at a dock as to run her in a lake, less 2-3 of the fuel consumed on a trip. Thus a steamer of 10,000 tons, carrying 300,000 to 320,000 bush., and which can earn $400 a day carrying coal one way at a total fuel cost of $530 for the trip, or $100 a day running time, loses $300 at least every day she is delayed in loading and running from elevator to elevator. The actual time of loading such boats now varies from two to six days. On an average of four days she thus loses $1,000 in round figures, or 1-3c per bushel. On a canal sized steamer the actual excess of cost now as compared with formerly is 1-4c to 1-2c per bush., all of which must come out of the producer eventually because competition (caused by the growth of Canadian tonnage from 600,000 bush. a trip in 1898 to 6,500,000 bush. a trip in 1908) has cut rates down to a minimum, leaving no margin of profit to provide for this additional cost above mentioned. The all water rate from Fort William to Montreal, now averages 5c or less per bush., while the rail rate from Buffalo to New York is 5 1-2c plus 9-10c or 6.40c per bush. One can see that this all water rate will have to be increased to provide for the additional expense caused by de-

FIRST-CLASS TUGS FOR WRECKING, RAFT TOWING, ETC.
STEAM PUMPS, DIVERS, JACKS, HAWSERS AND LIGHTERS

lays, and this will of course ultimately come out of the producer. A vessel of 200,000 bush. capacity has been loaded a full cargo at C.P.R. elevator "B" in 1 hour and 58 minutes. A vessel of 120,000 capacity has been loaded full at the C.N.R. elevator while her captain was simply reporting, clearing customs and visiting his vessel agent. The Empire elevator can do as well as these and these three houses could handle all the grain if no others were there and could thus save the time of the boats, as a vessel may get into port and begin loading at one house, while two or three boats may get ahead of her at the next house and thus cause her delay. Two boats reaching Fort William together last spring, one for Georgian Bay (a two days' run) and the other for Kingston (a six days' run) were loaded, but under such different conditions that the Kingston boat was unloaded a day ahead of the Bay boat. A vessel last summer unloaded at Fort William the same day as another unloaded at Jack Fish, which is 36 hours from Duluth. The Jack Fish boat went to Duluth for her load of grain and reached Kingston before the boat from Fort William simply because she arrived at Duluth at 7 a.m. and was able to leave again at 11 a.m. the same day, while the Fort William boat was four days in loading. This economic waste can certainly be avoided and a corresponding saving can be made for the producer of the grain. The establishment of a clearing house will bring about a very great saving and assist as much as anything in preventing these delays.

SHORTAGE IN OUT-TURNS.

These have been continually getting worse until vessel owners in self-protection have been forced to limit their liability to 1-2 bush. in the thousand, just as they have heretofore limited it in shipments of flax. In 1905 Fort William grain unloaded in Buffalo overran 20 lbs. per 1,000 bush. on 4,500,000 bush. delivered. In 1908 Fort William grain unloaded in Buffalo fell short 44 lbs. per 1,000 bush., an increase of 74 lbs. for the worse in three years. In 1908, Chicago grain unloaded at the same elevators in Buffalo shows a net shortage of only 10 lbs. per 1,000 bush. and Duluth grain only 15 lbs. per 1,000 bush., Fort William weights being thus 4 1-2 times worse than Chicago and three times as bad as those from Duluth. Statistics compiled by the Dominion Marine Association show the same increase as above. In 1906 net shortages ascertained by returns from members of the Association were approximately 10,000 bush. In 1908 from a partial return this net shortage has grown to over 42,000 bush. on about 32,000,000 bush. carried; and including companies not reported has grown at least to 50,000 bush. on about 40,000,000 bush. carried. This shortage is net after crediting all overages. This continued increase has alarmed vessel owners and has forced the adoption of a new bill of lading which limits the vessel liability to 1-2 bush. in the thousand. This is twice the ascertained shortage from Duluth to Buffalo or on experienced shortages of Duluth and Chicago grain unloaded at Canadian ports. The vessel owners have given these facts to exporters and shippers generally, and while these parties have admitted the vessel owners' grievance they are afraid to do business and trade is at a dead stop. They admit there is no reason why the vessel owner should accept the liability, but someone should as shippers put their grain into a terminal elevator and sell it f.o.b. ocean steamer Montreal or foreign port, and feel naturally they should get their full quantity on board steamer at Montreal. instead of possibly 100 up to 5.000 bush. short weight. Some years ago the steamboat Iroquois was 5,000 bushels short, and it took three months to obtain an admission of this, upon the clearest evidence, as Fort William insisted that its records, as usual were absolutely perfect. Last fall the steamboat Iroquois was reported to have received 120,000 bush. at the C.N.R. elevator and when unloaded at Meaford she was 1,339 bush. short in the afterhold and 110 short in the forward hold, a total of 1,449 bush. Instead of getting $2,000 net freight after paying elevator charges she only got $400, a net cash loss in operating of over $1,000, besides the profits she would have had. Meaford furnishes car numbers and affidavits as to the correctness of their weight. The C.N.R. elevator and Mr. Gibbs claim their record is perfect. The vessel suffers the loss. The average shortages have thus grown from practically nothing in 1898 to about 1 1-4 bush. per thousand in 1908, and it is expected that unless radical changes are made, 1 1-2 or 2 bush. per thousand may be the shortage this year. As the number of elevators increase this shortage will increase and a further tax on the grain will be added, and come off the value of the grain to the producer. One and a quarter bush. on the thousand is virtually 1-8c per bush. to be added to the freight rate, and this often represents the exporter's profit.

The Government is asked to enforce the Manitoba Grain Act and to compel the elevators to weigh up and ascertain the actual surplus, if any, at least once a year when the stocks in elevators are at their lowest point. That if necessary the Act be amended to make it clear that no terminal elevator has any title or ownership in grain passing through the house. That all screenings taken out in cleaning grain to pass the grade of inspection be the property of the Inspection Department as well as all surplus grain, which, of course, can only be found as a result of errors in weighing in and out. That the proceeds of this grain at all terminal or transfer elevators, either at the head of Lake Superior, Georgian Bay, Lake Huron, Kingston or Montreal, should be used by the Government to pay the cost of inspection and weighing and to reimburse shippers for shortages ascertained at Montreal, Kingston and other terminals when all grain has been delivered by the vessel in good order. The adoption of this method, by eliminating any chances for profit by the elevator companies from screenings or from the accumulation of grain, would naturally have a tendency to abolish the shortages entirely. The contention is that all services rendered by terminal elevators should be liberally paid for so that all interests, producer, railway, vessel carrier and terminal elevators may all have reasonable profit, but so that no one should benefit at the expense of the other, and the gamble on the outturn may thus be eliminated. If it is found that a tax of 30c per thousand bush., or 50c or any other reasonable amount is required to enable the Government to handle this plan without loss, the vessel owners are willing to pay their fair share, for no matter what it is, the grain must eventually pay for it, and the lower all these costs are kept the more will be returned to the producer..

COST OF WATER CARRIAGE FOR GRAIN.

Following are comparative rates on coal, ore and wheat in 1908:

Coal.—The minimum rate on coal from Lake Erie to Lake Superior ports was 30c per ton of 2,000 lbs. The open rate last trip was 50c per ton. From Lake Erie to Lake Michigan the minimum rate was 40c per ton of 2,000 lbs.

Wheat.—Fort William to Georgian Bay (without deduction for shortages in outturn). The minimum rate on wheat from Fort Wliliam to Georgian Bay may be taken as 1c per bush. or $10 per 1,000 bush. The cost per ton may then be figured as follows:

Per 1,000 bushels		$10.00
Less trimming charges per thousand bushels	.70	
Less shovelling charges	3.00	3.70
		6.30
Or at 30 tons per thousand bushels the rate per ton would be 1-30 of this or		.21
At 1¼c. per bushel the rate would be		$12.50
Less		3.70
		8.80
At 1¼c. per bush. the rate would thus be per ton 29⅓c.		.29⅓
At 1½c. per bushel the rate will be		$15.00
Less		3.70
		11.30
or the rate per ton would be		.37⅔

The foregoing shows rates carried on the same bills of lading, but it is important that the vessel is not liable for shortage in coal nor is there any risk of damage to a coal cargo. One must, therefore, deduct from these figures the vessel's liability for shortage in outturn and the net rate to the carrier will then appear as follows: Wheat, with limited liability for 1-2 bush. in 1,000, according to new bill of lading. On a limitation of 1-2 bush. per 1,000 with wheat at $1 a bush., one must deduct 50c per 1,000 bush., or 1 2-3c per ton from the rates shown above. The net rates will then be:

	cents
At 1c.—21c. less 1⅔c.	19⅓
At 1¼c.—29⅓c. less 1⅔c.	27⅔
At 1½c.—37⅔c. less 1⅔c.	36

If, however, we take shortages as they were in 1908 we find they average 1 1-4 bush. per 1,000 or 1.25 per 1,000 bush. This would mean a further deduction from the last named rates of 75c more. The rates would then appear: Wheat, with deduction of average shortage of 1908:

At 1c.—19⅓c. less 2½c.	.16⅝
At 1¼c.—27⅔c. less 2½c.	.25⅛
At 1½c.—37⅔c. less 2½c.	.35⅛

for 75c. per 1000 bushels is 2½c. per ton, hence the above deduction.

These rates on wheat under varying deductions for shortage are the rates which can be earned as against 30c or 40c on coal and 45c on ore; the rate on ore from Lake Superior to Lake Erie being 45c as a contract was 65c less 20c for unloading last year, prior to 1908 the rate being 75c less 20c, or 55c net.

Similar comparisons on rates to Montreal: The minimum rate on wheat to Montreal would be say 3 1-2c from Fort William.

Per 1000 bush.		$35.00
Less elevator charges at Montreal	5.00	
Shovelling	2.50

If, instead of deducting only 1-2 bush. per 1,000, we deduct the average shortage of 1908, this will mean as in the previous tables 2 1-2c less per ton, and the rate to the carrier will be 86 2-3c, less 2 1-2c, or 84 1-6c. Coal, on the other hand, carried from Lake Erie to Montreal or only half the distance which this wheat has to travel realizes $1.15 ton, showing a very substantial advantage in favor of coal cargo. Even if wheat is put up as high as 5c per bush. through from Fort William to Montreal, it will be found that the net rates per ton on wheat would figure out $1.36⅔, and after deduction of liability for shortage $1.34⅙. This computation would be as follows;

At 5c. 1000 bush.	$50.00	
Less as above	8.50	
	41.50	
Less limited shortage	.50	
	$41.00	
or per ton 1-30 of this		1.36⅔
or with 1908 liability		1.34⅙

It is also to be noted that in the matter of despatch the average time of loading at Fort William in grain is three days; on ore it is 6 to 12 hours. On coal it is 8 to 12 hours. Unloading ore at Lake Erie or South Chicago is 6 to 12 hours. Coal is 12 to 24 hours. Grain is 12 to 36 hours, according to the size of the vessel and the elevator.

At 30c a ton, no canal sized steamer with marine insurance at 6% and at the present cost of operating can return $1 to its owners or shareholders as dividends on money invested, to say nothing of loss of time for accidents, etc., which freight rates should cover. It is, therefore, manifest that the vessel owner cannot continue to pay these shortages and remain in business, and it is therefore absolutely necessary to devise some remedy for the difficulty at once. Shippers have had notice for over a year of the intention of vessel owners to limit their liability for shortage, but evidently they have relied on past experience of the inability of vessel owners to take uniform action, not realizing that present rates and conditons if continued would eventually result in the bankruptcy of the majority of Canadian vessel owners. No reason can be advanced why a vessel owner should pay a shipper for grain which has either never been put on board his vessel or else is stolen by the unloading elevator. There is absolutely nothing in the shipper's contention that the carrier should have some one to check the weights. The captain of the vessel is a skilled sailor, but does not and cannot know anything about elevators. The shippers on the other hand have their agents who, in some cases, have been old elevator experts, and if anyone should check the weights it should be the shipper. As a matter of fact, however, no one or two men no matter how expert, can guarantee in some elevators either that all grain weighed at the loading house has gone into the vessel, or that all grain passes through the scales at the unloading house.

It is suggested that the master of a vessel could tell the quantity of grain loaded by measuring the volume in the hold of his vessel. This has been tried repeatedly, however, and no estimate has been found to be in the slightest reliable except in discrepancies of 1,000 bush. or upwards. The other suggestion that the quantity of grain could be estimated by the draught of water is answered at once in the same way. Canal sized vessels carry from 20 to 25 tons per inch, or 600 to 800 bush., and as there is always more or less motion of the water it is impossible to read the vessel's draught closer than say half an inch at best and seldom that. On a large vessel of 300,000 bush. capacity, carrying 2,000 bush. per inch of draught, it is clear that any estimate would be useless. Yet even if this is granted that a captain protests before sailing or before signing bills, that either volume in hold or draught in water leads him to believe the quantity billed is not on board, what is the result? Simply this, the vessel must sail without bills of lading as the shipper will not give her any, and when she unloads and is brought out short, on the one side the captain and the unloading elevator will say the grain is not there, and on the other side the loading elevator and the Government weighman will say the grain was put on board. It is a safe gamble that the result of litigation would be that the vessel would suffer as usual. On the other hand, granting that the courts might hold after years of litigation that the grain was not put on board, and the vessel was loaded at 2, 3, 6, 8, 10, or 11 elevators, who can say which elevator failed to put it on. Another 5, 10, or 50 years would be required to settle the question as to which one of these elevators was responsible. Surely, it has been shown that only one remedy exists namely, that the Government remove all incentive to dishonesty by preventing any terminal house from owning or selling any grade of grain, and that the Government by an insurance fund or some other method make a charge against the grain or the shipper and carrier to cover the ascertained loss, which in 1908 averaged about 1-8c per bush. It is clear, too, that after the present and suggested amendments have been put in force, it is quite likely that no charge may be

necessary, for the surplus grain, which must exist somewhere if intake weights from cars are correct, would pay for all the shortages and a considerable portion of the expense.

This opportunity should be taken to point out that one of the charges above mentioned, which now falls upon the vessel is an absolutely unnecessary one, and that another equally unjust burden, not included in the above deductions from the freight rate, is suffered at the port of Montreal. The first item referred to is the trimming charge. This is not a legal obligation but the fact cannot be disputed that if this charge is not paid, the vessel suffers the penalty of greatly increased delay in loading. The charge is paid whether the trimming is taken or not and it is paid under pressure to the foreman who controls the gang of trimmers, simply because if it is not paid, the vessel has been proved to suffer a very greatly increased delay in getting her load. This statement seems to involve an accusation of collusion between the trimmers and the other employes. It has been brought to the notice of the elevator authorities and some investigation is promised. Trimming is optional at Duluth and Chicago. The other item is a charge of $5 imposed upon the vessel as a pilotage tax every time she moves in any way from one point to another in Montreal harbor. This results from the repeal of what was known as the Fitzpatrick clause in the Canada Shipping Act at the last session of the Dominion Parliament. That clause exempted from the compulsory payment of pilotage dues at Montreal, all vessels not drawing over 16 ft. Vessels with Ontario cargoes which have passed down the St. Lawrence canals thus become subject to pilotage dues and also to this extra tax of $5 every time they move at Montreal, a tax which is imposed by a by-law of the authorities. The tax goes into the funds of the Branch Pilots' Association and the vessel receives absolutely no benefit, for her captain is left liable for her safety by another section in the statute, and consequently looks after the navigation himself while the pilot sim-

ply draws the benefit of the payment, Under the sections in question, vessels trading between the ports of Quebec and the Maritime Provinces, or the ports of Newfoundland, or the ports on the Atlantic coast as far as New York, are exempt from the compulsory payment of pilotage dues. A most marked and unjust discrimination thus exists against Ontario, which has been protested against for some time past without success. These two items are specially referred to as they are absolutely unnecessary charges, and as they add to the cost of transportation and constitute a needless discrimination against the St. Lawrence route, no similar charges being imposed at United States ports, every effort should be made to remove them.

Among the Express Companies

The Board of Railway Commissioners passed the following order Mar. 22: In the matter of the complaint of C. N. Cobbett, M.D., of Edmonton, Alta., alleging exorbitant rates in the West charged by express companies: This complaint having been set down for hearing at the sittings of the Board held in Edmonton Feb. 19, 1909, no one appearing for the complainant, the Dominion Government being represented by counsel, it is ordered that the complaint be dismissed.

The Board of Railway Commissioners passed the following order, 6600, Mar. 22.—In the matter of the complaint of the Nipigon Bay Fish Co., of Rossport, complaining of the refusal by the C.P.R. and the Dominion Ex. Co. to receive and carry on passenger trains fish offered for traffic at Rossport, Jackfish, and Coldwell, fish-shipping points on the north shore of Lake Superior; No one appearing for complainant at sittings of Board held in Winnipeg Feb. 4, 1909, at which the complaint had been set down for hearing and due notice given, counsel for Dominion Government, the Dominion Ex. Co., and the Canadian Northern Ex. Co. being represented at the hearing, it is ordered that the complaint be dismissed.

The Canadian Northern Ex. Co. has closed its offices at Grays and Mafeking, Man.

A parcel of unsigned bank bills in transit between Ottawa and Toronto in charge of the Dominion Ex. Co., was reported to have gone astray recently. It is believed that they will be recovered, as being unsigned and of a new design, they cannot be negotiated.

The Dominion Ex. Co. has entered action against the municipality of Alliston, Ont., to obtain a declaration that a certain business assessment levied by it against the company is invalid, and an injunction is sought to restrain the municipality from levying the tax or seizing any of the company's property, and the company claims the return of certain property seized by the municipality against such taxes.

The Board of Railway Commissioners has dismissed the following complaints against the Dominion Ex. Co., as no one appeared to represent the complainants at the executive hearings; 1, Of J. G. Swinney, Cowley, Alta., alleging excessive rates on milk from Cowley to Michel, B.C. 2. Of F. W. Godsal, Cowley, Alta., alleging excessive rates between Winnipeg and Cowley. 3. Of D. H. Macdonald & Co., Fort Qu'Appelle, Sask., alleging excessive rates and delays in delivery consignments.

The Dominion Parliament has voted $3,000 to complete the new examining warehouse at Montreal, and to fit up the present building for the handling of express customs parcels.

Telegraph and Cable Matters

The C.P.R. Telegraph Department has opened offices at Basswood and Komarno, Man.; Sulphide, Ont.; Griffin, Osage, Welwyn and Wilcox, Sask.

The President of the Commercial Telegraphers' Union was in Winnipeg recently, when he enquired into several matters connected with the commercial and railway telegraph operators.

R. C. Clowry, President Western Union Telegraph Co., is reported to have said recently, in connection with the Commercial Cable Co.'s announcement, as to the connection of Newfoundland with its cables: "In the Western Union cable system, four cables have been operated from Newfoundland, two from Cape Canso, N.S., and one from Halifax, N.S., since 1882; and there are also two cables operated from New York to Cape Canso in addition to the land lines connecting with all these cables."

The joining up of the Commercial Cable Co.'s cable system with Newfoundland, will involve the laying of about 1,700 miles of cable, at a cost of about $1,500,000, which may easily be exceeded. The expense will be covered by an existing surplus or by current earnings. The Mackay system will then have control of about 30,000 miles of cable, of which about 20,000 miles are in the Atlantic and 10,000 miles in the Pacific.

Consequent on the death of P. W. Snider, C.P.R. Telegraph Superintendent, St. John, N.B., the temporary appointments, as announced in our April issue, have been confirmed, with one change, as follows; F. J. Mahon, Inspector, Eastern Division, Montreal, to be Superintendent Atlantic Division, St. John, N.B.; J. F. N. Caisse, Chief Operator, Montreal, to be Inspector, Eastern Division, Montreal; J. Mitchell, night Chief Operator to be Chief Operator; A. M. Bennie to be night Chief Operator, and A. Malcolm, assisted by J. A. Fortier, to be Traffic Chief, all at Montreal.

The Board of Railway Commissioners passed order 6679, dated Mar. 26, specifying the form in which telegraph companies' toll tariffs are to be printed for filing with the Board and what information they are to contain. A copy of each tariff in use at any telegraph office is to be left on file thereat, open for inspection by the public.

Wireless Telegraphy on Moving Trains.

The interest recently evinced in the experiments made in the use of wireless telegraphy on moving trains, recalls the fact that the first experiments of this nature took place in Canada six years ago. The results, which were interesting, were not at that time such as would ensure the necessary success for such a project, but those taking part in the experiment were sufficiently sanguine of the outcome, to follow up the experience gained. The party in charge consisted of Dr. H. S. Bovey, Dr. H. S. Barnes and F. Soddy, of McGill University; and Dr. E. Rutherford, of Manchester University, Eng. A special G.T.R. train between Toronto and Montreal was prepared with the wireless apparatus, and though long distance telegraphing, as has been otherwise achieved, was not attempted, the train was kept in touch with stations of between 8 and 10 miles distance. The central transmitting station was arranged at St. Dominique, where two metal plate vibrators, 10 by 12 ft., connected with an induction coil, were placed. The equipment on the train consisted of collecting wire connected with a coherer of nickel and silver powder, which operated bells in three cars. The collecting wires were passed through the guides used for the train signal cords and extended on either side of the coherer, and though these wires were placed inside the steel-framed cars, clear and definite signals were obtained. The vibration of the train, which was travelling at about 60 miles an hour, made it impossible to have the relay adjusted to its most sensitive point, but the results obtained with the purely experimental apparatus were considered very satisfactory, and the feeling was strong that with a more refined mechanism, a system of wireless telegraphy on trains would be brought within the realm of practical operation, thus providing another method for safeguarding trains and their passengers.—Adapted from the Telegraph Age.

The Intercolonial Railway Shops.

In our issue of July, 1906, general particulars were given of the new shops which it was proposed to erect at Moncton, N.B., for the I.C.R. These general facts were supplemented by an illustrated article in our issue of Sept., 1908, giving considerable additional information respecting the shops, which are now fast approaching completion. In a recent speech the Minister of Railways said "these shops will serve the Grand Trunk Pacific Ry. (National Transcontinental Ry.) also." He then presented to the House of Commons the following memorandum descriptive of the shops:

FREIGHT CAR REPAIR SHOP.—362'—0" x 134'—8". Area covered 48,700 sq. ft. Net floor area 47,400 sq. ft. Gross cubic contents 1,573,000 cubic ft. Net contents 1,541,000 cubic ft. This building is composed of concrete foundations; reinforced concrete wall columns, curtain walls, and roof slab; steel trusses and purlins. There are two longitudinal rows of steel columns within this shop. Floors between rails are of 3" plank; between tracks the floors are of mastic cement. Six repair tracks run through the building, providing working accommodation for 48 cars. Reinforced concrete air ducts are placed beneath the floor.

PLANING MILL.—202'—8" x 81'—10"; together with a fan house 20' x 20'. Area covered 17,100 sq. ft. Net area of floor 16,400 sq. ft. Gross cubic contents 550,000 cubic ft. Net contents 523,000 cubic ft. This building is composed of concrete foundations, surmounted by a steel frame, with curtain walls and roof slab of reinforced concrete. The bottom chords of trusses are designed to carry 3 ton trolleys, and the floor space is entirely free from obstruction. The floor is of hardwood. Reinforced concrete air ducts are placed beneath the floor.

PASSENGER CAR REPAIR SHOP.—361'—8" x 100'—0". Area covered 36,100 sq. ft. Net area of floor 371,000 sq. ft.; Gross cubic contents 887,000 cubic ft. Net contents 856,000 cubic ft. This is a transverse shop with 18 tracks, besides an area at one end of 36 ft. x 100 ft., which together with a mezzanine floor 18 ft. x 100 ft. is for use as a cabinet shop. The building is of reinforced concrete throughout, having four longitudinal rows of columns. Between the rails plank floors are provided; between tracks the flooring is of concrete. Reinforced concrete air ducts are placed beneath the floor.

PASSENGER CAR PAINT SHOP.—361 ft.—8 in. x 100 ft.—0 in. Area covered 361,000 sq. ft. Net area of floor 371,000. Gross cubic contents 887,000 cubic ft. Net contents 856,000. This building is practically a duplicate of the repair shop, the end area, not occupied by tracks, and the mezzanine floor being devoted to upholstering and varnishing.

ROBERT PATTERSON
Master Mechanic, G.T.R. Shops, Stratford, Ont.

STOREHOUSE AND OFFICE BUILDING.—343 ft.—8 in. x 51 ft.—8 in. Area covered by building 17,700 sq. ft. Net area of floors, 50,800 sq. ft. Area covered by platform, 7,900 sq. ft. Net area including platform, 58,700 sq. ft. Gross cu. contents exclusive of platform, 674,000 cu. ft. Net contents, 610,000 cu. ft. The building is of reinforced concrete throughout, except the office partitions, which are of porous tile. The building consists of two stories and a basement. The greater part of the upper floor is devoted to offices. The building is provided on two sides and one end with a concrete platform designed for heavy loads. Freight elevators connect the different floors. The interior is well finished. Floors are of hardwood except in basement which is of concrete. An ample supply of plumbing fixtures has been provided, and the building equipped for steam heating.

LOCOMOTIVE SHOPS.—Area covered 171,000 sq. ft. Net area of floors 168,000 sq. ft. Gross cubic contents, 7,360,000 cubic ft. Net contents, 7,270,000 cubic ft. This is a group of buildings comprising;

BOILER SHOP.—375 ft.—1 in. x 102 ft.—3 in. In two bays, with riveting tower at one end of the erecting bay. The tool bay is served by a 10 ton electric travelling crane; the erecting bay by a 35 ton crane; and the riveting tower by a 30 ton crane. Plank floor on timber sills.

LOCOMOTIVE ERECTING SHOP.—375 ft.—1 in. x 81 ft.—1 in. This shop is arranged with a central longitudinal pit, flanked upon either side by individual pits arranged in herring bone pattern. There is standing room for six locomotives upon the central pit, and for sixteen locomotives upon the side pits. Two electric travelling cranes, each of 60 ton capacity, command the shop. Flooring is of plank resting upon timber sills.

FORGE SHOP.—375 ft.—1 in. x 76 ft.—8 in. This shop is served by jib cranes. The flooring is of earth.

MACHINE SHOP.—408 ft.—4 in. x 132 ft. 6 in. This shop is in two bays, each of which is commanded by a 10 ton electric travelling crane. The flooring is of plank, supported by a concrete base.

MACHINE SHOP ANNEX.—408 ft.—4 in. x 44 ft. 10 in. This includes the bolt room, tool room, brass room, brass foundry, with lavatories upon a mezzanine floor. The foundations of all these shops are of concrete, the skeleton is of steel, with curtain walls and roof slabs of reinforced concrete. Travelling cranes command all floor space except that of the forge shop and the machine shop annex. Reinforced concrete air ducts are placed beneath the floors of all these shops, forming the locomotive group.

POWER HOUSE.—[illegible] ft.—2 in. x 69 ft. Area covered, 14,000 sq. ft.; net area of

Galena-Signal Oil Company

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated GALENA COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

GUARANTEE COST per thousand miles for from one to five years, when conditions warrant it.

Maintain EXPERT DEPARTMENT, which is an organization of skilled railway mechanics of wide and varied experience. Services of Experts furnished free of charge to patrons interested in the economical use of oils.

STREET RAILWAY LUBRICATION A SPECIALTY

Galena Railway Safety Oil

Made especially for use in Headlights, Cab, Classification and Tail-lights, and for Switch and Semaphore Lamps. Burns equally well with the long time as with the one day burner, with or without chimney, as the burner requires.

Is pure water white in color; high fire test; low cold test, and splendid gravity.

Please write to home office for further particulars.

CHARLES MILLER,

PRESIDENT

floor, 13,300, plus basement, 1,400; gross cubic contents, exclusive of basement, 477,000; net contents, 460,000. This building consists of concrete foundations, surmounted by a steel frame, with curtain walls and roof slab of reinforced concrete. The engine room is served by a 15 ton travelling crane operated by hand. The engine room is provided with a hardwood floor, supported by steel framing over the basement portion.

GAS-PRODUCER HOUSE.—40 ft.—10 in. x 38 ft.—10 in. Area covered, 1,600 sq. ft.; net area of floors, 2,750 sq. ft.; gross cubic contents, 61,600 cubic ft.; net contents, 52,700 cubic ft. This building consists of a single story with a basement. It is a steel frame structure with reinforced concrete walls and roof slab. The basement floor is of concrete, the charging floor is of steel.

DRY KILN.—57 ft. x 25 ft.—4 in., 17 ft.—4 in. x 16 ft.—8 in. Area covered, exclusive of platform, 1,730 sq. ft.; net area of floors, 1,550 sq. ft.; gross cubic contents, 22,500 cubic ft.; net contents, 14,000 cubic ft. This is a brick and wood combination building, upon concrete foundations. There is a platform on either side, 6 ft. in width.

LUMBER SHED.—150 ft. x 20 ft. Area covered, 3,100 sq. ft.; net floor area, 2,800 sq. ft.; gross cubic contents, 46,500 cubic ft.; net contents, 36,000 cubic ft. This is a wooden structure upon concrete foundations.

Replying to questions as to the cost of the shops, the Minister of Railways said the contracts had been completed, but the final payments had not been made. The contract price of the passenger car and paint shops, and the stores and office building was $146,445, with a schedule for additions and deductions. The amount paid to date was $147,736.08. A voucher for $72,304.75 had been prepared for final estimate but not paid. The contract price for the freight car repair shop was $96,630, with a schedule for additions and deductions; the amount paid on final estimate was $75,213.32. The contract price for the locomotive shops was $430,000, with a schedule for additions and deductions. The amount paid to date was $403,171.29, and a voucher for $81,740 had been prepared for final estimate, but not paid.

E. A. Walberg, the contractor, has issued a writ against the Government to recover $105,000 alleged to be due for extra work on the shops.

Railway Subsidy Commission Suit.

Royce & Henderson, solicitors, Toronto, recently sued the National Trust Co., as executors and trustees of the estate of the late E. A. Bremner, of London, Eng., for $19,416.96 for professional services rendered to Mr. Bremner, and after his death on June 23, 1908, to his estate. Of this amount $16,000 was commission claimed for procuring on Oct. 23, 1903, a general subsidy of $160,000 for the Temagami Railway Co. Mr. Justice McMahon dismissed the action as to all items of claim subsequent to Bremner's death, including the $16,000 item, saying: "As Allan H. Royce's retainer terminated with Mr. Bremner's death, and as he was, I find not retained by the National Trust Company as solicitor after Bremner's death, he cannot recover in respect of any items in the bill subsequent to June 23, 1903." Reference was made to the taxing officer to tax plaintiffs' bill of costs for services rendered prior to Bremner's death.

Government Railways Managing Board.

Following is a copy of a report of a Committee of the Privy Council, approved by the Governor General:—On a memorandum, dated April 16, 1909, from the Minister of Railways and Canals, representing that he has, for some time past, had under most careful consideration the various complicated questions involved in the operation of the Government Railways, both from the financial and administrative points of view, and, as the result, has concluded that a change in the present method of management is desirable. The Minister directs attention to the following facts; The Intercolonial Ry. was built as a Government road, in pursuance of the requirements of the British North America Act of 1867, sec. 145; and without amendment of this Act, must retain that characteristic. It was opened for traffic on July 1, 1876, between Halifax and Riviere du Loup; its length, including the Pictou and Windsor branches, and the line from St. John to Point du Chene (Shediac) being 745 miles. By various extensions, purchases, and leasing arrangements its length, in the year 1907-8, reached a total of 1,448.62 miles—the cost of operation being $9,157,435.53. Its traffic comprised 4,134,046 tons of freight and 2,789,371 passengers. The Prince Edward Island Ry. was taken over by the Government on December 29, 1873, under the express provisions of the Imperial Order-in-Council of June 26, 1873, admitting P.E.I. into the Dominion. At the time of the original opening of the I.C.R. for traffic, and the taking over of the P.E.I.R., an organization was adopted, which, with some modifications, has remained in force up to the present day, notwithstanding the changed conditions, and the expansion of the road and its operations. The official placed in immediate charge is a General Manager, who is also in charge of the P.E.I.R., under the title of "General Manager, Government Railways." By Section 49 of the Government Railways Act, R.S.C., 1906, chapter 36, it is provided that the Governor-in-Council may, from time to time, make such regulations as he deems necessary for the management, proper use and protection of all or any of the Government railways, including station houses, yards and other property in connection therewith; for the ascertaining and collection of tolls, dues and revenues thereon; to be observed by the conductors, engine drivers, and other officers and servants of the Minister, and by all companies and persons using such railways; relating to the construction of the carriages and other vehicles to be used in the trains on such railways.

The Minister considers it expedient and recommends that, in pursuance of the above statutory provision, the following be fixed as the organization to be in force on and after April 1, 1909, for the Government Railways—the I.C.R. and the P.E.I.R.—as at present constituted, and as the same may hereafter be extended or modified; such organization to be in supercession of the existing organization;—The position of General Manager of Government Railways be abolished. A Board to be constituted under the name "The Government Railways Managing Board." The said Board to consist of four persons, namely: M. J. Butler, Deputy Minister and Chief Engineer of the Department of Railways and Canals, who shall be Chairman of the Board; D. Pottinger, I.S.O.; E. Tiffin, the present Traffic Manager, he retaining that position; F. P. Brady, of Montreal. The said Board to supervise and direct all departments of the railways owned or operated by the Government of Canada. The duties and powers of the said Board to be as hereunder defined, namely: They shall have the powers usually vested in the executives of railway corporations. They shall prepare, subject to the Government Railways Act, and the Provident Fund Act, and, with the approval thereto of the Governor in Council first obtained, carry out rules and regulations as follows: For the organization of the staff and officials of the railways; for the conditions of employment in the railway service; for the purchasing of supplies and the sale of materials; for the ascertaining and collection of the railway tolls, dues and revenues; those to be observed by the conductors, engine drivers and other officers and servants, and by all companies and persons using such railways; those relating to the rolling stock to be used in the trains in such railways. They shall meet for the transaction of business at least once a month, and shall keep regular minutes of each meeting. They shall report to the Minister of Railways and Canals monthly, and shall also make a special and comprehensive report at the end of each fiscal year, on the expenditures and receipts of the Government roads; and on all occurrences and transactions of importance, and shall, further, furnish such reports as may be, from time to time, required of them by the Department of Railways and Canals. The Minister further recommends that the salaries payable to the several members of the said Board above-named be fixed as follows: To Mr. Butler, no salary as a member of the Board; and to Messrs. Pottinger, Tiffin and Brady, $6,000 a year each. The Minister also recommends that, with the exception of Mr. Butler, whose Departmental duties render such provisions inapplicable, the appointees be required to devote the whole of their time to the official duties attached to their positions. The Committee submit the same for approval.

Industrial Disputes Investigation Act.—For the two years ended Mar. 31, which this act has been in force, there were 22 investigations into disputes involving transportation interests. Of these, 16 concerned steam railways, 3 electric railways, and 3 mariners and longshoremen. Two applications for the appointment of boards were made by the employers. In only one case was a strike not averted, viz., that of the C.P.R. mechanical employes, who struck work Aug. 5, 1908, and remained out until Oct. 5, when they returned to work on the terms originally recommended by the board appointed on their own application. At the close of the year mentioned, there still remained one board investigating a transportation dispute to report, it being concerned with Kingston and Pembroke Ry. telegraphers.

Railway Lands Patented.—Letters patent were issued to railway companies, during Jan., covering Dominion lands in Manitoba, Saskatchewan, Alberta and British Columbia, as follows:—

	Acres.
C. N. R.	269.80
C. P. R. grants	10.54
G. T. P. R. grants	503.96

G. T. R. SEMI-ANNUAL MEETING.

The semi-annual meeting was held in London, Eng., Apr. 21, when the report for the half-year ended Dec. 31, 1908, was presented. The following summary shows a comparison of the revenue for that period with that for the corresponding one of 1907;

1907.		1908.		
£3,763,246	Gross Receipts	£3,382,841	10	0
	Deduct—			
2,710,934	Working Expenses, being at rate of 71.61%, as compared with 72.03% in 1907	2,422,413	11	0
£1,052,312	Net traffic receipts	£ 960,427	19	0
	Add—			
16,013	Received from International Bridge Company	16,012	16	7
900	Interest on Toledo, Saginaw, and Muskegon bonds	....		
6,507	Interest on Central Vermont Ry. bonds	6,506	14	3
66,491	Interest on securities of controlled lines and on St. Clair Tunnel bonds acquired by issue of G. T. 4% debenture stock	68,739	7	3
52,171	Balance of general interest account	42,625	17	5
£1,194,394	Net revenue receipts	£1,094,312	14	6

Following are the net revenue charges for the half-year, compared with the corresponding period, 1907:

1907.		1908.		
£77,603	Rents (leased lines)	£77,603	0	9
492,279	Interest on debenture stocks and bonds	498,624	6	8
42,757	Interest on debenture stock and bonds of lines consolidated with the G. T. R.	36,394	5	9
60,365	Canada Atlantic Ry. deficit	43,378	4	11
£673,004		£655,999	18	1
5,785	*Deduct* — Detroit, Grand Haven, and Milwaukee surplus	3,139	6	9
£667,219		£652,860	11	4
527,175	Leaving a surplus of	441,452	3	2
£1,194,394		£1,094,312	14	6

Following is a comparison of receipts for the half-years ended Dec. 31, 1908 and 1907:

TRAFFIC STATISTICS.

Description of receipts.	1908.	1907.	Increase.	Decrease.
	£	£	£	£
Passengers	1,072,408	1,162,593	.....	90,185
Mail and express	169,302	174,604	.....	5,302
Freight and Live Stock	2,046,367	2,347,182	.....	300,815
Miscellaneous	94,764	78,867	15,897	.....
	£3,382,844	£3,763,246	.....	£380,405
	1908.	1907.		Decrease.
Passengers carried	6,017,560	6,291,396		273,836
Average fare per passenger	42.77d.	44.35d.		1.58d.
Tons of freight and live stock	8,086,716	8,881,347		709,631
Average rate per ton	60.73d.	63.43d.		2.70d.
Tons carried one mile	1,435,557,481	1,710,193,134		274,835,953
Earnings per train mile	82.90d.	85.81d.		2.91d.

Adding the balance of £1,625 19s. 2d. at credit of net revenue account on June 30, 1908, to the above surplus of £441,452 3s. 2d., the total amount available for dividend is £443,078 2s. 4d., from which the directors recommend the payment of the following dividends:

Half-year on the 4% guaranteed stock	£196,800	4	3
5% on the first preference stock	170,841	10	0
2½% on the second preference stock	63,210	0	4
	£430,851	14	7

leaving a balance of £12,226 7s. 9d. to be carried forward to next half-year's account.

The average rate per ton per mile on the entire freight business was 0.69c., compared with 0.67c. in the corresponding half-year.

The working expenses, excluding taxes, for the half-year, were £2,350,067 or 69.47% of gross receipts, as compared with £2,646,670, or 70.32% in the corresponding half-year.

The following is a comparison of revenue expenditure, including taxes, for the half-years ended Dec. 31, 1908 and 1907, and

The train mileage of the half-year compares with that for the half-year ended Dec. 31, 1907, as follows:

Description of expenditure.	1908.	1907.	Increase.	Decrease.
	£	£	£	£
Maintenance of way and structures	568,395	583,457	.....	15,062
Maintenance of equipment	414,450	538,968	.....	124,518
Conducting transportation	1,286,819	1,445,413	.....	158,594
General expenses	80,404	78,833	1,571	.....
Taxes	72,346	64,263	8,083	.....
Total	£2,422,414	£2,710,934	.....	£288,520
Percentage of Gross Receipts	71.61	72.03	.....	0.42
Expenditure per train mile	59.87d.	61.82d.	.....	2.45d.

Description of Mileage.	1908.	1907	Increase.	Decrease.
Passenger	4,440,222	4,622,481	.....	182,259
Freight	5,102,567	5,654,386	.....	552,329
Mixed Trains	250,497	247,005	2,492	.....
Total	9,793,226	10,525,922	.....	732,696

The actual expenditure on capital account was:

	£	s.	d.
New works	44,783	1	6
Double track	58,576	6	5
Land purchased	4,325	14	1
G. T. Western fractional certificates purchased	88	10	0
	£107,773	12	0

This amount of £107,773 12s. was reduced by £1,987 0s. 5d., representing premium on 4% debenture stock sold and exchanged, thus making the total charges to capital account for the half-year £105,786 11s. 7d.

Two passenger, 30 freight, and 5 switching engines were purchased, and 15 engines scrapped; and 10 first-class cars, 3 mail cars, 1 derrick, and 2 caboose cars were built in the company's shops during the half-year, on revenue account. The amount at the debit of engine and car renewal suspense account at Dec. 31, 1908, was £544,149 10s. 9d., of which £246,116 16s. 8d. was in respect of engines, and £298,032 14s. 1d. of cars. The amount which has been expended on account of these special renewals in advance is £554,794 in respect of engines, and £826,963 in respect of cars, or a total of £1,381,757, which amount was to be charged to revenue over a period of 5 years commencing 1906. During 1906 and 1907 there was credited to this account, by charges to revenue and by credits for engines and cars sold £752,750, and during 1908 £84,858, leaving £544,149 10s. 9d. still to be charged.

The gross receipts of the Canada Atlantic Ry. for the half-year were £207,662, against £244,147 in 1907, and the working expenses were £187,939, against £242,409, leaving a net revenue balance of £19,723, against £1,738, compared with the corresponding period of 1907. The net revenue charges were £63,101, against £62,103, so that there was a net revenue deficiency of £43,378, compared with £60,365 in 1907. The number of passengers carried was 275,871, against 280,844, a decrease of 1.77%; and passenger receipts, including mails and express, were £49,032, against £56,973, a decrease of 13.93%. The quantity of freight moved was 1,192,452 tons, against 1,137,372 in 1907, an increase of 4.84%; and the receipts from freight traffic were £153,141, against £181,193, a decrease of 15.48%.

The gross receipts of the G.T. Western Ry. for the half-year were £587,541, against £683,757 in 1907, and the working expenses were £464,031, against £578,802, leaving a net profit of £123,510, against £104,955, compared with the corresponding period of 1907. The net revenue charges were £99,187, against £88,970, so that there was, at Dec. 31, a net revenue credit of £24,323, which is carried forward, as compared with £15,985 for the corresponding half-year of 1907. The number of passengers carried was 919,597, against 953,235, a de- of 3.53%; and passenger receipts, including mails and express, were £217,762, against £230,649, a decrease of 5.59 ... The quantity of freight moved was 1,555,695 tons, against 1,842,873, a decrease of 15.58%, and the receipts from this traffic were £368,162, against £452,606, a decrease of 18.66%.

The gross receipts of the Detroit, Grand Haven and Milwaukee Ry. were £186,803, against £206,671 in 1907; the working expenses were £145,831, against £163,156, thus leaving a balance of £40,972, against £43,515, a decrease in net revenue of £2,543, compared with the corresponding half-year of 1907. The net revenue charges were £37,833, against £37,730 in 1907, so that there was a net revenue surplus of £3,139, as compared with £5,785 for the corresponding period of 1907. The number of passengers carried was 446,936, against 440,979, an increase of 1.35%, and the passenger receipts, including mails and express, were £70,300, against £73,778, a decrease of 4.71%. The quantity of freight moved was 925,289 tons, against 844,891 in 1907, an increase of 9.51%, and receipts from freight traffic were £109,616, against £127,356 in 1907, a decrease of 13.93%.

GRAND TRUNK PACIFIC RAILWAY.

The erection of the important bridges at Battle River and Clover Bar, near Edmonton, having been completed, the laying of the remainder of the track between Winnipeg and Edmonton is being proceeded with, and will be finished during the present season. The company has been informed by the Dominion Government that it is expected the line between Winnipeg and Lake Superior Jct. will be completed during the summer, in which case—the Lake Superior branch being already completed—there will be a continuous line from Fort William, on Lake Superior, to Edmonton, of about 1,250 miles, available for the movement of this year's harvest. Owing to the unprecedented increase in the cost of labor and materials which took place in 1906 and 1907, the expenditure on the Prairie section has exceeded the estimates by about $10,000,000, and the

Engineers, designers and builders of hoisting machinery of all descriptions. Write us stating your requirements and ask for catalogues.

Main Office and Works:

CLEVELAND, OHIO

Branch Offices:

PITTSBURG AND NEW YORK

Canadian Government recognizing the causes of such increase as having been beyond the power of the company to control, and upon the report of their engineer, have agreed to ask Parliament to authorize them to advance this sum to the G.T.P.R. Co. at 4% per annum for 10 years, on the security of G.T.P.R. bonds guaranteed by the G.T.R. Co.

REPORTS OF OFFICIALS.

The Chief Engineer, H. G. Kelley, states that the length of the G.T. Ry. maintained and operated during 1908 was 3,536 miles, one mile more than in 1907. The new second track between St. Lambert and Ste. Rosalie, Que., has been opened for traffic, with the exception of the Richelieu River bridge, at Belœil and the Yamaska River bridge, east of St. Hyacinthe station, at which points new double-track superstructures are being erected.

The Richelieu River bridge will be opened, for both tracks, in Feb., and the Yamaska River bridge in April, 1909.

When these structures are finally completed, we shall then have continuous double-track from Montreal, east to Ste. Rosalie Jct., 38.01 miles.

The expenditure during 1908, for maintenance of way and structures, was $3,966,190.22, against $4,239,490.35 in 1907, a decrease of 6.45%.

The outlay on track and permanent way, including ballast and ballasting, clearing snow, renewals of rails and ties, also including their proportion of the cost of superintendence, was $3,047,731.90 in 1907, or at the rate of $862.16 a mile. In 1908, the amount was $2,871,503.78, or at the rate of $812.08 a mile, a decrease of 5.8%.

The cost of repairs and renewals of buildings and fixtures was $604,066.54 in 1908, compared with $760,297.32 in 1907, a decrease of slightly over 20%.

New stations have been built at Deering, Bulstrode, Lacolle Jct., St. Louis, Vars, Algonquin Park, Coboconk, Novar, Weston, Harrisburg, Hyde Park, Caledonia, Pinkerton, Walkerton, Londesborough, Lowbanks, and Canfield Jct., 17 in all.

A new station is in course of erection at South Lyons, and will be completed about April 15.

The materials used for repairs and renewals of main track and sidings were:

New steel rails laid in track	37,957 tons.
Re-rolled steel rails laid in track	15.40 tons.
Partially-worn steel rails laid in branch lines and sidings	7,729.8 tons.
New ties placed in track	1,643,539
Ballast (cubic yards)	542,996

The Superintendent of Motive Power, W. D. Robb, reports expenditure, mileage, etc., as follows:

Half-year ended.	Total expenditure.	Train mileage.	Rate of expenses per mile. Train	Engine.	Car.
			Cents	Cents.	Cents
Dec., 1908	$4,361,936	9,793,226	$44.54	$38.84	$2.76
" 1907	4,817,989	10,521,322	44.78	34.84	2.93

A decrease in expenditure of $456,053 or 9.47% and a decrease in train miles of 732,096 or 6.96%.

	Passenger trains.	Freight trains.	Mixed trains.
The average number of cars moved per train was	4.8	26.4	6.9
And for the corresponding period	4.8	24.8	6.9

During the half-year 15 engines were scrapped, leaving at the end of the half-year 53 old light capacity engines set aside to be scrapped. Two 10-wheel passenger engines, 20 compound consolidation freight engines, 10 mogul freight engines and 5 switch engines, were purchased, delivered and put into service during the half year. The actual stock at Dec. 31, 1908, was 875 engines, against the official figure of 803 engines, being a surplus of 72 engines.

The comparative cost of repairs per train, engine and car mile was:

Cost per mile.	Repairs and renewals of locomotives. 1908.	1907.	All repairing charges, including shop, machinery, tools, and marine equipment, etc. 1908.	1907.
	Cents.	Cents.	Cents.	Cents.
Train	10.05	10.24	13.37	12.66
Engine	7.85	7.79	10.48	9.64
Car	0.62	0.66	0.82	0.81

J. Coleman, Superintendent, Car Department, reports expenditure mileage, etc., as follows:

Half-year ended	Total cost of repairs and renewals.	Total miles run by cars. Passenger.	Freight.	Total	Cost per mile. Car.	Train.
					Cents.	Cents.
(Dec., 1908.	870,211	22,057,210	136,056,798	158,110,008	0.447	7.23
Dec., 1907.	1,290,049	22,871,821	141,668,021	164,539,842	0.784	12.26

A decrease in expenditure of $582,858, or 45.18%, with a decrease in car miles of 6,429,834, or 3.91%.

The revenue account for the half-year is as follows;

RECEIPTS.	£	s.	d.	£	s.	d.
Passengers	.....			1,080,580	4	1
Less— International bridge tolls	1,746	15	2

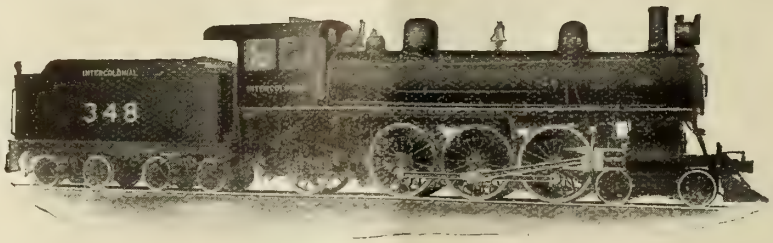
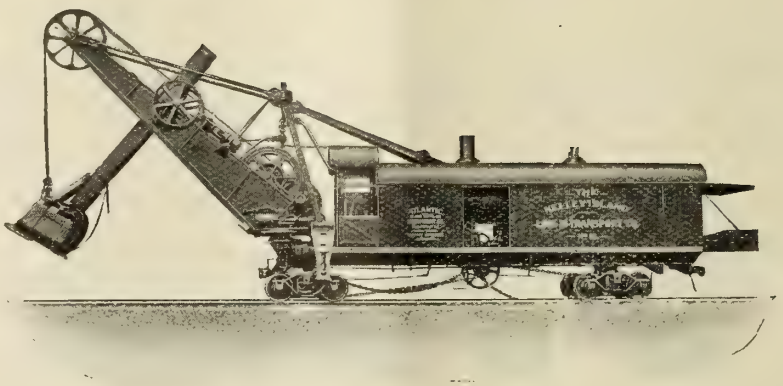
In presenting the report, the President, Sir C. Rivers Wilson, said:—The year 1908 was a melancholy period for the railways of Canada and North America —indeed, it was the worst year experienced since 1893—but, fortunately, the crisis, though very severe, was less prolonged than former similar visitations, and although the reaction is not, perhaps, quite so rapid as we could wish, yet there are abundant evidences that business is steadily improving, and there is every reason why we may now look forward to a return of the prosperity with which we were favored prior to 1908. The accounts for the Dec. half of last year, which we shall consider today, sufficiently indicate the strain and stress to which the company was subjected in common with all other railway companies during the year, and an examination of them will, I think, enable you to appreciate the efforts which were made by the management to counteract the effects of the falling away of revenue. The gross receipts decreased £380,405. The passenger traffic decreased £90,185, mails and express traffic £5,302, and freight and live stock traffic £300,815, but there was an increase of £15,897 in miscellaneous receipts. Passengers carried numbered 6,017,560, compared with 6,291,396 in 1907, and the average fare received per passenger fell from 44.35d. in 1907 to 42.77d. in the past half-year. The number of tons of freight and live stock moved was 8,086,716, compared with 8,881,347, and the average rate per ton was 60.73d., compared with 63.43d., which decrease was caused by the shorter average distance each ton of freight was carried, and not by any falling off in the rate per ton per mile, which increased from 0.67c. in 1907 to 0.69c. in 1908. The earnings per train mile showed a decrease of only 2.91d., which must be considered satisfactory, as it is practically impossible to reduce train mileage to the same extent as the falling off in receipts, particularly in the case of passenger traffic, where trains must be run, although there may be fewer passengers to be carried. The causes of the decrease in gross receipts must be familiar to you, and were fully explained by me at the meetings last year, and although the company has suffered severely, it has not suffered any more than our competitors, as I find that the gross receipts on the 14 trunk lines, the lines from Chicago to the seaboard, including the G.T.R., showed a decrease of 11.23%, whereas, the decrease on the G.T.R. proper was only 10.11%, or taking the whole of the system, only 10.88%. Of course, if the G. T. R. receipts were eliminated from the total the percentage decrease of the remaining lines would be somewhat higher. The decrease of £380,405 in gross receipts was considerably minimised by the decrease of £288,520 in working expenses, which amounted to £2,422,414, compared with £2,710,934 in the corresponding period in 1907, the decrease being 10.64%, or a greater percentage proportion than the reduction in the gross receipts, which was 10.11%. The percentage proportion to the gross receipts was 71.61 in 1908, compared with 72.03 in 1907. The amount charged in respect of maintenance of way and structures was £568,395, compared with £583,457 in 1907. The reduction would have been larger but for the necessity of laying a larger number of ties than usual, and for the improvement of level crossings at various points,

LOCOMOTIVES



Pacific Type Passenger Locomotive built for the Intercolonial Railway. Total weight of engine, 194,500 pounds. Weight on driving wheels, 132,000 pounds; diameter of driving wheels, 72 inches. Boiler pressure, 200 pounds. Maximum tractive power, 29,200 pounds.

STEAM SHOVELS



A high-class and powerful machine, absolutely reliable under all conditions of service.

MONTREAL LOCOMOTIVE WORKS LIMITED

BANK OF OTTAWA BUILDING, MONTREAL, CANADA

chiefly under order of the Railway Commission. Anyhow, while effecting substantial economies, it cannot be said that the management has been tempted to starve the road during the bad time. The amount expended on maintenance of equipment was £414,450, compared with £538,968. Of this decrease, £4,753 was in the motive power department and £119,765 in the car department. This decrease in the maintenance of equipment has been caused not so much by less work being done as by the suspension, to a considerable extent, of the charges to revenue in respect of the engine and car renewal suspense account. I wish specially to refer to that account, with regard to which, judging from the comments which have been made, there appears to be some misapprehension. At the meetings in 1906, I informed the proprietors that as the renewal of the bridges, which had been in progress for 8 years, had been completed, it was necessary to proceed more rapidly than we had been doing with the renewals of the rolling stock, not only to make up a certain amount of leeway which had been allowed to occur pending the completion of bridges, but also to proceed in advance with renewals of both engines and cars in order to obtain the increased haulage power of engines and carrying capacity of the cars, which was absolutely necessary to enable us to cope with the traffic, which at that time was increasing by leaps and bounds. In order to carry out these renewals without unduly pressing the revenue of any particular year, it was decided to charge these renewals to a suspense account, to be liquidated over a period of 5 years. I should observe that later it was decided to include a certain amount of passenger equipment in the arrangement. Of course, the whole of the equipment could not be delivered at once, and it was only during the past half-year that the last deliveries took place, which accounts for the increase in the amount at the debit of the account compared with June 30. Altogether, there has been expended on this account, £1,381,757, which would mean an average charge for 5 years of about £276,000 a year. As a result of this expenditure, we have 240 engines under 3 years old, and, therefore, practically new, with an increased haulage capacity of 770,000 tons, or 35% more than the haulage capacity of our locomotives on Jan. 1, 1906; we have 101 new passenger cars, with an increased seating capacity for 2,000 passengers, or 37% more than the old cars; we have also 4,000 new freight cars of various descriptions, with an increased carrying capacity of 45,000 tons, or over 50% more than the cars they have replaced. During the prosperous years of 1906 and 1907, when we were paying 3% on the third preference stock, we felt justified in charging to revenue a somewhat larger proportion in each year than one-fifth of the total expenditure, and the amount charged in those years was £752,750, and it was extremely fortunate that we were able to do this, as we were thereby able, without lengthening the period, to suspend, to a considerable extent, the charge against revenue during the past year, the result being that during the 3 years three-fifths of the total expenditure had been charged, and we have since Jan. 1 resumed the estimated yearly charge, and the monthly statements as published have included their proper proportion. The real reason of this suspense account is that we have expended in a limited period an amount which would, under ordinary circumstances, have been spread over a longer period, and, in order that the normal charge should not be materially increased, it was necessary to carry the expenditure made in advance to a suspense account. These equipment expenditures are, no doubt, a heavy burden, but are imposed by the absolute necessity of meeting competition with rival companies, frequently more powerful and more wealthy than ourselves. If we fail to do this we may make up our minds to go out of business. Reverting to the expenditure for the past half-year, the next item is the cost of conducting transportation, which amounts to more than one-half of our total expenditure, and here we find what, I think, you will consider a very satisfactory state of affairs. The total expenditure under this head was £1,286,819, compared with £1,[illegible],413, a decrease of 11%, being a larger proportionate decrease than the decrease in gross receipts, which was 10.11%, the proportion of expenses to receipts being reduced from 38.41% to 38.04%. There was a decrease in practically every item in the account, the principal decrease being in fuel for locomotives, which was over £56,000 less than the corresponding period, or about 12%, for which about 2% was due to lower price, but the actual consumption of fuel showed a decrease of 83,000 tons, or nearly 10%, although the train mileage showed a reduction of only about 7%. There was also a very welcome reduction of about £20,000 in the balance of car mileage. There was an increase of £1,571 in general charges, which is considerably more than accounted for by the contribution to the pension fund, and there was an increase of £8,083 in taxes, which, unfortunately, are constantly increasing in Canada, as they are in this country. The result of the economies we have been able to effect in working expenses had been that the decrease of £380,405 in gross receipts has been reduced to a decrease of only £91,885 in net traffic receipts, which amounted to £960,428, compared with £1,052,313 in 1907. The net revenue credits amounted to £133,885, making the amount available for payment of interest and dividends £1,094,313, of which rentals and interest on the debenture stock and bonds absorbed £612,622, leaving a surplus on working of the G.T.R. proper of £481,691, from which there has to be deducted the deficiency on the Canada Atlantic Ry. of £43,378—£17,000 less than last year—less the surplus of £3,139 on the Detroit Grand Haven and Milwaukee Ry., the result being that the amount available for payment of dividends out of the working of the half-year was £441,452, or only £85,723 less than in the corresponding period, notwithstanding the heavy decrease of £380,405 in the gross receipts. The working of the controlled lines for the half-year has been satisfactory, resulting in an increased net revenue of the three lines—the C.A.R., G.T.W., and D.G.H. & M.—of no less than £34,000, notwithstanding a decrease in their gross receipts of over £150,000. The receipts of 164 railways on the North American continent last year declined $300,000,000, and the 14 trunk lines, our immediate competitors, showed a decrease of $97,000,000, or 14.41%. I am speaking now of the entire year 1908. The gross receipts of the whole of the G.T.R. showed a decrease of £1,118,000, or 12.12%, but, thanks to the exertions of Mr. Hays and his staff, and also to the improvements introduced during the recent good years, we were able to reduce the working expenses by £885,000, or 12.57%, so that the net loss was reduced to only £233,000. Before leaving the accounts, I must remark upon one item in the general balance account, which shows a large increase. I allude to the sundry outstanding accounts due to the company. The increase, as compared with 1907, namely, £1,400,000, is entirely attributable to advances made to the G.T.P.R. Co. for construction, which will be very shortly repaid out of moneys to be received from the Government.

The financial disturbances of last year, while very injurious to railways generally, had the effect, on the other hand, of facilitating and accelerating the work of construction of the G.T.P. line by releasing, and placing at the disposal of the company and the contractors a much larger amount of labor than had been procurable during the two prosperous preceding years. The consequence has been that rapid progress has been made towards the completion of the work in which we have been engaged during the last 4 years; but as some misapprehensions appear to be still expressed as to the policy of the G.T.R. with regard to the G.T.P. Co., let me take this opportunity of saying that all the reasons which induced us—I may say compelled us—a few years ago to enter upon this great undertaking still hold good, and have, in my judgment, indeed, become intensified by the experience which we have since acquired. The question which we then had to consider was whether the G.T.R. should remain localised in the old provinces of Quebec and Ontario, with its extension to Portland in the east, and Chicago in the west, or whether it should follow and participate in the development of the fertile territory of the Northwest—whether it should be foremost in securing a share in the advantages and opportunities offered by the new country, or should be content to leave them to competitors who, by establishing connections with roads of their own in the eastern provinces, would place the G.T.R. in a postion of inferiority and disadvantage as regards the interchange of traffic between the eastern and western portions of the Dominion. To that question there could be but one answer. My colleagues and I have never concealed from ourselves that we had before us a task of great magnitude—of great difficulty—involving much labor and much anxiety, but we relied—and still rely—upon the goodwill, the sympathy, and the patience of shareholders, who cordially signified their entire approval of the scheme when it was first presented and explained to them, and for whose ultimate advantage we are laboring to bring it to a successful issue. You will remember that the G.T.R. did not stand alone in arriving at this determination. We were encouraged and supported by the Canadian Government—in fact, the scheme as we originally contemplated it was considerably enlarged by the Government. The Government also took upon themselves the responsibility of constructing more than half of the great transcontinental road, and, under parliamentary sanction, they engaged to guarantee to the G.T.R. nearly three-quarters of the cost of that

portion of the road which was to be constructed by the G.T.P.R., and that policy received the approval of the Canadian people. Careful estimates of the cost of the work were prepared by the Canadian Government and by the company for their respective portions of the road, framed in accordance with the conditions prevailing at that time. But the unforeseen happened, and, as so frequently occurs in matters of this character and magnitude, the original estimates were exceeded. I must say, in passing, that no blame can be attributed to the promoters or to their technical advisers, for the circumstances were beyond their control; 1906 and 1907 were years of extraordinary prosperity, bringing great profits to the railway companies, of which we had our share, but the result was that there was an enormous rise in the price of materials and labor. Laborers' wages rose 30% above the normal rates; the price of railway ties increased 100% above normal conditions; the price of lumber and material advanced 25%, and of steel rails 35%. Some of the smaller contractors had, indeed, to throw up their contracts, and the work was taken over and finished by the company itself. I could quote you various instances of U.S. railway undertakings where the cost of construction advanced in a similar ratio to our own, and for the same reason. The Dominion Government fully recognised the additional heavy burden thus placed upon the G.T.P. Co., and they agreed to ask Parliament to empower them to act as bankers to the company by advancing to them $10,000,000 at 4% on the security of bonds of the G.T.P.R., and supported by the guarantee of the G.T.R. A resolution for that purpose has just been passed by the Dominion House of Commons; a bill founded upon it is now under discussion, and we hope to hear very shortly that the bill has been passed. The most important—the most profitable—portion of our new line is on the eve of completion, and that I expect before we next meet you for our general meeting in Oct. that I shall attend the official inauguration of the 1,250 miles extending from Edmonton at the western extremity of the prairie to Fort William at the head of Lake Superior, and over which will be carried a large proportion of this year's harvest. There has been considerable delay in the completion of the link between Winnipeg and Lake Superior Jct., owing to the unforeseen difficulties encountered by the Government contractors on account of the rough country through which that section of the line has to pass; but I have been assured by the Premier that he has used every exertion to ensure the completion of the road by the time I have indicated, and that he has received satisfactory assurances from the chairman Transcontinental Railway Commission that his wishes will be realized. Some of you may remember that Mr. Hays attended one of our meetings at the inception of the G.T.P. scheme, and described with a good deal of enthusiasm the character of the proposed road, and I am glad to be able to corroborate the prediction he then made, and tell you that the line will be undeniably, the most perfect which has ever been built, in its inception, on the American continent. Some of our critics have said that we should have acted more wisely and judiciously had we built the road more cheaply and less perfectly, following the example of some of the great pioneer roads, and paying for subsequent improvements out of future earnings; but by acting as we have done we shall not discount profits, and the operation and maintenance of the road will, on account of its excellence, be conducted from its opening on lines of the greatest economy. It is only right, however, to add that we had really no option in the matter. This high standard of perfection, with its attendant high rate of expenditure, was imposed upon us as a condition by the Canadian Government. When I said just now that it was the most profitable portion of the road that we are about to put into operation, that remark must certainly hold good for some time to come. Owing to the facilities of communication established between the east and the west, and the opportunities for supplying the requirements of the rapidly-growing population, we may expect an early return for the labor and outlay incurred, but I would like to ask you to cast your thoughts forward to the time, not far distant now, when the road will be completed through the mountain section, and when the produce of the prairie will be carried over it to our terminus at Prince Rupert, which is 500 miles nearer than any other port on the Pacific coast to China and Japan, countries which I believe will, in a short time, enter into competition upon a vast scale with other countries for the absorption of grain. I venture to predict that the full measure of the advantage to our company will then be realised, and that the justification of our policy will be complete.

I shall have to ask you to vote upon a resolution approving an act which has been passed by the Dominion Government for enlarging the borrowing powers and increasing the capital of the G.T.R. Co. This is one of those applications which are made to you at periodical intervals, not with a view to any immediate or specified expenditure, but in order that we shall have a reserve in hand in order to meet the capital expenditure of the company. Since the year 1895, when we took office, the G.T.R. system has been practically rebuilt and re-equipped, and the revenue has been doubled, but at the completion of these 14 years there has been practically no increase in the fixed charges of the company. To be precise, I believe the fixed charges are about £50 more than they were at that time. In 1895 we were borrowing money to pay our fixed charges. Now, last year, in addition to the £1,377,000 of net revenue charges, we distributed £616,000 in dividends, and you will observe that that was an extremely bad year. In 1895 our 4% debenture stock was quoted at 75—it is now above par, and has been as high as 110. The amounts to which I have referred, and which are specified in the act, are 2½ millions of 4% guaranteed stock, and an interest charge of £100,000 a year, equivalent to 2½ millions of 4% debenture stock.

The President then moved the adoption of the report, and that dividends of 2% on the 4% guaranteed stock, 5% on the first preference stock, and 2½% on the second preference stock be paid. In the discussion which followed, it was suggested that of the four retiring directors, two only should be elected, the two vacancies to be filled by Canadian representatives, to which the President replied to the effect that he did not think they could do a more damaging act in the interests of the 55,000 stockholders in England than to take such a course; that there is a very small amount of stock held in Canada, and that if their directorate were transferre there, they would make themselves the laughing-stock of the Dominion. The report was subsequently adopted, and the retiring directors, A. W. Smithers, G. von Chauvin, Col. F. Firebrace and Sir Wm. L. Young, were re-elected. The retiring auditors were also re-elected, H. C. Newton acting in England, and W. Ramsay in Canada.

Nova Scotia Railway Report.

The Provincial Engineer of Nova Scotia, R. McColl, in his report for the year ended Sept. 30, 1908, says the year was a quiet one in the Province so far as railway matters were concerned. There was practically no new construction, and the mileage remained as in the previous year, viz.: The Intercolonial Ry., 467 miles, under Dominion Government control; the Dominion Atlantic Ry., 221 miles, under the Board of Railway Commissioners' jurisdiction, and 11 companies with a total of 631 miles, under Provincial jurisdiction. The returns received from these 11 railways show a slight increase for the year, and although since the close of the year there have been some slight decreases on some of the lines, the falling off in traffic shown on lines in various parts of the continent, has not been felt so much in Nova Scotia as in other parts of Canada and the United States. The total increase for the year was $84,524, the largest increases being on the Halifax and Southwestern Ry. and the Inverness Ry. and Coal Co.'s line. There was a considerable decrease on the Cumberland Ry. and Coal Co. and the Maritime Coal, Ry. and Power Co. lines, and slight decreases on some other lines. The variation in the traffic between the different lines, per mile of railway is very great, varying from $10,597 on the Sydney and Louisburg Ry., to $257 on the Cape Breton Ry. This is largely due to the tonnage of coal carried, as none of the lines connected with a mine and carrying any large quantity of coal, show less than $3,000 a mile, while the highest of the other lines—the Halifax and Southwestern Ry.—shows only $1,041 a mile.

The Provincial Engineer contends that too little attention is paid to the earning capacity and that too much stress is laid on its cost. The cost of construction on all railways in the Province varies very little, especially when the lines are constructed to the same standard, and even in the case of the Sydney and Louisburg Ry., where the standard is very high, with heavy rails and low gradients, the difference in cost, as compared with the cost of one of the poorest lines, is probably not over 40%. The cost of all subsidized lines in Nova Scotia probably runs somewhere between $18,000 and $25,000 a mile. It will be seen that the interest on cost of construction at 4% varies from $720 to $1,000 a mile, or a difference of $280 a mile, while the difference in the gross receipts is $10,340 a mile, and in net receipts $2,100 a mile. During the year not a single passenger was injured on any of the railways under Provincial authority, and of employes, the number of killed and injured was 17, as compared with 20 in the previous year.

CARDWELL FRICTION DRAFT GEAR MADE BY

UNION DRAFT GEAR CO.,

CHICAGO, ILL.

British Columbia and the C. P. R.

J. P. Mabee, Chief Railway Commissioner, has given the following judgment in the application of the B.C. Government for a reduction of C.P.R. freight and passenger rates in the Province: This is an application made by the Attorney-General of British Columbia for an order placing that province upon the same favorable condition in respect to tolls for freight and passenger traffic over the C.P.R. through B.C., as are other portions of the Dominion over the main line of that railway; that the existing freight and passenger tolls over the railway be reduced; and that the railway company be restrained from charging other or higher rates within British Columbia than it charges in other parts of Canada. The formal complaint and answer were filed with the Board after the case was argued, and the hearing took place upon the following resolution of the Legislative Assembly of the Province:

"Whereas by section 11 of the terms of union, the Government of the Dominion undertook to secure the construction of a line of railway to connect the seaboard of British Columbia with the railway system of Canada. And whereas large areas of public lands belonging to the Province of B. C. have been conveyed to the Dominion Government in furtherance of the said railway. And whereas the benefits to be derived from the construction of the said railway was one of the inducements which led to the union of B. C. with the other Provinces of Canada, as well as for the conveyance to the Dominion Government of the public land of the Province as aforesaid. And whereas the railway above referred to is national in its character, and as such has received a very large measure of assistance of public moneys and lands. And whereas it was not contemplated at the time of the union of B. C. with the other provinces of Canada that there should be any discrimination in freight and passenger rates between one locality and other localities, or between one province and any other province. And whereas numerous complaints have from time to time been made by various boards of trade in B. C. to the effect that existing freight rates discriminate against cities in B. C. And whereas the Board of Railway Commissioners have ordered a reduction in passenger rates to 3c. per mile upon all railways between Calgary and the Atlantic. And whereas the passenger rates charged upon railways in B. C. are in excess of 3c. per mile. And whereas such excess is a discrimination detrimental to the best interests of B. C., as it tends to prevent development and the influx of population; Therefore, be it resolved, that an address be presented to the Lieutenant-Governor, praying that he will cause a full representation of the facts to be made to the Government of the Dominion and to the Board of Railway Commissioners, to the end that B. C. may be placed in as favorable condition, in respect to freight and passenger rates, as are other portions of the Dominion."

In addition to the matters covered by the resolution, the formal complaint alleges that the C.P.R., by its contract with the Dominion Government, agreed to construct the railway through B.C. according to the standard of the Union Pacific Ry. when it was first constructed (the gradient of which latter railway did not exceed 2%), and also agreed forever to efficiently maintain and operate the railway, and that it was in consideration of the due performance of this contract that the lands were granted and the subsidies given, that the railway was not constructed according to the said standard, and the gradients through the mountains far exceed 2%, that the passenger rate in B.C. is 4c per mile, that the tolls charged unjustly discriminate against B.C., that the spirit of the C.P.R. Co.'s Act is not being carried out. At the hearing, no evidence was given by the applicants, but the history of the construction of the C.P.R., the various statutes and contracts bearing upon the same, the governmental aid in land and money, and other matters, were fully discussed, and counsel for applicant put his claim for relief upon the ground that these statutes and agreements bound the company to charge no higher tolls in one section of territory than in another, through which the line that was the subject of the contract ran; in other words, that the company's tolls could not vary as the circumstances and conditions changed. I have gone over the argument since the notes of hearing were transcribed, and have read all the enactments cited, and I am clearly of opinion that the contention of the applicant, in the broad way advanced, is not well founded. It matters not, for the purpose of considering this case, what the land and money grants to the company were; the extent or character of the government aid does not affect the contract that was arrived at, nor am I able to see how the position is in any way affected by the fact that the B.C. Government conveyed large areas of Provincial lands to the Dominion Government. The questions are what was the contract between the Dominion Government and the railway company? and, what was the general railway law at the time?

The agreement relating to the construction of the railway will be found as a schedule to 44 Vic., chap. 1, and only a few of its provisions bear upon this matter. Par. 22 provides that the Railway Act of 1879, so far as applicable and not inconsistent with the Company's Act of Incorporation should apply to the C.P.R. Co. The 17th sec. of the Railway Act of 1879 dealt with the tolls chargeable, and the 11th sub-sec. empowered the Dominion Parliament to, from time to time, reduce the tolls upon any railway, but not without the consent of the company, or so as to produce less than 15% per annum on the capital actually expended in its construction; nor unless on an examination by the Minister of Public Works of the amount received and expended by the company, the net income from all sources, for the year then last past, is found to have exceeded 15% upon the capital actually expended. Sec. 20 of the Company's Act of incorporation provides that the limit to the reduction of tolls by Parliament, as provided in sec. 17 above referred to, shall be extended so that such reduction may be to such an extent that such tolls, when reduced, shall not produce less than 10% profit on the capital actually expended in the construction of the railway, instead of 15% profit. So far as appears, the above sections are the only ones in either the general act or the special act, bearing upon the question of tolls; so both upon the company's contract with the Government of Canada and its special act, it was under the General Railway Act of 1879 upon the question of tolls, except as above indicated. The present law bearing upon this part of the complaint will be found in sec. 315 of the Railway Act, which provides that all tolls shall always, under substantially similar circumstances and conditions, in respect to all traffic of the same description, and carried in or upon the like kind of cars, passing over the same portion of the line of railway, be charged equally to all persons, and at the same rate; and no toll shall be charged which unjustly discriminates between different localities. It has been recognized by the board since its establishment that the equality of tolls was required only where the circumstances and conditions were substantially similar. The Railway Act of 1879 contained the following provision (s. 17, s.s. 6):

"All or any of the tolls may, by any by-law, be reduced and again raised as often as deemed necessary for the interests of the undertaking; *but the same tolls shall be payable at the same time and under the same circumstances upon all goods and by all persons*, so that no undue advantage, privilege, or monopoly may be afforded to any person or class of persons by any by-laws relating to tolls."

Nothing appears in the contract requiring the company to establish and maintain, over the whole main line of the railway when completed, the same or similar tolls, under different circumstances; and so far as I can see the company was bound, under the above clause, to charge the same or similar tolls, at the same time and under the same circumstances only. No clause appears in the Act of 1879 in express terms prohibiting unjust discrimination between different localities. I presume, however, a strict reading of the above sub-section would work the same result, so long as the circumstances were the same. It seems to me the company was at liberty, when the road was put into operation, to make distinctions in its tolls in different localities, where different circumstances existed that would justify such difference of treatment. The Railway Act, as it now stands, gives it and all other companies that privilege. This view of the law is adopted in the case of the B.C. coast cities vs. the C.P.R. Co., 7 C.R.C. 125, where the rates in B.C. were attacked upon the ground of discrimination. The late Chief Commissioner in that case said:

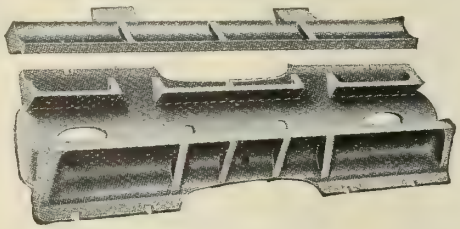
"It appears to me that no inference can be drawn from a mere comparison of distances upon different portions of railways, and that it does not constitute discrimination—much less unjust discrimination—for a railway company to charge higher rates for shorter distances over a line having small business, or expensive in construction, maintenance or operation, than over a line having larger business or comparatively inexpensive in construction, maintenance or operation. In my opinion, a party raising such a complaint upon a mere comparison of distances, should show the nature of the particular lines referred to, and that there is a material disproportion of rates as against the shorter line, after due allowance is made for the circumstances just mentioned."

With this I fully agree, and applying this doctrine to this case, the complainants would be required to establish that the rates in B.C., having regard to the nature of the lines there, the volume of business, cost of construction, maintenance, and operation, and other material matters, were out of joint with the rates over the company's lines in the provinces to the east. No evidence upon these heads was offered, and the whole case was put as one of contract. I am unable to find any such contract, express or implied, and so far as this branch of the contention is concerned, I think it fails.

The argument, as put at the hearing, summarized, was the following: "That being a railway of national concern, having received large subsidies from the Dominion Government, the Dominion Government having received large subsidies from the Province, it was the spirit and intention of all the parties, when that act was passed, and when the railway was authorized to be built, that no higher rates should be charged through B.C. than over any other part of the C.P.R. main line." To ascertain the spirit and intention of the parties one can only look at the contract and the

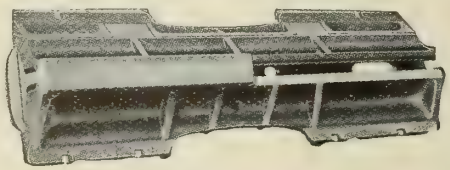
Have You Seen Williams Boltless Rail Joint?

The joint was first put in trial service on the Pecos River line of the Santa Fe at Roswell, N. Mex., where it remained for 11 months, and when removed at the end of that time it showed neither corrosion nor bright spots indicating wear. These joints have been in service for 10 months on the Fort Wayne division of the Pennsylvania Lines West, for 9 months in the yards of the St. Paul Union Depot Co., and for 8 months on the Wisconsin division of the Chicago & North Western Ry. in Chicago, where they are carrying the heavy North Shore suburban traffic of the road, as well as the through traffic for



the Wisconsin & Milwaukee division, which amounts to 316 trains every 24 hours.

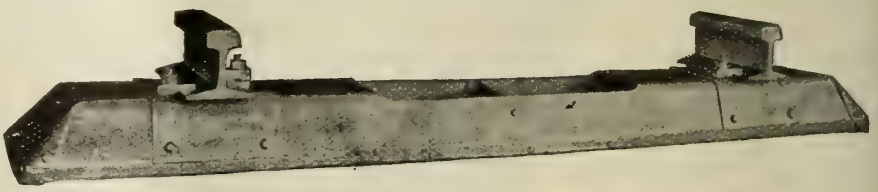
The joints are made of malleable iron and have on the bottom a series of transverse ribs for strength, the outer ones of which come against the tie and prevent longitudinal movement. To prevent rail creeping, there is a round hole through the joint midway of the outer side, in which a 1-in. round bolt is inserted, the rail flanges being cut away at the adjacent corners the slight amount necessary to permit the insertion of the bolt. The joints weigh the same as a yard of the rail to which applied; the joint for an 80-lb. rail, for example, weighing 80 lbs.



"I want to ride on a railroad equipped with the W.B.R.J. and the 20th Century Steel Ties."

We also Solicit Earnest investigation of

THE 20th CENTURY STEEL TIE



WILLIAMS BOLTLESS RAIL JOINT MANUFACTURING CO., INC.

503 Manhattan Bldg., CHICAGO, ILL.

acts bearing upon the matter; and, as stated, I am not able from these to find that the company prevented itself from increasing its tolls in localities where the circumstances justified it, and as permitted by the Railway Act of 1879. It is alleged that it was not contemplated, at the time British Columbia came into Confederation, that there should be any discrimination in freight and passenger rates between one province and another. The answer to this is that if there is undue or unjust discrimination, it is illegal, and if proved will be dealt with as a violation of the law; but this cannot be inferred; it is a matter of evidence having regard to different conditions and other matters above dealt with.

It was argued for the applicants that the company had violated its contract with the Dominion Government, dated Oct. 21, 1880, in that the road was not constructed up to the standard called for; that to save mileage it was located where heavy grades were necessary and expense of maintenance increased; and that the company should not be permitted to advance these as grounds for difference in rates if this position was caused by reason of its not fulfilling its contract. It was objected for the company that the applicants could not be heard to complain of any alleged breach, as the contract had not been made with the B.C. Government. Apart from whether such a contention is open to the applicants, as to which there is the gravest doubt, and apart also from any evidence that the contract was not fulfilled, and of which there was none, it appears that, by an agreement dated in Nov., 1886, and approved by order in council of Nov. 2, 1886, made between the Department of Railways and Canals and the C.P.R. Co., it is expressly stated that the road had been constructed and equipped of a quality and character equivalent upon the whole to the approximate standard agreed upon, namely, the Union Pacific Ry., as accepted by the U.S. Government, the railway being in many respects of superior quality and character to the approximate standard, and only in some degree inferior in respect of the gradients of a portion of the line in B.C., nine miles in length, passing Mount Stephen. The company covenanted in this document that it would, upon being so required by the Government, make such alteration and improvement in the nine miles as should be prescribed by the Government, not being in excess of the requirements of the Government engineer, as shown by the plans and specifications prepared by the company, and $1,000,000 land grant bonds were deposited with the Government to be held as security for the performance of this covenant, and to be used in such performance, if the company makes default therein. It appears perfectly clear that, in view of all this, the only party that could make any complaint would be the Dominion Government, and in any event, I am unable to understand how the matter has anything to do with the question of freight and passenger rates in B.C.

Upon the case as it stands it is impossible to afford any relief to the applicants. Request was made that the board should cause an inquiry and have an account taken to ascertain if the earnings of the railway were such that the Board could reduce the rates, in view of sec. 20 above mentioned. This inquiry is not necessary, as the company admits that its rates are subject to reduction or adjustment by the Board, if a proper case is made out—jurisdiction was admitted in the coast cities case above cited and in several others. If the applicant desires to give evidence for the purpose of establishing that, in view of all the circumstances, the rates now charged in B.C. are unreasonably high, or that undue discrimination exists, leave for such purpose should be granted, otherwise, upon the record as it stands, the application fails.

Deleware and Hudson Co's Report.

The annual report shows the net receipts from the company's coal and coal sales departments for the year ended Dec. 31, 1908, to have been $853,116.59 against $957,482.13 for 1907. The results from the operation of the company's railways during the same period was: Earnings, $18,500,731.43; expenses (excluding taxes), $10,811,720.87; net earnings, $7,689,010.56 against net earnings of $8,471,011.34 in 1907. The general income account, including earnings from all sources showed a total of $10,339,104.30 against $11,208,517.89, while the deductions for taxes, bond interest and miscellaneous items was $5,084,645.94, leaving a balance of $5,254,458.36 to be carried to net income account, against $6,466,-113.41 in 1907.

The floating debt was increased from $10,754,949.87 to $21,145,550 by the payment of the $6,000,000 collateral trust notes of the Quebec, Montreal and Southern Ry., due Feb. 6, 1908; by final payments on account of coal lands and by expenditures for railway construction. On May 23, 1908, the New York and Canada Ry. was merged with the D. & H. Co., under sections 53, 54 P.S.C. State of New York, and certificates of merger were filed in the office of the Secretary of State. The extension of the Quebec, Montreal and Southern Ry. from Pierreville to Ste. Philomene, Que., has been completed, with the exception of the bridge at Nicolet. It was expected that the new line would be placed in operation by May 1. The other portions of the report dealt entirely with the company's operations of railways and mines in the U.S.

The statistical tables attached to the report show liabilities of $104,116,925.01, and assets of $115,944,523.33, leaving a surplus of assets of $11,827,598.32. The stocks owned by the company include among others, 10,000 shares of the Quebec, Montreal and Southern Ry., par value, $1,000,000; 12,000 shares Napierville Junction Ry., par value, $600,000.

The length of the various lines operated by the company is 845.26 miles, of which 22 miles are operated under trackage rights from the Erie Rd., and 91.43 by four other companies. The company's Canadian lines: the Napierville Junction Ry. from Rouse's Point to St. Constant, Que., and the Quebec, Montreal and Southern Ry., are not included in the 845.26 miles.

Imperial Service Medals have been awarded to the following I.C.R. employes on their retirement:—S. Bedard, section foreman; D. Culligan, section foreman; J. Guillemette, section foreman; T. Hibbitts, carpenter; D. Proulx, section foreman; C. Rouillard, trackman; R. Williams, brakeman; J. Wilson, checker.

June Birthdays.

Many happy returns of the day to—

Harry Abbott, ex-General Superintendent C.P.R., Vancouver, B.C., born at Abbotsford, Que., June 14, 1829.

Jas. Anderson, Manager Sandwich, Windsor and Amherstburg Ry., Windsor, Ont., born at Ayr, Ont., June 20, 1851.

F. F. Backus, General Freight and Passenger Agent, Toronto, Hamilton and Buffalo Ry., Hamilton, Ont., born at Rochester, N.Y., June 4, 1860.

Archer Baker, European Manager C.P.R., London, Eng., born at York, Eng., June 21, 1845.

PLAN OF ORGANIZATION

CANADIAN GOVERNMENT RAILWAYS
INTERCOLONIAL & PRINCE EDWARD ISLAND RY.

Issued by the Railway and Marine World, Toronto, June, 1909

The above diagram shows the organization which has been decided on for the Government Railways consequent on the appointment of the Managing Board. The title of Superintendent of Motive Power, always a misnomer, as his duties embraced all rolling stock, has been enlarged to Superintendent of Motive Power and Rolling Stock. The position of General Superintendent, shown in the diagram, is a new one or rather a revival of an old one, the position having been abolished some years ago. In the operating department, as indicated in the diagram, the chief dispatchers, operators, station agents and employes, engineers and firemen on road, conductors and trainmen, teamsters and local storekeepers are responsible direct to the General Superintendent as well as to the Divisional Superintndents. This is a weakness that should be removed in the interests of discipline. The same anomaly occurs in the Traffic Department, where the district and travelling freight agents, district and travelling passenger agents, are shown as jointly responsible direct to the General Traffic Manager as well as to the General Freight Agent and the General Passenger Agent, respectively. This is another anomaly which should be removed. The roadmasters are shown as responsible jointly to the General Superintendent, not to the Divisional Superintendents, and to the Engineer of Maintenance of Way. The Law Department shown is apparently a new departure. While the organization plan could be improved in the directions suggested, it is a start in the right direction, if the Managing Board is given a free hand and its members are given freedom from political interference by members of Parliament. Many think that the divorcement of the Government railways from politics and the millenium will be contemporaneous. For the sake of the country it is to be hoped they are mistaken.

Orders by the Railway Commissioners.

Beginning with June, 1904, we have published in each issue summaries of orders passed by the Board of Railway Commissioners, so that subscribers who have filed our paper have a continuous record of the Board's proceedings. No other paper has done this.

The dates given of orders, immediately following the numbers, are those on which the hearings took place and not those on which the orders were issued. In many cases orders are not issued for a considerable time after the date assigned to them.

6885. Apr. 23.—Approving plan of Niagara, St. Catharines and Toronto Ry. standard trestle.

6886. Apr. 23.—Authorizing G.T.R. to construct branch line to the Empire Mfg. Co.'s premises at London, Ont.

6887. Apr. 23.—Authorizing Enterprise Gas Co. to lay pipes under G.T.R. at Delhi, Ont.

6888. Apr. 23.—Authorizing C.P.R. to construct steel trestle at mileage 95.7, Sherbrooke section.

6889. Apr. 23.—Approving Quebec Ry., Light & Power Co.'s tariff C.R.C. No. 7.

6890-6891. Apr. 23.—Amending orders 6616 and 6617 of Mar. 22, re construction of C.P.R. spurs in Okotoks, Alta.

6892. Apr. 26.—Temporarily approving agreements of four telephone companies entered into with the Bell Telephone Co. in Nov., 1908, and Mar., 1909.

6893. Apr. 26.—Releasing to G.T.R. Co. piece of land in St. Antoine de Longueuil Parish, Que.

6894. Apr. 23.—Directing C.N.R. to construct railway crossings between secs. 35 and 2, tp. 41 and 42, range 13, west of 3rd mer., and on sec. 22, in dist. 21-J-3, Sask.

6895 and 6896—Authorizing Andover and Perth Electric Light Commissioners to erect wires across C.P.R. at Perth and Andover, N.B.

6897. Apr. 26.—Authorizing C.P.R. to construct spur line to Nicholas Chemical Co.'s premises, Sulphide, Ont.

6898. Apr. 26.—Authorizing McKim tp., Ont., to construct crossing over C.P.R.

6899. Apr. 26.—Authorizing Monk Rural Telephone Co. to erect wires across G.T.R. at Church St., Carleton County, Ont.

6900. Apr. 26.—Authorizing Bell Telephone Co. to erect wires across C.N.O.R. at mileage 13.45, west of Hawkesbury, Ont.

6901. Apr. 16.—Re additional charge which railway companies may make for changing destination of carload traffic while in transit. This order is given fully on another page.

6902. Apr. 26.—Authorizing Manitoba Gov't Telephones to erect wires across G.T.P.R. between secs. 22 and 23-11-4 w. Man.

6903. Apr. 29.—Authorizing A. H. Watson to erect wires across G.T.R. at Creemore, Ont.

6904. Apr. 30.—Authorizing B.C. Telephone Co. to erect wires across E. & N. Ry. at Beaver Creek, B.C.

6905. Apr. 30.—Authorizing City of St. John, N.B., to lay water main across C.P.R. at Green Head road, Lancaster Parish, N.B.

6906. Apr. 28.—Directing G.T.R. to construct culvert under its Buffalo and Lake Huron divison, in Wainfleet tp., Ont.

6907. Apr. 28.—Ordering construction of culvert under G.T.R. in Eldon tp., Ont.

6908. Apr. 28.—Dismissing application of Plymouth Cordage Co., of Welland, Ont., for order directing G.T.R. to refund $884.01, alleged excessive freight charges on shipments of sand and gravel from Niagara Falls to Welland, Ont.

6909. Apr. 27.—Ordering G.T.R. to at once erect at Garnet, Ont., shelter to accommodate traffic.

6910. Apr. 29.—Authorizing C.P.R. to reconstruct certain bridges on its Windsor, North Bay and Souris sections.

6911. Apr. 30.—Authorizing C.P.R. to construct spur line to Imperial Oil Co.'s premises, Saskatoon, Sask.

6912. Apr. 28.—Refusing application of Don Valley Brick Works, Toronto, Ont., for order directing G.T.R. to make reparation on shipments of enamelled brick, to Ottawa.

6913. Apr. 28.—Dismissing application of Canboro tp., for order directing M.C.R. to construct highway crossing over its line to connect the line of highway laid out by the township.

6914. Apr. 27.—Authorizing Ekfrid tp. to cross G.T.R. east of Glencoe, Ont., with culverts.

6915. May 1.—Authorizing Shawinigan Water and Power Co. to lay water main under C.P.R. at Joliette, Que.

6916. Apr. 28.—Disapproving plans filed by Raleigh tp., Ont., for authority to construct Pike's drainage works across G.T.R.

6917 to 6921. May 1.—Authorizing Manitoba Government Telephones to erect wires across Canadian Northern Ry. at five points.

6922. Apr. 27.—Dismissing complaint of E. B. Sutton, alleging excessive freight rates charged by C.P.R. on brick in carloads, from Milton, to Bala Falls, Ont.

6923. May 3.—Authorizing C.P.R. to open for traffic its line between mileage 63 and 64, Medicine Hat section, Alta.

6924. Apr. 28.—Dismissing application of Byron Telephone Co. for leave to install telephone in G.T.R. station at Komoka, Ont.

6925. May 3.—Authorizing Caradoc-Ekfrid Telephone Co. to erect wires across M.C. Rd. in Ekfrid tp., Ont.

6926. Apr. 30.—Authorizing C.P.R. to construct spur line across Manitoba and River Sts., Moose Jaw, Sask.

6927. May 3.—Dismissing application of C.P.R. for order amending order 5102, of July 29, 1908, authorizing G.T.R. to cross tracks of C.P.R., Owen Sound section, and Ontario and Quebec Ry., near Toronto Jct., Ont.

6928. Mar. 5.—Ordering C.P.R. to change location of rails at Mill St., Enderby, B.C., so that top of rails shall not rise above or sink below level of highway to extent of more than 1 in.

6929. Apr. 28.—Amending order 5102, July 29, 1908, re G.T.R. crossing C.P.R. tracks east of Weston road, West Toronto, Ont.

6930. May 4.—Ordering G.T.P.R. to vacate its right of way where same affects land of C. Smith, J. Douglass and H. T. Champion, in Winnipeg.

6931. May 4.—Requiring proposed application to Board for approval of amalgamation agreement between C.N.R. Co. and Alberta Midland Ry. Co. to be published in Canada Gazette, and in one newspaper in Toronto, Edmonton, Calgary and Lethbridge.

6932. May 4.—Authorizing C.N.O.R. and C.P.R. to each construct certain portions of road allowance near Parry Sound, Ont., as specified in order 6365, of January 27.

6933. May 3.—Authorizing town of Buckingham, Que., to construct First Ave. across C.P.R.

6934. May 4.—Requiring proposed application to Board for approval of amalgamation agreement between C.N.R. Co. and Saskatchewan Northwestern Ry. Co. to be published in Canada Gazette, one newspaper in Toronto, Regina, Moose Jaw and Saskatoon.

6935. May 4.—Authorizing Welland County Lime Works Co. to lay gas pipe under G.T.R. in Wainfleet tp., Ont.

6936. May 3.—Authorizing Bell Telephone Co. to erect wires across G.T.R. half a mile north of canal, Hamilton Beach, Ont.

6937. May 4.—Approving Spokane and B.C. Ry. by-law, authorizing O. E. Fisher, G.F. & P.A., to prepare and issue tariffs of tolls for traffic.

6938. May 5.—Approving standard passenger tariff of Spokane & B.C. Ry. This order is given fully on another page.

6939. May 5.—Dismissing application of E. S. Brennan, of Hamilton, Ont., for order directing G.T.R. to refund $73.89, alleged overcharge on shipment 17 cars of lumber from Wiarton to Hamilton, in July, 1908.

6940. May 3.—Directing that watchman which was to be provided by order 6340, of Feb. 22, 1909, include a night as well as day watchman, at G.T.R. crossing, Main St., Welland, Ont.

6941. May 4.—Approving location of C.N.O.R. Ottawa-French River division through Fitzgerald, Deacon, Lister, Boyd and Pentland tps., Ont.

6942. May 4.—Approving plan of proposed iron bridge, to replace present wooden bridge carrying John St., Stratford, Ont., across G.T.R.

6943. May 4.—Extending for one month time within which Chatham, Wallaceburg & Lake Erie Ry. shall equip its cars with air brakes.

6944. Apr. 28.—Directing C.N.R. to make crossings already constructed in districts 18-B-3, Sask., and also in tps. 36.5 and 35.5, in said districts, in accordance with regulations.

6945. May 4.—Authorizing C.P.R. to construct tracks across Con St., Havelock, Ont., and to construct highway crossing, in accordance with regulations.

6946. May 4.—Authorizing C.P.R. to construct three bridges on its North Bay Portal and Megantic sections.

6947. Apr. 26.—Re new tariffs on fruit from California to Regina, Sask. This order is given fully on another page.

6948. Sept. 15, 1908.—The application respecting Canadian classification re bill of lading or live stock special contract, fixing freight rates on horses, on basis of declared valuation, and restricting liability of the carrier with respect thereto. This order is given in full on another page.

6949. May 5.—Dismissing complaint of residents of Sydenham tp., and Owen Sound, Ont., alleging dangerous condition of highway crossings C.P.R. at Murray's cut, near Owen Sound, and applying for order directing construction of bridge over the railway.

6950. May 6.—Authorizing C.N.O. Ry. to construct its line across 8 highways in Thorah tp., Ont.

6951. May 7.—Authorizing New Brunswick Ry. (C.P.R.) to open for traffic the portion of its grade revision between mileages 0.3 and 0.47, near Aroostock Jct., and between mileages 19.1 and 20.2, near Grand Falls, N.B.

6952. May 7.—Authorizing C.P.R. to open for traffic the portion of its main line at mileage 33.4, Grand River, N.B.

6953. May 6.—Approving location of

6981. May 10.—Authorizing C.P.R. to construct four bridges on its Ontario, Eastern and Pacific divisions.

6982. May 10.—Authorizing A. Michaud to lay water pipe under Temiscouata Ry. at St. Francis de Madawaska, Que.

6983. May 10.—Certifying that mistake was made in representing Chas. Oligny as sole owner of lot cadastral 645-J, he being curator for Albert and Arthur Oligny and others, and that same has been changed.

6984. May 7.—Rescinding order 6913 of Apr. 28, dismissing application of Town of Canboro, Ont., for order directing M.C.R. to construct highway crossing over its line of railway to connect highway laid out by applicants.

6985. May 6.—Rescinding order 5643 of Nov. 3, 1908, directing G.T.R. to provide flag station at Fern Glen, or Walls Crossing ½ mile west of Scotia Jct., Ont.

6986 to 6989. May 10.—Authorizing Bell Telephone Co. to erect wires across G.T.R. at Sundridge and Drayton, Ont., and across M.C.R. at Petrolia, Ont.

6990. May 10.—Authorizing Zorra Telephone Ass'n. to erect wires across Tilsonburg, Lake Erie & Pacific Ry., in West Zorra tp., Ont.

6991. May 10.—Authorizing Bolton Telephone Co. to erect wires across C.P.R. in Albion tp., Ont.

6992. May 10.—Authorizing C.P.R. to construct bridge 68.31, Chapleau section.

6993. May 10.—Authorizing C.P.R. to construct bridge at mileage 63.55, White River section.

6994. May 10.—Authorizing Crow's Nest Pass Coal Co. to construct bridge over C.P.R. main line at Michel, B.C.

6995. May 14.—Approving location of St. Maurice Valley Ry., from mileage 0 to 5.72, from Shawinigan Falls to Grand Mere, Que.

6996. Apr. 29.—Re rates on C.P.R. from Montreal to the Maritime Provinces on Western grain for domestic consumption. This order is given in full on another page.

6997. May 11.—Authorizing O. & N.Y.R. to construct a draw span and pivot pier on Cornwall canal bridge.

6998. May 4.—Extending time for installation of fire extinguishers in passenger cars. This order is given in full on another page.

6999. May 10.—Dismissing complaint of J. Kerr, Franklin, Man., against C.P.R. rate on vegetables from Franklin to Winnipeg, Man. This order is given in full on another page.

7000. May 4.—Authorizing G.T.R. to use and operate jointly and on equal terms with C.P.R. branch line to Sunbeam Incandescent Light Co.'s premises, Mowat Ave., Toronto.

7001. May 11.—Approving character of work provided for in report in connection with drain to be constructed across P.M. Rd. in Harwich tp., Ont.

7002. May 11.—Authorizing City of Hull, Que., to construct highway across Ottawa, Northern & Western Ry.

7003. May 12.—Approving location of United Gold Fields of B.C. railway from Frank to Grassy Mountain, B.C.

7004. May 12.—Authorizing C.P.R. to construct railway across highway between lots 25 and 26, con. 9, Vaughan tp., Ont., mileage 16.93, and at mileage 17.40.

7005 and 7006. May 4.—Authorizing V.V. & E. Ry. & Nav. Co. to cross with its tracks the B.C. Electric Ry. at Harris St. and Hastings St., Vancouver, B.C.

7007. May 12.—Authorizing Georgian Bay & Seaboard Ry. to cross with its track, by an overhead crossing, the G.T.R., near Lindsay, Ont.

7008. May 12.—Authorizing C.N.Q.R. to operate construction trains over crossing of C.P.R. track east of Lorette, Que.

7009. May 12.—Authorizing city of Winnipeg to construct highway crossing, at rail level, across C.P.R., Pembina branch.

7010. May 12.—Authorizing town of Victoriaville, Que., to lay sewer pipe under G.T.R.

7011. May 12.—Authorizing Water Commissioners of Brantford, Ont., to lay pipe under T.H. & B. Ry. at Oxford St. and Richardson St.

7012. May 12.—Authorizing C.P.R. to reconstruct bridge 115.4, Petewawa River, Chalk River section.

7013. May 5.—Authorizing C.P.R. to reconstruct bridge 58.5, Cobb's Lake, Ont.

7014. May 18.—Authorizing C.P.R. to construct its Pheasant Hills branch across road allowances at 47 points.

7015. Apr. 28.—Approving specifications of James Strong culvert, under G.T.R., in Rochester tp., Ont.

7016. May 17.—Amending order 6501, March 12, granting leave to Winnipeg Electric Ry. to cross the C. P. Ry. at Logan Ave., Winnipeg, so that same will read "that the cost of inserting, installing, connecting, and maintaining the home signals on its railway at the crossing be borne by the C.P.R. Co."

7017. May 13.—Dismissing complaint of Williams Quarry Co. that C.P.R. unjustly discriminates against it in rates charged on shipments from its quarry at Airdale, Man., to Winnipeg.

7018. May 15.—Authorizing G.T.R. to construct branch line commencing at the C.P.R. east of Craig's Road station, Levis county, Que., extending to the River Beaurivage.

7019. May 13.—Authorizing D. Hanley to lay a gas main under G.T.R. at Cainsville, Ont.

7020. May 13.—Authorizing Consolidated Telephone Co. to erect wires across C.P.R. at Bath, N.B.

7021. May 14.—Authorizing Dundurn Telephone Co. to erect wires across C.N.R. at Dundurn, Sask.

7022. May 14.—Authorizing C.P.R. to construct bridge at mileage 31.8, Smiths Falls section, Ont.

7023. May 10.—Approving proposed supplement 1 to Canadian Classification 14, to become effective three weeks from date of order.

7024. May 15.—Authorizing C.P.R. to construct spur line to Thurlow Lumber Co.'s premises, Port Moody, B.C.

7025. May 18.—Approving revised location of C.N.O.R. from mileage 32.56 to 33.76, Creelman tp., Ont.

7026. May 18.—Authorizing Calgary & Edmonton Ry. to construct its Wetaskiwin branch across 77 road allowances.

7027. May 13.—Authorizing Industrial School Ass'n, Toronto, to lay sewer under G.T.R. in Etobicoke tp., Ont.

7028. May 18.—Authorizing Water Commissioners of Brantford, Ont., to lay mains under G.T.R. at Chatham, Sheridan, Marlborough and Gray Sts.

7029. May 17.—Authorizing C. P. R. to construct nine bridges on its Ontario, Pacific, Atlantic, Eastern and Lake Superior divisions.

7030. May 18.—Authorizing Bell Telephone Co. to erect wires across G.T.R. at various points in Ontario.

7036. May 18.—Authorizing Bolton

7040. May 17.—Rescinding order 6784, April 8, authorizing B.C. Southern Ry. to construct coal tipple over main line and other tracks, near Michel Station, B.C.

7041. May 3.—Amending order 3244, July 4, 1907, authorizing C.P.R. to install automatic electric bell, near Pembroke, Ont.

7042. May 19.—Authorizing Bell Telephone Co. to cross P.M.R. 2 miles west of Ridgetown, Ont.

7043. May 19.—Approving C.N.R. standard pile and frame trestle.

7044. May 19.—Approving C.P.R. bridge where its Pheasant Hills branch crosses G.T.P.R. mileage 457.1.

7045. May 4.—Ordering Montreal Park & Island Ry. to grant same facilities in way of service and operation to people residing in Mount Royal ward as it grants to people residing in Notre Dame de Grace.

7046. May 18.—Directing that M.C.R. provide that bell circuit of automatic bell at Queen St. crossing, Tilbury, Ont., be extended so that bell will ring when trains are 2,200 ft. from the crossing; and that highway at 4th concession road crossing be diverted so as to cross the railway at right angles.

7047. May 19.—Authorizing C.P.R. to construct six bridges on its Pacific, Ontario, Eastern and Superior divisions.

Correction for the Erring

The Toronto Globe published an article recently, headed "The Intercolonial Commission," in which it said that one of the most important matters brought before Parliament this year was the Minister of Railways' "announcement of the appointment of a commission to manage the I.C.R.," and it referred to "the four commissioners." As the new management has just gone into effect it is well to point out that it is not a commission and that no commissioners have been appointed. In explaining the matter in the House of Commons the Minister, as quoted in our last issue, said: "My proposition is this: Not to establish a commission. . . . . The proposition is to establish a board. . . . . On that board I propose to retain two of the officials now on the I.C.R. in very high places. I propose also to allow the Deputy Minister of Railways to act on that board, and I would call it, not a commission, not an advisory board, but a board of management."

As also announced in our last issue the order in council making the appointments say: "A managing board entitled The Government Railways Managing Board, has been constituted for the supervision and direction of all the departments of the said railways" (I.C.R. & P.E.I.R.).

"An official announcement from Canadian Pacific headquarters at Montreal says that Mr. B. B. Kelliher, the company's chief engineer, will in future have his office in Winnipeg, instead of Montreal, as formerly."—Toronto Globe.

There is no such position as Chief Engineer in the C.P.R. at present. B. B. Kelliher is Chief Engineer Grand Trunk Pacific Ry.

G. T. R. Betterments, Construction, Etc.

Ballasting.—The work of ballasting the line between Ottawa and Coteau has been resumed; the gangs working east and west from Moose Creek, Ont.

Ottawa Station and Hotel.—A permit has been granted by the Ottawa City Council for the erection of a power station and baggage annex in connection with the new station. Work has been resumed on the temporary buildings, and will be continued until completed. Loomis & Co., Montreal, are the contractors for this portion of the work. E. H. Fitzhugh, third Vice-President, stated May 2, that arrangements for the construction of the permanent station buildings are about completed, and that work should begin at an early date. Representatives of Ross & Macfarlane, architects, Montreal, were in the city May 3, in connection with the matter.

A gang of men has been engaged for some time in sinking test pits on the Major Hill park site to find the rock level for the hotel building. In the House of Commons, May 13, a question was asked if anything more had been done regarding the transfer of the site for the hotel, and the Premier stated the matter remained in the same position as formerly.

Montreal-Toronto Track.—The relaying of the track between Montreal and Toronto with 100-lb. steel has been resumed at Thousand Islands Jct. It is expected that the new steel will be laid to Cobourg this year, leaving the stretch between Cobourg and Toronto to be done in 1910.

Hamilton to Niagara Falls.—A press report states that it is probable that the line between Hamilton and Niagara Falls, Ont., will be made into a four-track route in the near future, but that nothing has been done in the way of preparing plans for the project.

Viaduct at St. George.—We are advised that the details of the projected viaduct at St. George, on the old main line between Paris and Brantford, Ont., have not been completed, the Board of Railway Commissioners having only approved of the general plan.

Brantford Improvements.—The negotiations that have been in progress for some time between the company's officials and the City Council of Brantford, Ont., with reference to the laying of industrial sidings in the east ward and Holmesdale, and other matters are reported to be nearly completed. It was arranged May 10 that a conference would be held at an early date to determine a division of the expenses between the company and the city.

London Improvements.—H. G. Kelley, Chief Engineer, was in London, Ont., May 1, looking over some matters in connection with the projected improvements. He is reported to have stated that as soon as the plans for Toronto were out of the way he would be able to go on with what he has already laid out for London.

Sarnia Tunnel.—We are advised that it is the intention to renew the floor timbers through the tunnel and simultaneously therewith to relay the track throughout with new 100-lb. steel rails. As it was necessary to relay the floor beams it was decided that new rails be put down at the same time, and to use 6 by 9½ tie plates to prevent mechanical wear on the ties.

Chicago, Ill.—A contract has been let to the Charles A. Moses Construction Co. for the erection of a one-story passenger station at South Halstead and 49th Sts., Chicago. The building will be of brick, 50 by 125 ft., and is estimated to cost $25,000. (May, pg. 335.)

Fire Extinguishers for Passenger Cars.

The Board of Railway Commissioners passed the following order, 6998, May 4: In the matter of the equipment of passenger cars with fire extinguishers: Whereas, by order 3238, dated July 3, 1907, amended by order 4685, dated May 5, 1908, railway companies subject to the legislative authority of the Parliament of Canada, operating a railway by steam power, were directed to equip their passenger coaches with fire extinguishers within the time provided in the order of July 3, 1907, viz.: In cars to be constructed in the future for use on their said railways, before they are so used; in cars under construction or in shops undergoing repairs, within six months from the date of the order; in cars at present in use on their respective railways, within 18 months from the date of the order. And, whereas, it has been represented that delays have arisen in connection with compliance with the provisions of the order. Upon hearing the matter in the presence of counsel for the C.P.R., the C.N.R., the G.N.R., and the G.T.R. Companies, and what was alleged by counsel aforesaid, and upon their request, it is ordered that the time provided in the order 3238, within which railway companies are required to equip their passenger coaches with fire extinguishers be extended as follows: Cars under construction or in shops undergoing repairs, within six months from May 4, 1909; cars at present in use on their respective railways, within 18 months from Nov. 3, 1908. And in all other respects the said orders are hereby confirmed.

Canadian Railway Club.—At the annual meeting in Montreal, May 4, the following officers were elected: President, H. H. Vaughan; Vice-President, A. A. Maver; 2nd Vice-President, A. A. Goodchild; Executive Committee, J. Coleman, A. W. Wheatley, R. W. Burnett, F. Ditchfield, C. Manning and P. R. Diamond; Audit Committee, W. H. Stewart, H. A. White and J. S. Johnstone; Secretary, Jas. Powell; Treasurer, S. S. Underwood.

Railway Crossings Legislation.—Several bills were dealt with at the Dominion Parliament's recent session referring to the speed of trains at level crossings in towns and villages. The Lancaster bill, which has been passed by the House of Commons for two or three years past, but always defeated in the Senate, was again considered, and when it reached that body an amendment was introduced by Senator Beique, and the bill was passed. In the House of Commons a bill introduced by R. Bickerdike was also considered, but subsequently the Minister of Railways introduced another bill dealing with the matter more generally, by giving the Board of Railway Commissioners certain powers, and incorporating the amendment to the Lancaster bill passed in the Senate at the instance of Senator Beique. This bill was discussed on several occasions, and finally passed the House of Commons, May 12.

RAILWAY DEVELOPMENT

Projected Lines, Surveys, Construction, Betterments.

Alaska Central Ry.—A press report states that a contract has been let to Watson and Snow, for the completion of 20 miles of line from mileage 52 to 72. Track has been laid from Seward, northerly to Turnagain, Alaska, 52 miles, and grading for 20 miles from that point was nearly completed when operations ceased.

Algoma Central and Hudson Bay Ry.—A map showing the lines of railway operated or projected by the Lake Superior Corporation shows the present position of the A. C. and H. B. Ry. to be —line projected from Sault Ste. Marie to the C.P.R., 191.6 miles, of which about 70 miles have been completed and are being operated over. Beyond Pangissin construction had reached various stages towards Hawk Lake Junction. The Michipicoten branch extends from Michipicoten to Josephine Jct. and Helen Mine, 13 miles, and it is intended to construct an extension to Hawk Lake Jct., making the total length of the branch 26 miles. The company's charter grants the right to construct a line from Hawk Lake Jct. to the C.P.R. main line, crossing it at Missinabi, 28.6 miles (54.6 miles from Michipicoten); thence to the National Transcontinental Ry. (near its crossing of the Missinabi River), about 115 miles, and thence to Moose Factory on James Bay, a further distance of 199 miles; and a line from near Hawk Lake Jct. to the C.P.R. at White River, 68 miles; and another line from near Hawk Lake Jct. to Goudreau Lake, about 18 miles. (May, pg. 355.) See also Manitoulin and North Shore Ry.

Arnprior and Pontiac Ry.—Press reports state that this company has been organized to construct a number of lines radiating from Fitzroy Harbor, Ont., (a village in Carleton County, on the Ottawa River) to connect with the electric smelters which it is proposed to erect near there, in connection with the development of a water power, estimated to give 110,000 h.p. The railway lines will run out to a number of large deposits of iron ore in the vicinity. The act incorporating the company has been passed by the Dominion Parliament. L. Simpson, Valleyfield, Que., who controls the water power, is one of the provisional directors, and A. H. N. Bruce, Ottawa, is Chief Engineer. (Feb., pg. 101.)

Atlantic, Quebec and Western Ry.—Tenders were received to May 21 by the New Canadian Co., London, Eng., and New Carlisle, Que., for the steel superstructures of 14 bridges and trestles on the section of line now under construction towards Gaspe Basin. The total length of the structures is 4,900 ft. (May, pg. 355.)

Canadian Terminal Ry.—The New Brunswick Legislature has granted the company an extension of time within which it may construct its projected railway.

Chicago, Milwaukee and Puget Sound Ry.—W. S. Mason, of New York City, one of the largest shareholders in the C. M. and St. Paul Ry., of which the C.M. and P.S. Ry. is a subsidiary, was in Vancouver, B.C., May 8, making enquiries as to securing property for terminal and other purposes in the city. He stated that the company would be able to make a definite move with regard to terminals in Vancouver within the current year. (May, pg. 355.)

Detroit River Tunnel.—The eighth section of the tunnel, under construction between Windsor, Ont., and Detroit, Mich., was sunk into place, May 3, on the Canadian side of the river. The sinking of two more sections will complete the portion of the tunnel under the river.

Farmers' Ry.—A meeting was held at Melfort, Sask., May 8, in support of the project advocated by D. W. Hines, of Hannah, Sask., for the construction of a railway on the co-operative plan. Those signing the agreement pay $5 at the time of signing, and are not liable for any further calls until at least 500 persons, exclusive of the promoters and officials, have become shareholders. Engineers are expected at Melfort, according to press reports, to proceed with surveys of the line. (May, pg. 355.)

Grand Lake and Bell River Ry.—The Quebec Legislature has incorporated a company with this title to construct a railway near the crossing of Bell River by the National Transcontinental Ry., to Twenty-one Mile Bay, an arm of Grand Lake, or to Rabbit Lake, on the Ottawa River, with a branch line not to exceed 12 miles. The company is given power to construct wharves, docks and warehouses and to operate steam and other vessels on the navigable waters touched by its railway. C. B. Devlin, Hull, Que., is the solicitor. (Feb., pg. 101.)

Halifax to Guysboro.—A conference was held recently at Montreal, at which the Premier of Nova Scotia met some local financial men, when the project of constructing a railway from Dartmouth to Guysboro and Country Harbor, through the Musquodoboit Valley, was discussed. The projected railway has a total length of 207 miles, and the N.S. Government has made all necessary surveys. It is authorized to grant a substantial subsidy to any company undertaking the construction of the line, and the Dominion Parliament has voted a cash subsidy upon the usual terms and conditions. The project has been before the country for years, under various titles, including the Musquodoboit Valley Ry., the Halifax and Guysboro Ry., the North Eastern Ry., and the Halifax and Eastern Ry. (See Halifax and Eastern Ry., April, pg. 247.)

Howe Sound, Pemberton and Northern Ry.—A start is reported to have been made upon the work of clearing the right of way on this projected railway. The contractors, J. G. Brassey and D. McLennan, have three gangs of men at work at different points on the route, and it is expected to complete at least seven miles of track this season. The present object of the railway is to take timber out of the lower Squamish valley. (Nov., 1908, pg. 793.)

Intercolonial Ry.—In the course of a discussion upon the operation of the Inverness Ry. and Coal Co.'s line in the Nova Scotia Legislature, May 6, the Premier stated that the Minister of Railways had decided to build a station at Point Tupper, the southern terminus, which would remove a part of the grievance complained of. In the further supplemental estimates laid before the House of Commons May 12, provision was made for the following additional votes for the I.C.R.:—

Original construction, to pay for land taken at Point Tupper, N.S.	$6,000
Extension to Dalhousie wharf	27,500
Indiantown-Blackville line—To put same into condition for operation	50,000

(May., pg. 355.)

The work of ballasting the second track between Moncton and Painsec Jct., N.B., was started May 14, three trains being employed in carrying material from the ballast pit at Portage.

Lachine, Jacques Cartier and Maisonneuve Ry.—The Quebec Legislature has incorporated a company with this title to construct a railway between the points named. Press reports state that the line is projected in the G.T.R. interests in order to give that company access to a point alongside deep water, at which ocean steamship terminals may be constructed.

In the passing of the act through this Legislature a clause was added to the effect that the company must obtain the consent of the different municipalities before entering their limits.

Matane and Gaspe Ry.—The Quebec Legislature has extended the time within which the company may construct its projected railway, and authorizing a change in the location of its starting point. (Feb., pg. 103.)

Manitoulin and North Shore Ry.—Survey work has been started from the present westerly terminus of the line, at the smelter about 13 miles from Sudbury, Ont., westerly and southerly to Little Current, Manitoulin Island. The extension will be about 70 miles. The country through which the extension passes presents many difficulties in the way of construction, as it abounds in rocks, muskegs and lakes. The survey will occupy practically the whole season, but it is expected to have sufficient of the line located to permit of a start being made with construction at the present terminus in July. The starting of surveys in May, and the prospective starting of construction in July will meet the conditions imposed by the Ontario Legislature at the recent session. The company also proposes during the present season to start and complete certain works of betterment on the existing line between Sudbury, its nickel mines and its smelter. We are advised that the chief engineering features in connection with this construction will be the crossing of the Vermillion River by an iron bridge, the details of which have not been determined; the crossing of the Spanish River by a 183 ft. through girder bridge on concrete abutments, and the crossing of the Spanish River Pulp and Paper Co.'s power canal by two spans of 50 ft. each, resting on concrete piers and abutments. These latter bridges are both built and the line graded from Stanley, the crossing point of the Sudbury-Sault Ste. Marie branch of the C.P.R., to about two miles south. This piece of line is being operated over at the present time by the C.P.R. to take care of the output of the Pulp Co.'s mill. The other features will be the construction of the line from the mainland there to and across three islands, and finally a swing bridge across the channel to Little Current. The details of this bridge have not been settled. The engineers are endeavoring to get through on a 1% gradient, and a curvature of 8 or 10 degrees. A complete survey has been made, and the present survey, which is under H. B. Aylmer, is a revision survey in preparation for the starting of construction in June. We are

further advised that tenders are about to be asked for the construction of the first 10 miles of the extension, and as soon as a contract is let construction will be pushed as rapidly as possible until completion.

The company has at present in operation a line from Sudbury to Gertrude Mines, which line takes care of the output of the Canadian Copper Co.'s Creighton mine. With the completion of the 10 mile section for which contract will be let in June, the company will be able to handle the output of the Canadian Copper Co.'s Crane Hill mine, and also the Ludwig Mond Co.'s North Star mine. There are also on the line the Lake Superior Co.'s Elsie and Gertrude mines, which are not being operated. In addition to the two miles southerly from the C.P.R., the company has also done some construction on a distance of seven miles northerly from Little Current.

A map showing the lines for which the company holds a charter shows a line westerly from Sudbury to Searchmont, on the Algoma Central and Hudson Bay Ry., 175 miles, having a connection with the C.P.R. at Victoria mine, 25.5 miles from Sudbury; and a branch crossing the C.P.R. at Stanley, to Little Current, and thence across Manitoulin Island. The total mileage between Sudbury and Little Current is given by the company as 80.8, made up as follows:—Sudbury to Victoria mine, 25.5 miles; Victoria mine to Stanley (along the C.P.R.), 19.0 miles; Stanley to Whitefish (mainland shore), 18.0 miles; Whitefish to Little Current, 18.3 miles.

T. J. Kennedy is General Superintendent, and C. N. Coburn, Sault Ste. Marie, Ont., Chief Engineer.

Michigan Central Rd.—Two steel laying gangs are at work, east and west of St. Thomas, Ont., relaying the mainline tracks. Additional gangs, it is reported, will be set to work as soon as sufficient rails have been received to justify it. A press report states that the company proposes to start the construction at an early date of a 25-stall roundhouse and a new station at Windsor, Ont. The cost of the latter is placed at $100,000.

Minas Basin, N.S.—The residents in the numerous villages on the north shore of Minas Basin, N.S., are considering the desirability of urging the Nova Scotia Government and the Dominion Government to unite for the construction of a railway from the Intercolonial Ry. to serve the district. The suggested route is from East Mines, near Truro, on the I.C.R., to Parrsboro, the shore terminus of the Cumberland Ry. and Coal Co.'s line.

Montreal Bridge and Terminal Co.—The House of Commons has passed an amendment to the company's act for an extension of time for construction, by the addition of a section providing that the company cannot make use of Montreal streets for an entrance until authorized to do so by a city by-law, and that the tunnel from Longueuil to Montreal should be begun before the power to construct a tunnel at Lachine be exercised. (Apr., pg. 249.)

New Brunswick Coal and Ry. Co.—The Commissioners in charge of this provincially operated railway being desirous of carrying out a number of betterments, secured an act at the recent session of the New Brunswick Legislature authorizing the Government to grant them a loan for the purpose indicated. (May, pg. 357.)

New Brunswick Docks and Terminals Co.—New Brunswick Legislature has incorporated a company with this title. (April, pg. 249.)

See also Northern New Brunswick and Seaboard Ry.

North Eastern Ry.—The Quebec Legislature has extended the time within which the company may construct its projected line from Ville Marie, Lake Temiskaming, easterly for 25 miles. (Sept., 1908, pg. 617.)

Northern New Brunswick and Seaboard Ry.—The application of the Twin Tree Mines Ry. Co. for an act changing its name as above and varying its powers as to the terminal points of its projected line, has been passed by the New Brunswick Legislature. The Canada Iron Corporation, which owns the charter, has engineers in the field locating a line from its mines to the Intercolonial Ry. between Newcastle and Bathurst, N.B. Three routes are being surveyed, one to near Bathurst, a second to Bartibog, and the third to Red Pine. The point of junction with the I.C.R. has not been decided upon. (April, pg. 249.)

The Quebec Central Ry. is actively pushing forward the construction of 30 miles of the extension of its line from St. George, Beauce, to Ste. Justine, Dorchester county, Que. Five hundred men with construction plant, &c., are at work, and it is expected that 1,500 will be employed by the middle of June. The line is under contract to be completed by Dec. 1 next. This extension will open up a valuable agricultural and lumber portion of the province and give transportation facilities to a section of the counties of Beauce, Dorchester, and Bellechasse, bordering on the State of Maine, which has been somewhat isolated. Powers and Dussault, of Levis, Que., are the contractors for the grading, and the Dominion Bridge Co. for the iron structures.

Quebec County Ry.—The Quebec Legislature has granted the company an extension of time within which it may construct the railways authorized by its act of incorporation. (Feb., pg. 103.)

Quebec, Montreal and Southern Ry.—The company is applying to the Board of Railway Commissioners for authority to extend its terminal lines at St. Lambert, Que., so as to connect with the Rouse's Point line of the G.T.R. (April, pg. 249.)

St. John River Valley Ry.—The New Brunswick Legislature has incorporated a company with this title. Prior to the closing of the Legislature the Premier stated that upon further consideration the Government had came to the conclusion that it would be unwise at the closing of the season to rush through the important legislation guaranteeing the company's bonds without full consideration of the terms and agreements and conditions which must form an essential part of a bill pledging to so large an extent the credit of the property. The first offer of the Government was to guarantee the bonds of the railway for $20,000 a mile provided the Dominion Government would agree to operate it for 60% of the receipts, the remaining 40% to come to the Provincial Government towards paying interest on the bonds. A delegation representing the company subsequently waited upon the Dominion Government, and a reply had been received to the effect that no assurance of assistance could be given without further information as to details and suggesting that the legislation as to provincial assistance be put through. It was the intention at an early date to discuss the matter with the Dominion Government to see if some arrangement could not be completed so that at the next sessions of the Parliament and the Legislature acts might be put through to secure this much desired railway. If such an arrangement could not be made he was not without hope that an arrangement could be made with a railway organization to carry out the project. Approaches were being made by a railway company not now in the province, operating part of an international railway system, and connecting with the Transcontinental Ry., and negotiations were progressing with the hope that if arrangements with the Dominion Government could not be made the undertaking could be completed without jeopardizing the provincial financial condition. (April, pg. 249.)

The St. Maurice and Eastern Ry., proposed to be constructed by the company, which has been incorporated by the Dominion Parliament, will start from the National Transcontinental Ry. in the County of Champlain, traversing that county through the parishes of St. Stanislaus, St. Prosper, St. Nazaire and Mount Carmel, terminating at Shawinigan Falls, Que. The object of the railway is to give connection between the N. T. Ry. and St. Maurice Valley Ry. at Shawinigan Falls. (April, pg. 249.)

St. Maurice Valley Ry.—During the discussion in the House of Commons, May 10, upon the second reading of the St. Maurice and Eastern Ry. it was stated that the St. M. V. Ry. is now under construction between the present northerly terminus at Shawinigan Falls, and Grand Mere, Que., a distance of between five and six miles. It was further stated that when the St. M. V. Ry. obtained its charter it was given power to construct a line from Three Rivers to Shawinigan Falls, Grand Mere, and up the valley of the Mattawan River to connect with the National Transcontinental Ry. Owing to the route chosen by the N. T. Ry., the St. M. V. Ry. cannot connect with it except by constructing a bridge across the Mattawan River, which it has not power to do. The company thereupon decided to construct its line as far as Grand Mere only, and the only difficulty in the way of carrying that out was the opposition of the town of Grand Mere. This difficulty had now been overcome, and the additional construction was going on. (Sept., 1908, pg. 619.)

The Temiskaming and Northern Ontario Ry. Commissioners have ordered from the Algoma Steel Co. 2,000 tons of 80 lb. steel rails for relaying a portion of the track and for use on some of the principal sidings.

Two survey parties are in the field in connection with the proposed extensions, but the Chairman of the Commission recently stated that nothing would be done for some time about the projected line to Gowganda. The Government had power to authorize the construction of the line as soon as deemed advisable.

Contracts have been let for the construction of culverts at various points and for 75,000 lbs. of copper wire for additional telegraph lines. (May, pg. 359.)

Thessalon and Northern Ry.—On the motion for the third reading of the company's bill to extend the time for construction, the House of Commons was

asked to consider the question of Ontario's rights, the projected line being entirely within the boundaries of that province. The Minister of Railways said while this might be the case he favored the passing of the act because all these railways should be brought under the control of the Railway Commission. The act was accordingly passed. (Sept., 1908, pg. 619.)

Tobique and Campbellton Ry.—The New Brunswick Legislature has granted the company an extension of time within which it may construct its projected railway. (April, pg. 251.)

Vancouver, Westminster and Yukon Ry.—An act has been passed by the Dominion Parliament to complete the statute of 1908 with respect to granting aid to certain railways. In introducing the bill the Minister of Railways stated that at the session of 1908 Parliament voted $200,000 to the V. W. and Y. Ry. towards the construction and completion of a railway bridge across Burrard Inlet, near Vancouver, B.C., but by some oversight when the statutes were printed the amount voted was left blank. The present act directs that $200,000 shall be read into par. 6, sec. 2, chap. 83 of the statutes of 1908. (May, pg. 359.)

Toronto Viaduct Question.—The C.P.R. and the G.T.R. engineers and the City Engineer of Toronto submitted separate plans for the carrying out of the suggestions of the Board of Railway Commissioners for the construction of a viaduct along the Toronto water front to the Board at a meeting held in Toronto, April 29. It was directed that these plans be examined by engineers representing the Board, the city and the railway companies; and it is understood that as a result the Board's engineer has made certain recommendations, which, it is expected, will result in the final acceptance of plans and the making of the order necessary to have the work done. The final plans to carry out the Board's engineer's suggestions and the points upon which the engineers agreed in conference are being prepared.

Railroad Freight Rates is the title of a volume written by L. G. McPherson, Lecturer on Transportation at John Hopkins University, Baltimore. The subject is approached from the point of view of its relation to United States industry and commerce, and is discussed logically and lucidly in the light of information gathered directly from the traffic managers of the various railways and the traffic experts of the great industrial and commercial corporations and the shippers' organizations of the various cities. The earlier chapters deal with the channels of traffic, the preparation of foodstuffs and their distribution, the distribution of raw material and merchandise, and these are followed by chapters in which the transportation charges and prices, regional rate structures, commodity rate structures, classifications, etc., are considered and traced from their inception to their present complicated development. While the volume has some interest to the general student of economics, it has a special value to all railway men who are desirous of having a thorough knowledge of what the present freight rate system is and how it has been evolved. The volume is published at $2.25 by H. Holt & Co., New York City, and may be obtained from the Railway and Marine World book department.

Canadian Northern Ry. Earnings, Etc.

Gross earnings, working expenses, net profits, increases or decreases over 1907-08, from July 1, 1908:

	Earnings.	Expenses.	Net Earnings.	Net Increase or Decrease.
July	$ 728,500	$525,600	$202,900	$159,000
Aug.	747,400	561,300	185,100	30,400
Sept.	901,700	650,600	251,100	42,000+
Oct.	1,172,700	752,600	420,100	110,200+
Nov.	1,156,900	744,300	412,600	144,300+
Dec.	927,900	642,800	285,100	42,400+
Jan.	526,200	425,900	100,300	15,400
Feb.	502,600	402,200	93,400	9,700+
Mar.	738,700	534,200	204,500	32,600+
	$7,402,600	$5,246,500	$2,156,100	$176,400+
Inc. or Dec.	$ 405,600	$ 229,200	$ 176,400	.....

Approximate earnings for April, $741,200 and for 2 weeks ended May 14, $335,300; against $686,100 and $306,900 for same periods 1908. Mileage in operation during March, 3,094 against 2,874 in March, 1908.

C.P.R. Earnings, Expenses, Etc.

Gross earnings, working expenses, net profits, increases or decreases over 1907-8, from July 1, 1908:

Inc. or Dec.	$2,020,455.70	$1,[illegible]56,817.07	283,639.63	.....

Approximate earnings for April, $6,260,000, and for 2 weeks ended May 14, $2,702,000; against $5,390,000 and $2,365,000 for same periods 1908.

DULUTH, SOUTH SHORE AND ATLANTIC RY.—Gross revenue for Mar., $224,964.46; net revenue, $71,795.14; against $230,517.43, and $72,706.68 for Mar., 1908. Aggregate gross revenue for 9 months ended Mar. 31, $2,081,633.03; net revenue, $624,837.79; against $2,405,984.44 and $663,027.34 for same period 1907-08. Approximate earnings for Apr., $224,968, and for 2 weeks ended May 14, $109,312 against $219,410 and $93,575 for same periods 1908.

MINERAL RANGE RD.—Gross revenue for Mar., $70,933.75; net revenue, $10,750.52; against $68,436.80, and $3,689.75 for Mar., 1908. Aggregate gross revenue for 9 months ended Mar. 31, $623,755.42; net revenue, $520,340.33; against $607,964.70, and $514,135.35 for same period 1907-08. Approximate earnings for Apr., $67,785, and for 2 weeks ended May 14, $31,247 against $66,053, and $30,272 for same periods 1908.

MINNEAPOLIS, ST. PAUL AND SAULT STE. MARIE RY.—Gross revenue for Mar., $1,028,015.65; net revenue, $450,387.85; against $824,118.50 and $312,239.46 for Mar., 1908. Aggregate gross revenue for 9 months ended Mar. 31, $9,600,109.53; net revenue, $4,302,420.31; against $9,039,902.19, and $3,554,087.41 for same period 1907-08. Approximate earnings for Apr., $940,369, and for 2 weeks ended May 14, $428,553 against $844,111, and $369,239 for same periods 1908.

Grand Trunk Ry. Earnings, Expenses, Etc.

The following figures give the earnings of the G.T.R., the C.A.R., the G T. Western Ry., and the D.G.H. & M. Ry., separately, for Mar., as compared with Mar., 1908:

GRAND TRUNK RAILWAY.

	1909.	1908.
Earnings	$2,423,200	$2,272,829
Expenses	1,743,100	1,687,455
Net earnings	$680,100	$585,374

CANADA ATLANTIC RAILWAY.

	1909.	1908.
Earnings	$129,200	$111,036
Expenses	127,600	119,802
Net earnings	$1,600	*$8,766

GRAND TRUNK WESTERN RAILWAY.

	1909.	1908.
Earnings	$489,000	$528,882
Expenses	364,500	384,243
Net earnings	$124,500	$144,639

DETROIT GRAND HAVEN & MILWAUKEE RAILWAY.

	1909.	1908.
Earnings	$126,000	$105,679
Expenses	109,200	130,516
Net earnings	$16,800	*$24,837

*Deficit.

Approximate earnings for Apr., $3,142,748; and for 2 weeks ended May 14, $1,456,700, against $2,934,991 and $1,417,229 for same periods, 1908.

TRAFFIC RECEIPTS OF THE SYSTEM.

Aggregate from Jan. 1 to Apr. 30, 1909:

Grand Trunk..	£1,799,139	£1,730,462	£68,677
Can. Atlantic....	100,252	90,448	9,804
G.T. Western...	360,114	358,950	1,164
D.G.H. & M....	99,416	96,328	3,088
Total	£2,358,921	£2,276,188	£82,733

Great Northern Ry. Lines in Canada

A press despatch from Chicago, Ill., states that the G.N.R. construction for the current season provides for the expenditure of $15,000,000, mainly through its subsidiary lines. The more important part of the work is said to be the inauguration of construction west of Winnipeg, and the plan laid out shows the completion of a fourth through line from Winnipeg to the Pacific coast. The company has branch lines running from its U.S. main line, to Portage la Prairie, Man.; Brandon, Man., Fernie and Michel, B.C., and into the Red Mountain district of B.C. The proposition now outlined is to construct the long talked of line from Emerson into Winnipeg, and then to work westerly cutting across the branch lines, to meet a line now being surveyed from Michel easterly to Calgary, Alta. This will then be followed up by a line from Fernie, westerly connecting up the lines in the Red Mountain district with the Vancouver, Victoria and Eastern Ry., at Grand Forks, B.C. Th[illegible] a[illegible]a;

In the valley of the Flathead River, particularly on the Montana side of the international boundary, there is a great deal of survey work going on, the Great Northern Ry., and the Chicago Milwaukee and Puget Sound Ry., each having several parties in the field. The outcome of these surveys is being watched with interest, as they will affect the construction of lines in the coal districts on the borderland of British Columbia and Alberta, in which both companies are interested, and through which both hold charters to construct railways.

While construction is being proceeded with on the section of the Vancouver, Victoria and Eastern Ry., westerly—the section between Keremeos and Penticton being the scene of operations—the point to which the company's officials are paying most attention at present is in Vancouver, B.C., where terminals are being provided. The lines which the company constructed were south of the Fraser River, these are carried over that river into New Westminster by the bridge erected by the Government, and thence into Vancouver by a line constructed by Vancouver, Westminster and Yukon Ry., which the V.V. & E.R. acquired over a year ago. In Mar., 1907, the company obtained an order from the Board of Railway Commissioners with respect to the location of a line from False Creek to Burrard Inlet, and after developing its plans a new order was obtained Jan. 23, 1909. Under this latter order the work of laying out the terminals is being proceeded with, the contractors being Ironside, Rennie and Campbell, who state that they have instructions to push the work as rapidly as possible. The route of the line crosses the British Columbia Electric Ry. at Harris and Hastings Sts., and that company has given permission so that work may not be delayed pending the obtaining of the formal order from the Board of Railway Commissioners.

Railway Commissioners Traffic Orders

Summaries of other traffic orders passed are given on another page under the heading of Orders by Railway Commissioners.

CHANGING OF DESTINATION IN TRANSIT.

6901. April 16.—Judgment by the Assistant Chief Commissioner: The practice of the C.P.R., the G.T.R., and other railway companies in Canada in the past has been to charge a consignee 1c. per 100 lbs. for services in connection with the changing in transit of the destination of carload traffic from one place to another. The matter was brought to the attention of the Board by a complaint of Hyde & Webster, Montreal, against an extra charge of $4.90 on a carload of bricks which was consigned from Casselman, Ont., to Dorval, Que.—the destination of which was changed, while it was en route, to Westmount, Que. This amount is made up at the rate of 1c. per 100 lbs. of brick in the car, and the charge is made pursuant to the C.P.R. special tariff C.R.C. No. E. 716 of Aug. 30, 1906. At the suggestion of the Chief Traffic Officer of the Board, the question of the disallowance of all such tariffs for charges at a rate equal to, or exceeding that mentioned, was set down for the Ottawa April sittings, and the chief railway companies under the jurisdiction of the Board were notified. The question to be decided therefore is, what the general policy of the Board shall be with regard to tariffs containing clauses authorizing charges for changing destination of cars in transit. It is often a decided advantage to a shipper to be able to change the destination of a car in transit, and requires a service to be rendered by the railway company, which should be paid for. It was not in contemplation by both parties at the time the contract of carriage was made, and therefore cannot be expected to be included in the freight rates. The railway companies have been charging for this service on the basis of the advantage to the shipper, that is, the heavier the load, the greater is the amount he is asked to pay. It seems to me, a simpler and just as equitable basis upon which remuneration to the railway company might be estimated is, the cost to the company of the service. The weight of the carload has no effect on the amount of work the railway company must perform. In order to arrive at an approximately fair amount which a railway company might be permitted to charge for such service, let us consider what must be generally done by railway officials when a request for diversion in transit is received. 1. A telegram to the agent at the point where the change is to be made must be sent. 2. The agent at that point must be on the lookout for the car. This may require his going to the van of each freight train that passes, in order to examine the conductor's records. 3. When the car is found it must be relabelled. The way bill must be changed. The amount of charges usually must be varied, and the Auditor's department notified. 4. Then the car must be got out of the train and put to one side. This will require shunting, switching, etc., which takes up the time of the train crew and causes delay to the rest of the train. The car must usually be picked up and put in another train going to the new point of destination. 6. The railway company must assume the legal responsibility of deciding whether the party asking to have the destination of the car changed, owns the merchandise and has the right to deal with it.

These services, of course, must vary somewhat in different cases, but for the sake of uniformity, I think that a stated sum per car should be fixed, and I think $3 a car a fair and reasonable amount to allow. An order should, therefore, go, cancelling all items in tariffs providing a charge of over $3 a car for changing destination of carload traffic in transit. In order to give the railway companies an opportunity to file new tariffs, I would make the order effective May 15 next.

In compliance with the above judgment the following order was passed: It is ordered that the additional charge which railway companies subject to the jurisdiction of the Board may make for changing the destination of carload traffic while in transit shall not exceed $3 per carload; and that all charges for changing the destination of carload traffic in transit which are now shown by the companies in their tariffs, published and filed, in excess of the said $3 per carload, be withdrawn and cancelled not later than June 1, 1909.

KETTLE VALLEY LINES PASSENGER FARES.

6938. May 5.—In the matter of the application of the Spokane & British Columbia Ry. Co. (Kettle Valley Lines), under sec. 331 of the Railway Act, for approval of its Standard Passenger Tariff C.R.C. 6; Upon the report and recommendation of the Chief Traffic Officer of the Board, it is ordered that the said tariff, on a basis of 4 cents a mile, applying between all stations in B.C., be approved, subject to the condition that the tariff be published in at least two consecutive weekly issues of the Canada Gazette.

CALIFORNIA FRUIT RATES TO REGINA.

6947. April 26.—In the matter of the complaint of Stockton and Mallinson, wholesale fruit and produce merchants, Regina, Sask., alleging that rates charged by the C.P.R. on shipments of citrus fruit from California to Regina, are unreasonable as compared with rates charged from same points in California to Manitoba and Ontario. Commissioner McLean gave the following judgment: The present rate from Los Angeles to Regina is $1.70 per 100 lbs. on citrus fruits of all kinds. This fruit is routed over the Southern Pacific or Sante Fe, the Oregon Rd. & Nav. Co., and Spokane International, to Kingsgate, B.C., and thence by C.P.R. to destination. The rate is made up as follows:

Los Angeles to Portland, Oregon	.53
Portland, Oregon, to Kingsgate, B.C.	.57
Canadian Pacific	.60
	$1.70

The rates in U.S. territory are full locals, while the C.P.R. rate is a proportional one. On shipments from Riverside and Redlands, the rates are respectively 2½c and 5c higher. Regina has the same rate as Moose Jaw. The rate on oranges in straight carloads to Winnipeg, a longer distance point, is $1.25 per 100 lbs. The same rate applies on oranges and lemons in mixed carloads. On straight carloads of lemons, the rate is $1.10. These rates have been in force since Nov., 1907. In the shipments to Winnipeg the competition of railways in the U.S. has to be met. As a result of competition, compromise and consideration of the best methods of meeting the demand for citrus fruits in the large markets of the U.S. the practice has developed of making blanket rates of $1.15 on oranges and $1 on lemons, both in straight carloads, to points in the U.S. east of the Missouri and Mississippi river gateways. This applies to Detroit, Buffalo, New York, Boston, and common points. This also affects points in Canada, Toronto, for instance, having the advantage of the Buffalo rate. It is apparent that whatever rate is fixed by the competition of railways and of markets to points in U.S. territory south of Winnipeg must be recognized by the C.P.R. in making rates to that point. It is contended by the applicants that the same rates should apply to Regina via Kingsgate, as apply to Winnipeg via its connection through Emerson with the U.S. trans-continental lines. Winnipeg, Portage la Prairie, and Brandon are terminal points in the territory known, under the trans-continental freight tariffs, as Missouri River common points. The Winnipeg rate is 10c higher than to Missouri River common points. The reason for this is, that the connecting lines south of Minnesota Transfer (St. Paul) will not so reduce their portions of the total rate as to give the northern lines what they consider a fair return of the rate if the rate of $1.15 is charged. Out of the total rate of $1.25 on oranges to Winnipeg the lines north of Minnesota Transfer to the international boundary receive 38.8c per 100 lbs., while the lines north of the boundary receive 12⅛c per 100 lbs. In Nov., 1906, the new route via Kingsgate was opened. During the first season of operation of this route, the C.P.R. made the same rate to Winnipeg via Kingsgate as via Emerson. On account of the inadequate revenue obtained from this experiment in meeting a competitive rate, the small amount of tonnage moved by it, and the difficulties in the way of prompt delivery on account of climatic conditions, the rate was cancelled at the end of the season. It is apparent that different factors enter into the rate situation at Winnipeg and the territory adjacennt thereto, from those existing at Regina. The large volume of citrus fruits moving over the U.S. lines, and the large market to which this line of product caters in the U.S. has developed a low rate basis which gives Winnipeg a rate advantage over Regina; but the circumstances are so dissimilar that the advantage is not an undue one. The further fact that the C.P.R. no longer quotes the compelled Winnipeg rate over its route from Kingsgate, relieves it from a charge of violating the long and short haul clause by charging higher rates to intermediate points. The Regina rate complaint must be considered not from the standpoint of discrimination, but of reasonableness. Before the opening of the route via Kingsgate, the orange rate to Regina based on Winnipeg, was $1.72 per 100 lbs. The rate via Winnipeg is still operative. With the opening of the Kingsgate route the rate was reduced to $1.60. This rate was in force from June 5, 1907, until Feb. 10, 1908. It is alleged that this was changed to the present basis, because it was out of proportion with the Calgary rate of $1.65. It is a well established principle that when a lower rate which has been in force for some time is replaced by a higher rate, the former lower rate is prima facie a profitable and reasonable one. It is, of course, open to the railway to adduce evidence to show that the former rate was an unprofitable one, and such evidence should be most carefully considered. But, in the application before us, no such evidence has been adduced to show that the rate of $1.60 was

unprofitable. In addition to this, Mr. Peters, then Assistant Freight Traffic Manager C.P.R., made the affirmative statement, under date of Jan. 20, 1908, when an earlier application in this matter was before us, that the rate of $1.60 was fair and reasonable. I see no reason why any departure should be made from this position now. At present the rate to Regina, via the Emerson gateway, is $1.72, which is made up of the $1.25 rate plus the third class rate of 63c., Winnipeg to Regina, less the Winnipeg cartage, which is not performed. On the citrus tonnage moving via Kingsgate to Regina, the C.P.R. is at present receiving $1.82 per ton per mile. The route from Kingsgate to Regina presents more difficult features from an operating standpoint, than that from Winnipeg to Regina. If, then, the citrus fruits are routed to Regina via Winnipeg, it would appear fair to apply a rate on the Winnipeg to Regina haul not exceeding that earned per ton per mile on the Kingsgate-Regina haul, and making the rate via Winnipeg $1.60. The rate on lemons, which is also involved in the complaint, should be lined up with the rate practice, whereby lemons in straight carloads are given a lower rate than oranges. I am of opinion that the C.P.R. should be required to arrange with its connections for the publication of new tariffs on the basis of $1.60 per 100 lbs. Los Angeles points to Regina, via Kingsgate or Emerson, on oranges in straight carloads, or on mixed carloads of oranges and lemons, as well as a rate of $1.45 on lemons in straight carloads. An order was passed accordingly.

FREIGHT RATES ON HORSES.

6948. Sept. 15, 1908.—The application of J. Lemon and others of Winnipeg, under sec. 340 of the Railway Act, for an order directing the revision of the provisions of the Canadian Classification, and the companies' bill of lading or live stock special contract, fixing the freight rates on horses, high priced or otherwise, on the basis of declared valuation, and restricting the liability of the carrier with respect thereto: Upon hearing the application in the presence of counsel for applicants and the C.P.R., and what was alleged; and it appearing that the C.P.R. and the C.N.O.R. only had been served with a notice of the application. It is ordered that the Michigan Central Rd., the G.T.P.R., the G.T.R., and such other companies as may desire to be represented at the hearing and which will receive notice of the time and place fixed for the hearing from the Advisory Committee of the Canadian Freight Association, be added as parties to the application.

I.C.R. RATES ON TIES.

6955. May 6.—In the matter of the application of T. Crockett of Riviere du Loup, Que., under the toll clauses of the Railway Act, for an order directing the Intercolonial Ry. and its connecting companies to comply with the provisions of the said clauses and the previous orders of the Board, in respect of the carriage of cedar railway ties, with particular reference to shipments from Riviere du Loup station, on the I.C.R., to Bennington, Vermont, a station on the Rutland Rd: The Board having no jurisdiction over the Intercolonial Railway, it is ordered that the application be dismissed.

THROUGH PASSENGER TRAFFIC TO C.N.O.R. STATIONS.

6969. May 6.—The complaint of the Keystone Camping Club of Pittsburg, Pa., alleging the refusal of the railway companies to issue through tickets and provide through baggage arrangements from Pittsburg to the South Magnetawan River Crossing, a local station on the C.N.O.R., 35 miles north of Parry Sound, Ont. Upon hearing the application in Toronto on April 28, in the presence of counsel for the C.N.R., the G.T.R., and C.P.R. Companies, no one appearing for the complainants, and what was alleged by counsel, it is ordered that the G.T.R. and the C.P.R. Companies be directed to honor, from the international boundary and in respect of their lines in Canada, any through tickets and through baggage checking arrangements issued and provided by initial United States railways from points in the U.S. to non-competitive points on the C.N.O.R.

STOP-OVER CHARGE ON LUMBER.

6970. May 7.—The application of the Long Lumber Co., of Hamilton, Ont., for an order directing the G.T.R. Co. to refund $3.88, amount of stop-over charge collected by the railway company on a shipment of shingles from Fort Kells, B.C., to Sarnia, Ont. Upon reading what was alleged in support of the application and on behalf of the railway company, and it appearing that at the time the shipment was made, viz., Sept. 7, 1908, no stop-over charge was in force. It is ordered that the railway company be directed to refund to applicant the amount of stop-over charge collected as aforesaid.

SPECIAL CONTRACT FOR VALUABLE ORES.

6972. May 6.—The application of G.T.R. under sec. 353 of the Railway Act, for approval of form of "release" or special contract respecting carriage of silver and other valuable ores, filed with the Board. Upon reading what was alleged in the letter of application, it is ordered that the said release or special contract respecting the carriage of silver and other valuable ores, be approved, and the applicant company is authorized to use the said form upon its railway until the Board shall hereafter otherwise order and determine.

GRAIN RATES TO MARITIME PROVINCES.

6996. Apr. 29.—The application of Transportation Bureau of Montreal Board of Trade, under secs. 77 and 315 of the Railway Act, for order directing that the C.P.R. Co.'s special mileage tariff on grain and grain products, in carloads (C.R.C. No. E. 438), which applies between stations in Ontario, east of Windsor and North Bay, and in Quebec, east to Quebec City, and the Maine boundary, be applied also from Montreal to points on the C.P.R. in New Brunswick. Upon hearing what was alleged upon behalf of applicants as well as respondents at Montreal on Dec. 23, 1908, and upon report and recommendation of the Board's Chief Traffic Officer, it is ordered that, commencing not later than June 1 next, the rates to be charged from Montreal by the C.P.R. to its stations in New Brunswick, on Western grain for domestic consumption, arriving at Montreal by vessel, be made by adding 5c per 100 lbs. to the "arbitrary" rates from Montreal to the said New Brunswick points charged by the company on Western grain arriving by vessel at its ports on Lake Huron; and that the rates from Montreal, so made, be exclusive of elevation and storage charges at Montreal. That should the company change its rates from its Lake Huron ports, the rates herein prescribed shall be changed in like proportion. That the company's rate, lawfully published and filed, on local shipments from Montreal to St. John, or West St. John, N.B., for furtherance by vessel to Bay of Fundy and other N.B. and N.S. ports, shall not be exceeded on Western grain arriving at Montreal by vessel and shipped to the same destinations.

VEGETABLE RATES IN MANITOBA.

6999. May 10.—The complaint of J. Kerr, of Franklin, Man., that rate charged by C.P.R. Co. on vegetables from Franklin to Winnipeg, is unreasonable and discriminatory as compared with the rate charged on wheat from Franklin to Fort William. Commissioner McLean gave the following judgment: Franklin is a station on the C.P.R., 126 miles from Winnipeg. The rate from Franklin to Winnipeg, under the company's special mileage tariff on grain, grain products and vegetables, is 13c per 100 lbs.; this is also the eighth class rate in the Canadian classification. It is contended that this rate is discriminatory since the rate on grain and grain products from Franklin to Fort William, 550 miles, for furtherance east is likewise 13c. It cannot be urged that this constitutes a discrimination against the applicant. The rate to Fort William is a division of a through rate concerned with a through shipment to an eastern market. Where grain and grain products move to Fort William for local consumption they move on the company's special mileage tariff and take a rate of 29c. The through rate of which 13c forms a part, is affected not only by the competition of other grain-growing territories, it was also reduced by the provisions of the Crow's Nest agreement. The conditions affecting the through shipments handled on this through rate are such that a division of such a through rate cannot be taken as the measure of the reasonableness of a local rate from Franklin to Winnipeg. The complaint should, therefore, be dismissed. An order was made accordingly.

Underbilling of Grain.—Mr. Justice Latchford gave judgment in Toronto recently in favor of W. Tolmie & Co., grain merchants, Rodney, Ont., for $864, against the Michigan Central Rd., being the price of 900 bush. of wheat at 96c, with interest from Dec. 2, 1907, and costs. The claim was for $1,060.05, and interest and costs, for a carload of wheat alleged to be wrongfully delayed in delivery, consigned to the Traders Bank at Dutton for H. Hollingshead, and, instead, delivered to Hollingshead, who at the time of delivery was said to be insolvent. The quantity shipped was 202 bush. in excess of that mentioned in the bill of lading, and the judge in his judgment characterizes as "reprehensible and dishonest" the practice of "underbilling," which, he says, may be a common custom among grain shippers, and against which carriers protect themselves by making the quantity expressed subject to ascertainment.

The first train of the Minneapolis, St. Paul and Sault Ste. Marie Ry.—C.P.R.—Spokane International—Oregon Ry. and Navigation Co. combination, left St. Paul, Minn., May 3, and reached Portland, Ore., May 6. The train runs over the M., St. P. & S.S.M. Ry. from St. Paul to Portal; over the C.P.R. lines from Portal to Kingsgate, B.C.; then over the S.I. Ry. to Spokane, Wash., and on to Portland, Ore., over the O. Ry & N. Co.

C. P. R. Betterments, Construction, Etc.

Richelieu River Bridge.—Press reports state that the company has had plans and estimates prepared for replacing its present single track bridge over the Richelieu River, near St. John's, Que., with a double track steel structure.

Windsor St. Station.—The repairs to the Windsor St. station, Montreal, necessitated owing to the recent accident caused by the runaway train, have been completed. The waiting room has been rearranged so as to give more acoommodation. The concourse now extends through to Donegane St., with large windows at the end, which gives much better light and accommodation to the platform. The location of the ladies' waiting room has been changed, it now being partitioned off from the end of the main waiting room, and provided with much better accommodation than was possible in the old location.

Wellington St. Viaduct, Ottawa.—Construction was started May 14 by the C.P.R., and the work is to be completed by July 1. The construction of the viaduct will do away with the level crossings at this point, an elimination of which has been under discussion for several years. A portion of the work is to be done by the city council.

Brockville Improvements.—We are advised in connection with the report as to the contemplated improvements at Brockville, Ont., that the surveys being made at the tunnel under the city, connecting the upper yards with those on the water front, were simply for the company's information, and that the officials are not in a position to say anything as to the object of the surveys, or whether any improvements are contemplated.

Hamilton and Guelph Junction Ry.—Reports as to the probable early starting of construction upon this projected line are current in Hamilton and Guelph, Ont., but no official information has been given out other than that surveys have been made and estimates prepared, and that they have been submitted to the C.P.R., which is at the back of the project.

Guelph, Ont.—The chairman of the city council's railway committee stated recently that the C.P.R. proposed to provide a new station at Guelph during the summer.

St. Mary's and Western Ontario Ry.—A director of the company is quoted as having stated that the people of Blanshard tp., having defeated the by-law to aid the construction of the company's projected railway through the township, will now have to apply to it, as the company will take no further steps in the matter.

Bisco to Gowganda, Ont.—The company has, through the Bisco-Gowganda Transportation Co., completed a new route into the Gowganda country. It starts from Bisco station on the main transcontinental line, 346.2 miles from Toronto, and 529 miles from Montreal, and lands passengers in Gowganda after a trip of 80 miles by wagon roads and along stretches of rivers and lakes by launches and canoes. The company is providing stopping places en route, and is quoting a through rate.

Sault St. Marie Roundhouse.—The contract for the construction of a roundhouse at Sault Ste. Marie, Ont., is about to be let. The plans provide for a six-stall structure at a cost of about $15,000.

Jackfish Cut-off.—We are advised that the proposed cut-off on the main transcontinental line, north of Lake Superior, in the vicinity of Jackfish, will be about two miles long, extending from Steel siding to the crossing of Steel River. There will be no bridges on the new line; it will be principally rockwork, and the gradients will be less than 1%. A press report says the character of the country east of Jackfish was such as to make filling impossible because of the muskegs and the difficulties encountered. It was therefore decided to abandon this portion of the line, and to construct a new section, to the north of the present line. The new section involves the removing of 80,000 cubic yards of rock and the cutting of a 300 ft. tunnel. We are advised that the object of constructing this diversion is to escape the muskegs over which the line now passes on four long pile trestles. The muskeg is of such a character that to fill the bridges on the present line would not only prove expensive, but would involve the interruption of the traffic, which is not permissible. The work is expected to be completed by Jan. 1, 1910, and there is nothing particularly interesting either in alignment or gradient. The contract for this work has been let to W. T. Parsons, Winnipeg.

Fort William Viaduct.—The company's overhead bridge at Fort William, Ont., was blown down by a violent gale, May 6. The bridge connected the station with the freight sheds and passenger docks, and crossed the thickly congested tracks opposite the passenger station, the west approach being from the north end of the passenger platform. The first span at the west end of the approach was not destroyed, but the rest was carried away a distance of 20 ft. A temporary structure was put in position May 8, but it is not expected that a permanent bridge will be erected until the new station is built.

Manitoba and Northwestern Ry.—During the passing through Parliament of the company's act providing for an extension of time for the construction of the line, a clause was added that unless 10 miles were constructed beyond Sheho, Sask., this year the charter will lapse. The objective point of this line is Prince Albert.

Wynyard to Lanigan.—Tracklaying has been started on the route graded between these points. When completed this will give the company a route into Saskatoon, via Portage la Prairie, Yorkton and Sheho, the existing route being by the Kirkella branch to Lanigan.

Weyburn, Westerly.—Construction has been started at Weyburn, Sask., on the extension of 26 miles westerly, for which a contract has been let to Hargreaves. McDougall, of Regina, Sask., has taken in an outfit for grading a further mileage, and other contractors are arranging to bring in men and plant. J. Stephenson has charge of construction on the extension. It is the intention to carry this line to a junction with the company's line at Lethbridge, Alta.

Langdon or Cheadle to Alix.—The construction of a line of 40 miles from the main transcontinental line between these points, northerly to Alix, Alta., is under construction. One outfit is working about 20 miles east of Airdare, another at the Alix end, and a third at the southern end. Official information speaks of the southern end of the line as at Langdon, while press reports state that the work has been started near Cheadle. These two stations are seven miles apart, Cheadle being the more easterly. The contractors are Foley, Welsh and Stewart.

Lacombe Branch.—Grading on the extension of this branch easterly from Stettler, Alta., its present terminus, is in progress, the present contract covering a distance of 35.5 miles. The ultimate destination of this line is to effect a junction with the line at present under construction from Moose Jaw, which at present is close up to the crossing of the South Saskatchewan River. Foley, Welsh and Stewart are the contractors.

Edmonton.—The C.P.R. has recently been purchasing considerable areas of land in Edmonton, Alta., for terminal purposes. The areas acquired are in the vicinity of Ninth St., one block north of Jasper Ave.; the price paid for the lots purchased is said to have been $102,000. Options have been secured on other properties. It is stated that the company has secured its entire right of way for the projected extension from Strathcona into Edmonton. The construction of such a line involves the erection of a high level bridge across the ravine between Strathcona and Edmonton. The city corporation is desirous that in the construction of the bridge provision be made for pedestrian and vehicle traffic in return for civic, provincial and Dominion contributions towards its cost, which is estimated at $1,000,000. There has been an agreement with regard to the erection of this bridge, but negotiations are in progress for a new one. The matter has been before the city council on several occasions recently, and on May 5 it was stated that a difficulty in the negotiations is as to the damages to property in the neighborhood of a proposed subway on Jasper Ave., which the plans prepared by the company provide for.

Lethbridge-Calgary Line.—On a recent visit of W. Whyte, Second Vice-President, to Lethbridge, Alta., he said he would be disappointed if this line was not completed to Carman, on the Little Bow River, in time to carry out this year's crop. The line starts at Kipp, on the Blood reserve, south of Lethbridge, and runs to the Little Bow River, 28.5 miles. The contractors are Foley, Welsh and Stewart, and press reports state that Fitzgerald and O'Connor are sub-contractors.

Lethbridge and Macleod.—On his recent visit to Lethbridge, Alta., W. Whyte, Second Vice-President, said it was expected to have the big bridge at that point completed by Sept. The bridge over the Old Man River at Macleod would be finished soon after, and the Lethbridge-Macleod cut-off will then be completed.

The latest reports as to the state of construction of the big bridge over the Belly River is that there are two towers to erect before the big span is reached. These were expected to be completed by the end of May, when work on the big span, of 170 ft. 3 in., will be started. The false work necessary for the erection of this span will be 150 ft. high. About two months will be necessary to complete the span, and a month later the other spans will be in position and the bridge finished ready for the operation of trains over it.

Field-Hector Grade Reduction.—The work which has been in progress for a couple of years on the grade reduction loops and tunnels between Field and

Hector, B.C., is now approaching completion, and it is expected that trains will be running over it about June 15. The boring of the last tunnel was completed May 6. A plan showing the old and new routes with a description of the work was given in our Sept., 1907, issue. The new route adds 4.19 miles to the length of the line, but with the gradients reduced from 4.37% to 2.2%, the haulage capacity of the engines is doubled.

Okanagan Lake.—The company is applying to the B.C. Government for permission to lease certain pieces of land in Peachland, on the north-west shore of Okanagan Lake, B.C., having a total area of 356 acres, for improvements.

Vancouver.—The report has been revived that the company has again under consideration the erection of a bridge from the foot of Burrard St. to its wharves, in order to relieve the congestion of traffic at the main Granville St. entrance to the station and wharves. The latest report is that construction of the bridge will start soon after Jan. 1, 1910, but the company's officials state that no appropriation has been made for any part of the work during the current construction year.

Port Simpson, B.C.—Press reports from Montreal, May 14, stated that the C.P.R. had under consideration the desirability of constructing a line from Edmonton, Alta., through the Yellowhead Pass to Port Simpson, B.C., about 30 miles from Prince Rupert, the G.T. Pacific Ry. terminus. The report stated that several parties of engineers were in the field making surveys for the line, and that plans are in preparation for developing a deep water harbor at Port Simpson, in connection with the trans-Pacific trade. The reports are ridiculed at C.P.R. headquarters.

Bridge at Seymour's Narrows.—Local press reports state that C.P.R. officials have been again examining the possibility of bridging Seymour's Narrows so as to enable trains to be run through on to Vancouver Island, with a view of developing a new deep water port for the trans-Pacific trade. Sir Sandford Fleming suggested the construction of such a line and bridge 30 years ago, but its great cost was against it then, and the project has been revived in one form or another from time to time since, the most recent being by the Vancouver Island and Eastern Ry., which has power to operate a ferry service across the Narrows.

Esquimalt and Nanaimo Ry.—Among the works of betterment to be carried out during the current season is the erection of a cantilever bridge, to replace the present structure over the Niagara canyon, 15 miles northerly from Victoria. (May, pg. 355.)

Kootenay Central Ry.—Construction is being proceeded with on the portion of this line from Golden South, some 12 or 15 miles. No announcement has been made as to the starting of construction from the south end of the proposed route.

After several days' hearing at Toronto, the action of M. A. Piggott & Co., to recover $523,574 for work done during the construction of the Guelph and Goderich Ry., has been adjourned until the fall. The G. & G. Ry. Co., in addition to contesting the whole of the claim has filed a counter claim of $250,000 for delays in the work.

Railway Finance, Meetings, Etc.

Alberta Ry. and Irrigation Co.—Approximate net profits, exclusive of land sales for Mar., $39,116, against $25,963 for Mar., 1908. Cumulative net profits for 9 months ended Mar. 31, $332,552. Approximate railway traffic receipts for Apr., $22,753, against $14,736 for Apr., 1908. Aggregate railway traffic receipts for 10 months ended Apr 30, $265,649.

Algoma Central and Hudson Bay Ry.—See Lake Superior Corporation.

Canadian Northern Ry.—There has been deposited with the Dominion Secretary of State a mortgage made by the C.N.R. to the National Trust Co., Toronto, securing an issue of bonds to the amount of $10,000 a mile for 88.1 miles of railway from Etoimami to Pas Mission, Sask.

Dominion Atlantic Ry.—Gross earnings for Mar., $71,150, against $70,373 for Mar., 1908. Aggregate gross earnings for 3 months ended Mar. 31, $200,950, against $201,059 for same period 1908.

Lake Erie and Detroit River Ry.—The business transacted at the company's annual meeting at Detroit, Mich., May 4, was of an entirely formal character. The road is leased to the P.M. Rd., which absorbs the earnings, etc., and no separate report is issued. The directors were re-elected for the current year, as follows:—President, W. Cotter, Detroit, Mich.; Vice-President, A. Leslie, Walkerville, Ont.; Secretary-Treasurer, J. E. Howard, Detroit, Mich.; and A. H. Skirring, Chatham, Ont.

Lake Superior Corporation.—A London, Eng., cable states that 60% of the company's issue of $5,000,000 first consolidated mortgage bonds at 90 have been taken up. At the time of the issue the company's common stock was quoted at 28, and the income bonds at 55 on the Philadelphia, Pa., exchange, where these securities are most largely traded in. At these prices, including the $9,000,000 of first mortgage bonds at 90, the total market valuation of the company's securities is $20,950,000, against which there has been actually invested $28,000,000 by the old company, and $7,000,000 by the present company. The company owns the Algoma Central and Hudson Bay Ry. and the Manitoulin and North Shore Ry., both of which are to be extended from the proceeds of the bond issue.

Manitoulin and North Shore Ry.—See Lake Superior Corporation.

Montreal and Vermont Jct. Ry.—The annual meeting was held at Stanbridge, Que., May 12. Following are the directors for the current year;—President, C. M. Hays; Vice-President, E. H. Fitzhugh; G. C. Jones, E. C. Smith, A. H. Gilmour, C. W. Witters and W. H. Chaffee.

Quebec and Lake St. John Ry.—Gross earnings for Mar., $53,135.78; Apr., $44,090.97, against $39,891.51 and $39,880.05 respectively, for Mar. and Apr., 1908. Aggregate gross earnings for 4 months ended Apr. 30, $180,546.99, against $147,988.14 for same period 1908. Mileage operated, 285.6, against 240 at same date, 1908.

Quebec Central Ry.—Gross earnings for Mar., $94,110.96; net earnings, $33,622.73, against $98,931.74 gross and $31,719,77 net for Mar., 1908. Aggregate gross earnings for 3 months ended Mar. 31, $763,051.20; net earnings, $219,534.98, against $807,357.86 gross and $238,129.89 net for same period, 1908.

Temiskaming and Northern Ontario Ry.—Gross earnings for Feb., $101,813.32; expenses, $83,374.23; net operating earnings, $18,439.09; for Mar., gross earnings, $142,006.38; expenses, $84,658.49; net operating earnings, $54,347.89; for Apr., approximate gross earnings, $143,744.17; expenses, $65,000; net operating earnings, $78,744.17.

White Pass and Yukon Ry.—Gross earnings for Mar., $41,665; total for 9 months ended Mar. 31, $945,879.

Sanitary Regulations for Cars and Stations

The Board of Railway Commissioners passed the following order, 6965, May 7: The application of Montreal Board of Trade for adoption of regulations requiring railway companies to clean and disinfect railway cars, stations, and waiting rooms, in order to prevent dissemination of tuberculosis or other infectious diseases: In pursuance of powers conferred upon it by secs. 30 and 269 of the Railway Act, and of all other powers possessed by the Board in that behalf. It is ordered that every railway company subject to the legislative authority of the Parliament of Canada, be, and it is hereby directed and required: To keep all its passenger stations, waiting-rooms, and closets clean and well ventilated; to keep the closets and those portions of passenger stations, where germs of disease are likely to exist, properly disinfected; and to get reports at least monthly from employes charged with care of passenger stations, on the cleanliness, ventilation and disinfection of its stations, waiting-rooms and closets. To keep all its cars in which passengers may travel, including closets and smoking compartments of same clean, ventilated, and in cold weather properly heated; to have at least one employe on every passenger train, whose duty it shall be to see that every such car in the train is kept clean, ventilated, and when necessary properly heated. To adopt a by-law (if no such by-law has already been adopted), under sec. 307 of the Railway Act, prohibiting spitting in passenger stations, waiting-rooms, closets, or other premises of the company, and in or upon platforms of cars in which passengers may travel, except in receptacles suitable for the purpose, and providing a penalty for breach thereof, and to post up and maintain in a conspicuous place in passenger stations and in such places in its cars, in which passengers may travel where smoking is permitted, notice of such by-law and penalty for breach thereof. Such notices in the Province of Quebec to be printed in French and English. To provide and maintain cuspidors in such places in passenger stations and in cars in which passengers may travel where smoking is permitted; and to have such cuspidors emptied and washed clean whenever necessary, but at least once in every 48 hours. To fumigate promptly and thoroughly all cars known or suspected to have carried and all stations known or suspected to have contained any passenger or passengers suffering from any infectious disease. To fumigate thoroughly all sleeping cars which are regularly in service at least once every 30 days. And it is further ordered that every such railway company be liable to a penalty in a sum not exceeding $50 for every failure to comply with any of the provisions of this order; and that every railway employe whose duty it is to carry out any of the provisions of this order, be liable to a penalty of not less than $2 nor more than $15 for every failure to do so.

Canadian Northern Ry. Construction, &c.

Quebec and Lake St. John Ry.—By an act passed at the recent session of the Quebec Legislature the company has been granted an extension of time within which it may construct certain branch lines and extensions.

Canadian Northern Ontario Ry.—The company has several survey parties working on the Port Arthur-Sudbury line in the clay belt north of Nipigon, westerly towards Port Arthur. As stated in our May issue the company has about 1,000 men engaged upon construction work westerly from near Sudbury, Ont.

Canadian Northern Ry.—A press report from Ranier, Minn., stated recently that the C.N.R. traffic between Fort Frances and Port Arthur, Ont., was shortly to be diverted over the Duluth, Rainy Lake and Winnipeg Ry. into Duluth, pending the reconstruction of the section of the C.N.R. mentioned. It was stated that track on this mileage was to be relaid, and that all the bridges were to be reconstructed. We are officially advised that there is no truth in the statement that the C.N.R. is going to divert to Duluth any of its business that can be handled through Port Arthur. It is true, however, that the company will do considerable work on the line between Port Arthur and Winnipeg during the summer, but it will not interfere with the free movement of the traffic to and from Port Arthur in any way.

The new and heavier rails for relaying the track between Port Arthur and Fort Frances, are being delivered at Port Arthur, and as soon as a sufficient quantity have been delivered work will be started. Rails to lay 200 miles of track are to be received.

The work of pushing the last lift of ballasting on the line between Brandon, Man., and Regina, Sask., is in progress, and is expected to be completed at an early date. M. H. McLeod, Chief Engineer and General Manager, stated May 11, that it was expected to have the line in thorough shape to put on a fast passenger service by the end of the summer or early fall.

As a result of the final conference of the principal C.N.R. officers at Winnipeg recently, W. Mackenzie, President, stated that it was the intention to construct between 400 and 450 miles of track during the season. In Manitoba there would be constructed about 100 miles of new lines; in Saskatchewan the programme covered from 200 to 250 miles, and in Alberta it was expected to construct from 100 to 150 miles. M. H. McLeod, General Manager, in an interview at Regina, Sask., May 10, said the principal construction work of the season would be carried on in Saskatchewan. About the only work to be undertaken in the vicinity of Regina would be the relaying of the track between Regina and Lumsden, on the Regina-Prince Albert branch (the old Qu'Appelle, Long Lake and Saskatchewan Ry.). It was proposed to relay this with heavier steel, and to make it, with the new roadway over the Disley hill, equal to any other part of the system. Some work would also be done on the line into the Eagle Lake country, branching off the Regina-Prince Albert line a short distance north of Regina; and the Maryfield line would also be rushed. He was not in a position to state what mileage on these lines would be completed, however. As to the work to be undertaken on the Pas Mission line, all he could say was that the gangs out there would devote their attention to ballasting the track already laid; it was not the present intention to undertake any extension northerly from Pas Mission this season.

G. N. Weeks, who has been engaged on the company's engineering staff in Saskatchewan and Alberta, while on a visit to relatives in London, Ont., is reported to have stated that the line between Saskatoon, Sask., and Calgary, Alta., which is partly constructed, would be continued during the season. West of Edmonton the line under construction to Athabasca Landing would be progressed with; and further work would be done on the lines under construction from Prince Albert to Battleford, Sask., and from Vegreville to Camrose, Alta.

In connection with the Vegreville-Calgary line, W. J. Cowan, of the Cowan Construction Co., and A. R. Mann, another contractor, were in Edmonton May 5. The first named stated that both of them had contracts on the work, and it was expected to have 125 miles graded by the end of the season, starting from the Vegreville end. Track laying will be commenced as soon as ever the roadbed can be got in shape. The 125 miles to be constructed will carry the line past Camrose to the New Norway country. At Camrose the line will be joined by a line running south from Strathcona.

The surveys for the extension of the line from Morinville to Athabasca Landing, are in progress, S. A. Dixon being in charge. The surveys were expected to be completed May 31, and reports state that construction work will be started shortly.

W. J. Cowan, of the Cowan Construction Co., stated in Winnipeg May 13, that his company and the Northern Construction Co. (of which A. R. Mann is manager) had been given contracts covering the construction of over 600 miles. The Cowan Construction Co. has been given the following: Extension from Maryfield southwesterly 125 miles; Prince Albert branch, 30 miles; Oak Point branch, 20 miles; Rossburn extension, 30 miles; while the Northern Construction Co. has been given the following: From Vegreville to Calgary, 235 miles; Goose Lake extension, 100 miles; Morinville branch, 50 miles; Ochre River through St. Rose du Lac, 20 miles; the completion of the 30 miles from Rapid City westerly. A contract has also been let to N. K. Boyd, Carberry, Man., for an extension of the line west from Wakopa. The work contemplated for the year, however, does not include the completion of all these lines, for instance, on the Vegreville-Calgary line, the work laid out for the year is for 125 miles to near Camrose.

A bill has been under discussion in the House of Commons at the instance of the Minister of Railways with the object of interpreting the act passed during the session of 1908, guaranteeing the company's bond issue with respect to the construction of its lines west of Edmonton, Alta. The new act simply makes more clear and definite the act of last year, and does not grant any further aid to the company.

In a recent interview at Winnipeg D. D. Mann, Vice-President, stated that among other work to be done on the line during the season, something would be undertaken upon the construction of the line westward to the Pacific coast, for which surveys were in progress. Mayor Douglas, of Vancouver, B.C., is reported to have received a letter from D. D. Mann, in which it is stated that the C.N.R. will be in operation to that city within five years.

T. H. White, C.E., who has his headquarters at New Westminster, B.C., has established a base at Kamloops, B.C., for the B.C. location surveys, of which he is in charge, with C. F. Hannington as assistant. Five parties are in the field, two of them are reported to be working westerly from the present terminus of the line, about 30 miles west of Edmonton, Alta., into the Rocky Mountains, and the other three are taking the country between the mountains and the coast. These latter parties, which include J. Irving, J. F. Dalgliesh, and W. Killaly, from Mackenzie, Mann & Co.'s Toronto office, are working along the North Thompson River Valley. One party is located at Fruitlands and is working northerly; the second 40 miles up the river, and the third 20 miles further on.

As to the location of the terminal point on the coast it is stated that instead of following the Fraser River valley, the survey will cross that river at Lytton, and run through the Nicola River valley, and finally reach New Westminster, which city has made an offer of a free site for yards and shops, and as there is plenty of available water front there at comparatively cheap rates, it is thought, that if a satisfactory location can be obtained, that city may be able to secure the terminals.

Saskatchewan Northern Ry.—Notice has been given to the Board of Railway Commissioners of the amalgamation with the C.N.R. of the S.N.R. The charter of the S.N.R., which is a provincial one and carries a guarantee of bonds, provides for the construction of the following lines: From Craven, on the Craven branch of the C.N.R. Regina-Prince Albert branch, to the line near Prince Albert; a line connecting the company's line near Long Lake, with its Saskatoon-Calgary line; a line from Maryfield on the Manitoba boundary, south of the C.P.R., towards Lethbridge, Alta. (which is also covered by a Dominion charter); a cut-off from this line to the Roche-Perce coal fields, and a line northwesterly from North Battleford.

Alberta Midland Ry.—The Board of Railway Commissioners has received notice that the A.M. Ry. has been amalgamated with the Canadian Northern Ry. The A.M.R. Co. was incorporated by the Provincial Legislature, and has a guarantee of bonds for the lines authorized to be constructed, which consist of a line to connect Calgary and Edmonton, a line to Lethbridge, connecting with the Calgary line, and some other lines, a total of about 500 miles. The application for the amalgamation of the two companies will come before the Governor-General in Council at Ottawa, June 10.

Duluth, Rainy Lake and Winnipeg Ry.—Reports from Ranier, Minn., state that the company is preparing to complete the ballasting and gravelling of the line between there and Virginia. Several boarding cars were reported to have arrived at Ranier at the end of April, in connection with the work.

The Duluth, Winnipeg and Pacific Ry. is the title of a company which has been incorporated in Minnesota, with a capital of $3,000,000, and D. B. Hanna as its President, for the purpose of constructing a line from Virginia, Minn., the present southerly terminus of the Duluth, Rainy Lake and Winnipeg Ry., to Duluth. The D.R.L. & W.R. at present obtains an entrance into Duluth over the Duluth, Missabi and Northern Ry.

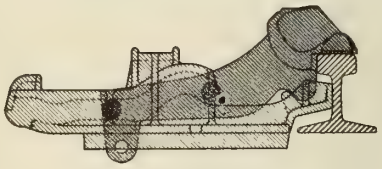
MANUFACTURERS OF

High Explosives and Blasting Powder, and Dealers in Safety Fuse Detonators, Batteries, Electrical Fuses, Etc.

OFFICE: BOARD OF TRADE BUILDING - - MONTREAL
Works: L'ISLE PERROT, NEAR VAUDREUIL, P.Q.



When used in signaling plants both the operating and locking connections of Hayes Derails are attached direct to the moving piece. The pull of the operating pipe is in line with the motion of the derail block and the force required to throw the derail is small. The locking rod is attached to a second lug on the derail block rendering the indication of the lock simple and positive. Fine adjustment of the locking mechanism, such as is required in the closed position of a split switch derail, is unnecessar in either direction.

They are made in Canada at Hamilton, Ontario.

Address: Hayes Track Appliance Co., Geneva, N.Y.

Railway Rolling Stock Notes.

The I.C.R. has received 4 second class sleeping cars from Rhodes, Curry & Co., Amherst, N.S.

In addition to those already mentioned, the Crossen Car Mfg. Co., Cobourg, Ont., has shipped 100 stock cars to the C.N.R.

The I.C.R., between Apr. 16 and May 18, received 4 second class sleeping cars from Rhodes, Curry & Co., Amherst, N.S.

The Canadian Northern Ry. Co. has deposited with the Dominion Secretary of State agreements made between it and the Imperial Rolling Stock Co. and the National Trust Co., securing bonds, series S. and T. 1909.

The C.N.R., between Apr. 15 and May 15, ordered rolling stock as follows:—2 cafe parlor cars from Rhodes, Curry & Co., Amherst, N.S.; 27 refrigerator cars and 100 flat cars from the Crossen Car Mfg. Co., Cobourg, Ont.

The C.P.R., between Apr. 8 and May 13, ordered rolling stock as follows:—4 store supply cars, 2 horse cars, 54 box cars, 1 stock car, 1 Hart ballast car and 1 locomotive, at its Angus, Montreal, shops, and 32 vans at its Farnham, Que., shops.

The C.N.R., between Apr. 15 and May 15, received additions to rolling stock as follows:—75 stock cars from the Crossen Car Mfg. Co., Cobourg, Ont.; 31 box cars from the Canada Car Co., Montreal; and 262 box cars from Rhodes, Curry & Co., Amherst, N.S.

The 500 all steel dumping gondola cars which the Dominion Car & Foundry Co. is building for the C.P.R. and which were referred to in our April and May issues, were specially designed by the Hart-Otis Car Co., and are of that company's 1909 design.

The Silliker Car Co., Halifax, N.S., has received orders as follows:—18 flat cars and 27 box cars from the Anglo-Newfoundland Development Co.; 4 first class cars, 4 combination second class and baggage cars, 2 combination baggage and mail cars, from the C.N.R.; and 7 conductors' vans from the T. & N.O.R.

The C.P.R., between Apr. 8 and May 13, received additions to rolling stock as follows:—4 locomotives, 172 30-ton box cars, 6 baggage and smoking cars, 272 stock cars, 4 baggage and express cars, and 2 dining cars, from its Angus, Montreal shops; 8 vans from its Farnham, Que., shops; and 9 Pacific type locomotives from the Montreal Locomotive Works.

A letter from the General Manager of the Inverness Ry. and Coal Co., read in the Nova Scotia Legislature, May 6, set out that the company's contract called for the placing on the line of rolling stock to the value of $150,000. Up to April 20 the company had placed on the line $220,000 worth of rolling stock, and had an order with Rhodes, Curry & Co., for additional rolling stock to the value of $40,000. The delivery of this additional rolling stock was expected to be made by May 30.

The Montreal Locomotive Works has sold one 4-wheel locomotive to the Robertson Asbestos Co. Following are particulars:—

Gauge of track	42"
Weight	25,000 lbs.
Wheel base	4'—6"
Cylinders	9" x 14"
Drivers, diar.	29"
Boiler, type	Straight top
Boiler, diar.	29⅞"
Boiler, pressure	150 lbs.
Firebox	34" x 23¾"
Tubes, no. and diar.	56—1¾"
Tubes, length	7'—4¾"
Capacity, water	325 U.S. galls.
Capacity, coal	300 lbs.

The Montreal Locomotive Works has received an order from the Intercolonial Coal Co. for one Forney mogul locomotive (2-4-4). Following are particulars:—

Weight, on drivers	73,500 lbs.
Weight, on truck	6,500 lbs.
Weight, on trailer	14,000 lbs.
Weight, total	94,000 lbs.
Wheel base, driving	7'—0"
Wheel base, total	28'—2"
Cylinders	15" x 24"
Drivers, diar.	44"
Boiler, type	Straight top
Boiler, diar.	46"
Boiler, pressure	160 lbs.
Firebox	75" x 55¼"
Tubes, no. and diar.	146—1¾"
Tubes, length	18"
Journals	7½" x 9"
Capacity, water	1,200 U.S. galls.
Capacity, coal	2½ tons

The M. C. Rd. has ordered 6 Atlantic type, 2 six-coupled, and one ten-coupled, locomotives from the Montreal Locomotive Works. Following are chief particulars:—

	Atlantic	6-coupled	10-coupled
Weight on drivers	153,000 lbs.	163,300 lbs.	274,000 lbs
" " truck	44,000 lbs.		
" " trailer	47,000 lbs.		
Wheel base, driving	13'-0"	11'-6"	19'-0"
" " total engine	33'-7½"		
" " and tender	65'-8½"	42'-5¾"	54'-5½"
Cylinders	22"x26"	21"x28"	24"x28"
Driving wheels, diar.	75"	57"	51"
Boiler, type	Straight top	Straight top	Straight top
" diar.	72 1-16"	67⅜"	80"
" pressure	200 lbs.	180 lbs.	210 lbs.
Firebox	108⅛"x75½"	72½"x65½"	108⅛"x73⅛"
Tubes, no. and diar.	56-1¾"	294-2"	308-2"
" length	21 ft.	16 ft.	19 ft.
Journals	10"x12"	9"x12"	main 10½"x12" others 9½"x12"
Brakes	Westingnouse	American	
Capacity, water	7,100 U.S. galls.	5,100 U.S. galls.	8,000 U.S. galls.
" coal	12 tons	7½ tons	12 tons
Tender truck, type	4-wheel		arch bar
Wheels, diar.	36"	33"	32"
Journals	5½"x10"	5"x9"	5½"x10"

The Temiskaming and Northern Ontario Ry. has ordered 2 passenger and 4 freight locomotives (10 wheel) from the Canadian Locomotive Co., Kingston, Ont. Following are chief particulars:—

Weight on drivers	114,000 lbs.
Weight total	145,500 lbs.
Wheel base, rigid	13' 6"
Wheel base of engine	23' 8"
Wheel base of engine and tender	52' 6"
Length over-all	61' 10"
Width over-all	10' 0"
Height over-all	14' 9½"
Heating surface, firebox	139 sq. ft.
Heating surface, tubes	1693 sq. ft.
Driving wheels, diar., passenger	63"
Driving wheels, diar., freight	57"
Driving wheels, centres	Cast steel
Driving journals	8½" by 10"
Cylinders	19" by 24"
Boiler, type	Extended wagon top
Boiler, pressure	200 lbs.
Tubes, no. and diar.	245—2"
Tubes, length	13' 2¼"
Brakes	Westinghouse
Tender, weight loaded	120,000 lbs.
Capacity, water	5,000 imp.galls.
Capacity, coal	10 tons
Truck	4-wheel arch bar type
Wheels, diar.	33"
Wheels	Cast steel centres, steel tires
Journals	5" by 9"
Brake beams	Simplex

The Temiskaming and Northern Ontario Ry. is having built by the Preston Car & Coach Co. an official car which presents several new features of construction. Its extreme length over end sills is 70 ft. 2 in., with platforms at each end 3 ft. 5 in. over all. The width over side sills is 9 ft. 10 in; the width of deck opening, 5 ft. 6 in., and the height between sill and plate, 6 ft. 10 in. The layout shows that the car is divided into the following compartments, starting from the front end; Observation room, 10 ft., fitted with four revolving chairs and one upper and lower berth; three staterooms, each 7 ft. 6 in. in depth, each fitted with a stationary brass bed, chair, folding washstand, wardrobe, lounge, and closet; there is a passage, 2 ft. 2 in. wide, extending from the observation room, alongside these staterooms, to the dining room, which is 14 ft. 6½ in. deep, and is fitted with a centre table with six seats; an upper and lower berth; a table at one side and a desk at the other, while four additional chairs are provided; over the table and desk are cupboards. Leading from this is a berth room, 6 ft. 4 in. deep, in which are four upper and four lower berths. This completes the accommodation set apart for the three commissioners and the other officials who may accompany them on their trips of inspection. Immediately to the rear of the berth room is the heater, coal box, and a general toilet room. Then comes the servants' room, fitted with upper and lower berth; china closet, refrigerator, kitchen, etc. The provisions refrigerator is placed on the end platform. Following are extracts from the specifications; Underframe, to be of the best grade O.H. structural steel throughout; body framing, to be as per Pullman standard throughout, continuous blocking; double body bolsters; tower steel couplers; sheathing, poplar or white wood, 2 in. width; roof and hoods as per Pullman standard; inside finish to be quarter sawn oak throughout; inside finish design full Empire type; deck sash, gothic sash; interior trimmings, statuary bronze; lighting, Pintsch gas throughout and wired for electric lights; heating, Safety Car Heating and Lighting Co.'s system; Pullman wide vestibule on front end; observation platform on back and with bronze hand rails and gates; refrigerator, white enamelled, iced from top of car; air brake, Westinghouse; trucks, standard 6 wheel, equalized, 80,000 lb. capacity; wheel base, 10 ft. 6 in.; steel wheels, 38 in. diameter; axles, steel, journals 5 x 9 in., M.C.B. standard; journal boxes, McCord malleable brake beams, Simplex, with automatic brakeheads; brake shoes, steel back; bearings, Canadian Bronze Co.; painting, striping, etc., in accordance with T. & N.O. standard.

Railway Tie Preservation.—The question of the preservation of ties is an important one to railway companies. In Great Britain the method of preservation adopted has been by a creosoting process, which has been adopted with satisfactory results by a number of the lines in the U.S. The life of an untreated tie is usually about seven years, but experiments have shown that creosoted ties of jack pine and tamarac will last for 16 years, and creosoted oak ties for 18 years. Experiments have been made with steel and concrete ties, but these have been found unsatisfactory on account of their rigidity. It is understood that the C.P.R. has decided to make an exhaustive test of the creosoting process and will treat 100,000 ties during the present season. Plants will be erected at suitable centres on the line so that the tests may be made under varying conditions. Local press reports state that a plant for the treatment of ties will be located in London, Ont., and another one at Fort William, Ont.

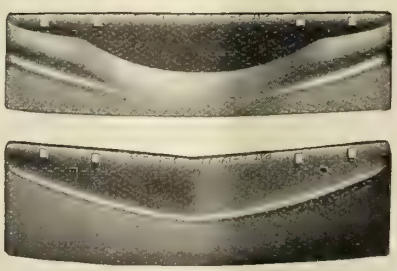
McCord Journal Box.



Fewings Car Replacers.

Steel Back Brake Shoes.

We highly recommend including the McCORD Malleable Iron Journal Box in specifications for new passenger, freight or locomotive tender equipment. The Mechanical features of the lid make the box dust and sand proof, and insure constant lubrication of the journal. No engine is complete without our FEWINGS Cast Steel Car Replacers, which are used to-day by all the leading Roads in Canada. The use of our STEEL BACK Brake Shoes insures the maximum of efficiency and economy in this connection. Write us for descriptive literature and prices, and watch for illustrations of our other specialties.

THE HOLDEN COMPANY, Limited

MONTREAL—302 St. James Street. TORONTO—42 York Street. WINNIPEG—291½ Portage Ave

MAINLY ABOUT PEOPLE

Mrs. A. P. Walker, wife of the Assistant Division Engineer C.P.R., Toronto, died there May 3.

Miss A. Apps, daughter of W. Apps, formerly Master Car Builder, C.P.R., died at Toronto, recently.

C. R. Hosmer, director C.P.R., returned to Canada from Great Britain on the s.s. Empress of Britain, May 15.

R. Meighen, director C.P.R., and Mrs. Meighen, sailed for England, May 7, on the C.P.R. s.s. Empress of Ireland.

T. P. Phelan, President Canada Railway News Co., has bought a house in Rosedale, Toronto, for about $18,000.

Sir H. Montagu Allan has been re-elected Honorary President of the Montreal Amateur Athletic Association.

The Governor-General occupied D. D. Mann's house, Scarboro Cliff Park, during the Ontario Jockey Club's spring races.

Mrs. J. H. Fulford, wife of the G.T.R. ticket agent at Brockville, Ont., died there suddenly of heart failure April 29, aged 66.

Lieutenant-Colonel E. G. Piche, C.P.R. Ticket Agent, Joliette, Que., and First Vice President, Canadian Ticket Agents' Association, died May 19, aged 51.

D'Arcy Scott, Assistant Chief Railway Commissioner, was a guest at the banquet of the Canadian Club, New York, May 14.

The marriage of Miss Bertha Brodeur, daughter of the Minister of Marine, to J. G. Delorimier, Montreal, is announced for June 15.

Wm. Haldane, brewer, Prescott, Ont., father of W. R. Haldane, General Freight Agent, Pacific Division, C.P.R., died May 15, aged 78.

W. H. Caryer, chief clerk, C.P.R. local freight department, Montreal, died May 13. He had been with that department for over 20 years.

T. C. Frew, a native of Guelph, Ont., has been appointed General Freight and Passenger Agent, Beaumont and Great Northern Ry., Onalaska, Tex.

S. J. McLean, Dominion Railway Commissioner, spoke on "Some Considerations on Railway Regulation" before the Empire Club, Toronto, April 29.

Mrs. Nicholls, wife of F. Nicholls, Second Vice-President and Managing Director, Canadian General Electric Co., died suddenly at Toronto, April 27.

J. Sutherland has been appointed Acting Deputy Commissioner of Railways, Telegraphs and Telephones for Saskatchewan, with headquarters at Regina.

Jas. Mills, Dominion Railway Commissioner, who recently underwent an operation at Miss Lash's Cottage Hospital, Toronto, returned to Ottawa early in May.

N. L. Luther, steamship and passenger ticket agent, and Canadian Passenger Agent, London & Northwestern Ry. of England, Montreal, died there suddenly May 23.

Lady Shaughnessy and Miss Shaughnessy returned to Canada by the C.P.R. ss. Empress of Britain, May 15, from Great Britain, where they have been on a long visit.

Wm. Whyte, Second Vice-President C.P.R., accompanied by Mrs. Whyte and T. C. Irving of Toronto, returned to Winnipeg May 1, after a two weeks' trip to the Pacific coast.

E. J. Melhuish, clerk in charge of advertising, C.P.R. District Passenger Agent's Office, Toronto, left there May 14 on a two months' visit to his old home at Malvern, England.

S. L. Shannon, Comptroller and Treasurer, and C. F. Burns, Auditor of Disbursements, I.C.R., Moncton, N.B., attended a convention of Railway Accountants at Cincinnati, Ohio, early in May.

Mrs. E. Tiffin, wife of the General Traffic Manager, I.C.R., Moncton, N.B., spent some time in Toronto early in May, afterwards going to Preston, Ont., with her daughter before leaving for Europe.

W. Mackenzie, President Canadian Northern Ry., and Mrs. Mackenzie left Toronto May 21 for England. On their return they will be accompanied by the Misses Mackenzie, who are now in England.

J. Meagher, a former contractor on C.P.R. construction between Montreal and Ottawa, and Port Arthur and Winnipeg, also on G.T.R. construction near Prescott, Ont., died at Kelowna, B.C., recently.

Mrs. Reid, mother of the late Sir Robert G. Reid, and grandmother of W. D. Reid, President and General Manager, Reid Newfoundland Co., died at Coupar Angus, Scotland, recently, aged 90.

J. Hyde, formerly connected with the Paymaster's Department of the Toronto, Hamilton and Buffalo Ry., was sentenced to three years' imprisonment, at Hamilton, Ont., May 13, for forging time checks and so defrauding the company.

L. A. Hamilton, ex-Land Commissioner C.P.R., who is living at Clarkson, Ont., has been elected President of the Clarkson and Lorne Park Fruit Growers' Association. He has also been re-elected President of the Mississauga Golf Club.

C. T. Jafferay, Chicago, Ill., who has been elected a director of the Wisconsin Central Ry., under the control of the Minneapolis, St. Paul and Sault Ste. Marie Ry. (controlled by the C.P.R.) is a native of Galt, Ont., where his brothers now reside.

H. J. Varlow, formerly of Stratford, Ont., and latterly engaged as a shop foreman in the C.P.R. shops at Fort William, Ont., is reported to have been transferred to Vancouver, B.C., as general foreman over the erecting and machine shops there.

Scott Griffin, Manager Canadian Northern Express & Telegraph Companies, is building a 20 room house on Clarendon Ave., Toronto, immediately in rear of Benvenuto, the residence of his father-in-law, Wm. Mackenzie, President Canadian Northern Ry.

Hon. W. Pugsley, Minister of Public Works, has accepted an invitation to a banquet to be held in New Brunswick in the near future. He will subsequently take a trip to the Pacific coast, on a visit of inspection of the various works in progress under his department.

J. B. Laflamme, who died in Montreal, May 10, was for many years engaged in superintending construction on the railway contracts carried out by the late Sir Robert G. Reid, in Canada and the United States. Latterly he was engaged in a similar capacity with W. J. Poupore, contractor, Montreal.

W. R. Baker, Secretary and Assistant to President, C.P.R., returned to Montreal, May 3, after a visit to Great Britain, the Continent and Egypt. While in England he was received by the Prince of Wales, whose host he was, on behalf of the C.P.R., during H.R.H.'s visit to Canada in 1902.

A rumor is current in Montreal, that Sir Wm. C. Van Horne will, in the near future, enter politics. The matter appears to be discussed in all sincerity, but in the face of any such pronouncement by Sir William himself, we merely mention the rumor for what it is worth, at the same time doubting its accuracy.

Jno. Williams, bridge engineer for the Toronto City Council, who died in Toronto, May 1, aged 67, was on the engineering staff of the old Great Western Ry. at Hamilton, Ont., from 1870 to 1874. After residing some years in England, he returned to Canada in 1887 and entered the Toronto City Council's service.

H. E. Vautelet, C.E., one of the engineers in charge of the plans for the construction of the Quebec bridge, was a passenger on the Allan Line s.s. Tunisian, which had to put in at St. John's, Nfld., May 13, while en route from England to Montreal, owing to the starting of a plate while forcing a passage through the ice.

T. McHattie was entertained at a reunion by the foremen and engineers of the Eastern Division G.T.R., at Montreal, recently, and was presented with a cabinet of silver and an address, in connection with his retiring from the position of master mechanic of that division, to become Superintendent of Motive Power of the Central Vermont Ry.

R. Lawrie was recently presented with a gold headed cane, and Mrs. Lawrie with a silver tea service, on leaving Wiarton, Ont. Mr. Lawrie has been in the G.T.R. service since 1886, and has latterly been station agent at Wiarton. He has been appointed joint station agent for the G.T. Pacific Ry. and the Great Northern Ry., U.S., at Portage la Prairie, Man.

Sir Wm. Van Horne, Chairman of the Board, C.P.R., is reported to have said in England, May 3, in the course of an interview on a reciprocal trade agreement between Canada and the U.S.: "I estimate there are only about 6½% of fools in Canada. So long as this percentage does not materially increase, we are in no danger of reciprocity—or such reciprocity as would throw down all customs barriers."

The U.S. press plays many parts. From the latest sample from Boston, Mass., it would appear that it has now adopted the role of a prophet. The Boston News Bureau has published an interview with "Sir" William Mackenzie, President Canadian Northern Ry.

H. C. Grout, whose appointment as Assistant Superintendent, District 3, Ontario Division, C.P.R., Toronto, was announced in our May issue, was born at Wausau, Wis., Mar. 14, 1881, and entered C.P.R. service June, 1898, since when he has been to Feb., 1899, rodman; Feb., 1899, to Apr., 1901, leveller; Apr., 1901, to Apr., 1903, transitman; Apr., 1903, to Apr., 1, 1907, resident engineer, Toronto; Apr. 1, 1907, to Apr. 1, 1908, Assistant Division Engineer; Apr. 1, 1908, to Apr. 20, 1909, Resident Engineer, Toronto.

C. W. Cooper, who has been appointed General Passenger Agent, C.N.R., was born at Montreal, Nov. 16, 1868, and entered railway service Feb. 24, 1885, since when he has been successively, in the

AGENTS FOR THE

Flannery Bolt Company, = Pittsburgh, Penn., U.S.A.

G.T.R. Passenger Department, Montreal; secretary to D. McNicol, then General Passenger Agent, C.P.R., Montreal, and later in Montreal and Ottawa ticket offices, until 1901, when he was appointed chief passenger clerk, C.N.R., and from Jan., 1907, to Apr. 30, 1909, Assistant General Passenger Agent, C.N.R., Winnipeg.

W. S. Cookson, who has been appointed Assistant General Passenger Agent, G.T.R., Chicago, Ill., was born at Port Jervis, Orange Co., N.Y., June 12, 1871, and entered railway service July 15, 1886, since when he has been, to Nov. 1, 1886, clerk, car record office, Erie Rd., Jersey City; Nov. 1, 1886, to Dec. 1, 1888, clerk, General Roadmaster's office, Chicago and Western Indiana Rd., Chicago, Ill. (the G.T.R. is part owner of this railway); Dec. 1, 1899, to May 1, 1909, chief clerk, G.T.R., Assistant General Passenger Agent's office, Chicago, Ill.

Geo. Stephen, who has been appointed General Freight Agent, C.N.R., Winnipeg, was born at Montreal, July 5, 1876, and entered railway service in 1889, since when he has been, to 1899, clerk in C.P.R. service; 1899 to 1900, chief clerk to Assistant General Freight Agent, C.P.R., Winnipeg; 1900 to 1901, Travelling Freight Agent, C.P.R. lines in Manitoba; 1901 to 1903, Contracting Freight Agent, C.P.R., Nelson, B.C.; 1903 to Jan., 1907, chief clerk to General Traffic Manager, C.N.R., Winnipeg; Jan., 1907, to May, 1909, Assistant General Freight Agent, C.N.R., Winnipeg.

G. W. Vaux, General Passenger Agent, G.T.R., Montreal, whose portrait appeared in our May issue, was born at Montreal, Mar. 21, 1866, and entered G.T.R. service July 13, 1881; since when he has been, to June 13, 1885, office boy, General Passenger Department, Montreal; June 13, 1885, to Feb. 1, 1897, clerk same department, Montreal; Feb. 1, 1897, to Aug. 1, 1899, chief clerk, same department, Montreal; Aug. 1, 1899, to May 1, 1900, Assistant General Passenger and Ticket Agent, Montreal; May 1, 1900, to May 1, 1909, Assistant General Passenger and Ticket Agent, Chicago, Ill.

L. J. Rouleau, who has been appointed Travelling Freight Agent, and Agent National Despatch—Great Eastern Line, which operates in connection with the G.T.R., Central Vermont Ry., Boston & Maine Rd., and connections, Montreal, was born there Jan. 6, 1879, and entered G.T.R. service Apr. 1, 1899, since when he has been, to Mar., 1903, clerk and timekeeper, local freight department, Montreal; Mar., 1903, to Nov., 1905, claims investigator, freight claims department, Montreal; Nov., 1905, to Apr., 1907, rate clerk, divison freight office, Montreal; Apr., 1907, to Apr. 1, 1909, Soliciting Freight Agent, Montreal.

H. R. Charlton, who has been appointed General Advertising Agent, G.T.R. and G.T.P.R., was born at St. John's, Que., Feb. 6, 1866, and after some three years' newspaper work at St. John's, Que., was engaged on railway survey work in 1883 and 1884 on the Waterloo and Magog Ry.; he was engaged in commercial pursuits in St. John's, Que., until 1887, when from Feb. to June he was engaged with the C.P.R. travelling exhibition car, and after four years' newspaper work was given charge of the C.P.R. advertising department in April, 1891, remaining there until April, 1896, when he again went into private employ. In Jan., 1898, he was appointed Advertising Agent, G.T.R.

Trade and Supply Notes

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

The Hamilton Stamp & Stencil Works have installed one of the largest and latest improved vulcanizers in its rubber stamp department.

The Dominion Iron & Steel Co., Sydney, N.S., has received an order for 5,000 tons of bull-head steel rails, from the Great Northern Ry. of England.

The Canadian Westinghouse Co., Hamilton, Ont., has issued illustrated pamphlets dealing with the Westinghouse multiple Tungsten lamps, and Westinghouse type M.S. mill motors, also Textile Motor Talks, No. 6, and Motor Talks, No. 4.

The Falls Hollow Staybolt Co., Cuyahoga Falls, Ohio, has received a large order for Staybolt iron from one of the largest railway companies in England, which wishes to give it a trial with a view to its adoption on the entire system by them.

The Union Draft Gear Co, J. R. Cardwell, President, announces that it has taken over the Cardwell Manufacturing Co.'s draft gear business, in connection with which it proposes to manufacture and sell other improved types of friction and spring draft gear appliances.

The Safety Car Heating and Lighting Co., New York, has issued a complete and comprehensive catalogue in loose leaf form in a special soft binder, the contents of which make clear the thorough way in which the company is meeting demands in the car lighting and heating fields.

The Canadian Gold Car Heating & Lighting Co. has during the past year made several improvements in its car heating specialties, which will be on exhibition in secs. 301 to 311 exhibition hall, Master Mechanics' and Master Car Builders' convention at Atlantic City from June 16 to 23.

The Falls Hollow Staybolt Co., Cuyahoga Falls, Ohio, has appointed Mussens Limited, Montreal, as its agent for Canadian territory east of Lake Superior, and the Brydges Engineering & Supply Co. as agent for territory west of Lake Superior. H. J. Skelton & Co., of London, Eng., have been appointed the representatives for the British Isles and India.

The U. S. Lighthouse Establishment has recently decided upon more liberal lighting for the lower New York harbor and has placed orders with the Safety Car Heating & Lighting Co. for a sufficient number of Pintsch Gas buoys to enable the largest steamers to enter the harbor at night. There are over 2,200 of these buoys in service throughout the world, the principal countries using them as follows: United States and Canada, 497; England, 439; Argentine, 296; France, 209; Germany, 166; Holland, 166.

The Union Draft Gear Co., Chicago, has been organized with the following officers: J. R. Cardwell, President and General Manager; C. A. Jennings, Vice-President; J. D. Ristine, Secretary and Assistant Treasurer; C. H. Tobias, Treasurer and Assistant Secretary. This company, which has a paid-up capital of $2,000,000, has bought the Cardwell Manufacturing Co.'s patents and business, relative to draft gear, and will continue the manufacture and sale of the friction draft gear, which was started by this company in the latter part of 1904.

The G.T. Pacific Ry. has put on a regular passenger service on its line between Winnipeg, Man., and Biggar, Sask.

The Donald Ross Incline Ry. Co., Ltd., has been incorporated under the Northwest Territories Ordinance, with office at Edmonton, Alta.

The C.P.R. proposes to lay out a 20-acre vegetable and fruit farm at Kerrisdale, B.C., for the purpose of supplying its dining cars and mountain hotels with fruits, vegetables, etc.

J. J. Conway, St. Maurice Lumber Co., Pentecost River, Que., in remitting his subscription, writes: "I assure you I find the Railway & Marine World a most welcome friend along the north shore."

The Minister of Railways made the definite statement in the House of Commons, May 11, that it was not the intention of the Government to ask Parliament to vote any subsidies in aid of railway construction at the session which has since closed.

The installation of the telephone on the Michigan Central Rd., between Windsor, Ont., and Buffalo, N.Y., was completed May 4. Connections are made with the principal points on the line and the system will be used as a subsidiary agent to the telegraph system for the more expeditious despatch of the company's business. The results are reported to have been thoroughly satisfactory.

The Guelph, Ont., City Council, in fixing a rate of 14½ mills on the dollar for the current year, has taken credit for estimated receipts of $25,000 from its interest in the Guelph Junction Ry. (operated under lease by the C.P.R.), and $3,240 profit from the electric street railway, which it owns and operates. The city also owns and operates the water works system, and the gas and electric light plants.

The U.S. Bureau of Railway News and Statistics has compiled figures of the results of the operation of the 2-cent passenger fare legislation in operation there. The figures estimate that during 1908, the railways lost in gross earnings $25,000,000, although a larger number of passengers was carried. This is accounted for by a reduction in the average receipts per passenger mile on 94 per cent. of the mileage, from 2.014 cents in 1907 to 1.932 cents in 1908.

J. D. McLennan, who has been appointed Auditor of Freight Accounts, G.T.R., Montreal, was born at St. Mary's, Ont., Apr. 6, 1863, and entered railway service July, 1878, since when he has been, to Sept., 1881, in G.T.R. Freight Office, Brockville, Ont.; Sept,. 1881, to Dec., 1884, in Treasurer's Office, Chicago, and Grand Trunk Ry., Port Huron, Mich.; Dec., 1884, to Aug., 1890, Chief Freight Clerk, Chicago, and G.T.R., Detroit, Mich.; Aug., 1890, Travelling Auditor, G.T.R. lines west of Detroit and St. Clair Rivers; and subsequently, to May 1, 1909, Chief Clerk to Auditor of Freight Accounts, G.T.R., Montreal.

TORONTO — CANADA

Misrepresentation of the Northwest.

Some time ago there was considerable discussion of the misrepresentation of Canada by writers who, apparently, had more regard for picturesqueness than for accuracy. Many, if not most of Arthur Stringer's criticisms in a Western magazine had to do with the climate, and life in the northern woods. So long as misrepresentation is confined to details such as were pilloried by Mr. Stringer, no special harm to the country is discoverable, except, possibly, a prolonging of the tradition which obtained south of the international boundary line, that when it does not show in Canada it freezes, and that the Niagara River, flowing north and south, is a sharp dividing line between the temperate and the frigid zones. The writers referred to have possibly had no malice against the country. They probably did not know as much as they thought they did. It may be assumed that this is true, also, of those who, in reputable publications, assail enterprises that are of great importance to Canada's development. For the latest case in point, we are indebted to The World's Work, a United States magazine, which has published two articles which surely could not have been passed by any editor who was not under the glamor of Miss Agnes Laut's vigorous, picturesque and entertaining style of writing. There are some things in which it is better to be matter-of-fact than dramatic. Railway enterprise is one of them. After the exhibition in The World's Work, magazine editors should be more careful before they succumb to the temptation to accept the obiter dicta of a woman who, apparently, aspires to be regarded as an authority on railway construction, accomplished and prospective.

The first World's Work article is entitled, "On the Frontier of the Fur Country: The Struggle of the Hudson's Bay Company and Revillon Freres over the Canadian trade in pelts in a country forever impassable to railroads." Before taking up the credibility of the railway references in the article, two or three other statements may be referred to. An account of the appearance of the Revillon's first ship, in James Bay, is given, which, in the absence of corroborative evidence, discriminating readers, with Canadian knowledge, will hesitate to accept; especially the suggestion that the Hudson's Bay Co.'s office at Moose Factory might have deliberately caused the wreck: "Whether he cut harbor buoys and put out beacon lamps, as they used to of old, I was unable to learn. Probably he did not."

It is said the Revillon crew "were more than 1,000 miles from help overland." But Moose Factory is less than 300 miles, as the crow flies, from Missanabie, a station on the C.P.R. main line.

We are told about "tracking canoes from island to island on lakes; of a riverman who, in winter regularly drove his dog-team from Fort Garry to the Rocky Mountains, 1,800 miles, averaging from 60 to 90 miles a day;" and of "many a trapper who sets out for a 2,000 mile tramp with nothing but a single blanket wrapped up in a lean-to, firearms, and a gunny sack of flour and bacon strapped on his dog's back." Of course, it is impossible to track a canoe from island to island. It is doubtful if any man ever averaged from 60 to 90 miles a day with a dog-team. The idea of a blanket "wrapped in a lean-to" is too grotesque for comment. But the statements about railways and railway possibilities along the Saskatchewan are the most remarkable of all. Miss Laut says:

"North of the railroads stretch 2,000 miles of muskeg country, where roads can never be built. Between the wheat plains and Hudson's Bay, lies an area, 400 by 70 miles, of pure muskeg, quaking silt on a bed of water, covered by goose-grass and muskrat reed 16 ft. high, with lanes of water cris-crossing in endless maze. Will there be any great game preserve left in America? Having canoed along the southern edge of the fur country for 1,500 miles, frankly, I do not think settlement can ever encroach on the great game preserve of the North. I think it will exist always, and for these reasons: When you go 70 miles north of the Saskatchewan you are in a muskeg region. This swamp land cannot be reclaimed. It is 5 ft. deep at the shallowest, and forever bars out settlers. It will also bar out railroads except along two or three ridges of rock—from Lake Winnipeg to Hudson's Bay, from Prince Albert to Lac La Rouge, from Edmonton to Athabasca and the Peace. Even if you build your railroad elsewhere—as the 90 miles built by Mackenzie and Mann from the wheat plains to the Pas prove—you cannot operate it in summer. You cannot operate it with a hand-car or a wheelbarrow for the floods. You can run your train over muskeg only in winter when the water is adamant ice; and then you have the consideration of blizzards to keep your track open. The Pas road to-day cannot be used."

If it were not notorious that feminine writers on engineering subjects are full of lovingkindness to those who undertake constructive works, some ulterior motive might be suspected in such an attack on the sanity of men who were among the most experienced railway builders on this continent. But the statements printed are so absurd, on the face of them, that even malice could not invent them. They are probably merely the result of neglect to ascertain the facts, and of desire to make out a case for an inviolable game preserve. But the innocent reader does not know this, and gets a wrong impression, accordingly.

The article referred to is self-contradictory. The title says the country in which the Hudson's Bay Co. and Revillon Freres are competing is "forever impassable to railroads," and that "north of the railroads stretch 2,000 miles of muskeg country, where roads can never be built." But the muskeg area, in another place, is said to be 400 miles by 70, and still, in this "2,000 miles of country where roads can never be built," there are three ridges on which railways can be built.

Perhaps the coolest thing ever printed about a railway enterprise is the paragraph about the Canadian Northern branch line from Etoimami to the Pas. It is so foolish that one marvels how it can have passed an experienced copy-reader. It intimates that most experienced railway builders have constructed a line which can never be used, as part of a road across a strip of country "where roads can never be built * * * * pure muskeg, quaking silt in a bed of water." It assumes that they have not examined the country north of the Saskatchewan; or that, if they have, their engineers are incompetents who have not learned as much about the country as a woman did, who canoed down the Saskatchewan, with Indian or half-breed guides. The Pas branch is still in the contractors' hands, but it is being used and work trains will this summer complete the ballasting for which first-class material is found on the right of way.

The Canadian Northern engineers' reports on the country north of the Pas are not made public. But Government reports are. In The Hudson Bay Route and Canada's Fertile North Land, issued by the Department of the Interior, there is abundance of evidence, not only of the simplicity of building a railway from the Pas to Fort Churchill over the limestone formation which begins at the river itself, but of a big belt of fertile clay land through which it will pass. The Government maps show that where, according to Miss Laut, there is only "pure muskeg, quaking silt in a bed of water," there is timber, some of it 18 inches in diameter. There is, according to the evidence of Mr. McInnes, of the Geological Survey, and of every other traveller northward from the Pas, no unusual difficulty in the way of building a railway. The Government reports have been out for more than a year, and have been widely noticed in the press. They are amply confirmed by the reports of the Dominion Government survey parties, which, last fall and winter, explored the country from the Pas to Hudson Bay. The first party, which was in charge of Mr. Law, travelled to the Pas over the road which "cannot be used." Mr. Law states, apropos of the 70 miles of "pure muskeg, quaking silt," etc., that "the country was wooded from first to last."

Why should a writer who has achieved Miss Laut's reputation, write such nonsense? It is not necessary to suggest a motive. The facts are enough. The most careful writer may make slips. Miss Laut's offences against accuracy have long been notorious among those who know Western Canada. They have now become serious; for they are giving the American business public totally wrong ideas about the scope of railway construction in Western Canada; and the time has come to denounce them.

Renewals of licenses for G.T.R. refreshment rooms at Niagara Falls and Stratford, Ont., have been refused by the license commissioners of Welland and Perth Counties.

Judgment was reserved in the Claresholm, Alta., District Court, May 12, in the C.P.R.'s appeal against a conviction at Stavely, last fall, under the Manitoba Grain Act, when a $500 fine was imposed. It was contended that if the conviction stood, it would be impossible to make shipments of grain to the west, and that there was no act to prohibit the company from shipping east or west as it desired. The question was also discussed as to whether the Manitoba Grain Act applied to western shipments.

The recent friction between the C.P.R. and its mechanical employes is reported to have been settled, an agreement on all points in dispute having been reached at Montreal, May 8. The terms of the agreement have not been made public, but it has been stated that those men who were not taken back, at the time of the collapse of the strike last fall, will be reinstated in their old positions, and that the strikers will not be restored to their old places on the pension list. H. H. Vaughan, Assistant to the Vice-President, acted for the company.

IDEAL RAILWAY FENCING

MADE TO LAST

Large gauge (No. 9) hard steel wire is used throughout, decreasing cost of maintenance, insuring durability and serviceability.

IDEAL FENCE has been adopted as a standard by all the leading Railways in Canada. More IDEAL is used by Railways this year than all other makes combined.

National Transcontinental Railway.

Replying to a question in House of Commons recently, the Minister of Railways said the total amount expended to Mar. 31 upon the construction of the eastern section of the line was $49,326,678.47, of which $27,335,663.32 had been upon the Moncton-Quebec section and $21,991,015.15 upon the Quebec-Winnipeg section. For the year ended Mar. 31, 1909, the amounts expended had been: Moncton-Quebec section, $13,556,842.04; Quebec-Winnipeg section, $9,562,082.82. The amounts for the year, however, were not complete, as there were several outstanding accounts which had not been finally settled.

Owing to representations from New Brunswick, the question of the adoption of electricity as a tractive power upon that portion of the N.T.R. lying between the St. Lawrence River and Moncton, N.B., has been under discussion. The N.B. Legislature has passed a resolution to the effect that inasmuch as the line between the two points named runs through a heavily timbered country it would be advisable to use electricity as a motive power, in order to prevent forest fires, and calls attention to the large number of water powers which could be developed along the route and so provide the energy necessary. The principal water power pointed out is that at Grand Falls, on the St. John River, 270 miles from the St. Lawrence River, and 160 miles from Moncton. At this point the river has a natural fall of 130 ft., and it is estimated to be capable of developing 100,000 to 125,000 continuous h.p. The requirements of the line are estimated to be 40,000 h.p. An officer of the Department of Railways stated May 7 that the matter had not been brought before the notice of the Department either in connection with the N.T.R. or the Intercolonial Ry. He further pointed out that as there were supplies of coal available in New Brunswick for railway purposes there would not be so much benefit from the electrification of that section as there would be for that between Quebec and Winnipeg. However, the question of the electrification of trunk lines is still in its infancy, and railways will probably rely upon coal for some few years to come.

No new features in connection with the construction of the line between Moncton and Winnipeg are reported, except that tracklaying was commenced at Lake Superior Jct., Ont., May 1, to meet the gang working easterly. J. D. McArthur, the contractor, is reported as having stated that the work will be completed so as to have trains running by July 31. The contract for the erection of stations on the N.T.R. between Winnipeg, Man., and the junction with the Lake Superior Branch of the G.T. Pacific Ry., is reported to have been let to —. Vopin, of Winnipeg.

Quebec Bridge.—A large staff of engineers is engaged in Montreal in preparing designs for the bridge which the Dominion Government proposes to erect across the St. Lawrence River, to take the place of that partially erected (which collapsed, Aug., 1907) by the Quebec Bridge & Ry. Co., whose franchises and assets have been taken over. It is expected that the general plans will be completed within six months, and it is understood that they provide for a bridge at a height of 150 ft. above high water mark, with a centre span of 1,800 ft. as in the original. The commission in charge of the work makes monthly progress reports to the Government, but these are not made public.

An unconfirmed press report from Ottawa, May 20, stated that the board of engineers appointed by the Government had prepared plans for the new bridge and that tenders might be called for at an early date. This does not agree with the ministerial announcements made during the recent Parliamentary session.

St. Boniface Shops and Yards.—The yards with shops which are being laid out by the Commissioners, for the N.T.R., are situated six miles east of St. Boniface, Man. The buildings now under construction consist of locomotive machine and erecting shop, 170 by 612 ft., provided with 25 pits; boiler and tank shop, 185 by 210 ft.; power house, 110 by 150 ft.; grey iron foundry, 130 by 200 ft., with clearing room adjoining, 48 by 80 ft.; locomotive carpenter and pattern shop, 70 by 100 ft.; store room, 60 by 260 ft., with oil house, 40 by 60 ft.; and stores platform, 60 by 120 ft. adjoining; forge shop, 100 by 260 ft.; stores and scrap shop, 40 by 220 ft.; crude oil house, 20 by 60 ft.; frog and track shop, 60 by 100 ft. A chimney and high water tank are also included in the shop contract. The contractors for these shops are Haney, Quinlan and Robertson, and the contract for the structural steel work has been sublet to the Dominion Bridge Co.

The plans for the layout of the yard show that provision has been made for the construction of a second track along the main line. The freight shed and tracks for team delivery of freight are situated between Springfield road and the main line. On the other side of the main line is situated the east bound receiving and classification yard, while further on is the westbound lead, with various tracks for repair and other purposes branching off therefrom. Beyond the westbound lead is situated the track scales, icehouse, wrecking outfit tracks, etc., and further on again come the special tracks for locomotives going to and from the roundhouse, the coaling trestles, water tanks, ashpits, etc., necessary for the operation of the line. The roundhouse is a double one built round a 75 ft. turntable, and having accommodation for 37 engines. Adjoining it is a shop for making running repairs. The contractor for the construction of the roundhouse is J. D. McArthur. A map showing the location of the shops and yard and a plan showing the layout of the yards appeared in our Nov., 1908, issue.

It is said that tenders will be asked at an early date for the erection of the following shops for the car department:—Freight car shops, 200 by 600 ft.; paint shop, 100 by 325 ft.; coach shop, 125 by 250 ft.; planing mill, 100 by 300 ft.; lumber shop, 60 by 115 ft.; dry kiln, 40 by 50 ft.

Red River Bridge.—An act has been passed by the Dominion Parliament authorizing the commissioners to make arrangements with the city of Winnipeg for the provision of a roadway for passenger and vehicle traffic, if thought necessary, upon the bridge which they have power to construct over the Red River between the cities of St. Boniface and Winnipeg. The Manitoba Legislature has granted the city of Winnipeg the necessary power in this respect, and the present act is the complement to it.

The Commissioners have let contracts for the construction of this bridge as follows:—For the substructure to Haney, Quinlan and Robertson, and for the superstructure to the Dominion Bridge Co. The estimated cost is stated to be $265,000 for the concrete piers and abutments, and $240,000 for the steel work. These contracts cover all the work for the completion of the roadway from the bank of the Red River, on the St. Boniface side, up to and including Water St. in Winnipeg. The bridge crosses at the foot of Lombard St., and has a total length of 780 ft. 8 in. It will be carried on six concrete piers, having their foundation on cemented gravel over solid rock, and two shore pedestals. The approach to the bridge proper is over an ordinary deck plate girder span; then comes a bascule lift span of 100 ft. clear waterway at low water, the whole span with its operating parts and counter weight having a length of 132 ft. The other four spans are truss spans of 144 ft. each. The floor of the bascule span is 36 ft. above the bed of the river, and is about 10 ft. above the average of high water. The construction in Winnipeg consists of elevated tracks with retaining walls and solid filling crossing over Mill, Notre Dame and Water streets, with through plate girder spans, on a curve of 6 degrees 44 minutes. At Water St. the N.T.R. tracks will join those of the G.T. Pacific Ry.

GRAND TRUNK PACIFIC RY.

The Minister of Railways replying to a question in the House of Commons recently, said the G.T.P.R. had its Lake Superior branch open from Fort William to the point of junction with the N.T.R., 188.77 miles, but it had not been taken over by the operating departments. Including bond interest, but inclusive of terminals, the cost of the line had been $9,686,457.98, while the estimated cost of the line was $9,986,457.98. Towards the cost of this line the Dominion Government voted a subsidy not to exceed $6,400 a mile for 220 miles, and the Ontario Government granted $2,000 a mile for 200 miles and 675,000 acres of land. The city of Fort William granted $300,000 to be applied on the terminals in the city, and $50,000 to be applied upon the bridge over the Kaministikwia River.

E. J. Chamberlin, General Manager, returned to Ottawa, April 29, from his tour of inspection over the line, and made a statement confirmatory of the interview which he gave some days previously at Winnipeg, reproduced in our May issue.

W. G. Mehan, of the company's construction department, started out from Saskatoon, Sask., in April to hurry on the work of tracklaying on the line into Edmonton, Alta. He stated that it was expected to finish the work by June 20. In connection with this it is stated that arrangements are being made to have a big celebration in connection with the opening of the line through from Fort William to Edmonton. The date for such a celebration depends largely upon the completion of the Winnipeg, Peninsular Junction section by the N.T.R. Commission. A feature of the celebration will, it is said, be the inspection of the line by a large party including the President and some of the directors of the G.T.R., officers of the G.T. Pacific Ry., the Premier and representatives of the Dominion Parliament, as well as

leading railway men and others. Fort William, Winnipeg, and Edmonton are planning to have hotel banquets and other celebrations on the occasion of the special train reaching those points.

The company has sent out a number of survey parties to locate branch lines principally in Saskatchewan. R. P. Graves is reported to be in charge of a party running a line from Melville to Yorkton; D. Bergen is reported to be in charge of a party locating a line from Scott to Battleford.

West of Edmonton, the work is proceeding rapidly, between the Pembina and the McLeod rivers. C. R. Schacht, a sub-contractor on this section, took on his men from Edmonton May 3, and before starting said he expected the grading between the two rivers would be completed by the autumn. The first divisional point beyond Edmonton, will be located at Edson about six or eight miles west of the crossing of the McLeod River. D. M. Murphy, engineer in charge of construction for the Government, has completed an inspection of the work. He says the work to the crossing of the Pembina River is practically completed, and the work is going on in good shape between there and the McLeod River.

Supplies for engineering parties have been delivered at Kamloops, and C. C. Van Arsdol is said to have taken charge of the work there, with the object of making surveys along the North Thompson River Valley in the direction of Vancouver.

A Vancouver press report dated May 10, states that the delay in the letting of the contract for the construction of the line beyond Kitselas canyon for 100 miles, for which tenders were asked

---

Notice is hereby given that a duplicate original of an amalgamation agreement made between The Canadian Northern Railway Company and The Edmonton, Yukon and Pacific Railway Company duly sanctioned by the Governor General in Council by Order in Council dated 23rd April, 1909, has been filed in the office of the Secretary of State of Canada.

GERARD RUEL,
Chief Solicitor.

Dated at Toronto, this 8th day of May, 1909.

Notice.—Application will be made on behalf of the Alberta Midland Railway Company and the Canadian Northern Railway Company to the Board of Railway Commissioners for Canada at the Board's office, Ottawa, on tenth June, 1909, at 12 o'clock noon for a recommendation to the Governor General in Council for the sanction of an agreement amalgamating the said companies.

GERARD RUEL,
Solicitor.

Dated at Toronto, 5th May, 1909.

Notice.—Application will be made on behalf of the Saskatchewan North-Western Railway Company and the Canadian Northern Railway Company to the Board of the Railway Commissioners for Canada at the Board's office, Ottawa, on June tenth, 1909, at twelve o'clock noon, for a recommendation to the Governor General in Council for the sanction of an agreement amalgamating the said companies.

GERARD RUEL,
Solicitor.

Toronto, 5th May, 1909.

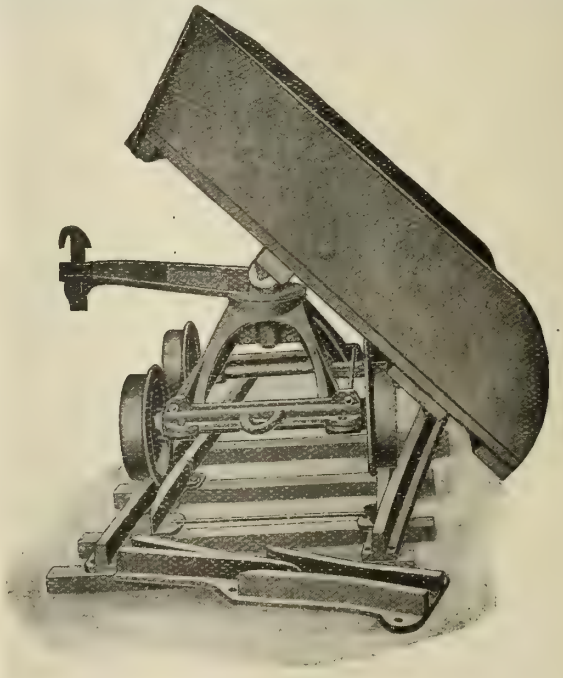
Baltimore, Md. **Chicago, Ill.**

Champion Revolving Dump Car



The CHAMPION CAR is radically different from any now on the market. It is simple, strong, compact and being built entirely of iron except the bed, is extremely durable. The bed revolves and may be dumped on either side or end. Write for catalogue of cars and drums.

The Canadian Road Machine Co., Limited
HAMILTON, CANADA

some time ago, is due to a possible abandonment of the located line up the Skeena River Valley via Hazleton and Bulkley Valley, in favor of the Copper River route. C. C. Van Arsdol has had direction of some surveys through the Copper River country, and it is stated that the results show that a saving of 80 miles in distance can be effected. The only difficulty in the way is said to be at Pine Pass on the divide between the Copper River and Telkwa River basins. These it is said can be overcome by the construction of a tunnel at a cost of $1,000,000. The matter was investigated by E. J. Chamberlin, General Manager, on his recent western trip, and is now being discussed at headquarters.

Grand Trunk Pacific Branch Lines Co.—The Dominion Parliament has passed an act authorizing the construction of the following additional branch lines: From west of Pembina River crossing southwesterly to Embarras River, and southerly to the headquarters of the Little Pembina River, about 100 miles; from Embarras River southwesterly to the McLeod River, about 25 miles; from between Calgary and Coutts southwesterly to Macleod, thence via Pincher Creek to the western boundary of Alberta, about 100 miles; and from Regina, Sask., to Moose Jaw, about 45 miles.

G.T. Pacific Townsite and Development Co.—Replying to a question in the House of Commons recently, the Minister of Railways stated that the directors, C. M. Hays, E. J. Chamberlin, W. Wainwright, W. H. Biggar and E. H. Fitzhugh, held two shares each, while the G.T.P. Ry. Co. held the remaining 29,990 shares of common stock issued; the balance of the $5,000,000 of authorized capital consisted of $2,000,000 of preferred stock, which had not been issued. The property held by the company consists of 81 townsites, and a three-quarter interest in the townsite of Prince Rupert, B.C., the total area being 78,648 acres. The Department of the Interior gave the additional information that the Crown sold to the company 12,905.45 acres at $3 an acre, receiving therefor $38,716.35, while it is agreed that as the lands are sold the Government will receive one-quarter of the net proceeds of the sales. The Government further permitted the company to buy 11,279.81 acres from the holders of unpatented lands, receiving therefor $1 per acre, the company buying out the various holders of the lands. (May, pg. 337.)

G. F. Hichborn, formerly Agent of the Great Eastern Line at New York, and now General Traffic Manager, United States Rubber Co., has also been appointed General Traffic Manager of the General Rubber Co., New York; Rubber Goods Mfg. Co., New York; Peerless Rubber Mfg. Co., New Durham, N.J.; New York Belting & Packing Co., Passaic, N.J.; Fabric Fire Hose Co., Sandy Hook, Conn.; Hartford Rubber Works Co., Hartford, Conn.; Morgan & Wright, Detroit, Mich.; Indianapolis Rubber Co., Indianapolis, Ind.; India Rubber Co., New Brunswick, N.Y.; Sawyer Belting Co., Cleveland, Ohio; Mechanical Rubber Co., Cleveland, Ohio; Mechanical Fabric Co., Providence, R.I.; Stoughton Rubber Co., Stoughton, Mass.; Mechanical Rubber Co., Chicago, Ill.; C. & J. Tire Co., Indianapolis, Ind., and Sandy Hook Reclaiming Works, Sandy Hook, Conn.

A Railway to Hudson Bay.

E. H. Drury, who had charge of one of the survey parties sent out by the Dominion Government into the Hudson Bay country, has returned to Montreal, and in an interview May 7, stated that when the railway was constructed the country between Pas Mission and Hudson Bay would undoubtedly prove to be a most productive one. He expressed an opinion, however, in favor of the line starting from a point further west, and suggested the possibility of using Saskatoon as a starting point, on the ground that all competitive lines would then have an even chance in freight matters. There were no engineering difficulties in the way of construction—few bridges would be required, and the gradients were easy. The records of snow showed that the maximum fall was only three feet in the year, therefore the cost of maintenance in winter would not be great.

The progress report of the Government surveyor for the projected railway to Hudson Bay, recently presented to the House of Commons, deals with the result of the preliminary survey in sections. Starting from Pas Mission, one party covered a section of 150 miles to Setting Lake. This section will be the lightest in point of construction, being mainly earthwork, with some small stretches of muskeg. The cost of clearing and grubbing will be heavy, but on the whole it presents no great difficulties. The second section of the route extends from Setting Lake to the summit between the waters of the Nelson and the Churchill Rivers, a distance of 175 miles. This country is badly broken up, and will necessitate the making of a number of heavy rock cuts, particularly along the Oder and the Burntwood rivers. An alternative route is being surveyed along the east side of Setting Lake and Grass River, which it is thought may turn out to entail less expensive work. The third section from the summit to Fort Churchill, a distance of about 140 miles, presents great difficulties in the way of making an estimate of the cost of construction. There are a great many muskegs, and in the last hundred miles, the route passes through a moss-covered tundra, which appears to be permanently frozen to within a few inches of the surface. Detailed information as to the cost of handling this material, or how it will carry a railway is not available.. This last 100 miles being over an open country, more or less trouble with snow may be expected.

The route to Port Nelson from the Pas follows that surveyed to Fort Nelson for about 120 miles, and then on to a point fixed for the crossing of the Nelson River. Between this crossing and Port Nelson a preliminary examination has been completed, and a more detailed survey is now being made. The results at present obtained show that very little rock work will be necessary, the location being almost entirely in a bush country. The snow problems which will have to be dealt with on some points of the line to Fort Churchill will not be encountered on this line, and the hinder country is not passed through to any great extent, such stretches as are met with being short detached pieces, resembling more the spruce swamps found in Manitoba.

The gradients adopted throughout have been 0.4 of 1% north bound, and 0.6 of 1% south bound. No difficulty or particularly heavy work has been encountered which could have been materially lessened by the adoption of heavier gradients. In fact, it seems probable that the southbound gradient might be reduced to 0.5 of 1% without greatly increasing the cost. It is estimated that the cost of grading will average 55 cents a yard; the price used being $1.50 per yard for solid rock, 60 cents a yard for loose rock, and 25 cents a yard for earth or common excavation. The estimate includes the material to be moved in the construction of the roadbed, including side tracks, terminal tracks, and drainage ditches.

Granting of Railway Charters.

A bill was laid before the Dominion Senate, May 7, having for its object the simplification of the granting of charters to companies proposing to construct railways. It was explained that the bill was designed to relieve Parliament of the consideration of the applications for the incorporation of railway companies, which took up a lot of time each session, by enabling railways to be incorporated by letters patent on terms analagous to those relating to joint stock companies. The bill provided that seven persons might petition for incorporation upon filing an agreement of association which should set forth particulars as to name of company, terminals of projected route, gauge, capital, shares, subscribed shares, head office, provisional directors, names of officials, etc. The railway to be constructed, it was provided, should be subject to the provisions of the Railway Act and any other general act relating to railways. Within twelve months after publication of the notice of agreement of association the provisional directors might apply for a certificate that the public interest required that a railway should be constructed as proposed. This certificate would determine all such matters as were set out in the articles and not provided for by the Railway Act, but the Commission was to be given power to grant certain additional powers if deemed advisable. It would not be compulsory on any company to take advantage of the act, but the act would afford an opportunity to companies to obtain incorporation under more favorable conditions than at present, while at the same time it would prevent the securing of charters for purely speculative purposes.

The C.N.R. reports that an increased acreage of from 10 to 30% will be put under crop in the Northwest this year. The greatest increase is reported to be along the company's main line through Saskatchewan and Alberta.

E. Tiffin and F. P. Brady, of the Government Railways Managing Board, were in St. John, N.B., May 1, in the course of a trip over the I.C.R. Discussing the work of the Board, Mr. Tiffin is reported to have stated that the change of system, would be little felt and that no radical measures would mark its accomplishment. The Board, he said, had simply taken over the duties of Mr. Pottinger, who had been appointed a member of it. Three members of the Board are to reside in Moncton. The fourth, the Deputy Minister of Railways and Canals, will as chairman, continue to direct the work from Ottawa. Mr. Tiffin stated that there would be no immediate change in the personnel of the staff.

Recent Dominion Legislation.

Among the acts passed during the recent session of the Dominion Parliament to which Royal assent was given May 20, were the following:

Algoma Central and Hudson Bay Ry.—Extending time for construction.

Arnprior and Pontiac Ry.—Incorporation.

Athabaska Northern Ry.—Extending time for construction.

British Columbia Southern Ry.—Extending time for construction.

Brockville, Westport and Northwestern Ry.—Extending time for construction.

Cabano Ry.—Incorporation.

Canada Shipping Act.—Amendments.

Canadian, Liverpool and Western Ry.—Incorporation.

Canadian Northern Ontario Ry.—Authorizing extensions.

Canadian Northern Quebec Ry.—Extending time for construction.

Canadian Northern Ry.—Aids for extension.

Central Ry. of Canada.—Extending time for construction.

Cobalt Range Ry.—Extending time for construction.

Government Harbors and Piers Act.—Amendments.

G.T. Pacific Branch Lines.—Authorizing extensions, etc.

G.T. Pacific Ry., Lake Superior branch.—Respecting subsidy.

G.T. Pacific Ry.—Authorizing loan.

Intercolonial and P.E.I. Rys.—Amending Employes' Provident Fund Act.

Joliette and Lake Manuan Colonization Ry.—Extending time for construction.

Kettle River Valley Ry.—Authorizing extensions.

Kootenay and Alberta Ry.—Incorporation.

Kootenay and Arrowhead Ry.—Extending time for construction.

London and Northwestern Ry.—Incorporation.

Manitoba and Northwestern Ry.—Extending time for construction.

Manitoba Radial Ry.—Extending time for construction.

Montreal Bridge and Terminal Co.—Change of name and amendments.

Montreal Harbor Commissioners.—Respecting advances, etc.

National Transcontinental Ry.—Financial.

Niagara-Welland Power Co.—Extending time for construction.

Ocean Steamships Subsidies Act.—Amendments.

Ontario, Hudson's Bay and Western Ry.—Extending time for construction.

Ottawa Northern and Western Ry.—Extending time for construction.

Prince Albert and Hudson Ry.—Incorporation.

Quebec and New Brunswick Ry.—Extending time for construction, etc.

Quebec Oriental Ry.—Extending time for construction.

Quinze and Blanche River Ry.—Extending time for construction.

Railway Act.—Amendments.

St. Maurice and Eastern Ry.—Incorporation.

Superior and Western Ontario Ry.—Incorporation.

Thessalon and Northern Ry.—Amendments.

Tillsonburg, Lake Erie and Pacific Ry.—Extending time for construction.

Victoria and Barclay Sound Ry.—Incorporation.

Windsor, Essex and Lake Shore Rapid Ry.—Extending time for construction.

New Ways To The Woods

The six railways of the Canadian Northern Railway system offer the widest choice of new territories for the fisherman, canoeist, camper and hunter.

IN NOVA SCOTIA the Halifax and Southwestern Railway, from Halifax to Yarmouth, serves seven hundred miles of ocean shore; two score generous trout streams and the famous Rossignol lake system.

IN CAPE BRETON, sixty miles of the Gulf of St. Lawrence shore is skirted by the Inverness Railway, which gives easy access to the Margaree valley—far-famed for its salmon fishing.

IN QUEBEC, the Canadian Northern, Quebec and Quebec, and Lake St. John Railways give easy access to the Saguenay, Upper St. Maurice, the Batiscan, the La Tuque game and fish preserve, and the valleys of the St. Lawrence and Ottawa. All good fishing waters, abounding with ouananiche, trout and bass.

IN ONTARIO, the entire range of the Muskokas, the Georgian Bay hinterland, the French, Pickerel, Still and Maganetawan rivers—well stocked with bass, mascalonge, and pickerel, are best reached by the Canadian Northern Ontario Railway.

IN WESTERN ONTARIO and the prairie provinces, the Canadian Northern Railway serves over three thousand miles of splendid territory. The Rainy River section follows the old Dawson fur trail, which is the finest canoe trip on the continent. There is an amplitude of sporting opportunities for the camera hunter, the fisherman and canoeist.

For literature and general or special information inquire of the information Bureau, Canadian Northern Railway System, Toronto.

Transportation Appointments.

The information under this head, which is almost entirely gathered from official sources, is compiled with the greatest care, so as to ensure absolute accuracy. Anyone who may notice any error in our announcements will confer a favor by advising us.

Alberta and Great Waterways Ry.—E. A. James, formerly Manager, Canadian Northern Ry., is reported to have been appointed General Manager of this recently incorporated company.

Canadian Northern Ry.—M. A. Murphy has been appointed Superintendent, district 1, office Port Arthur, Ont. He will also continue to act as Superintendent, Duluth, Rainy Lake and Winnipeg Ry., with office at Virginia, Minn.

Geo. Stephen, heretofore Assistant General Freight Agent, has been appointed General Freight Agent. Office, Winnipeg.

C. W. Cooper, heretofore Assistant General Passenger Agent, has been appointed General Passenger Agent. Office, Winnipeg.

W. G. Manders, heretofore chief clerk, Freight Traffic Department, Winnipeg, has been appointed Assistant General Freight Agent, vice G. Stephen promoted. Office, Winnipeg.

J. B. Sheppard, heretofore Contracting Freight Agent, Toronto, has been appointed City Freight Agent, Winnipeg, vice J. M. Horn, promoted.

A. Wilcox, heretofore Superintendent, Port Arthur, Ont., has been appointed Superintendent, district 3. Office, Dauphin, Man.

C. D. Fisher has been appointed Chief Dispatcher, district 3, vice S. S. Foley promoted. Office, Dauphin, Man.

S. S. Foley, heretofore Chief Dispatcher, Dauphin, Man., has been appointed Superintendent, district 5. Office, Saskatoon, Sask.

J. M. Horn, heretofore City Freight Agent, Winnipeg, has been appointed District Freight Agent, Edmonton, Alta. In mentioning this appointment in our May issue we referred to his former position as Contracting Freight Agent. It should have been as given above.

G. R. Hall, heretofore Traffic Manager, Duluth, Rainy Lake and Winnipeg Ry., Duluth, Minn., has been appointed Commercial Agent, C.N.R., and D.R.L. and W.R. Office, 430 Commercial National Bank Bldg., Chicago, Ill.

Canadian Pacific Ry.—The jurisdiction of J. R. Gilliland, Superintendent, Montreal Terminals, has been extended over the Smith's Falls section of district 2, W. B. Cronk, heretofore Superintendent, district 2, having been transferred to district 1, at Farnham, Que.

G. Pratt has been appointed Locomotive Foreman, Fort William, Ont., vice G. H. Reed promoted.

G. B. McGougan has been appointed Car Foreman, Fort William, Ont., vice J. Moore transferred to Winnipeg.

W. Bryce, heretofore Locomotive Foreman, Minnedosa, Man., has been appointed Locomotive Foreman at Ignace, Ont., vice A. E. Hough.

H. F. Mathews, heretofore Assistant General Superintendent, Sleeping, Dining and Parlor Cars and News Service, Eastern Lines, has been appointed Assistant General Superintendent, same service, Western Lines, vice W. Bell assigned to other duties. Office, Winnipeg.

C. C. Barclay, heretofore District Superintendent, Pullman Co., St. Paul, Minn., has been appointed Superintendent, Sleeping, Dining and Parlor Cars and News Service, Central Division, vice N. F. Paterson, who has left the service. Office, Winnipeg.

O. V. Dotts, heretofore in Dining Car Service, Pennsylvania Rd., Jersey City, has been appointed Assistant Superintendent Sleeping, Dining and Parlor Cars and News Service, Central Division. Office, Winnipeg.

W. R. White, heretofore General Baggage Master, Winnipeg, has been appointed Station Master, Winnipeg, vice P. F. Weisbrod, transferred.

W. F. Lowe has been appointed Locomotive Foreman at Minnedosa, Man., vice W. Boyce transferred to Ignace, Ont.

P. F. Weisbrod, heretofore Station Master, Winnipeg, has been appointed Trainmaster at Brandon, Man., vice W. M. Ansley, transferred to Revelstoke, B.C.

Alex. Crawford has been appointed acting Locomotive Foreman, Souris, Man., vice A. Peers, who has been granted leave of absence.

F. W. Sadlier, heretofore Locomotive Foreman at Field, B.C., has been appointed District Master Mechanic, district 1, Western Division, vice R. A. Pyne transferred. Headquarters, Moose Jaw, Sask.

J. K. Allen, heretofore Car Foreman, Calgary, Alta., has been appointed Car Foreman, Medicine Hat, Alta., vice T. G. Taylor transferred.

T. G. Taylor, heretofore Car Foreman, Medicine Hat, Alta., has been appointed Car Foreman, Calgary, Alta., vice J. K. Allen transferred.

A. Hall has been appointed Locomotive Foreman, Macleod, Alta.

F. W. Hoskins has been appointed Car Foreman, Red Deer, Alta.

A. E. Bennetts, heretofore Locomotive Foreman, Kamloops, B.C., has been appointed Locomotive Foreman, Field, B.C., vice F. W. Sadlier promoted.

R. A. Pyne, heretofore District Master Mechanic, district 1, Western Division, Moose Jaw, Sask., has been appointed District Master Mechanic, district 3, Pacific Division, vice E. E. Austin transferred to Revelstoke, B.C. Headquarters, Nelson, B.C.

W. M. Ansley, heretofore Trainmaster, Brandon, Man., has been appointed Trainmaster, Revelstoke, B.C.

C. H. Tedlock has been appointed Locomotive Foreman, North Bend, B.C.

J. C. Reed, heretofore General Foreman, Locomotive Shops, Vancouver, B.C., has been appointed Locomotive Foreman, Kamloops, B.C., vice A. E. Bennetts transferred.

G. H. Reed, heretofore Locomotive Foreman, Fort William, Ont., has been appointed General Foreman, Locomotive Shops, Vancouver, B.C., vice J. C. Reed.

W. Bell, heretofore Assistant General Superintendent Sleeping, Dining and Parlor Cars and News Service, Western Lines, Winnipeg, has been appointed Assistant Commissary Agent in connection with the Purchasing Department. Office, Victoria, B.C.

Detroit River Tunnel Co.—F. O. Waldo, Auditor, M.C. Rd. and T.H. & B. Ry., has also been appointed Auditor, D.R.T. Co. Office, Detroit, Mich.

Duluth, Rainy Lake and Winnipeg Ry.—D. T. Murphy, heretofore Trainmaster, has been appointed Assistant Superintendent. Headquarters, Virginia, Minn.

See also Canadian Northern Ry.

Grand Trunk Pacific Ry.—B. B. Kelliher, Chief Engineer, has been transferred to Winnipeg, Man., from Montreal, H. A. Woods, Assistant Chief Engineer, remaining at Montreal.

D'Arcy Tate, Assistant Solicitor, has been transferred from Montreal to Winnipeg.

It is reported that the headquarters of the Vice-President and General Manager, E. J. Chamberlin, will be transferred to Winnipeg, but no official announcement had been made up to May 27.

Grand Trunk Ry.—J. D. McLennan, heretofore chief clerk to Auditor of Freight Accounts, has been appointed Auditor of Freight Accounts, vice W. Clark, who has been given special work. Office, Montreal.

F. Rockhill, heretofore General Foreman Bridges and Buildings, has been appointed Master of Bridges and Buildings, Southern Division, vice P. Brass, who has resigned on account of ill health. Office, St. Thomas, Ont. The position of General Foreman of Bridges and Buildings has been abolished.

The following agents have been appointed:—Powassan, Ont., W. W. Langford (acting); Lisle, Ont., R. Johnston; Hamilton, King St., Ont., E. T. Mannix; London East, W. J. Burr; Caldwell, Ont., M. J. Egan; Kearney, Ont., J. M. Joynt (temporary). Outside Agencies: Clinton, Ont., Jno. Ransford; Sault Ste. Marie, Ont., Thos. Taylor.

Intercolonial Ry.—C. White, heretofore night foreman of roundhouse, Moncton, N.B., has been appointed day foreman there, vice N. Sinclair transferred to engineman.

T. A. Trites, heretofore fitter, has been appointed night foreman of roundhouse, Moncton, N.B., vice C. White promoted.

National Despatch-Great Eastern Line.—L. J. Rouleau, heretofore Soliciting Freight Agent, G.T.R., Montreal, has been appointed Travelling Freight Agent and Agent, vice H. A. Laird.

National Transcontinental Ry.—F. W. Walker, heretofore in charge of plans and specifications of shops, roundhouses, etc., G.T.P.R., has been appointed Superintendent of the erection of the Winnipeg shops.

Northern Pacific Ry.—H. Swinford, General Agent, Winnipeg, has been appointed General Agent, Vancouver, B.C., vice C. E. Lang, assigned to other duties.

W. C. Hartnett, heretofore Travelling Freight Agent, Chicago, Ill., has been appointed General Agent, Winnipeg, vice H. Swinford, transferred to Vancouver.

G. Barnes has been appointed General Agent Freight Department, Detroit, Mich., vice W. E. Belcher, assigned to other duties.

Reid Newfoundland Co.—A circular states that J. A. Boak, with headquarters at 217, Royal Insurance Building, Chicago, Ill., will have charge of this company's traffic in U.S. territory, west of St. Clair River, Detroit, Buffalo and Pittsburg. His title is General Agent. He is also Intercolonial Ry. Freight Agent for the same territory.

Thousand Islands Ry.—P. B. Whiteley, heretofore agent Bay of Quinte Ry., Deseronto, Ont., has been appointed agent, T.I.R., Gananoque, Ont., vice E. R. Chapman, resigned to enter private business.

The Transportation Salesman.

By W. B. Lanigan, Assistant Freight Traffic Manager, C.P.R., Western Lines

Every large business to-day, manufacturing or wholesaling various commodities, includes in its organization a department which supervises the introduction of its wares to the public, the extension of its commerce, and its relation with its patrons. This department is called the sales department, and its relative importance to the other departments composing the business organization may be described, briefly, as the department delivering the tangible result of what the other departments have been laboring to produce. The sales department is generally under the supervision of a sales manager who instructs and controls the operation of the selling force, who cover certain cities or districts as resident agents or as commercial travellers, and sell to the trade the output of the houses they represent. It can, therefore, be readily seen that a department forming the channel by which a business house reaches its patrons and does its business must necessarily be of great importance, and must, to perform its duties successfully, require the strong co-operation of every department behind it. A railway offering its transportation (the principal source of its revenue) to the public, must likewise have its sales organization to determine its tolls, and to divert to its rails the greatest possible tonnage. This it effects through the traffic department whose traffic manager, general freight and passenger agents, district agents and travelling agents occupy the same relative position as the sales manager and commercial travellers I have already mentioned do to the business houses they represent.

The success of a sales department must necessarily depend, first on the quality of the goods it offers, second on the price, and third on its living up to the representations of the selling agent. No business house can extend its operations or ever retain its customers that fails in any of these three requirements. The sales or traffic manager of a railway company must interest himself in the purchasing capacity of the community served by his line, because as the community prospers the more of the higher class merchandise is transported at the higher rate and the greater the general tonnage. He is consequently interested in what may be regarded as his staple business, the successful movement and marketing of the raw product of the country, knowing that this movement which is, generally speaking, in this country towards the Atlantic seaboard, will be exchanged for a west-bound movement of higher class merchandise of perhaps a lesser tonnage, but carrying higher and more profitable revenue. It is this tonnage that tests his sales organization. Its destination is to wholesale and distributing points which are nearly always competitive with other carriers. Only persistent effort in the way of canvassing, prompt attention to his customers' requirements and the co-operation of every department of his line, can make his work successful. No commercial traveller can continue to sell goods his company cannot deliver nor can he continue to sell goods of an inferior class at the same price as his competitor. It must be remembered that the traffic department is selling, not the staple class of transportation on which there is little or no profit, but the fancy

PEERLESS
The Fence that saves Expense

Because it saves repairs. It does not sag, bag, snap, or break, and when once put up it stays in good shape. Adjusts itself to all irregularities of the ground and resists weather—wear and stock especially well. Makes the best railroad fence you can possibly put up, both in appearance and lasting qualities. You can do no better than to erect Peerless Fencing. It will always be a standing example of your good judgment. The free book we are sending out is very interesting to people in your field. Shall we send you a copy—a postal request will bring one promptly.

merchandise lines on which his company must reap their surplus over operating expenses. Every member of each department has, or should have, a personal interest in a matter upon which depends not only the profit of the company, but which affects his own employment and remuneration. The old proverb that you cannot make bricks without straw needs no elaborate explanation. No company without profits can increase wages or afford increased employment by extending its operations. The departments back of the sales department must, in their own interests, deliver the goods the sales manager has contracted for or the organization of which they are members must be cut down, economies introduced, reductions made. The maintenance of way man who fails to maintain, the mechanic whose machine does not work, the engineer whose engine does not steam, the conductor who fails to remember, the yardman who fails to place, the operators whose operations are neglected, the superintendent who fails to superintend, all and every department who fails to co-operate with the salesman are working for reduced profits, and to lower the standard of wages. That without speaking of the common honesty of doing well the work we are paid for, without speaking of the loyalty every man should have for the source of his daily bread is the personal interest we all have in the prosperity of the company that employs us.

There is, perhaps, no employment that offers greater reward than railway service, none with a greater field for personal advancement; but all classes of employment in every line require the candidate to deliver the goods. The world, a writer has said, reserves its big prizes for but one thing, and that is initiative. Initiative is doing the right thing without being told. Next to doing the right thing without being told, is to do it when you are told once.

The foregoing was read before the Western Canada Railway Club recently.

The G.T.R. is suing the Ottawa and New York Ry., and F. J. Balch, Assistant General Freight Agent, O. and N.Y.R., for the return of certain papers and correspondence respecting a shipment of cotton consigned to the Montreal Cotton Co., which it is alleged, were handed to F. J. Balch on or about May 28, 1907. Damages are claimed for their alleged wrongful detention.

The branches of the Trainmen's Brotherhood at Winnipeg have asked the Department of Labor to take up, under the Alien Labor Law, the question of the operation of Great Northern Ry. trains from North Dakota into Manitoba. They suggest that the company be directed to make up new trains, manned by Canadians at the boundary for operation over the company's lines in Manitoba.

During Mar., 30 railway employes were killed and 23 injured in the course of their work on Canadian railways. Of the fatalities, 8 each were due to being run over and to falling material; 5 each to collisions and to explosions of dynamite; 2 to boiler explosion, and one each to a fall and to being caught between cars. Of the other accidents, 11 were due to collisions; 4 to being caught between cars; 3 to falls; 2 to being run over; and one each to falling material, to being struck by a passing object and to machinery.

Railway Subsidy Contracts.

The Department of Railways has entered into contracts for the construction of the following lines:

NORTH SHORE RY.—From the main line to Mount Carlyle, N.B., 2½ miles. (Dec. 22, 1908.)

MARGAREE COAL AND RY. CO.—From the I.C.R., near Orangedale, to Chimney Corner Cove, 46 miles; and from the I.C.R., between Orangedale and Point Tupper, to Caribou Cove, N.S., 4 miles. (Dec. 31, 1908.)

CANADIAN PACIFIC RY.—From Moose Jaw, Sask., in a northwesterly direction, 123 miles. (Jan. 8, 1909.)

CANADIAN NORTHERN ONTARIO RY.—From Toronto, via the east side of Lake Simcoe, through Parry Sound, to near Sudbury, Ont., 265 miles. (Jan. 23, 1909.)

From Sudbury Jct., to Hutton Mines, Ont., 30 miles. (Feb. 4, 1909.)

QUEBEC, MONTREAL AND SOUTHERN RY.—From Yamaska to a point in Lotbiniere Co., Que., 70 miles, and from Mount Johnson to St. Gregoire Station, Que., 1½ miles. (Feb. 25, 1909.)

CANADIAN NORTHERN QUEBEC RY.—From Garneau Jct., to Quebec, Que., with branch lines towards the Quebec Bridge, 83 miles. (Apr., 5, 1909.)

ELECTRIC RAILWAYS

Niagara Falls Electric Car Fares.

The Ontario Railway and Municipal Board gave the following judgment, May 6:—This is an application made by the Board of Trade of Niagara Falls against the International Ry. Co., alleging that the company in the operation of its electric railway from Chippewa to Queenston charges the public travelling on its cars a minimum cash fare of 10c. no matter how short the distance, contrary to section 171 of the Ontario Railway Act, 1906, and praying that relief may be granted by this Board, compelling the company to accept a 5c. cash fare for conveying passengers for any distance not exceeding three miles south of Bridge St. The purpose of this application, evidently, is to compel the company to comply with section 171 of the act, which provides that fares on railways operated by electricity shall not exceed 5c. for any distance not exceeding three miles, and where the distance exceeds three miles then not exceeding 2c. per mile or fraction thereof for the distance actually travelled.

On hearing of the application before the Board, the company alleged, as its sole defence, that this Board had no jurisdiction to fix passenger rates which can be charged by the company, but on the contrary that the Commissioners for the Queen Victoria Niagara Falls Park had the power to fix such rates. The issue is therefore clear cut. Who has the power and authority to fix the passenger rates, this Board or the Commissioners? It is necessary to carefully consider the original act incorporating the company (Ontario, 1892, 55 Vic., chap. 96), as well as the agreement set forth in schedule B to that Act. The agreement was made between the Commissioners and E. B. Osler and others. At the time the agreement was entered into, the parties thereto had no authority to make it, consequently it was necessary to validate it by act of Parliament. This was done by section 1 of the act referred to. Sec. 32 of the agreement in schedule B to that act provides that the company's tariff for passengers shall be a reasonable one and shall be subject to the Commissioners' approval, provided that the Commissioners are not to have the right to insist upon such a tariff as will prevent the company operating the railway at a fair profit, but it shall be their privilege to exact from the company the imposition of reasonable rates only. It is upon this clause of the agreement and subsec. 5 of sec. 171 of the Ontario Railway Act, 1906, that the company rests its contention that the Commissioners and not the Board have authority to fix the rates.

By sec. 5 of the company's incorporation act, 55 Vic., cap. 96, the clauses and provisions of the Ontario Railway Act and amendments thereto, except subsec. 18 of sec. 9 and save as barred, varied or excepted by the act itself, &c., &c., formed part of the act. By the same section certain portions of the Railway Act were expressly excluded from the Act of Incorporation. Shortly stated, the effect of section 5 of 55 Vic., cap. 96, was to incorporate therein sec. 31, R.S.O. 1887, cap. 170, the then Railway Act of Ontario, and make such section part thereof. Subsec. 9 of section 31 provides that no tolls should be levied or taken until approved of by order-in-council, &c. An order-in-council was passed January 5, 1894, approving the company's by-law fixing tolls to be levied for the conveyance of passengers and express. It was ably argued by Mr. Fraser on behalf of the company that clause 32 of the agreements barred or varied sec. 31, R.S.O. 1887, cap. 170, and that subsec. 5 of sec. 171 of the Railway Act, 1906, applied and therefore the Commissioners and not this Board had the sole power and authority to fix the company's passenger rates. It will be observed that the agreement of Dec. 4, 1891, schedule B to the act, is only validated. It is not made part and parcel of the company's Act of Incorporation. Parliament said in effect, we will validate your agreement, but when it comes to fixing your tolls or passenger rates, sec. 31 of the Railway Act of Ontario will apply. No matter what agreement you make between yourselves, the rates for the conveyance of the public on your railway must be fixed in accordance with sec. 31. If Parliament had intended that clause 32 of the agreement should vary sec. 31 of cap. 170, it would have said so, and sec. 5 would have read "save as barred, varied or excepted by the agreement." But the act does not say that. It says "save as barred, varied or excepted by this act." The conflict is between the agreement and the positive enactment of the statute, and the Board's opinion is that the statute must prevail. We therefore have before us a special act, not an agreement, providing for the fixing of tolls or passenger fares. Sec. 171 of the Ontario Railway Act, 1906, provides that "notwithstanding anything contained in any agreement with any municipal or other corporation or person, or any provision contained in any special act to the contrary, the fares to be taken by the company on a railway operated by electricity for each passenger shall not exceed 5c. for any distance not exceeding three miles, and where the distance exceeds three miles then not exceeding 2c. per mile or fraction thereof for the distance actually travelled."

The Board are of the opinion that subsec. 5 of sec. 171 of the Ontario Railway Act, 1906, does not apply in this case, for the reason that there is no

act or statute which makes the company's tariff of passenger fares subject to the approval of any Commissioners, &c., and that we are in no wise bound to consider clause 32 of the agreement, but that we are bound to fix the company's tariff for passenger fares in conformity with sec. 171. We might also refer to secs. 16 and 17 of the Ontario Railway and Municipal Board Act of 1906, as having a bearing on the question of the Board's jurisdiction. The following statutes may be referred to, in connection with the change from the Niagara Falls Park and River Ry. Co. to the International Ry. Co., but otherwise they have no bearing upon this controversy: Statutes of Canada, 1900, cap. 54; 1902, cap. 43; Statutes of Ontario, 1901, cap. 86; 1902, cap. 12.

It was suggested by Mr. Ferguson on behalf of the applicants, that this Board should state a case for the opinion of the Court of Appeal. This we declined to do. We prefer to decide the question involved, as well as we can, so that a concrete case may be presented to that court for their determination, rather than what might appear to be an academic question. We are pathfinders, and we prefer to blaze the trail ourselves, rather than ask other people to blaze it for us. The Board directed that the Commissioners of the Queen Victoria and Niagara Falls Park should be represented upon the hearing of this application. Sir Æmilius Irving appeared for the Commissioners and very ably stated his views on the question of jurisdiction. The Board make no order as to costs except that the company shall pay $20 stamps on the formal order.

Montreal St. Ry. Service and Fares.

The Board of Railway Commissioners passed the following order:—

7045. May 4.—The complaint of city of Montreal, against rates charged by and the service and operation of the Montreal Park & Island Ry. Co., and re order 6805, dated April 6, directing that Montreal St. Ry. Co. be made a party to the application, to show cause why it should not join with the M. P. & I. Ry. Co. in establishing a through route and through rates with the M.P. & I.R. Co.: Upon hearing the application, counsel for the city of Montreal and the railway companies interested appearing at the hearing (the Montreal St. Ry. Co. declaring that it appeared only to decline the Board's jurisdiction), the evidence adduced, and what was alleged; and it appearing to the Board that the M.P. & I.R. Co. unjustly discriminates against the residents of Mount Royal ward, Montreal, and in favour of the residents of the town of Notre Dame de Grace, in respect of the rates charged and in the service and operation of its railway: It is ordered that the M.P. & I.R. Co. be directed to grant the same facilities in the way of services and operation, including the rates to be charged by it, to people residing in Mount Royal ward, that it grants to people residing in Notre Dame de Grace; and that it forthwith enter into the necessary agreements for the purpose of removing the said unjust discrimination; and that with respect to through traffic over the Montreal St. Ry., the Montreal St. Ry. Co. be required to enter into any agreement or agreements that may be necessary to enable the M.P. & I.R. Co. to carry out the provisions of this order. And it is further ordered that the operation of this order be stayed for 30 days from date, to enable the M.P. & I.R. Co., or the Montreal St. Ry. Co., or both, to appeal. If no application for leave to appeal is made within the 30 days, the order to go into effect at once at the expiration of that time.

Projects, Construction, Betterments, Etc.

Brantford St. Ry.—The question of the reconstruction of the Brantford St. Ry., which is owned by the G.V.R., has been occupying a good deal of the time of the Brantford city council recently. As a result of all the consideration a resolution was passed May 10, effecting a temporary adjustment. The resolution provides that the G.V.R. shall deposit with the city clerk a bond for $25,000 and $35,000 of the bonds of the company in lieu of the bond of a guarantee company required by the agreement, and that in the meantime the company is to be allowed without prejudice to the city's right in the event of any default being made, to proceed with the work of reconstruction. The work is to be done under the direction of the city engineer. Prior to this agreement being reached the city was considering the question of cancelling the franchise and removing the rails preparatory to repaving the streets. (April, pg. 281.)

British Columbia Electric Ry.—A contract is reported to have been let to Boyd and Craig for grading of an extension on Hastings St. east, Vancouver, to the eastern boundary of Hastings townsite; and that tenders have been asked for the grading of the Powell St. extension to the Hastings Park entrance. The council of Burnaby township has granted the company a 40-year franchise for a line from the eastern boundary of the township right across it, a distance of six miles. Two survey parties are engaged in locating the route, and as rails and other material for the work are on hand, there will be no delay in pushing construction through.

Tenders have been asked for the erection of trolley poles, etc., on the Eburne-New Westminster extension; and a press report says that a contract has been let for 390 miles of aluminum wire for overhead and other work on the new lines.

Another report states that it has been decided to proceed at once with the extension of the tracks along Westminster road from Ninth Ave. to the boundary of district lot 301, and from North Arm road south to district lot 301.

A London, Eng., cable of May 10 states that the directors have authorized the expenditure of $2,500,000 upon extensions and betterments upon the company's lines during the current season. (May, pg. 365.)

Brockville, Ont.—T. M. Kirkwood, Toronto, has written the City Council of Brockville, Ont., asking it to give a guarantee on an amount of bonds at the rate of $25,000 a mile, for 20 years, to aid in the construction of an electric railway through the city, to connect Toronto and Montreal.

Calgary, Alta.—A press despatch states that owing to the labor troubles among the marine men on the Great Lakes, construction material for the street railway is not coming forward, and that work is at a standstill.

An application has been made by the residents of Chestermere, to the City Council of Calgary, to supply power for the operation of a line from Calgary, due east to Chestermere Lake, 10 miles. The Mayor states that it must first be seen that a street car system can be profitably worked in the city before an extension as suggested could be considered. (Apr., pg. 291.)

Campbell River Power Co.—Application will be made at the next session of the B.C. Legislature for an act incorporating a company with this title. Among the objects for which power is sought, are, the constructing and operating of single or double track, aerial or other tramways, with the necessary side tracks and turnout for the passage of cars and all kinds of vehicles capable of being used in connection with a tramway; the carrying of passengers and merchandise of all kinds on such tramway, by any motive power now used or that may be discovered, the erecting of poles, wires, and lines for the transmission of electrical energy, or other power, or for telephone and telegraph messages; the generation of power, and the use of water power for mechanical purposes other than the generation of electricity. Barnard and Robertson, Victoria, are solicitors for the company.

Cobourg Radial Ry.—Upon the application of the Provincial Steel Co., which is interested in this company, the Cobourg, Ont., Town Council, has granted the company a franchise for the construction of an electric railway from its works, through the town to the lake front. (May, pg. 365.)

Dunnville, Wellandport and Beamsville Electric Ry.—Press reports state that grading has been started on the first 10 miles of the 22-mile line projected to connect up these three Ontario towns by — Lloyd, to whom a contract has been let. It is also stated that tenders will shortly be asked for the supply of rails, poles, overhead equipment and rolling stock. The construction will be light, the heaviest fill being between St. Ann's and Dunnville, and the bridge construction will involve structures of no great importance over Chippewa Creek, and three or four other streams. The gradient is a comparatively easy one, the heaviest being down the mountain where it is about 3%. It is proposed to purchase power to operate the line. Jas. A. Ross, Wellandport, Ont., is President of the company. (May, pg. 367.)

Hamilton St. Ry.—The Hamilton City Council is preparing to asphalt Barton St., and desires the H.S.R. to relay its tracks at the same time. The company desires to postpone the work on account of the disorganization of traffic which it will necessitate at a time when traffic is heaviest on this piece of line. (Mar., pg. 215.)

London and Northwestern Ry.—D. A. Stewart, London, Ont., states that the company's plans provide for the construction of an electric railway from London to Sarnia, Ont., passing through Hyde Park, Melrose, Lobo, Poplar Hill and Park Hill, and a connection to Grand Bend on Lake Huron, a total of 114 miles. It is expected to start construction within six months, and when the line is completed to give a regular service with 15 cars. London is to be the location of the car and repair shops.

Moncton Electric Tramway Co.—The New Brunswick Legislature has passed an act amending in various ways the

NOS. 346 and 348 BROADWAY, N. Y. CITY, U. S. A.

The Bradstreet Company gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices.

THOS. C. IRVING,
Gen. Man. Western Canada, Toronto.

company's powers to enter into an agreement with the City Council for the construction of an electric railway within the city of Moncton, and granting an extension of time within which the railway may be constructed. (See Moncton St. Ry., Heat and Power Co., May, pg. 367.)

Montreal and Southern Counties Ry.—Press reports state that contracts have been let to Slack and Brogan for paving Common and Mill streets, and the approaches to Black's Bridge, on the company's piece of line in Montreal city, and to G. Duncan for grading in St. Lambert, and for the excavation of the sub-station and car barns to be erected on St. Denis St., opposite Elm Ave. The work of grading to the Victoria Bridge is in progress. (May, pg. 367.)

Mount McKay and Kakabeka Falls Ry.—W. F. Hogarth, President, stated May 7, that if the arrangements with the city of Fort William, Ont., are completed at once track will be laid out to the park by July 1. The city acquired all the company's property within the boundary as the result of the vote at the last municipal election, and the company now desires to secure a connection so that it can take its traffic into the city. (Feb., pg. 136.)

Niagara, St. Catharines and Toronto Ry.—A connection has been made between the N., St. C. and T. Ry. and the Toronto, Hamilton and Buffalo Ry. at Welland, Ont. This will greatly facilitate the handling of freight traffic between the two companies. (Oct., 1908, pg. 737.)

Ontario West Shore Ry.—Grading will, it is reported, be recommenced on the section of the line between Kincardine and Goderich, early in June. The heavy rains have prevented much of the work that had been outlined for the spring. J. W. Moyes, engineer, states that 4,500 tons of rails have been purchased, half of which will be landed at Kincardine, and half at Goderich, in readiness for laying from each end of the line during the summer.

The Goderich Town Council raised the question at its meeting May 7 as to how far the rights of the various municipalities guaranteeing the company's bonds, were protected, as regards the work of construction; and in response to questions on the subject, J. W. Moyes has said that the books and reports of the company are open to inspection by the municipalities concerned, and that every dollar is accounted for, and the strictest economy practiced.

Ottawa and St. Lawrence Electric Ry.—At a meeting of shareholders at Morewood, Ont., May 4, the following were elected directors: C. M. Willard, J. K., B. and W. M. Longbridge, J. W. Bogart, A. Merkley, and J. McFarlane. C. M. Willard of Morewood, was subsequently elected President, and —. Iveson, Secretary. Meetings have been held in support of the project at Prescott and other points, and the directors state that stock enough to start the line has been subscribed by the farmers along the route; that nearly all the municipalities through which it will pass have voted cash subsidies, and that a New York firm has taken over the selling of the bonds. The route of the line as projected is as follows: Starting from Ottawa it will touch Metcalfe, Ormond, Winchester Springs, Williamsburg, Morrisburg, then west along the St. Lawrence River, passing Iroquois, Cardinal, Prescott, Maitland, to Brockville, thence northerly, taking in Lyn, Athens, Perth, Lanark and Arnprior, thence along the Ottawa River to the starting point. It was reported that surveys were started May 10, A. H. N. Bruce, Ottawa, being Chief Engineer in charge. It is stated that an arrangement has been made to obtain electric power from Morrisburg, until the company develop a power of its own which it hopes to secure in the vicinity of Ottawa. (May, pg. 367.)

People's Ry.—The by-law submitted to the taxpayers of Wilmot tp., Ont., to grant a bonus in aid of the construction of this projected railway through the township, was defeated by 42 votes. At a meeting held at New Hamburg, Ont., May 2, the directors appointed a number of business men from Stratford, Tavistock, New Hamburg, and from Wilmot and Blenheim tps., as an advisory board. A. N. Warfield, New Hamburg, is in charge of the project. (May, pg. 367.)

Quebec and Saguenay Ry.—In connection with the reported transfer of the control of the Quebec Ry., Light and Power Co., it is stated that the rearranged company will undertake the construction of the projected line from St. Joachim to Murray Bay, Que., which the Q. and S. Ry. Co. is authorized to construct. The starting point would be at St. Joachim, the terminal point of the Q., Ry. L. and P. Co.'s Montmorency division, and the line would be constructed along the shore of the St. Lawrence River, passing through Baie St. Paul to Murray Bay. The act also gives the company power to extend the line to St. Catherines Bay, where a deep water port may be established. The distance from St. Joachim to Murray Bay is 56 miles, and the cost of this portion of the line is estimated at $2,000,000. It is stated that the company's bonds have been underwritten, that construction will be started this summer and the line completed within two years. (April, 1908, pg. 283.)

Sarnia St. Ry.—During the current construction season the company proposes to relay its double track main line with 70-lb. rails, for which the city will provide a roadbed of creosoted block. The extension made during 1908 was a line of 1.5 miles through the southern part of the city, on Vidal and Christina Sts., the purpose of which was to take over the passenger and baggage business from which the Pere Marquette Rd. was withdrawing. The P.M.R. ceased operating its trains up town Jan. 1, and since that date the S.S.R. has taken over the business. (Feb., pg. 197.)

Stratford and St. Joseph Radial Ry.—At a meeting of provisional directors in Stratford, Ont., May 4, their interests were transferred to a new board which is stated to have subscribed for $125,000 of stock. The new board is said to have entered into a contract with R. H. Sherwood, of Brooklyn, N.Y., for the construction of the line, he taking payment in the company's bonds.

The projected line will have a total length of 65 miles, extending from Stratford to St. Joseph, on the shore of Lake Huron, via Carlingford, Russeldale and Exeter or Hensall. It is proposed to issue bonds to the extent of $25,000 a mile, carrying 4% interest, and to run for 30 years. The municipalities are being asked to guarantee these bonds, so as to enable the company to issue them at par. The capital is fixed at $500,000. A proposition has been submitted to the Stratford City Council that it give a guarantee of bonds up to $250,000. This is under consideration.

It is proposed to operate the line by trolley in the ordinary way, and to keep two 50-ton steam locomotives in reserve to provide a partial service in case of a breakdown of the power plant. An hourly service will be given for passengers during 15 hours each day, and during the remaining 9 hours freight will be carried. (May, pg. 367.)

Stratford Tramway Co.—A proposition has been submitted through J. C. Makins, Solicitor, to the City Council of Stratford, Ont., for the construction of an electric railway in the city. The company, he stated, was being promoted by responsible parties, and if the franchise were given a contract with guarantees, would be at once entered into. The draft contract submitted provides for the carriage of freight over the lines to be constructed, subject to regulations; the interchange of traffic with any other electric line reaching the city, and the utilization of Niagara power purchased from the city. The application has been referred to the finance committee for consideration.

A press report states that the company, which is stated to be organized under the laws of the province, and subject to the control of the Ontario Railway and Municipal Board, is being promoted by the St. Mary's and Western Ontario Ry., which in turn has the financial and moral support of the C.P.R. (See also Stratford and St. Joseph Radial Ry.)

St. Thomas Street Ry.—Construction was started May 7 on the subway under the Michigan Central Rd., at Ross St., St. Thomas, Ont. The commissioners of the municipal street railway propose laying a track on the street through the subway with a passing track 150 ft. long on the south side. The cost of track and overhead work is estimated at $5,600, which it is proposed to raise by means of debentures. (Dec., 1908, pg. 891.)

Toronto.—A letter has been received by the Toronto City Council, from the Kearney High Speed Ry. Co., London, Eng., suggesting the construction of an underground railway in the city to be constructed on the company's plans. Two routes were suggested, one along Yonge St. to the Custom House, and the other from East Toronto along Queen, Dufferin and Dundas Sts. to West Toronto. No action has been taken by the Council upon the communication.

Toronto and York Radial Ry.—As a result of its investigation of the complaints of the municipalities, and an inspection of the line as far as Mulock's corners, 28 miles north of Toronto, May 14, the Ontario Railway and Municipal Board made an order May 18, directing the company to macadamize between the rails of its Metropolitan divison at various points. Leave to appeal against the order was given. (May, pg. 369.)

Toronto Ry.—The city's appeal against the order of the Ontario Railway and Municipal Board, giving the T.R. Co. the right to lay tracks on Adelaide and Bay St., University Avenue, and Richmond and Wellington Sts., has been argued before the Court of Appeal, and judgment reserved.

The question of the construction of a car line to the eastern entrance of the exhibition grounds is still causing con-

siderable discussion. The company desires to extend its line from Bathurst St. through the grounds of the Old Fort, which the city is acquiring from the Dominion Government, while the city favors a line along Tecumseh St., outside the Old Fort grounds. The Consumers' Gas Co. is opposed to the company's plan on the ground of the possible danger to its gas-holders at the foot of Bathurst St. The matter was mentioned in the House of Commons May 12, when the Minister of Militia said the conditions attaching to the transfer of the property to the city require that the Old Fort shall, as far as possible, be restored to its original condition. There is no prohibition in the deed against letting the street railway go through the grounds, but the plan of the proposed restoration and all matters connected with it will have to be approved by the Government before anything is done. (May, pg. 369.)

Toronto Suburban Ry.—Now that the city of West Toronto has been taken into the city of Toronto, the question of the extension of the company's line towards the Lake Shore Road at Swansea is being considered by the Toronto Civic Parks and Exhibition Committee. The committee met May 20 to consider the question and went over the projected route in the vicinity of High Park. (May, pg. 369.)

Winnipeg Electric Ry.—The Manager states that the company is ready to proceed with the various extensions contemplated on the lines in the city, as soon as the City Council reaches a decision as to paving. Among the extensions contemplated are: From Maryland St., westerly on Portage Ave.; second track construction on Dufferin Ave.; extension on Academy Rd., and a second track from Main St. to Andrew St., on Selkirk Ave. (April, pg. 283.)

Electric Railway Finance, Etc.

British Columbia Electric Ry.—Gross operating earnings for Mar., $186,724; operating expenses, $114,447; net operating earnings, $72,277; renewal funds, $13,958; net earnings, $58,319; approximate income from investments, $13,550; net income, $71,869; against $158,339 gross operating earnings; $94,114 operating expenses; $64,225 net operating earnings; $10,750 renewal funds; $53,475 net earnings; $11,036 approximate income from investments; $64,511 net income for Mar., 1908. Aggregate gross earnings for 9 months ended Mar. 31, $1,712,281; net earnings, including estimated income from investments, $783,133; against $1,490,260 and $727,130 for same period, 1907-08.

Halifax Electric Tramway.—Railway receipts for Apr., $14,495.74, and for 2 weeks ended May 14, $6,623.64; against $13,303.12 and $5,738.54 for same periods, 1908. Aggregate receipts for 4 months ended Apr. 30, $54,376.56, against $51,213.85 for same period, 1908.

Montreal St. Ry.—Total earnings for Apr., $294,373.85; expenses, $173,351.62; net earnings, $120,822.23; city percentage on earnings, $22,024.96; interest on bonds and loans, $15,099.83; rent leased lines, $498.67; surplus, $83,198.77; against $280,735.83 total earnings; $170,141.23 expenses; $110,594.60 net earnings; $19,727.73 city percentage on earnings; $17,323.08 interest on bonds and loans; $444.43 rent leased lines; $73,099.36 sur-

The important saving in the power bill of the railroad shop effected by individual Motor drive

YOU are naturally interested in the problem of increasing the efficiency of your shops.

You want to get more and better work out of your shops and you want to get it at the lowest possible cost.

You realize that a saving of 25% in your power bill is a considerable item and one worth investigating.

Then you will be interested in the Western Electric Individual Motor Drive for the Railroad Shop.

Let us give you some facts—

First, with Western Electric Individual Motor Drive you pay only for the power used in actual production. There is no power wasted in turning idle pulleys, shafting, and slipping belts. From actual tests, this waste power amounts to from 25 to 50% of the total power delivered by the engine.

You know how important it is to perform every operation at the greatest possible speed. Now, on a belt driven lathe, the cone steps give speed variations of about 50% each. If the first speed is too high for the operation, the next choice of speed is 50% lower than necessary. With the Western Electric variable speed motor any desired speed can be maintained without inconvenience to the operator. Consequently the speed of the operation is greatly increased and the machine becomes much more productive.

The portable machine, an absolute necessity in operation on very large work, is made reliable and practical by means of the electric motor drive.

The saving in floor space and the ease and quickness with which any machine may be moved at any time are points which alone should recommend the direct motor drive system to you.

If you are interested—if you want to know more about this system just write us and we will gladly give you full information.

Write to-day for our Bulletin No. 714.

plus for Apr., 1908. Aggregate total earnings for 7 months ended Apr. 30, $2,107,716.40; net earnings, $767,781.06; total charges, $218,866.04; surplus, $548,-915.02; against $2,027,872.71 gross earnings; $711,865.75 net earnings; $224,108.56 total charges; $487,757.19 surplus for same period, 1907-08.

Quebec Ry. Light and Power Co.—Local reports state a syndicate, headed by Rodolph Forget, M.P., has secured a controlling interest in the company, and that its members are interested in the project for an electric railway to Murray Bay, Que., under the title of the Quebec and Saguenay Ry. It is further stated that the same interests have undertaken to provide the necessary capital for the construction of the line.

St. Thomas St. Ry.—The report presented to the city council of St. Thomas, Ont., as to the operations of the municipal street railway for April shows that 32,219 passengers were carried, against 31,110 in April, 1908. The receipts were: Sale of tickets, $680.75; cash fares, $476.51; total, $1,157.26, against $1,144.66 in April, 1908.

Toronto Ry.—Gross earnings for Mar., $298,142; operating expenses, maintenance, etc., $162,286; net earnings, $135,-856; against $272,808 gross earnings; $156,046 operating expenses; $116,762 net earnings for Mar., 1908. Aggregate gross earnings for 3 months ended Mar. 31, $861,768; net earnings, $393,707; against $803,767 and $337,215 for same period, 1908. Approximate earnings for Apr., $297,858.14, against $272,929.02 for Apr., 1908. The percentage on earnings paid to the city for Apr. was $44,990, against $41,229 for Apr., 1908.

London St. Ry.—Gross earnings for Apr., $18,321.56; expenses, $13,933.49; net earnings, $4,388.07; interest charges, $2,405.61; surplus, $1,982.46; against, $17,-178.54 gross earnings; $13,811.58 expenses; $3,366.96 net earnings; $1,004.63 surplus for Apr., 1908. Aggregate gross earnings for 4 months ended Apr. 30: $70,636.40; expenses $53,054.89; net earnings, $17,581.51; interest charges, $9,-567.78; surplus, $8,013.73; against, $67,-465.68 gross earnings; $52,543.27 expenses; $14,922.41 net earnings; $9,243.77 interest charges; $5,678.64 surplus for same period 1908.

Electric Railway Notes.

The Ottawa Electric Ry. has recently received 4 semi-convertible pay-as-you-enter cars, 21 ft. bodies, from the Ottawa Car Co.

The Winnipeg Electric Ry. has purchased three car bodies in the U.S., and they are being mounted on trucks at the Toronto Ry.'s car shops, Toronto.

The Ottawa Electric Ry. has purchased a site at the corner of the Britannia line and Holland Ave., upon which it is proposed to lay out an athletic ground.

The Ottawa Valley Motor Transit Co. inaugurated its motor bus service between Ottawa and Richmond May 6. The vehicle is driven by a 16 h.p. motor.

The Grand Valley Ry. is reported to be negotiating with the Ottawa Car Co. for some cars, and with other companies for the purchase of four sets of double trucks and one set of single trucks.

The Ontario Railway and Municipal Board has been asked to make an order enforcing the original agreement made between the town of Sandwich and the Sandwich, Windsor and Amherstburg Ry.

The last link has been completed in a chain of electric railways which renders it possible for a passenger to travel by trolley between New York and Chicago, 970 miles. A system of through cars will doubtless be put on in due time.

The Quebec Ry. Light and Power Co. has filed its standard passenger tariff C.R.C. 7 with the Board of Railway Commissioners, fixing the maximum passenger elevator tolls at the Montmorency Falls elevator at 5c. each way, and no half fares.

Replying to a question in the Nova Scotia Legislature May 4, Hon. Mr. Chisholm stated that the subject of granting subsidies in aid of the construction of electric railways was under the Government's consideration. No application for such a subsidy, however, had been made.

The International Traction Co. has been ordered by the Ontario Railway and Municipal Board to reduce the fare on its line for the trip from Suspension Bridge to Niagara Falls, Ont., from 10c. to 5c. The Board refused to grant a stated case on the subject of jurisdiction for the consideration of the court of appeal.

The Chatham, Wallaceburg and Lake Erie Ry. is reported to have purchased an additional 25-ton electric locomotive for freight service, and two storage batteries; to have contracted to equip its entire stock of cars with Westinghouse automatic air brakes, and to change two of its single-end cars to double-end ones.

Rev. C. W. Gordon, Winnipeg, is chairman of the board of conciliation appointed to consider certain differences between the Winnipeg St. Ry. and its employes. W. J. Christie represents the company, and J. G. O'Donoghue, Toronto, the men. The men ask for a nine hour day, and the right for all ranks to join the union.

The Montreal Street Ry. has laid some tracks on St. Alexander St., south of St. Catherine St. Our report says they have been laid for the purpose of a Y, and another that they are for the purpose of hauling stone for some building operations going on. As the question of hauling freight on the streets is as yet unsettled, citizens are asking which report is correct.

The British Columbia Electric Ry. is sueing J. A. Fairbairn, of Vancouver, B.C., for damages occasioned to their light and power system by blasting operations on the defendant's property. The effect of one of the blasts was that one of the company's poles carrying the high tension wires was thrown down, causing the burning out of three transformers at Lake Buntzen and other damage. The damage is placed at $4,000.

The Board of Railway Commissioners has issued an order directing the Montreal St. Ry. and the Montreal Park and Island Ry. to grant the same facilities and treatment to the residents of Mount Royal ward as have been granted to Notre Dame de Grace. The present fare over the lines of the two companies is 10c., and it is claimed that this particular ward is being discriminated against in comparison with other parts of the city. The question of jurisdiction was raised, and the companies were given time to appeal.

Grain Elevator Notes

S. J. Kent is erecting a farmers' elevator at Carlyle, Sask.

The farmers in the neighborhood of Strome, Alta., are organizing an elevator company.

The C.P.R. elevator at Prescott, Ont., has been overhauled and improved at a cost of about $4,000.

The Ogilvie Milling Co. is reported to be about to erect a fireproof elevator of 300,000 bush. capacity at Winnipeg.

The Sunny Belt Elevator Co. is erecting elevators of 30,000 bush. capacity at Carstairs, Magrath and Crossfield, Alta.

The British American Grain Elevator Co. is erecting grain elevators at nine points along the Canadian Northern Ry. line between Brandon, Man., and Regina, Sask.

W. J. Bettingen & Co. are said to be planning to erect elevators at Carstairs, Crossfield, Strathmore, Gleichen, High River, Cayley, Nanton, Parkland and Warner, Alta.

Elevator sites have been applied for at Burrard Inlet, Vancouver, B.C., and it is stated to be the intention of the Alberta Pacific Elevator Co. and the Alberta Grain Co. to erect elevators there.

The Battleford Milling and Elevator Co., Ltd., Battleford, Sask., has increased its capital stock from $30,000 to $40,000.

The Islay Elevator Co., Ltd., has been incorporated under the Northwest Territories Ordinance, with office at Islay, Alta.

The Lake of the Woods Milling Co. is reported to have decided to erect a large modern flour mill at Depot Harbor, Ont., with a capacity of 5,000 barrels a day. The buildings and plant will cost about $500,000. This will make the company the largest of its kind in Canada.

An order in council has been passed approving the Montreal Harbor Commissioners' by-law, relating to the G.T.R. elevator at Windmill Point, as follows: "Shovelling grain by power or hand, as the steamer or barge will permit, $2 per 1,000 bush., to be paid by the steamer or barge."

It is reported that four elevators will be erected shortly at Carstairs, Alta., one of 30,000 bush. capacity by the Sunny Belt Elevator Co., one of 40,000 bush. capacity by the Imperial Elevator Co., one by W. J. Bettingen & Co., and another by the Alberta Grain Co. Work has been commenced there on the last mentioned.

The MacGregor Grain Growers' Elevator Co., Ltd., has been incorporated under the Manitoba Companies Act, with a capital of $5,000 and office at MacGregor, to carry on a general grain warehousing and elevator business, and to acquire, build, maintain and operate all classes of elevators and warehouses. The provisional directors are: N. Chant, A. Hay, P. Poiser, D. Shaw, S. Snow, T. Rowan, J. Muir, R. Cutting, J. Irwine and C. Currie, MacGregor, Man.

Following are the officers and directors of the Goderich Elevator and Transit Co. for the current year:—President, I. A. Hunt, London, Ont.; Vice-President, S. R. Stuart, Mitchell, Ont.; Secretary, Manager and Treasurer, W. L. Horton, Goderich, Ont.; other directors: S. Dyment, Barrie, Ont.; M. McLaughlin, Toronto; E. R. Weyland, Port Arthur, Ont.; M. Goldie, Ayr, Ont. The financial statement presented at the annual meeting, recently held, was a satisfactory one.

A deputation from the Western Grain

FENCE TALK NO. 5

Page "Empire" Fences have "high-carbon" horizontal 9-gauge wire.

High-carbon wire is harder, tougher, and far stronger—from a third to a half as strong again—stands 2,400 lbs. strain-test.

Page "Empire" Fences, because of this extra strength, have ample spring in reserve to hold a long panel tight and sagless with fewer posts by a third.

Page Fence uprights are fastened to horizontals by a positive lock, clinched so tightly as to make a solid joint that cannot work loose nor slip—even under the severest strain. But the intersecting wires are not injured.

Other fences and our "Star" brand have "hard drawn" wire. Hard drawn wire is softer, is weaker—stands but 1,800 lbs. strain-test.

Other fences thus lack springiness, need three posts to Page Fence's two and then sag and give.

Other fences half-fasten the crossing wires together with a mere twist of wire that will slip. Some use locks that dent and weaken the wire.

These are the reasons why Page High-carbon Fences cost less and wear best, because they need a third less posts and a third less labor to erect, and yet make a tighter, sightlier, sag-proof and more enduring fencing. The Page Wire Fence Co., Limited, Walkerville, Toronto, Montreal, St. John, Vancouver, Victoria.

Growers' Assocation presented a petition signed by 10,000 Manitoba farmers, to the Dominion Government at Ottawa, April 28, asking that the Government assume control of all terminal and transfer elevators between Port Arthur and the Atlantic coast. A similar petition is coming forward, signed by farmers in Saskatchewan. A further deputation waited on the Government May 2, to urge the same matter, on behalf of the Dominion Millers' Association. Sir Richard Cartwright, Minister of Trade and Commerce, received the deputations.

R. Meighen, before leaving Canada for Europe recently, gave a most emphatic contradiction to the rumor as to the merger of the Lake of the Woods Milling Co., and the Ogilvie Milling Co., so far as the first named is concerned.

The Westminster Elevator Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $250,000, to acquire lands and to erect buildings for the purpose of receiving, warehousing and delivering grain and other merchandise and in connection therewith to own and operate steam and other vessels, for the carriage of passengers and merchandise.

F. W. Peters, Assistant to Second Vice-President, C.P.R., on his return to Winnipeg from Mexico, recently, intimated that the C.P.R., in conjunction with the Tehuantepec Ry., had the question of the export of grain from the Pacific coast well in hand. He said that possibly neither company would be able to handle the first crop by means of permanent elevators, but both were quite prepared to deal with it by temporary devices. W. Whyte, Second Vice-President, confirmed this latter by saying: "We will instal permanent devices with all possible speed, but whether they will be ready for the first crop or not I cannot definitely state. I do say, however, that we will handle all the grain we are required to, possibly by means of clams, but whatever the means, we will handle it."

A bill was introduced into the House of Commons, May 3, to amend the Manitoba Grain Act, providing that grain shipped by vessel shall be officially weighed in and out of terminal elevators. The intention of the bill is to do away with numerous complaints of vessel owners that they are continually weighed out short at such elevators. It has been claimed that last year, vessel owners lost over $50,000 by this means. The Government already provides official weighmasters to weigh in at terminal elevators, but no such provision is made at transfer elevators, and the losses appear to occur between these two points. The bill provides an option, that the shippers and carriers can, by mutual arrangement, avoid weighing charges; otherwise all grain must be weighed in and out.

Grain Shipments From the Dual Ports.

F. E. Gibbs, Dominion Grain Inspector, has favored us with the following statement of shipments of grain from terminal elevators at Fort William and Port Arthur, Ont., from close of Navigation, 1908, to May 14, 1909, inclusive.

Wheat	5,528,287-20
Oats	2,093,010-08
Barley	199,025-00
Flax	187,483-20
SHIPMENTS ON CROP, 1908.	
Wheat	41,539,770-40
Oats	8,046,212-08
Barley	1,649,889-02
Flax	705,396-48
TOTAL ALL GRAIN.	
Crop, 1908	51,941,268-00

Vessels Removed from the Register.—During April, the following vessels were removed from the register for the reasons assigned:—Steam: Alma V., Kenora, Ont., 38 tons, dismantled; W. E. Gladstone, Owen Sound, Ont., 30 tons, lost; Wenonah, Toronto, 3 tons, burned. Sailing: E. A. O'Brien, Maitland, N.S., 1,037 tons, condemned; Genesta, Charlottetown, P.E.I., 29 tons, transferred to Newfoundland; Luarca, Windsor, N.S., 632 tons, lost; Mary E., Sackville, N.B., 99 tons, wrecked; Rowena, St. John, N.B., 96 tons, wrecked.

During March, 6 employes were killed and one injured in the course of their work in connection with the navigation of Canadian waters. Of the deaths, 4 were due to drowning and 2 to falls; while the other accident was caused by machinery.

SAULT STE. MARIE CANALS TRAFFIC.

U. S. Canal opened April 20, and Canadian Canal opened April 21, 1909.

MARINE DEPARTMENT

Atlantic and Pacif c Ocean Marine.

A Canadian annex to the Passmore Edwards Sailor Palace, London, Eng., was opened May 11, by the Lady Mayoress, acting for Lord Strathcona.

The Japanese cruisers Aso and Soya arrived at Victoria, May 5, on a visit, and the officers and crew were entertained by local army officers, &c., on behalf of the Dominion Government.

The s.s. Stikstad arrived at North Sydney, N.S., from Great Britain, May 14, with her bows considerably damaged by ice. A survey has been made, and the vessel sent to Halifax, where she has been docked for repairs.

With regard to press reports to the effect that there was an exclusive compact between the G.T.R. and the White Star-Dominion Line, for the handling of ocean borne traffic, we are advised that there is no such compact, and that the statement has been officially denied.

The electric freight transporter designed by F. W. Cowie, Chief Engineer, Montreal Harbor Commission, was put into operation May 7, at No. 9 shed, Montreal, and is reported to have performed the work of unloading the C.P.R. s.s. Mount Temple, in a satisfactory manner.

The agreement between the steamship companies and the longshoremen for the current season, provides for the payment of a bonus of 2½c an hour, at the end of the season, to all those working for the entire season. A further small concession was also made regarding extra pay for night work.

Capt. T. McDowell, of the Head Line s.s. Bray Head, was presented with a gold watch, chain and pendant by the Lord Mayor of Belfast, Ireland, on behalf of the U.S. Government, recently, in recognition of his services in rescuing the crew of the U.S. schooner William H. Skinner, Feb. 22, 1908.

The Australian Government has decided that it cannot, for the present, entertain the proposals made by Canada in regard to the projected "all red" route. While recognizing the importance of the scheme, it regrets that in the present state of its finances, it is unable to concur in the proposals, but it is hoped that when the financial limitations imposed on the Commonwealth by its constitution are removed, it may be able to express a more decided opinion on the merits of the proposals.

The winter season of Atlantic traffic closed May 1, by the sailing of the C.P.R. s.s. Lake Erie from St. John, N.B. While the inward business is estimated to compare favorably with that of last year, it has not been so large as about two years ago. Outward traffic returns, it is anticipated, will show to some advantage, especially in cargoes to Great Britain. The lower freight rates will possibly detract from the advantage gained by handling increased tonnage. The total sailings for the season were 107, compared with 111 of the 1907 season.

An attempt to draw Sir William Van Horne, at Liverpool, Eng., recently, as to the C.P.R. shipbuilding programme, resulted in the statement that "it was the company's determination to keep pace with the times." The amount of satisfaction which can be taken from this re-

mark, by those press correspondents who have been busy with the reports of the laying of keels at various dockyards in England for the C.P.R., must be enormous. With regard to the latest of these rumors, in which it is said that orders have been placed in England for two vessels to have a speed of 20 knots an hour, each vessel to be equipped with combined turbine and reciprocating engines, we were authorized May 11 to say that there is no foundation for the statement.

The Dominion Iron and Steel Co. will shortly ship 15,000 tons of steel rails to Prince Rupert, B.C., for the G.T.P.R. In commenting on this, the daily press, in general, states that the decision" . . . to forward its order . . . across the Isthmus of Panama, via the Tehuantepec Ry., will be, to many, the first revelation of a new trade route." We are advised that the Dominion Iron and Steel Co. will not ship the rails in question by the route named, but they are being transported by the all-water route around Cape Horn in vessels, sailing from Sydney, N.S., in May, July and Aug. We might also say that though the statement may be, "to many, the first revelation of a new trade route," it is no new thing to those whose business is concerned with transportation matters, as, we have, at intervals, from Jan., 1908, published interesting items relative to the development of this route, in which Canada is playing no mean part.

The White Star-Dominion Line S.S. Laurentic arrived at Montreal May 7. This is the first vessel of the new service to be operated between Great Britain and Canada under the joint management of the White Star and Dominion Lines. The Laurentic is the largest vessel, at present, trading to Canadian ports, her dimensions being: Length, 565 ft.; breadth, 67.4 ft., and about 15,000 tons. She has accommodation for about 260 first-class, 430 second-class and over 1,000 third-class passengers. The accommodation generally is of the most up-to-date and luxurious description, and the equipment includes the latest improved system of Marconi wireless telegraphy and of submarine signalling apparatus. While the vessel was in port a number of receptions were held on board at which the principal men connected with or interested in the marine matters of Canada, attended. A full description of the vessel was given in our Oct., 1908 issue. The second boat of this service, the Megantic, will also be on the route during the present season.

Maritime Provinces and Newfoundland.

Capt. Neil Hall has been appointed surveyor to the British Corporation for the Halifax district.

A. Pearl, keeper of the light at Tancok, N.S., has been granted the Imperial Service Medal on his retirement.

The Bras d'Or Steamship Co., Sydney, N.S., is building a steamboat at Shelburne, N.S., which it hopes to launch June 1.

The Dartmouth, N.S., ferry commissioners have awarded the contract for the repair of the ferry wharf to Reed and Archibald.

The name of the steamboat Granville, No. 116653, registered at Yarmouth, N.S., has been changed by order in council to Connors Bros.

The French fishing schooner Dictator

THE CLIFTON HOTEL

NIAGARA FALLS, CANADA.

Rates $4 per day up, American Plan. For weekly rates and further information, address: GEORGE R. MAJOR, Manager.

OPEN THE YEAR ROUND

The only Hotel that Commands an Unrivalled View of Both Falls.

HOW TO REACH THE CLIFTON HOTEL.

Arriving on Grand Trunk Railway or Wabash Rd., at Niagara Falls, Ont. Hotel bus meets all trains or take trolley to hotel—7 minutes. Arriving on Michigan Central Rd., Canadian Pacific Railway, at Victoria Park station—Hotel bus meets all trains, only three minutes' walk from station to hotel.

International Railway (trolleys), connecting with Niagara Navigation Co. steamers at Queenston, to or from Toronto, pass the door.

IMPORTANT

Guests coming to the Hotel should see to it that they are taken to The Clifton Hotel, CANADIAN SIDE, and also that their mail is addressed "Care of The Clifton Hotel, Niagara Falls, CANADA." To insure prompt delivery, don't forget to make Canada plain in the address.

C.P.R. LANDS

The Canadian Pacific Railway Company have 9,000,000 acres of selected lands for sale in Manitoba, Saskatchewan and Alberta.

Maps, as enumerated below, showing these lands in detail, will be sent free on application.

Map No. 1—Winnipeg to Second Meridian	$ 8.00 to $15.00 per acre.
Map No. 2—South-Eastern Saskatchewan, 2nd to 3rd Meridians	10.00 to 25.00 per acre.
Map No. 3—Main Line, 3rd Meridian to Range 10, W. 4th Meridian (generally)	8.00 to per acre.
Map No. 5 South-Western Alberta	8.00 to 15.00 per acre.
Map No. 6—Part of Alberta, Edmonton, Battle and Saskatchewan Rivers Districts—4th Meridian to Range 7, West 5th Meridian	10.00 to 25.00 per acre.
Map No. 7—Part of Western Saskatchewan, 3rd to 4th Meridians	10.00 to 25.00 per acre

All prices are subject to change without notice.

TERMS OF PAYMENT

An actual settler may purchase not more than 640 acres on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal, with interest, in nine equal instalments annually thereafter, as shown in the following table:

160	Acres at	$ 8.00	per acre,	cash payment	$191.70	first year's interest	$ 65.28	and nine instalments of	$160.00
"	"	9.00	"	"	213.70	"	"	"	73.46	"	"	180.00

"	"	15.00	"	"	359.50	"	"	"	122.44	"	"	300.00

Purchasers who do not undertake to go into residence on the land are required to pay one-sixth of the purchase money down, balance in five equal annual instalments with interest at the rate of six per cent. per annum. Interest at six per cent. will be charged on overdue instalments.

F. T. GRIFFIN, Land Commissioner, Winnipeg.

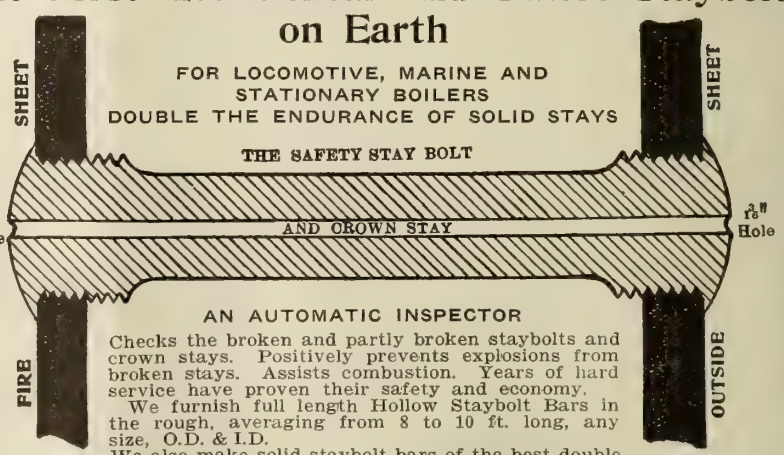
CANADA NORTH-WEST LAND CO.

This Company has 525,000 acres of selected lands in Manitoba and Saskatchewan which offer excellent opportunities to settlers and investors who desire to secure good lands in well-selected districts. These lands are on sale at the Company's Office at Winnipeg, and at the various land agencies of the Canadian Pacific Railway Company.

F. T. GRIFFIN, Land Commissioner, Winnipeg.

The Most Economical and Safest Staybolt on Earth

FOR LOCOMOTIVE, MARINE AND STATIONARY BOILERS
DOUBLE THE ENDURANCE OF SOLID STAYS



AN AUTOMATIC INSPECTOR

Checks the broken and partly broken staybolts and crown stays. Positively prevents explosions from broken stays. Assists combustion. Years of hard service have proven their safety and economy.

We furnish full length Hollow Staybolt Bars in the rough, averaging from 8 to 10 ft. long, any size, O.D. & I.D.

We also make solid staybolt bars of the best double refined charcoal iron. Average length, 16 to 20 ft.

FALLS HOLLOW STAYBOLT CO., CUYAHOGA FALLS, OHIO

was seized, at North Sydney, N.S., May 14 for a breach of the customs regulations, committed last year.

The name of the schooner Kate A. Burns, No. 94670, registered at Charlottetown, P.E.I., has been changed by order in council to Effie J. Agnew.

The owners of the schooner Regina B. are suing the owners of the s.s. John Irwin for the value of the schooner, which was run down by the steamer last fall, near Halifax.

The s.s. Cacouna was libelled at Halifax, N.S., on a claim for $6,000 recently at the instance of G. Frecker, of St. Pierre, Miquelon, for running down his schooner near St. Pierre last year.

The wrecking steamer Lord Strathcona returned to Quebec, May 8, from Anticosti, where she went to attempt to float the s.s. King Edward, wrecked there in the fall. It is probable the wreck will be abandoned.

The Minister of Public Works, in reply to questions in the House of Commons, May 13, said that the right of way to the Panmore Island wharf, P.E.I., purchased by the Dominion Government, Apr. 9, 1906, was now open.

The Maritime Steamship Co.'s s.s. Granville commenced its new service, May 3, between St. John and St. Andrews, N.B., calling at Beaver, Dipper and Black's Harbors and Back Bay. Capt. E. H. Warnock is in charge.

The Halifax and Canso Steamship Co.'s s.s. Scotia collided with the Allan Line s.s. Siberian, May 11, near Meagher's Beach, and had her bows and forward bulwarks smashed. The damage done was all above the water line.

The Magdalen Islands Steamship Co.'s s.s. Amelia has been placed on the south shore route this season, between Halifax, N.S., and St. John, N.B., and made her first trip, May 3. The company receives a Dominion subsidy of $10,000 for operating over the route.

The Valley Steamship Co.'s new steamship Granville was launched at Shelburne, N.S., recently. She will run between Annapolis Royal, N.S., and St. John, N.B., when completed. Her dimensions are; Length, 107 ft.; breadth, 22 ft.; depth of hold, 9 ft.

The Miramichi Steam Navigation Co.'s vessels and officers for the current season are:—Alexandra, captain, J. Nowlan; chief engineer, W. Stewart. Miramichi, captain, J. P. Bullick; chief engineer, C. Johnstone. Sybella H., captain, D. S. Betts; chief engineer, E. Perkins.

The construction of the ice breaking steamer for the Northumberland Strait is proceeding rapidly. T. Ferguson, formerly of the Dominion Government s.s. Stanley, who was in England in connection with the building of the s.s. Simcoe for the Government, is remaining to overlook the construction of the ice breaker.

An order in council was passed May 3, making regulations for the health, security and safe carriage of live stock from any port in Canada to any port out of Canada, not being a port in the U.S., Newfoundland, St. Pierre, Miquelon, Bermuda, W. I. Islands, Mexico or South America, and cancelling the order in council of May 14, 1904.

The Premier of Nova Scotia had a conference with the Dominion Minister of Marine, May 10, and urged upon him the necessity for the appointment at all the principal ports of inspectors of gear and tackle with a view to the prevention of accidents to seamen. It is understood that the Department has decided to make such appointments in the near future.

In the House of Commons, May 7, the Minister of Marine decided not to proceed further with the bill having for its object the transferring of the collection of wharfage from the Public Works Department to the Marine Department, until the matter of the collection of top wharfage in addition to side wharfage at small country wharves was looked into.

At the inaugural meeting of the St. John city council, Apr. 30, F. L. Potts was elected chairman of the Ferry Committee, and stated that he considered a saving of $10,000 a year could be accomplished in the operation of the ferry service. Recommendations have been made for the doing away of the harbor facilities committee, which will be replaced by a harbor committee acting under the Board of Works.

Four spar buoys, painted red, surmounted by cross heads painted red and white, have been placed at intervals between Thrum Cap shoal and the eastern passage, Halifax, N.S., to mark the extreme limits of the danger zone of the Government rifle ranges at McNab's Island, and notice is given that vessels should not cross that area during rifle practice, during which a red flag is hoisted at the south end of the island.

The Newfoundland Government recently received tenders for the supply of a steamboat for the postal service in the Fortune Bay district. The requirements called for a vessel of from 100 to 130 tons net measurement, classed A1 at Lloyds (England) with a speed of, at least, 10 knots, and accommodation for 20 cabin and 40 steerage passengers. The service, which is to commence June 1, and continue throughout each year for 10 years, consists of one round trip each week.

Province of Quebec Marine

The name of the s.s. Restigouche, owned by Bouchard Bros., Quebec, No. 78554, registered at Quebec, has been changed by order in council to Lady of Gaspe.

The French steamboat Pro Patria, which was berthed during the winter at Halifax, N.S., is reported to have been sold to a Quebec company, for operation on the Gaspe coast. Her name has been changed to Canada.

Capt. Alex. Macleod, of the Dominion Government cruiser Constance, died May 3, aged 52 years, from heart failure as a result of the overturning of a small boat, of which he was an occupant, on the Richelieu River.

The Premier, in the House of Commons, Apr. 30, in the discussion on the G.T.P.R. loan, intimated that the Government was considering a ferry system across the St. Lawrence River, pending the construction of the Quebec bridge, which would not be ready until about 1916.

Press reports recently stated that J. G. McPhail was to be appointed Commissioner of Lights, vice J. F. Fraser dismissed, but we are officially advised that the report is incorrect, and that "the Department of Marine is in no way responsible for it, the matter not having even been considered."

La Compagnie Trans-St. Laurent, Ltd., has been incorporated under the Dominion Companies Act, with a capital of $50,000 and office at Fraserville, Que., to navigate the inland waters of Canada and especially the St. Lawrence and its tributaries; and to lease, acquire or build vessels, to carry on a general transportation, towage and salvage business. The provisional directors are: M. Fraser, J. Viel, J. C. Pouliot, F. E. Gilbert, O. Laurin, J. O. Girard, S. Belle, A. Danais, Fraserville, Que.

The Richelieu and Ontario Navigation Co.'s steamboat Laprairie, which ran ashore between Victoria bridge and Nun's Island, May 3, was subsequently floated, and towed into one of the Lachine canal basins. Considerable damage was done to the woodwork forward below the water line.

The Richelieu and Ontario Navigation Co. is suing the Crown for the recovery of certain land situated at Sorel, Que., which it is alleged is owned by the company, but was taken possession of by the Government some years ago for the construction of the present dockyards, etc.

The Marine Department announces the placing of two additional spar buoys in Lake St. Louis, north of the lightship No. 12, to indicate the northwest edge of the old channel at that point. The lower buoy 72 E. is painted red and black in horizontal bands and moored in 14 ft., on the edge of the channel, 300 ft. north of the lightship, at the point where the Ottawa River steamboat channel runs into the ship channel. The upper buoy 74 S. is a red spar, moored in 14 ft., southwest from the lower buoy. Upbound vessels must use the passage to the northwest of the lightship, and downbound vessels the new channel to the southeast.

The Montreal Corn Exchange Committee received a petition, May 3, from a firm of Montreal stevedores, asking it to take some steps to oppose the custom of some grain exporters there, of naming their own stevedores, when loading full grain cargoes, instead of allowing the steamship companies to do so. It was pointed out that if this restriction were removed, the petitioners would load vessels at Montreal with full cargoes of grain cheaper than at any U.S. port. The committee decided that the employment of stevedores was a matter entirely between the grain shippers and the steamship companies, and that it could not effectively interfere.

The 47th annual meeting of the Montreal Sailors' Institute was held there May 11, under the presidency of W. I. Gear. The following officers were elected for the current year:—President, W. I. Gear; Vice-President, J. C. Holden; Second Vice-President, D. Morrice; Hon. Treasurer, A. F. C. Ross; Hon. Secretary, Capt. J. W. Bales; Board of Management, H. A. Allan, Hon. J. K. Ward, R. White, T. Harling, D. W. Campbell, B. McLennan, J. M. M. Duff, G. Hodge, A. McPhee, R. S. Logan, J. Rodger, L. Lewis, J. R. Binning, A. Kinzman, J. Thorn, R. W. Reford, J. Hodgson, D. McNicoll, G. W. Stephens, S. A. McMurtry, and Capts. Reid, Clift, Walsh, Lindsay, Jenkins and Gillies.

The new lighthouse tower which has been erected at Father Point lightstation, on the south side of the St. Lawrence River, stands about 200 ft. east of the old lighthouse. It is constructed of re-

inforced concrete, octagonal in shape, with eight flying buttresses, and surmounted by a red circular lantern, showing a group of four flashes of white light every 7½ secs., with intervals of 0.75 sec. between each flash, and of 4.25 secs. between each group of four flashes. The tower is 97 ft. high from base to vane, and the light, which is 91 ft. above high water mark, is dioptric of the third order, and is produced by petroleum vapor on an incandescent mantle. The tower will be operated on or about June 1.

Ontario and the Great Lakes.

The name of the steamboat Rand, No. 126221, registered at Sarnia, Ont., has been changed by order in council to Sowards.

A. Root, keeper of the light at Rockport, Ont., has been granted the Imperial Service Medal on his retirement from the service.

The schooner Theodore Voges, of Deseronto, was towed to Oswego, N.Y., with her cargo of lumber in a waterlogged condition, May 3.

The customs outport of Leeblain, Ont., has been closed, and North Lake has been established as an outport in lieu thereof, under the survey of Port Arthur.

The S.S. City of Montreal was the first vessel for the third year in succession to reach Port Arthur, after the opening of navigation, arriving there Apr. 28.

Capt. E. B. Smith, of Picton, who has commanded the steamboat Alexandria for several years, has retired after 56 seasons in the lake and river service.

It is reported that negotiations are proceeding for the purchase of a U.S. vessel, to be operated as a ferry between Ontario and Michigan at Sault Ste. Marie.

The Department of Railways and Canals received tenders May 31, for work in connection with the abutments and approaches of the new bridge below the waste weir at Kingston Mills lock station of the Rideau canal.

A number of claims are said to have been filed by U.S. citizens for damages alleged to have been sustained owing to a diversion of current, which it is claimed has been caused by the construction of a breakwater at Brockville.

A temporary fixed red light, 28 ft. above lake level, exhibited by an anchor lens lantern elevated on a pole, is taking the place of the light from the front range lighthouse at Point Edward in Lake Huron, recently destroyed by fire.

Sylvester Bros.' schooner St. Louis, which ran aground at Gibraltar Point, and again in the western channel, Toronto, was released May 4, and towed to the harbor, where her cargo of coal was removed, and the necessary repairs to her hull made.

The s.s. Carleton was the first vessel of the season to arrive at Kingston, with grain from Fort William. She arrived at the Montreal Transportation Co.'s elevator Apr. 30, and but for the ice blockade at Sault Ste. Marie, would have been there earlier.

The Lake Coast Trading Co., Ltd., has been incorporated under the Ontario Companies Act, with a capital of $40,000 and office at Port Arthur, to carry on the business of a coast trading company. The provisional directors are: A. I. Thompson, W. C. Thompson, and J. J. O'Connor, Port Arthur, Ont.

A lighthouse tower, 19 ft. back from the outer end of the wharf, painted white, surmounted by a square wooden lantern exhibiting a fixed white light, visible 6 miles from all points of approach by water, has been established on the Government wharf at Sand Point, Ottawa River.

The Marine Department has erected a lighthouse tower at Cape Croker light station, Georgian Bay, built of reinforced concrete, to replace the old structure. The light is 67 ft. above lake level and is visible for about 15 miles. It was brought into operation May 1 and the old one discontinued.

The Lake Ontario and Bay of Quinte Navigation Co. has been awarded $460.76 and costs, for damage sustained by one of its vessels in a collision with Mrs. Fulford's yacht Magedona in Kingston harbor last summer. The counter claim was dismissed. Francis King, Counsel Dominion Marine Association, acted for the company.

The Pelee and Lake Erie Navigation Co., Ltd., has been incorporated under the Ontario Companies Act, with a capital of $40,000 and office at Pelee Island, Ont., to carry on the business of steamboat navigation. The provisional directors are: R. Harris, F. Harris, E. Diffenbach, H. Henderson, R. Piper, W. Pierce, Pelee, Ont.

The Hamilton Warehouse and Forwarding Co., Ltd., has been incorporated under the Ontario Companies Act, with a capital of $75,000 and office at Hamilton, Ont., to carry on the business of warehousing, storage and transportation in all its branches. The provisional directors are: W. W. Stewart, W. P. Witton, H. L. Roberts, T. Patterson, A. F. Hatch, Hamilton, Ont.

At a meeting of the Rainy River Navigation Co., at Kenora, May 3, it was decided not to operate its steamboat Keenora this year, on account of the low water at the mouth of the Rainy River.

The Detroit, Belle Isle and Windsor Ferry Co., incorporated under Michigan, U.S., laws, has been granted a supplementary license, authorizing it to increase the capital it may use in Ontario from $150,000 to $500,000.

The Kingston Board of Trade has appointed a committee, consisting of C. Bermingham, R. J. Carson, R. Crawford, E. Davis, J. M. Farrell, D. G. Laidlaw, C. Livingston, W. I. Minnes, Dr. Ryan, E. T. Steacey and Francis King, Counsel Dominion Marine Association, to carry on a campaign for the instruction of various Canadian municipalities as to the benefits to result from the deepening and enlarging of the Welland canal.

A meeting of representatives of various business associations, the Board of Trade, and the Board of Harbor Commissioners, was held in Toronto, May 4, when it was resolved that the various lake ports and municipalities along the St. Lawrence River, Lake Ontario and the Welland canal, be communicated with, urging them to join in impressing the Government with the necessity of deepening the St. Lawrence and Welland canals.

The Public Works Department will carry on the work of deepening and widening the channel at Telegraph Narrows in the Bay of Quinte this season. The channel on which operations will be conducted is 1,100 ft. long by 100 ft. wide, and during the progress of the work will be marked by buoys at each end and in the middle. The dredging plant to be used will consist of a drill and dredge, and navigators are warned to leave it on the port side when upbound.

The steamboat Simcoe, which the Dominion Government has had built in England, for service in the Georgian Bay, arrived at Halifax, N.S., recently. She is 180 ft. long, with a gross tonnage of 300 and net of 300 tons; with triple expansion engines driving twin screws. She has been specially constructed for lighthouse and buoy service, with large deck space forward for carrying buoys, equipped with derrick of 40 tons capacity. On her trial trip she made 12½ knots an hour.

The U.S. Lake Survey reports the stages of the great lakes, in feet above tidewater, for Apr., as follows: Superior, 601.36; Michigan and Huron, 580.25; Erie, 572.01; Ontario, 246.18. During May, it was anticipated that Superior would rise about 4 ins.; Michigan and Huron, 3½ ins.; Erie, 3 ins., and Ontario, 3 ins. Compared with the average April stage for 10 years, Superior was 8 ins. lower; Michigan and Huron 3 ins. lower; Erie, 3¾ ins. lower, and Ontario 1¾ ins. lower.

A. A. Laurie, Toronto, and F. A. Knapp, Prescott, are suing Polson Iron Works, Ltd., for $30,000 damages, for alleged negligence in the custody of the plaintiffs' chattels. The plaintiffs were the owners of the Knapp roller boat, which ran amok in the Toronto harbor some time ago during a storm, and collided with the s.s. Turbinia. The Turbine Steamship Co. subsequently obtained damages from the owners, and the roller boat was sold by order of the court to satisfy the claim.

The Fort William Warehousing and Forwarding Co., Ltd., has been incorporated under the Ontario Companies Act, with a capital of $250,000, and office at Fort William, to construct, or otherwise acquire, wharves, docks, railway and steamboat terminals, etc., and to carry on a general navigation, transportation, wharfinger and grain elevating business; and in connection therewith, to charter and navigate steam and other vessels. The provisional directors are: E. R. Wayland, S. C. Young, G. R. Duncan, F. W. Young, J. E. Swinburne, Fort William, Ont.

The Dominion Marine Association in advising the Montreal Corn Exchange Committee that the new bill of lading for lake grain shipments was suspended at the meeting of that association held Apr. 21, urged that there be no cessation in the efforts made to procure assistance from the Government in the matter of the prevention of grain shortages from the elevators. The committee at its monthly meeting, May 3, expressed its gratification at the Association's action in suspending the bill of lading, the provisions of which had been strenuously opposed by the committee, and instructed the secretary to assure the Association that it would gladly join in representing to the Government the need of action being taken to secure correctness of elevator weights at Fort William and Port Arthur.

ed for the coal carrying trade between Lake Erie and Montreal, and present some new features. They are of the single deck type, with arch beams, so as to eliminate all pillars or stanchions. The hatches are 12 by 29 feet, with the exception of the aftermost, which is 20 by 29 feet, with 36" coamings, to act as a trimmer. The machinery is of the usual triple expansion type with two single ended Scotch boilers, suitable for a speed of 10 miles an hour. The dimensions of the vessels are: Length, between perpendiculars, 249 ft.; beam, 42.6 ft.; depth, molded, 20 ft.; and the deadweight on a 14-ft. canal draught is 2,280 tons, with a capacity for over 80,000 bush. of wheat. The Keystone Transportation Co., Ltd., was recently incorporated under the Dominion Companies' Act, with a capital of $100,000, and office at Montreal. The provisional directors named at the time, were: R. C. McMichael, R. O. McMurtry, F. G. Bush, M. J. O'Brien, and H. H. W. Jackson, Montreal.

Regulations for the governance of the ferry across the St. Lawrence River between Prescott, Ont., and Ogdensburg, N.Y., have been made by order in council, providing that the limits shall be co-terminus with the easterly and westerly limits of Prescott, and a point in Ogdensburg fixed by a local ordinance. Suitable landing places must be provided at a central point in Prescott, available at all states of the river, and the vessel to be utilized must be a substantial, seaworthy steamer of not less than 100 ft. long over all, and 20.9 ft. beam, with sufficient deckroom to allow of 6 vehicles to be driven on and off without unhitching; with an engine of 180 h.p., and capable of a speed of not less than 10 miles an hour. Accommodation must be provided, with all modern conveniences, for not less than 400 passengers. During the summer season, from Apr. 1 to Nov. 30, the vessel is to leave Prescott every hour from 6 a.m. to 6 p.m.; and every hour from 6.45 p.m. to 12 midnight; and from Dec. 1 to Mar. 31, every hour from 6 a.m. to 5 p.m., and at 7.30 p.m., and 12 midnight. The summer passenger rates are fixed at 10c., and the winter at 20c., with half rate for children. The license to operate is granted for 10 years from May 1.

The Bisco-Gowganda Transport Co., Ltd., has been incorporated under the Dominion Companies Act with a capital of $150,000 and office at Montreal, to carry on a general business as common carriers and freighters, etc. The provisional directors are: L. O. Armstrong, Industrial Agent, C.P.R.; R. L. Prieur, A. Geoffrion, O. A. Goyette, Montreal, and P. Shannon, Biscotasing, Ont.

The company expects to have launches on a string of lakes, and wagon roads connecting these lakes, about June 15, from Biscotasing to Gowganda, taking in, en route, Minniesinaque, Mattagami, Duncan and Shining Tree Lakes. The lake fleet will at first consist of 7 launches, of which 5 will be about 40 ft. long by 10 ft. beam, with scows in tow. Stopping places under the company's control will be arranged at each lake. Pieces of freight will be handled up to 2,000 lbs., and it is hoped to cover the journey in 2 days for passengers and 2½ days for freight as a start, and make it a 24 hr. route towards autumn. It is intended to make the line permanent, as it is not anticipated that railway construction from Charlton or Sudbury to Gowganda will interfere with the company's traffic. The officers of the company and their locations are as follows: President, P. Shannon, Biscotasing; Vice-President, L. O. Armstrong, C.P.R., Montreal; General Manager, J. A. Shannon, Biscotasing; Terminus Manager, L. J. Labrosse, Gowganda; Secretary-Treasurer, R. Prieur, Montreal.

Manitoba, Saskatchewan and Alberta

A company is reported to be in process of organization in Winnipeg for the purpose of building a fleet of steamboats to operate on Lake Winnipeg immediately on the completion of the locks at St. Andrews.

C. D. A. Barber, General Manager, Northern Transportation Co., Athabasca Landing, Alta., is reported to have said, recently, that there are 3,600 miles of navigable waterways, with only two breaks, between Athabasca Landing and the Arctic Ocean. One break of about 87 miles is on the Athabasca River, and the other, of 16 miles, on the Great Slave River, at Smith's Landing.

The Standard Shipping Co., Ltd., has been incorporated under the Manitoba Companies Act, with a capital of $5,000, and office at Winnipeg, to act as agents, brokers, etc., in connection with persons or companies operating any transportation facilities; and with power to build, purchase or otherwise acquire, deal in, and operate, steam and other vessels and any other transportation facilities excepting railways. The provisional directors are; L. H. Wolvin, J. Walker, D. N. Wemyss, G. A. H. Dysart, A. K. Dysart, Winnipeg.

The Northern Transportation Co., Ltd., of Athabasca Landing, Alta., has registered two vessels and has under construction a third one which it will operate during the current season, between Edmonton and Athabasca Landing and other points, making connections with the Hudson's Bay Co.'s vessels. The dimensions of the Northland Light are: Length, 122 ft.; breadth, 22 ft.; depth, 4.5 ft.; tonnage, 148 gross, 94 register; with engine of 5 h.p. driving a screw. The Northland Sun's dimensions are: Length, 103 ft.; breadth, 17 ft.; depth, 4.5 ft.; tonnage, 132 gross, 83 register; with engine of 3 h.p., driving paddle wheels. Both vessels were built at Athabasca Landing, in 1907, and a third vessel, to be named Northland Call, is at present on the stocks there. We are advised that the following tentative appointments have been made to the vessels for the current season:—Northland Sun, captain, C. D. A. Barber; chief engineer, A. V. Bucknam. Northland Light, chief engineer, E. R. Morton.

B.C. and Pacific Coast Marine

The Western Steamboat Co.'s steamboat Ramona ran aground in the Fraser River, Apr. 23, and has been abandoned.

A light draft river steamboat for service on the Fraser River was launched at Quesnel, May 1, for the Fort George Lumber and Navigation Co., Ltd.

It is reported that a dry dock will shortly be constructed at Vancouver, by a British syndicate, in which Swan, Hunter and Wigham Richardson are interested.

The C.P.R. s.s. Princess Charlotte is now on her summer route between Victoria, Vancouver and Seattle. At the recent inauguration of the service, Capt. J. W. Troup, Superintendent, B.C. Coast Service, entertained a number of press representatives on board.

The Premier, recently, in reply to a question in the House of Commons, as to the jurisdiction of Canada in the Hecate Straits, said that there had been correspondence with the U.S. Government on the subject, but he was not at liberty to make any announcement.

The Nelson city council has leased the city wharf to the C.P.R. By the terms of the lease it remains a public wharf, but the company reserves the right of demanding wharfage or dockage fees in the same manner as is done with other wharves owned or leased by it.

The Fort George Lumber and Navigation Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $50,000, to carry on the businesses of lumber merchants, stevedores, shipping agents and general carriers by land and water; and in connection therewith to own and operate steam and other vessels.

The Island Dock and Warehouse Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $500,000, to take over certain property at Deadman's Island, Burrard Inlet; to construct docks, slips, elevators, etc.; to own and operate steam and other vessels, and to carry on the businesses of ship builders, ship owners, wharfingers, and general carriers.

Compulsory Pilotage Dues.

A bill was introduced in the House of Commons, May 7, having for its object the removal of what is alleged to be a discrimination against Ontario vessels, by inserting the word "Ontario" in the section of the Canada Shipping Act, referring to the exemption of the vessels of other provinces from the compulsory payment of pilotage dues. In explaining the details, J. W. Edwards, M.P., Frontenac, said:—

The amendment proposed by this bill has been the subject of negotiations between the Ontario and Dominion Governments, and of representations on the part of the Dominion Marine Association, which represents practically all the vessel owners of Canadian inland waters. By section 477 of the Canada Shipping Act, there is a discrimination against vessels in Ontario which appears to me, and to others who are more directly interested, to be entirely unwarranted and unjustifiable. The section referred to exempts the following vessels from the payment of pilotage dues: Vessels employed in sailing from port to port in the same province; employed in trading between any one or more ports of the provinces of Quebec, New Brunswick, Nova Scotia, Prince Edward Island, and any other or others of them; employed in voyages between any port or ports of any of the said provinces and the port of New York or any port of the United States of America on the Atlantic north of New York, or employed in voyages between any port in any of the said provinces and any port in Newfoundland.

Previous to June of last year, exemption was granted to vessels with a draft when loaded not exceeding 16 ft. and employed exclusively in voyages between any port or ports on the Great Lakes or any of the waters connecting those lakes, and any port or ports on the River St. Lawrence or between any ports on the River St. Lawrence. In the last hours of the 1908 session this section was repealed at a time when the Ontario vessel owners were urging their claims to have Ontario put on an absolute parity with the other provinces. Why should a vessel sailing from Montreal to Sydney or Halifax or Newfoundland or New York be exempt from compulsory payment of pilotage dues, and the same vessel if beginning her voyage at Owen Sound, or Toronto, or Kingston, or Brockville or any port in Ontario be obliged to pay these dues? Another point which makes this proposed amendment all the more necessary is the working of by-law 25 of the Montreal Pilotage District which reads:

"Every vessel liable to compulsory payment of pilot dues and moved into or out of the limits of the harbor of Montreal or from one point to another within the same shall pay such dues for the services of a branch pilot except in the case of vessels which are merely shifting their position at the wharf and attached thereto by their moorings."

Since Ontario vessels are the only ones obliged to pay pilotage dues under section 477 it follows that Ontario vessels alone come under the provisions of by-law 25, and therefore have to pay this additional tax from which the others are exempt. I wish to point out that notwithstanding this extra taxation and evident discrimination, the liability of the master or owner of the Ontario vessel is not lessened in the slightest degree, but on the contrary is emphasized. This is made abundantly clear by sec. 477 which reads:

"Nothing in this part shall exempt any owner or master of any ship from liability for any loss or damage occasioned by his ship to any person or property on the ground either of such ship being in charge of a licensed pilot or of such loss or damage being occasioned by the act or default of a licensed pilot, or on any ground."

This section makes it clear that Ontario vessel owners are discriminated against and put at a disadvantage in the carrying trade. I therefore propose this amendment which by inserting the word "Ontario" in sub-sec. 2 of sec. 477 will place the province of Ontario on an equality with the other provinces and will relieve Ontario vessel owners from this unfair discrimination and unjust tax. I hope the Minister of Marine will take this up as a government measure. There are many interests that want this amendment carried, and I hope he will see his way clear to have the bill passed even at this late hour of the session.

The Minister of Marine, in replying, said:—"As the bill will not probably be reached this session, I may be permitted to inform the mover that an order in council has been passed lately, providing that vessels from Ontario coming through the Lachine rapids and moving in the harbor of Montreal shall not be obliged to pay pilotage dues. This was done in order to meet a serious complaint made by the Dominion Marine Association. The reason why the legislation was passed was to improve the safety of navigation in the St. Lawrence, and it was done at the request of the Shipping Federation."

In response to a question, the Minister emphasized the point that the order in council and the complaint previously mentioned referred only to vessels which passed through the Lachine Rapids. The concession thus granted to Ontario vessel owners, in fact, only benefits one company, the majority of Ontario owners are in exactly the same position as before. Regarding the statement made by the Minister of Marine, that "the

complaint was only in regard to the Lachine Rapids," there appears to have been some misunderstanding, as we are informed that "the Minister's statement that it had been only with regard to boats running the rapids that complaint was made is, of course, absolutely contrary to facts."

Aids to Navigation Required.

The Dominion Marine Association has made the following recommendations to the Lighthouse Board:—

LAKE SUPERIOR. Michipicoten Island.—A light, and if possible a fog horn, on the north east end of the island, at such point as would render the light of most service to vessels bound up as well as to vessels bound down. It is submitted that the recommendation of the Association of Masters and Mates for a light on the west end of the island has not been considered by that Association with due regard to all the requirements of the case, and would probably be amended to conform to the recommendation of this Association if the following points were noted, viz., that a light on the west end of the island would only serve as a beacon in approaching down the lake, could not assist in passing the eastern end of the island, and would be of no service to vessels up-bound in the north channel.

Pancake Shoal.—A gas buoy on the outer Pancake shoal to aid vessels taking the north shore.

LAKE HURON AND GEORGIAN BAY. Centre Island bank.—A range on Kokanongwi Island to clear Centre Island bank passing south of Badgely Island.

Bad Neighbor shoal.—The request is renewed for a whistling gas buoy well outside of Bad Neighbor shoal. A location has been suggested in the 13 fathom path two or three miles west of Cove Island, on a line between Gat Point and East Sister shoal. A location further out would be desirable if suitable anchorage is available. It has been suggested that the light and fog horn on Cove Island should suffice, but they are too far in to protect ships entering from the lake and the channel is important enough to demand this additional safeguard.

Lonely Island.—A fog horn on Lonely Island. This request is renewed, as vessels require this assistance on account of the proximity of the Shingle shoals. Without the horn to locate the island a vessel cannot proceed on her course east of the island without great danger.

Kennedy Bank.—A gas buoy on Kennedy bank.

Port Colborne ranges.—The rear range light at Port Colborne, now occulting red, and objected to on acocunt of its dimness, should be continued as a red light to distinguish it from others on the shore and if found too dim should be replaced by one of that color of the greatest brilliancy possible.

LAKE ONTARIO. Niagara shoal.—The request is renewed for a gas and bell buoy at Niagara shoal.

Toronto Harbour.—The inshore light in the range at the eastern entrance should be raised to keep the light in range.

Salt Point, Brighton entrance.—The light should be replaced to enable vessels entering to keep the dredged channel, the ranges being quite ineffective in certain weather until approached more closely. This request is urgently renewed.

Kingston Harbour.—A range on the north shore entering Kingston harbour to take the place of the very long distant range of Pigeon Island and Nine Mile Point lights, and to lead past the Middle Ground and Seven Acre shoals. Another range to intersect this and lead into the harbour along the shore as far as Barriefield range. If this latter is not given then at least a gas buoy on Penitentiary shoal. A bell or other suitable fog signal at Snake Island light or Four Mile Point (Simcoe Island) to lead through the channel between this light and Simcoe Island. The Richelieu & Ontario passenger boats sometimes require to anchor in fog after passing Nine Mile Point and if helped past Snake Island light could make their dock at Kingston and maintain their schedule. This channel is also freely used by all boats when going out light and the improvement will be of general benefit.

The request is again renewed that distinctive tops be given black and red buoys so that they may be distinguished even when the colors are not distinguishable. Even the simple device of pointing one spar and sawing another square across would be of great service. But other effective distinguishing shapes may readily be devised and used and the system is urgently recommended. That request has already been granted for the Montreal-Kingston division.

Montreal–Georgian Bay Canal.

A deputation representing the Board of Trade Federation and a number of municipalities waited on members of the Dominion Government at Ottawa, April 28, to urge the construction of the Montreal-Georgian Bay canal, either as a Government work, or by a private company, by means of a Government guarantee of bonds. The Premier said he had frequently expressed his personal views in favor of the canal as the natural means of channel communication between the east and the west. The only difficulty in the way of construction was that there was not enough money. The Dominion revenue was substantial, but the demands were far in excess of what could be spent, and it could not be expected that the Government would now undertake more. Regarding the proposal to guarantee bonds, it was also more than the Government could now do. As soon as the project could be taken up, the Government would do so.

Sir Robert W. Perks, head of the London, Eng., syndicate which has a charter to construct the canal, recently stated in an interview that he hoped shortly to obtain the sanction of the Government for the starting of construction upon the canal next spring.

Sole Agents:
James Hutton & Co., Montreal

Sir Robert W. Perks, who is at present visiting Canada in connection with the scheme, in the course of an interview at Montreal, May 10, said that if the proposals were accepted, work would be started on the canal next spring, and completed in 1915. His company, he said, was prepared to find the whole of the money necessary for the work provided the Dominion Government granted 3% interest on the bonds and an additional ½% to provide a sinking fund. The first section to be undertaken would be from Georgian Bay to North Bay, or possibly, that and the section from North Bay to Montreal might be carried out simultaneously. His plan was to have a board of his company, on which the Government would have representatives, and the profits would be divided equally between the Government and the company. The Montreal terminus would in all probability be situated at the Back River, as it is considered cheaper to build the canal to that point, than to the harbor, besides having the additional advantage of providing an alternative route, as it would be possible by erecting another lock at St. Anne's to use the present canal from that point to Montreal. "If the Government agrees to our proposals," he concluded, "Canada will have the canal as soon as it is humanly possible to build it, and what is more, will get it more cheaply than they could get it by any other means. It is even possible that the Government would not have to pay anything at all for it, for I am told that the traffic in prospect is such that the tolls for the use of the canal would pay the cost of the interest from the first. I am somewhat doubtful if this would be the case before the canal is finished, but there certainly would be a large and progressive income as the canal was gradually extended."

Among the Express Companies.

The Canadian Northern Ex. Co. has opened an office at Hamills Point, Ont., for the navigation season.

The Canadian Ex. Co. has opened offices at Tignish, P.E.I.; Sydney Mines, N.S.; and Donald, Ont.; and has closed its office at Caplin, Que.

The Canadian Northern Ex. Co. has opened offices at Tessier, Mansevy and Harris, Sask.; Kenora and Rosedale, Ont.; and Woodington, Ont., for the navigation season.

The Canadian Northern Ex. Co. has established its service over the C.N.R. Goose Lake line, and has opened regular offices at Tessier, Harris, Vanscoy, Delisle and Zealandia, Sask.

A joint express office has been established at the Yukon-Alaska Exposition grounds, Seattle, Wash., to be known as Exposition, Wash. The rate for merchandise to that point is 50c. per 100 lbs. above the Seattle rate.

The Dominion Government has consigned a second lot of live lobsters from the Atlantic to the Pacific coast, to continue the experiments in breeding them there, which it commenced last year. The consignment was handled by the Dominion Ex. Co.

Express companies are instructing their agents to see that cards reading: "This Company's tariffs are open to public inspection and may be seen on application to the agents," are exhibited in a public place in their offices, in accordance with the Board of Railway Commissioners' order.

The Canadian Ex. Co.'s annual meeting was held in Montreal, May 1. The following directors were re-elected for the current year: President, C. M. Hays; Vice-President and Manager, J. Bryce; other directors, E. H. Fitzhugh, W. Wainwright, M. M. Reynolds, E. J. Chamberlin, H. Paton and F. Scott.

The Canadian Ex. Co. has issued a notice that its summer offices on the Muskoka Lakes have been reopened for the season, with the exception of Royal Muskoka, which reopens about the middle of June. Shipments are also being accepted for the Lake of Bays route, and to Byng Inlet and French River points.

Telegraph and Cable Matters.

J. D. Gaines, Superintendent, Commercial Cable Co., at Honolulu, is visiting his home in Nova Scotia.

A U.S. patent has been granted to C. E. Davies, G.N.W. Telegraph Co.'s chief operator, Ottawa, Ont., for an electrical circuit breaking and making device for telegraphic purposes.

The Commercial Cable Co.'s cable repair steamer Mackay-Bennett is harboring on the west coast of Ireland in readiness to repair any breaks that might occur in the neighborhood.

A statement has been published that wireless communication took place between New York and Chicago, May 3. It is claimed that this is a record in the transmission of wireless messages overland.

A. J. Wisewell, a former C.N.R. telegraph operator, was charged recently, at Regina, Sask., that while he was in the C.N.R. employ at Humboldt, he stole from the C.N.R. office, during a bye-election, certain political telegrams.

The Marconi Wireless Telegraph Co. has arranged for the completion of two additional stations between Quebec and Montreal, one being situated at Three Rivers, the other in Montreal, probably on the Tarte pier. The installation will, it is anticipated, be completed early in June.

The Association of Railway Telegraph Superintendents will hold its annual convention, June 23, 24 and 25 at Detroit, Mich. W. J. Camp, Superintendent, C.P.R. Telegraphs, Montreal, is President, and P. W. Drew, Superintendent of Telegraphs, Chicago Division, Minneapolis, St. Paul and Sault Ste. Marie Ry., Chicago, Ill., is Secretary.

The C.P.R. has completed the erection of a wire between Toronto and Sudbury, by way of Muskoka, thus giving Toronto an independent connection with Winnipeg. The lines to be erected by the company, as mentioned in our March issue, between Winnipeg and Field, B.C., will be 971 miles long, and the other between Calgary, Alta., and Cranbrook, B.C., 276 miles. Other work now nearing completion comprises the re-erecting of about 600 miles in different parts of the Dominion.

An appeal was heard by the King's Bench, May 11, in the case of Croysdill vs. the Anglo-American Telegraph Co., when the plaintiff appealed against the judgment of the Quebec Superior Court dismissing his action against the company, claiming $400 penalty incurred by the company for not filing the declaration required to be filed by incorporated companies as provided in article 4754 Revised Statutes of Quebec. The appeal was dismissed, one of the five judges dissenting.

B. S. Jenkins, General Superintendent C.P.R. Telegraphs, Western Lines, Winnipeg, on his return there recently after an inspection trip through British Columbia, said that little work was in contemplation for this year, owing to the fact that the C.P.R. had kept well ahead of the times in that province. The company is however considering the laying of another cable between the mainland and Vancouver Island. This is required, owing to the growth of business to the Island, and of the Pacific cable which lands at Bamfield on the west side. Certain extensions of line would also be made on the Island, coincident with the extension of branch railway lines there. He also said that a new copper wire would be erected from Calgary, Alta., along the Crow's Nest line into British Columbia, and eventually it would be extended to Nelson.

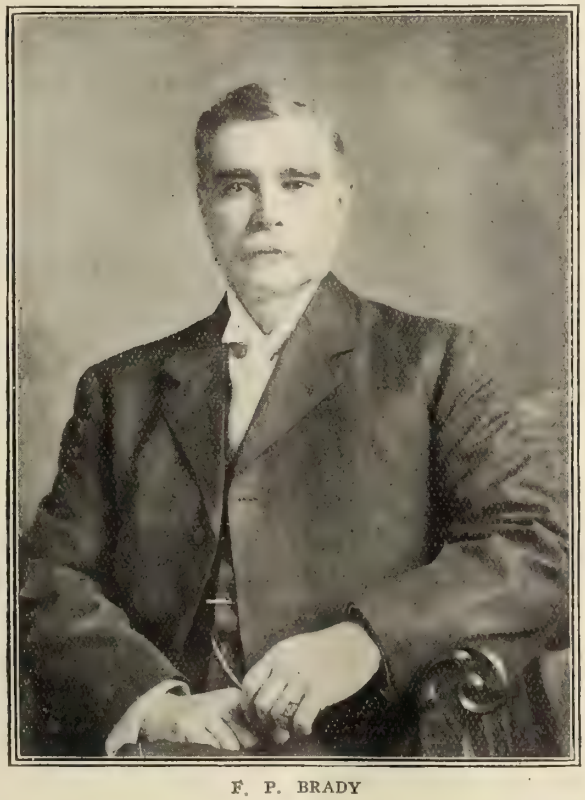
Overhauling Electric Ry. Rolling Stock.

W. R. McRae, Master Mechanic, Toronto Ry.

In presenting these remarks concerning the periodical overhauling of rolling stock, it is my intention to endeavor to convince those interested in the maintenance of electric railway rolling stock that periodical overhauling is absolutely necessary to obtain the maximum of efficiency and also that when this work is completed, the term, general overhaul will be amply justified.

Prior to three years ago very few of the cars on the Toronto system were overhauled with any degree of regularity. This neglect was responsible for some of the following results: Average daily cripple cars amounted to about 17% of all motor-operated rolling stock, failures in service were very common, line blockades interrupted schedules, cars out of service when required to fill schedules, inconvenience to passengers, lost mileage and revenue. This condition of affairs necessitated the introduction of a method of repairs whereby the average daily number of cripples would be reduced to a minimum. Instructions were issued by the management that all cars were to be put in first-class condition at once. This was done, but not without a very large expenditure of money; the results obtained, however, were such as to prove without the shadow of a doubt the wisdom of permitting the above-mentioned expenditure. To-day in Toronto there are comparatively speaking no motor breakdowns in service, and as a comparison I may say, that instead of 17% of the cars being crippled as before stated every 24 hours, the daily average is now 3.7%; and it must be borne in mind that every car that is repaired, whether large or small repairs, is classed in the totals from which this percentage is struck. Those not included are those cars repaired by the night and day inspectors and repair men, after the cars are housed and have completed their day's run; or, in other words, cars which have not caused any interruption to service or schedules. This is a considerable reduction you will admit, but we are endeavoring to lower this record, and those in charge of the rolling stock are of opinion that this can be done. The vastly superior service which we are now enabled to give has secured to the company a very valuable asset in the citizens' good-will.

It is very necessary that the good work of overhauling rolling stock should be done in a most thorough and systematic way. The work should be laid out so that there will be no confusion of material, men or ideas. All the work should be done in a pre-determined manner. Gauges, measurements and tools should be supplied for the proper carrying out of the same. When a system of overhaul is finally decided upon as being the best suited to local conditions, it should become a law in the shop, and any employe departing from the standard of practice should be dealt with accordingly. The introduction of new methods or stunts or experiments should not be permitted until they are carefully considered by the proper officials. I strongly recommend that employes be encouraged to promote new ideas. and if on the presentation of them to the proper officials, they are found to possess even some small merit, every encouragement should be given the originator to perfect the same, and on the adoption of his proposal in practice he should, so far as the shop is concerned, receive all the credit due him.



F. P. BRADY
Member Canadian Government Railways Managing Board.

In preparing the repair material in the Toronto Ry. shops, carefully kept gigs, patterns and gauges are always used in production. By this means absolute accuracy is assured, and the parts are interchangeable. The fact that the pit men or fitters have no work other than to bolt together and put to place, is a strong argument in favor of the repair material being properly produced in the company's shops or by outside manufacturers.

I will endeavor to explain some of the methods in use in the Toronto Ry. Co.'s central shops. This system no doubt would be more readily understood by a visit to our works, which we will at all times welcome. The cars are overhauled on a mileage basis; 50,000 to 55,000 miles being the limit of distance a car travels before being brought to the shops and thoroughly overhauled. Owing to the fact that our roadbed is now in a very much better condition than it formerly was, and the cars standing up so much better, the matter of permitting cars to run 70,000 to 75,000 miles before over-hauling is now under serious consideration.

I will now trace the course of overhauling a car. Owing to the fact that overhauling was first started by rotation of car numbers, it is quite easy for us in the shops to know just about the car or cars due to come in, and as accurate mileage is kept on all cars, a glance at the mileage statements is sufficient to procure the proper car for overhauling. This done, the central car dispatcher is instructed to have that car delivered to the shops ready for the following morning. The car is then placed in a section set aside for the purpose, brake and cable connections unfastened, car body raised and placed on trestles, trucks are then pulled out from under the body and shunted to truck overhaul section; here the motors are removed and sent to motor overhauling section.

The truck is completely stripped down, except side and end frame, wheel centres marked, and trammil points used to test for truck frame being true. Journal boxes are stripped of brassed wedges and waste, and thoroughly cleansed. Wheels and journals are now replaced if necessary. The stripped material has been placed on one side of the truck, the floor on the other side is swept clean, the truck inspector inspects the old material and o.k's. that which is to be used again. This o.k. material is now moved to the clean space on the other side of the truck, the balance is taken to the shop storekeeper, who gives in return a new or repair part for every one sent in; this is then delivered to the truck fitters, and is placed with the balance of the o.k. material. The trucks are now built up, the journals being packed with clean, oil-soaked waste; the trucks having been thoroughly scraped and blown off with compressed air, are now given a coat of mineral quick drying black paint, and ready for the motors.

The motors are first stripped of armatures and field coils; these with the brushholders are sent to the armature and machine departments respectively. The motor frame is next scraped inside and out, grease boxes cleaned out, bottom oiled, wells cleaned and washed with kerosene. The inside of motor frames are next painted with black insulating compound, oiled canvas liners are placed around permanent pole pieces, frames are

Galena-Signal Oil Company

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated GALENA COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

GUARANTEE COST per thousand miles for from one to five years, when conditions warrant it.

Maintain EXPERT DEPARTMENT, which is an organization of skilled railway mechanics of wide and varied experience. Services of Experts furnished free of charge to patrons interested in the economical use of oils.

STREET RAILWAY LUBRICATION A SPECIALTY

Galena Railway Safety Oil

Made especially for use in Headlights, Cab, Classification and Tail-lights, and for Switch and Semaphore Lamps. Burns equally well with the long time as with the one day burner, with or without chimney, as the burner requires.

Is pure water white in color; high fire test; low cold test, and splendid gravity.

Please write to home office for further particulars.

CHARLES MILLER,

PRESIDENT

now ready for assembling. Field coils are next put to place and magnet plates bolted home, finished steel bolts and hexagon nuts with spring lockwashers being used exclusively for motor and truck work. The motor frames are now bolted together and a gauge inserted between the pole pieces to prove proper distances. The proper distance between magnets having been secured, the armature is next put to place and armature boxes bolted on. Equal clearance between armatures and magnets is next secured by use of a special gauge. New spring felt feeder wicks are placed in bottom oil pocket of both armature and motor axle bearings, and oil receptacles filled with clean oil. Next a piece of felt is inserted in the grease hole at bottom of grease box touching the shaft, a square oil-soaked pad, half-inch in thickness, is then neatly fitted to the bottom of the box, the balance of space is then filled with hand-picked pure wool waste, the waste having previously soaked in oil 24 hours and dripped for 12 hours. Brush-holder yokes, and brushholders completely assembled, are now bolted to place. These parts do not require any alteration for the reason that they have been built up in a special jig, their correct position and alignment on the commutator being both electrically and mechanically correct. The overhauled motor is now subjected to a running test on the floor for three hours with 40 amperes of current for the purpose of proving the condition of the bearings. While the motor is under test it is painted with a quick drying mineral black paint. The gears, pinions and gear case having been thoroughly cleaned of grease, the motor is now swung to place on the trucks and gears and pinions given an application of special compound, the two or four motors all having come through at the same time the overhaul truck and motor equipment is now ready for service.

Just as soon as car body is placed on trestles, the controller, rheostats, trolley stand and brake cylinder are removed and sent to their respective repair departments; they are at once replaced with new or overhauled material. Cable ducts on car body are opened, cleaned and repainted, renewals being made where necessary. Car body, wood and iron work repaired and painted. Overhauled trucks and motors are now run under, and body put to place, brake and cable connections made, brakes adjusted and car given a severe tryout under service conditions before being passed as o.k. by the inspector.

Armatures are first inspected for bearings and renewals made where necessary, cast steel sleeves lined with babbit being used for bearings. Next, the entire armature is carefully cleaned, commutator turned and polished, string band carefully inspected or renewed, and sent to the testing department. Here the millovolt drop test from bar to bar is used and finally the armature is subjected to a six hundred volt ground test, armature body then shellaced and placed in the o.k. rack. Field coils are then placed in section of motor frame without magnet, and a millovolt reading taken, next a magnet attached to an air cylinder is lowered on field coil and another reading taken while the coil is under pressure. If the coil reads up to the standard and shows no variation under pressure the outside tape is repaired and the coil dipped in air drying compound.

This description practically covers the entire performance of overhauling a car. The following remarks, however, may not be out of place. A great reduction in motor lead trouble has been secured by boring the motor frames on the axle side and bringing the leads out as near the king bolt as possible; this, of course, refers to outside hung motors.

Railway Freight Statistics.

During the year ended June 30, 1908, the railways of Canada carried 63,071,167 tons of freight, distributed among the various classes of traffic as follows:— Products of mines, 22,636,227 tons; products of forests, 12,912,226 tons; products of agriculture, 9,396,967 tons; manufactures, 6,655,719 tons; products of animals, 2,472,359 tons; merchandise, 2,008,267 tons; miscellaneous consignments, 6,938,-135 tons. Of the total tonnage relating to commodities 38,821,418 tons were reported as originating on the line, and 24,198,482 tons as having been received from connecting lines. The railway statistics give full details of the various classes of freight under both headings, and the following table shows the grand totals of the various classes of freight carried, whether originating on the various lines, or received from connecting lines:—

Quebec Transportation Club.—The annual meeting was held at Kent House, June 1, at the conclusion of which, the members were the guests, at dinner, of the Quebec Ry. Light and Power Co., and subsequently conveyed to the city by special cars. The club has accepted the R. and O. Nav. Co.'s invitation for a trip to Murray Bay, July 3, and on July 19 and 27, it will entertain Boston and Chicago railroad men respectively. The officers for the current year are: Hon. President, E. A. Evans, General Manager Q. Ry. L. and P. Co.; Hon. Vice Presidents, W. M. Macpherson, Dominion Line Steamships; E. O. Grundy, Quebec Central Ry.; President, F. S. Stocking, Quebec Central Ry.; Vice Presidents, J. A. Everall, Superintendent Montmorency Division, Q. Ry., L. and P. Co.; F. M. Spaidal, General Superintendent, C.N.Q.R. and Q. and L. St. J. Ry.; Hon. Secretary-Treasurer, A. H. Davis, C.P.R.

A. M. Nanton, Managing Director, Alberta Ry. and Irrigation Co., on the occasion of a recent visit of inspection, stated at Lethbridge, that the company was endeavoring to settle up the winter wheat land it owned. The company's policy, as it had been for years past, was to fill up its land with settlers.

The Canadian Society of Civil Engineers held its last meeting of the season at Montreal recently, when an address on "Some phases of the construction and design of the Manhattan Suspension Bridge" was delivered by J. C. Ostrup, Professor of Structural Engineering, Stevens Institute of Technology, Hoboken, N.J.

WISCONSIN STEEL CO., South Chicago, Ill. Three fast plants.

THE BROWN HOISTING MACHINERY CO.

Engineers, designers and builders of hoisting machinery of all descriptions. Write us stating your requirements and ask for catalogues.

Main Office and Works:

CLEVELAND, OHIO

Branch Offices:

PITTSBURG AND NEW YORK

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments.

Abitibi and Hudson's Bay Ry.—Under this title a company was incorporated by the Dominion Parliament in 1907, with power to construct a line of 200 miles from the National Transcontinental Ry. between Frederick House River and Abitibi Lake to James Bay between the Albany and Main Rivers, Ont. Nothing in the way of construction has been undertaken to date. (May, pg. 355.)

Alberta and British Columbia Ry.—The Dominion Parliament in 1908 incorporated a company with this title to construct a line from the International boundary at Kootenay River to Elko, thence to Cowley and Calgary, Alta., about 200 miles. Construction work has not yet been taken in hand. (Sept., 1908, pg. 613.)

Alberta and Brazeau River Ry.—The Dominion Parliament incorporated a company with this title in 1908 for the purpose of constructing a line from the Calgary and Edmonton branch of the C.P.R., between Olds and Innisfail, to Rocky Mountain House, thence westerly to Kootenay Plains, on the Rocky Mountains; and from between Big Horn and Sheep Rivers, north of the Saskatchewan River, to Brazeau River, thence along McLeod River to the G.T.P.R. The mileage authorized is 250 miles, but as yet there has been nothing done in the way of construction. (April, 1908, pg. 253.)

Alberta Central Ry.—This company was incorporated by the Dominion Parliament in 1901 to construct a railway from tp. 38, r. 23, 4th mer., Alta., to Red Deer, thence westerly to tp. 39, r. 7, w. 5th mer., 100 miles. The company was granted extensions of time for construction in 1903, 1905 and 1907. (May, pg. 355.)

The Alberta Ry. and Irrigation Co. was incorporated in 1904 by the Dominion Parliament to take over the Alberta Ry. and Coal Co. and the St. Mary's Valley Ry., together with the allied land and irrigation interests. The A. Ry. and Coal Co. was incorporated in 1889 to construct a line from Lethbridge to the International boundary to connect with the Montana railway system, and in 1892 it obtained power to extend through the Crow's Nest Pass to Hope, B.C. The total mileage authorized was about 700 miles, and of this there has been constructed, from Lethbridge to Coutts, Alta., 66.72 miles, and from Dunmore to Lethbridge, 107 miles. This latter line was in 1893 sold to the C.P.R.

The St. Mary's River Ry. was incorporated in 1900 to construct lines aggregating 65 miles from between Stirling and Lethbridge, Alta., to the International boundary, between r. 24 and 30, w. 4th mer., with branch lines not exceeding 15 miles each. The company constructed a line from Stirling to Cardston, 47 miles, and was subsequently amalgamated with the Alberta Ry. and Irrigation Co. In the return respecting railway charters granted 1888 to 1908, recently presented to the Dominion Parliament, the charter is classed as lapsed, and it is stated that 65 miles of line has been constructed. This is undoubtedly an error, as the A. R. and I. Co. only operates 111.82 miles of line, of which 66.72 miles were constructed by the Alberta Ry. and Coal Co., and about 47 by the St. M. R. Ry. (Aug., 1908, pg. 547.)

The question of the extension of the company's Kimball branch railway was discussed at Cardston, Alta., June 3, by officers of the company and the Town Council. At a meeting in the neighborhood recently it was stated that the branch would be standard gauge, but that the track would not be extended beyond the field of J. W. Woolf this season.

Algoma Central and Hudson's Bay Ry.—The incorporation of this company by the Dominion Parliament took place in 1899, and it obtained additional powers in 1901. In 1905 and 1907 the time within which its authorized lines might be constructed was extended. The lines authorized extend from Sault St. Marie to Dalton station on the C.P.R., to Michipicoten Harbor and to James Bay, not further north than Equam River, 600 miles. There has been constructed 91.57 miles as follows:—From Sault Ste. Marie towards C.P.R., 64.25 miles; from Michipicoten to Helen Mines, 12 miles; from Josephine Jct. to Josephine mines, 10.50 miles; from Trout Lake to Arveres, 2.00 miles; from mileage 20 to Maple camp, 1.00 mile, and from Lake Wilde to Breiting mine, 2.00 miles. (June, pg. 413.)

Algoma Copper Range Ry.—The Dominion Parliament in 1905 incorporated a company with this title to construct a railway from Batchewana Bay on Lake Superior to the Superior Copper Mines, thence easterly about 120 miles to the C.P.R. transcontinental line between Cartier and Biscotasing, Ont., 150 miles. No construction work has been undertaken by the company to date. (April, 1905, pg. 143.)

Alsek and Yukon Ry.—In 1907 the Dominion Parliament incorporated a company with this title with power to construct a railway of about 300 miles from the International boundary at the crossing of the Klihini River, northwesterly along the valleys of the Klihini, Patsenshini, Shakwak and Alsek rivers, thence along Kluane Lake, Darjek and White rivers to the International boundary between the 62nd and the 64th parallels of latitude. Nothing in the way of construction has as yet been undertaken. (May, pg. 355.) See also White Horse and Alsek Ry.

Anthracite Coal Ry. Co.—The Dominion Parliament in 1905 incorporated a company with this title with power to construct a railway from the coal deposits in tps. 18 and 19, r. 7 and 8, w. 5th mer., to Lethbridge, Alta., 120 miles. No construction has been undertaken by the company to date. (June, 1905, pg. 241.)

Ashcroft, Barkerville and Fort George Ry.—The Dominion Parliament in 1906 incorporated a company with this title to construct a line from Ashcroft or Kamloops, B.C., to Fort George, with a branch from Quesnel to Barkerville. The length of the line authorized is 300 miles. An extension of time for construction was granted in 1908, but up to date there has not been any construction. (Mar., 1908, pg. 179.)

Athabaska Northern Ry.—The Dominion Parliament in 1905 incorporated a company with this title for the purpose of constructing a line of 100 miles from Edmonton to Athabasca Landing, Alta., and in 1907 an extension of time for construction was granted. No construction has been undertaken to date. (Jan., pg. 17.)

Athabaska Ry.—The Dominion Parliament in 1905 incorporated a company with this title to construct a railway of about 300 miles, from Edmonton along the north side of the North Saskatchewan River to tp. 59, r. 19, w. 4th mer., thence by the Northwest end of Smoky Lake to the west end of Lake Labiche, thence to the Athabaska River at the junction with the Clearwater River. An extension of time for construction was granted in 1907, but up to date nothing in the way of construction has been done. (May, pg. 355.)

Atlantic and Lake Superior Ry.—This company was incorporated by the Dominion Parliament in 1893 to construct a railway from Gaspe Bay, Que., to St. Marys River, Ont. about 1,200 miles. It took over the Baie des Chaleurs Ry. and proposed to take over some other short lines, but its project was never carried out. The receiver for the bondholders continued the operation of the B. des C. Ry. and completed it for 100 miles. The affairs of the company have been before the courts at various times ever since, and are only just about straightened out. The Atlantic, Quebec and Western Ry. was subsequently incorporated, with power to take over the line, and it is now completing the construction into Gaspe. (See Atlantic, Quebec and Western Ry., June, pg. 413.)

Battleford and Lake Lenore Ry.—A company with this title was incorporated by the Dominion Parliament in 1902, to construct a line from Hobbema station on the Calgary and Edmonton branch of the C.P.R., easterly to Lake Lenore, thence to the Canadian Northern Ry. near Crooked River, with a branch from tp. 40, or 41, r. 24, w. 2nd mer., to Yorkton, Sask. The length of the lines authorized is 600 miles, but no construction has been done. An extension of time for construction was granted in 1905. (Feb., 1905, pg. 45.)

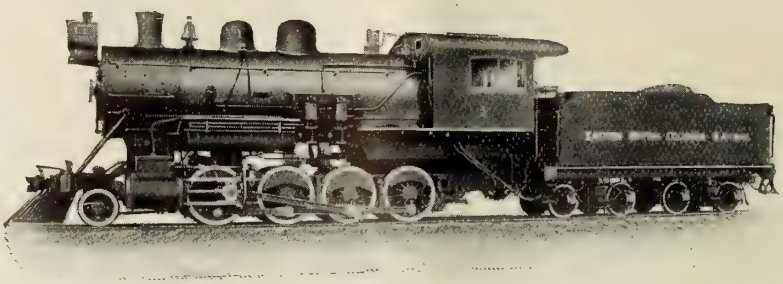
Bessemer and Barry's Bay Ry.—The Dominion Parliament in 1904 incorporated a company with this title with power to construct a railway from L'Amable station on the Central Ontario Ry. to Barry's Bay, Ont., 40 miles. The company has constructed a line of about 5 miles from L'Amable station to its iron mine. (Mar., 1908, pg. 179.)

Boundary, Kamloops and Cariboo Central Ry.—In 1904 the Dominion Parliament incorporated a company with this title for the purpose of constructing a line from Midway, B.C., to Kamloops, thence via North Thompson River to the Nechaco River, thence to Hazleton, to Teslin Lake, and on to the confluence of the Hootalinqua River with the Yukon River, about 1,600 miles. Extensions of time for construction were granted in 1906 and 1908, but no work has yet been undertaken. (Mar., 1908, pg. 179.)

Brantford and Woodstock Ry.—In 1905 the Dominion Parliament incorporated a company with this title to construct a railway of 30 miles connecting Brantford and Woodstock, Ont. No construction has been undertaken to date. (Mar., 1905, pg. 89.)

British Yukon Ry.—This title was given by an act passed in 1900 to the British Yukon Mining, Trading and Transportation Co., incorporated by the Dominion

LOCOMOTIVES FOR ALL CLASSES OF SERVICE



Consolidation Type Freight Locomotive, Built for Eastern British Columbia Railway.

Total weight of engine in working order, 186,310 pounds. Weight on driving wheels, 166,100 pounds. Diameter of driving wheels, 51 inches. Boiler pressure, 210 pounds. Cylinders, 20 x 28 inches. Maximum tractive power, 39.200 pounds.

ATLANTIC STEAM SHOVEL

Direct wire rope hoist with but one sheave, instead of chain hoist with from five to seven sheaves, reduces delays and loss of time due to breakdowns, increases the efficiency of the engines, and reduces repair bills as well as fuel consumption.

Finished, interchangeable spare parts always on hand at works.

MONTREAL LOCOMOTIVE WORKS, LIMITED

BANK OF OTTAWA BUILDING, MONTREAL, CANADA

Parliament in 1897. This act authorized the construction of a railway from the head of Lynn Canal through the White Pass to Selkirk, 300 miles. Of this there has been constructed 90.32 miles, viz.: White Pass to White Horse spur, and a branch to White Horse, Yukon Territory, In Alaska the line extends from White Pass to Skagway, and from White Horse a line of steamers is operated during the season of navigation to Dawson, a stage route being operated during the winter. The whole is operated as the White Pass and Yukon Ry. (See White Pass and Yukon Ry., May, 1908, pg. 335.)

Brockville, Westport and North Western Ry.—A company with this title was incorporated by the Dominion Parliament in 1903, with the object of acquiring the 45 miles of railway constructed by the Brockville, Westport and Sault Ste. Marie Ry., and to extend the same from Westport to Sault Ste. Marie, and to North Bay, with a branch to Barry's Bay or other point on the Canada Atlantic Ry. The 45 miles constructed extends from Brockville to Westport, Ont., and the company has not undertaken any construction upon the other 500 miles of its projected line, but it obtained extensions of time for its construction in 1905, 1907 and at the recent session of the Dominion Parliament. (Mar., pg. 171.)

Bruce Mines and Algoma Ry.—A press despatch from Boston, Mass., June 15, stated that plans had been completed under which a syndicate of Boston and New York capitalists would take over this line, and extend it from its present terminus at the Rock Lake Copper Mines, Ont., to the timber limits to the north. The company has a charter to construct a line to the C.P.R. and northerly towards Hudson Bay. The portion already built has not been operated for some years. (Sept., 1908, pg. 613.)

Burks Falls and French River Ry.—The Dominion Parliament in 1906 incorporated a company with this title to construct a railway from Burks Falls to French River, where that river is crossed by the C.P.R. Toronto-Sudbury line. Up to date nothing has been done. (See Burks Falls Ry., May, pg. 355.)

Burrard, Westminster and Boundary Ry. and Navigation Co.—This company was incorporated by the Dominion Parliament in 1907 to construct a belt line of about 100 miles from Vancouver, through New Westminster, Port Moody, etc., to the starting point; and from a proposed bridge at the Second Narrows to the north boundary of North Vancouver, thence to the North Arm and Howe Sound, with branches. Nothing in the way of construction has been undertaken to date. (Mar., pg. 355.)

Calgary, Red Deer and Battleford Ry.—The Dominion Parliament in 1905 incorporated a company with this title, having power to construct a railway of 300 miles from Calgary, Alta., to Battleford, Sask. The company has not done any construction to date. (Mar., 1905, pg. 89.)

Calgary and Fernie Ry.—The Dominion Parliament incorporated a company with this title to construct a railway of 150 miles from Calgary, Alta., through Kananaskis Pass to Elk River and Fernie, B.C. An extension of time for construction was granted in 1908, but nothing has been done. (Mar., 1908, pg. 179.)

Calgary and Battleford Ry.—The Dominion Parliament in 1905 authorized the construction of a line from Calgary, Alta., to Battleford and Prince Albert, Sask., about 450 miles. The company has not proceeded with any construction to date. (Mar., 1905, pg. 89.)

Canada Central Ry.—The Dominion Parliament in 1902 incorporated a company with this title, with power to construct a railway of about 2,500 miles as follows: From the mouth of French River on Georgian Bay, Ont., to Lake Wanapitei, thence to the headquarters of Montreal River, and northwesterly to Albany River, thence to points not less than 50 miles north of Prince Albert and Edmonton, and to Tete Jaune Cache; with a branch to Port Arthur and Fort William, Ont. The company obtained extensions of time for construction in 1903, 1905, 1906 and 1907, but no work has been done. (May, pg. 355.)

Canso and Louisburg Ry.—An act was passed in 1892 by the Dominion Parliament authorizing the construction of a railway from the Strait of Canso via St. Peters to Louisburg and Sydney, N.S., 120 miles. No construction has been done by this company, but under the title of the Cape Breton Ry., a company chartered by the Nova Scotia Legislature, 31 miles of line have been constructed to St. Peters. (See Cape Breton Ry., Sept., 1908, pg. 615.)

Central Ry. of Canada.—The Dominion Parliament incorporated a company with the title of the Ottawa River Ry., power being given to construct a railway from Grenville on the Ottawa River to Montreal, with various branch lines, including one to Hawkesbury, Ont. An extension of time for construction was granted in 1904, and again in 1905, when the name of the company was changed to the Central Ry. of Canada. Under acts passed by the Ontario Legislature the company has secured power to construct a large number of lines throughout the old portion of the province. No construction has been done under either of the charters. (Sept., 1908, pg. 615.)

Chicago and North-Western Ry.—U.S. press reports state that this company is making active preparations for the construction of a line to reach the Pacific Coast at Seattle, Wash., and Vancouver, B.C.

The Chicago, Milwaukee and St. Paul Ry., it is reported, has decided to start at once the construction of a system of branch lines west of the Missouri River, in North and South Dakota, in connection with its main line now under construction to the Pacific Coast. The lines to the south, which have been located, will be started first, and surveys for the northern lines are said to be in progress. (June, pg. 413.)

Cobalt Range Ry.—The Dominion Parliament in 1906 incorporated a company with this title to construct a railway from Haileybury, Ont., to Lorraine tp., opposite Fort Temiskaming on the Ottawa River, and from Fort Temiskaming to Ville Marie and Kippewa, Que., on the Temiscamingue Colonization Ry. (C.P.R. Mattawa-Kippewa branch), about 70 miles, with power to operate a car ferry across the river at Fort Temiskaming, Que. The company has not yet arrived at the construction stage. (Feb., pg. 101.)

Collingwood Southern Ry.—The Dominion Parliament in 1907 incorporated a company with this title to construct a line from Collingwood southerly to Baxter on the C.P.R. Toronto-Sudbury line, and from Collingwood to Orillia, Ont. The lines to be constructed are about 75 miles, but nothing in the way of construction has yet been arranged. (May pg. 355.)

Detroit River Tunnel.—We are advised that construction work on the double tunnel under the Detroit River, to connect Windsor, Ont., and Detroit, Mich., is progressing satisfactorily. The tunnel approach sections on both sides of the river are expected to be completed towards the end of July. The open cut work, both in Windsor and Detroit, has been almost completed. At the beginning of June two sections of the sub-aqueous construction had to be got in place, and this work, in addition to building in the interior lining, was expected to take from four to six months. It is anticipated that if the work proceeds as satisfactorily as at present, and there are no accidents, the tunnel will be completed and ready for operation early in 1910. (May, pg. 413.)

Dominion Central Ry.—An act was passed by the Dominion Parliament incorporating a company with the title of the Kingston and Dominion Central Ry., with power to construct a railway of about 240 miles from Kingston, via Newboro and Westport, to Georgian Bay between Parry Sound and Midland, Ont. The name of the company was changed to Dominion Central Ry. in 1905, when, and in 1907, extensions of time were granted for construction. Up to date no construction has been taken in hand. (Dec., 1906, pg. 611.)

Eastern Townships Ry.—This company was incorporated by the Dominion Parliament in 1907, with power to construct a railway from the Intercolonial Ry. in St. Leonard parish to the junction of the Quebec Central Ry. and the Maine Central Rd., in Wolfe county, Que., about 75 miles. Nothing in the way of construction has yet been done. (Sept., 1908, pg. 615.)

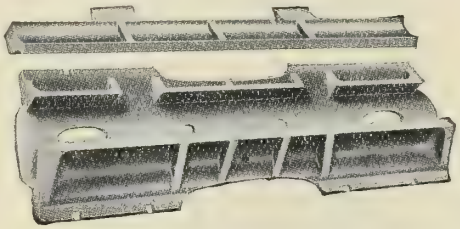
Edmonton, Dunvegan and British Columbia Ry.—The Dominion Parliament in 1907 incorporated a company with this title to construct a railway from Edmonton, Alta., to Dunvegan, thence along Peace River to its confluence with Parsnip River, to Fort George, B.C. The line authorized is 650 miles. An extension of time for construction was granted in 1908, but so far nothing in the way of construction has been done. (Mar., 1908, pg. 181.)

Elgin and Havelock Ry.—A company with this title was incorporated by the Dominion Parliament in 1894 to acquire the Elgin, Petitcodiac and Havelock Ry. (constructed under an act of the New Brunswick Legislature), and to extend it from Havelock to Chipman, and to construct a line from a point on the said line to Salisbury or Moncton, and from Elgin to Alma. The mileage authorized was 100 miles, and of this 28 miles have been constructed from Elgin, crossing the I.C.R. at Petitcodiac Jct., to Havelock, and from Havelock to Keith's Mills.

Erie, London and Tillsonburg Ry.—A company with this title was incorporated by the Dominion Parliament in 1906, with power to construct a railway from Port Burwell to London, with a branch from between Port Burwell and Aylmer to Tillsonburg, Ont. The mileage authorized is 50 miles; an extension of time

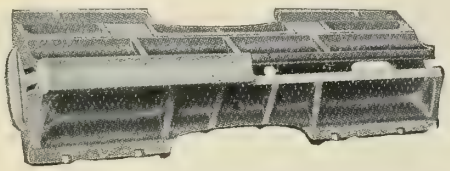
Have You Seen Williams Boltless Rail Joint?

The joint was first put in trial service on the Pecos River line of the Santa Fe at Roswell, N. Mex., where it remained for 11 months, and when removed at the end of that time it showed neither corrosion nor bright spots indicating wear. These joints have been in service for 10 months on the Fort Wayne division of the Pennsylvania Lines West, for 9 months in the yards of the St. Paul Union Depot Co., and for 8 months on the Wisconsin division of the Chicago & North Western Ry. in Chicago, where they are carrying the heavy North Shore suburban traffic of the road, as well as the through traffic for



the Wisconsin & Milwaukee division, which amounts to 316 trains every 24 hours.

The joints are made of malleable iron and have on the bottom a series of transverse ribs for strength, the outer ones of which come against the tie and prevent longitudinal movement. To prevent rail creeping, there is a round hole through the joint midway of the outer side, in which a 1-in. round bolt is inserted, the rail flanges being cut away at the adjacent corners the slight amount necessary to permit the insertion of the bolt. The joints weigh the same as a yard of the rail to which applied; the joint for an 80-lb. rail, for example, weighing 80 lbs.



"I want to ride on a railroad equipped with the W.B.R.J. and the 20th Century Steel Ties."

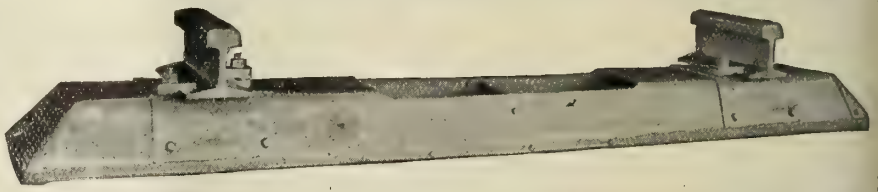
THE 20th CENTURY STEEL TIE



WILLIAMS BOLTLESS RAIL JOINT MANUFACTURING CO., INC.

503 Manhattan Bldg., CHICAGO, ILL.

for construction was granted in 1908, but up to date nothing has been done. (Mar., 1908, pg. 181.)

Essex Terminal Ry.—The Dominion Parliament, 1902, incorporated a company with this title, authorizing the construction of a railway of 18 miles from Walkerville to Windsor, Sandwich and Amherstburg, Ont. In 1904 and 1906 the company was given extensions of time for construction. The company laid 2 miles of track in 1906. (Dec., 1908, pg. 865.)

Fording Valley Ry.—The Dominion Parliament in 1906 incorporated a company with this title to construct a line, including branches, of 175 miles, as follows: from the British Columbia Southern Ry. (C.P.R.) between Elk River and Michel Creek to the Fording River Valley, along Henrietta Creek to the Alberta boundary, and to Okotoks, and branch line up Five Mile Creek, and other points, not exceeding 15 miles each. The company has to date undertaken any construction. (Oct., 1906, pg. 583.)

Fort William Terminal and Bridge Co.—The Dominion Parliament in 1906 incorporated a company with this title with power to construct certain bridges and a railway around islands 1 and 2 at the mouth of the Kaministikwia River, Fort William, Ont. The line to be constructed is 5 miles. An extension of time for construction was granted in 1908, but up to the present time the company has not done any work. (May, 1908, pg. 329.)

Great West Ry.—In 1903 the Dominion Parliament incorporated a company with the title of the North West Coal and Coke Co., with power, among other things, to construct a railway from Bull Park on North Fork River to Cowley or Livingstone, Alta., on the C.P.R. Crow's Nest branch. In 1905 an act extending the time for construction and changing the name of the company to the Great West Ry. was passed. The company has not yet started any railway construction. (Mar., 1908, pg. 181.)

Guelph and Georgian Bay Ry.—This company was incorporated in 1903 by the Dominion Parliament, with authority to construct a line of about 150 miles from Guelph to Elora, connecting Elora, Fergus, Arthur and Mount Forest, Ont. An extension of time was obtained in 1905, but no construction has been undertaken to date. (May, 1905, pg. 93.)

Hillcrest Ry., Coal and Coke Co.—In 1906 the Dominion Parliament incorporated a company with this title to construct a line from Morrisey, B.C., to Hillcrest Jct., on the C.P.R. Crow's Nest branch, thence to Cardston, Alta., with branches from Mill Creek to Pincher Creek, and to the coal deposits in tp. 5, r. 1, w. 5th mer. The length of the lines authorized is 150 miles, and of this there has been constructed 1.5 miles, from Hillcrest Jct. to its mine, in Alta. (July, 1908, pg. 471.)

Hudson's Bay and Northwest Ry.—This title was given by an act passed in 1899 to a company originally incorporated by the Dominion Parliament in 1897 as the Hudson's Bay and Yukon Ry. and Navigation Co. The company has power to construct a railway about 1,000 miles long from Chesterfield Inlet on Hudson's Bay to Great Slave Lake, and from the Mackenzie River to the Porcupine or Yukon River. It obtained extensions of time for construction in 1899, 1902 and 1904, but so far no work has been done.

Hudson's Bay and Pacific Ry.—In 1896 the Dominion Parliament incorporated a company with this title to construct a line from Fort Churchill on Hudson's Bay to Fond du Lac on Lake Athabasca, from Fort Churchill to the north-west end of Lake Winnipeg, thence to Prince Albert, and Calgary, and from Manitou Lake to Edmonton, Alta., 1,800 miles. The time within which these lines might be constructed was extended in 1898, 1901, 1903, 1905 and 1909, but up to the present no definite construction work has been undertaken. (May, pg. 355.)

Indian River Ry.—The Dominion Parliament in 1902 incorporated a company with this title, authorizing the construction of a line of 20 miles from the north end of Lake Megantic to the international boundary at Riviere Morte, Que. An extension of time for construction was granted in 1907, but so far nothing has been done. (June, 1908, pg. 403.)

Intercolonial Ry.—Tenders are under consideration for the construction of a three stall engine house, turntable, ringwall with centre foundation, freight shed, loading platform, and for various alterations and additions to, and for the moving of the station at Loggieville, N.B. Loggieville is the terminal point of the extension of the old Canada Eastern Ry. from Chatham, where it crosses the I.C.R.

The newly appointed Government Railways Managing Board held its first meeting in Montreal, May 27, and subsequently made a visit of inspection over the I.C.R. and the P.E.I. Ry. The members were acompanied during their inspection by the chief officers of the lines and by the officials of the different divisions. The Minister of Railways recently announced that the headquarters of the Board would be in Montreal, where the regular meetings will be held. (June, pg. 413.)

Interprovincial and James Bay Ry.—The Dominion Parliament in 1901 incorporated a company with this title to construct a railway from Lumsden's Mill on the C.P.R. Kippewa branch to Des Quinze River. Extensions of time for construction were granted in 1903 and 1905, but no construction work has been undertaken to the present time. (June, 1908, pg. 399.)

Joliette and Lake Manuan Colonization Ry.—The line which this company was authorized to construct by its act of incorporation passed by the Dominion Parliament in 1903 was to be 140 miles long, to extend from Joliette to Ste. Emelie de l'Energie, to St. Michel des Saints and Lake Manuan, Que. No construction has been undertaken, and although it was reported to the House of Commons in the list of charters granted 1888-1908 as having lapsed, Parliament at the last session passed an act giving the company an extension of time for construction. (Feb., pg. 103, and June, 1908, pg. 403.)

Kamloops and Yellow Head Pass Ry.—This company was incorporated by the Dominion Parliament in 1906 to construct a railway from Kamloops, B.C., to Tete Jaune Cache, via the North Thompson River, Canoe River valleys and McLellan's Creek. The line authorized is 230 miles long, but up to date no construction has been undertaken. (Mar., 1908, pg. 181.)

Kettle Valley Lines.—The Dominion Parliament in 1901 incorporated a company with the title of the Kettle River Valley Ry., with power to construct a line from the International boundary near Cascade City westerly to Carson City, with a branch from Grand Forks 50 miles up the North Fork of the Kettle River; also from Grand Forks via Greenwood to the International boundary at Midway; in 1904 it was granted an extension of time for construction, and in 1906, in addition to being granted a further extension of time, it was given authority to extend its line from Midway to Hedley, from Hedley northerly for 20 miles, and from the Midway-Hedley line to Penticton. The total length of lines authorized is 200 miles, and of this distance there has been constructed about 16 miles, viz.: from the International boundary to Grand Forks, B.C., 3.86 miles, and the remaining mileage from Grand Forks up the North Fork of the Kettle River. Of this the 3.86 miles only has been operated in connection with the company's line to Republic, Wash. (April, pg. 247.)

Klondike Mines Ry.—The Dominion Parliament in 1899 incorporated a company with this title to construct a railway from Klondike City to Bonanza Creek, to the Divide, Dominion Creek, Indian Creek and Dawson City, with branches on Klondike River, Hunker Creek, Bean Creek, Quartz, Sulphur, Eldorado and other creeks, 120 miles. Extensions of time and variation of powers were obtained in 1901, 1902, 1903 and 1907. The company has completed the construction of 32 miles from Klondike City towards Stewart River. (Sept., 1907, pg. 663.)

Kootenay, Cariboo and Pacific Ry.—This company was incorporated by the Dominion Parliament in 1903, and was given an extension of time for construction in 1905. The line authorized to be constructed is to start at Golden, B.C., and to extend to Tete Jaune Cache, Barkerville and Fort George, altogether 400 miles. No construction work has been undertaken to date. (Feb., 1905, pg. 49.)

Lebonk and Thunder Bay Ry.—The Dominion Parliament in 1905 incorporated a company with this title to construct a railway from Thunder Bay, following the Blende River, to Lebonk mine, on lot 1, Merrick's survey, in McTavish tp., and westerly to Loon Lake, Ont. Nothing in the way of construction has been done. (April, 1905, pg. 145.)

London and Port Stanley Ry.—A proposition has been made to the London, Ont., City Council, for the electrification of the L. and P.S.R. The Mayor said he had been informed that there was a possibility that the transmission lines between London and St. Thomas would run along the L. and P.S.R. right of way, but nothing official had come to his knowledge. The electrification of the line was a big problem, and it would be some years yet before the city could handle it.

London and St. Clair Ry.—The Dominion Parliament in 1905 incorporated a company with this title to construct a railway of 70 miles from the Ontario and Quebec Ry. (C.P.R.) between London and Komoka to the St. Clair River between Sarnia and Lake St. Clair. An extension of time for construction was granted in 1907, but up to date nothing has been done. (Nov., 1906, pg. 641.)

Macleod, Cardston and Montana Ry.—A company with this title was incorpor-

ated by the Dominion Parliament in 1903, to construct a line of 100 miles from Macleod via Cardston to the International boundary west of range 21, with a branch from between Macleod and Cardston to tp. 1, r. 30, w. 5th mer. Extensions of time were granted in 1905 and 1908, but up to the present time no contruction work has been undertaken. (Sept., 1908, pg. 617.)

Malone and Hopkins Point Ry.—The Dominion Parliament in 1907 incorporated a company with this title to construct a line from Dundee to Hopkins Point, Huntingdon Co., Que. Construction of the line has not been taken in hand to date. (Mar., 1907, pg. 161.)

Manitoba and Keewatin Ry.—By its act of incorporation, passed by the Dominion Parliament in 1902, this company was authorized to construct 1,200 miles of line located as follows: from Winnipeg or Selkirk to the west coast of Hudson's Bay or James Bay at the mouth of the Severn River, and a branch from the main line west of Cat Lake to the C.P.R. transcontinental line at Ignace or Black River, Ont. Extensions of time for construction were granted in 1904 and 1906, but so far no construction has been undertaken. (Feb., 1906, pg. 63, and Feb., 1905, pg. 49.)

Manitoulin and North Shore Ry.—This railway company was incorporated by the Dominion Parliament in 1900, to construct a line from Little Current on Manitoulin Island northerly and easterly 100 miles, crossing the C.P.R. Sault Ste. Marie branch at Onaping or Cartier, with a branch from the line in Drury of Hyman tp. to Sudbury; also a line from Little Current to the southern shore of Manitoulin Island, and from Tobermorey in Bruce County through Wiarton and Owen Sound to Meaford, Ont., with power to operate car ferries between Tobermorey and Manitoulin Island. The length of the line authorized was 250 miles, and there has been constructed about 16 miles in three sections connecting Sudbury with the Gertrude mines, 13.50 miles; Spanish River with the C.P.R. at Stanley Jct., 1.50 miles; and the Elsie mines with the main line, 1.00 mile. The line is owned by the Lake Superior Corporation, along with the Algoma Central and Hudson Bay Ry., and the section to Spanish River is operated by the C.P.R. Extensions of time for construction were granted in 1901, 1903, 1905, 1906, 1907 and 1908, together with powers respecting agreements with other companies. The more important legislation with regard to construction, however, has been passed by the Ontario Legislature particularly at its last session. (June, pg. 413.)

Medicine Hat and Northern Alberta Ry.—This company was incorporated by the Dominion Parliament in 1902, and was given extensions of time for construction in 1903 and 1905. It has power to construct a line from Medicine Hat to the North Saskatchewan River at Victoria, Northern Alberta. The length of the line authorized is 350 miles, but no construction work has been done to date. (Feb., 1905, pg. 49.)

Montreal Bridge and Terminal Co.—A company was incorporated by the Dominion Parliament in 1890 to construct a bridge and approaches over the St. Lawrence River and lines to connect with other lines in Montreal, a total length of 5 miles. The time for construction was extended in 1897 and 1905, and the title of the company has been changed from the Montreal Bridge Co. to the present one. (June, pg. 415.)

Montreal, Quebec and Southern Ry.—A company with this title was incorporated by the Dominion Parliament in 1905, with power to construct a railway of 25 miles from St. Guillaume station on the Montreal and Atlantic Ry. (C.P.R.) to Sorel, Que. Nothing in the way of construction has been undertaken to date. (Feb., 1905, pg. 49.)

Moose Jaw and Edmonton Ry.—The Dominion Parliament in 1905 incorporated a company with this title to construct a line from Moose Jaw to the elbow of the South Saskatchewan River, and thence to Edmonton, Alta., about 450 miles. Up to date the company has not proceeded with any construction. (Mar., 1905, pg. 93.)

New York Central Lines in Canada.—The N.Y.C. and Hudson River Ry. directly controls the Ottawa and New York Ry., extending from the St. Lawrence River near Cornwall to Ottawa, 56.90 miles; and owns jointly with the C.P.R. the Toronto, Hamilton and Buffalo Ry., 83.67 miles. Through its control of the Michigan Central Rd., it owns the Canada Southern Ry., 382.19 miles, and through its control of the Rutland Rd. it owns, leases or controls the Rutland and Noyan Ry., 3.39 miles; the St. Lawrence and Adirondack Ry., and its leased line the South Western Ry., 46.12 miles, a total of 572.27 miles.

A company with the title of the Rutland and Noyan Ry. was incorporated by the Dominion Parliament in 1899, with power to construct a line from the junction of the Canada Atlantic Ry. and the East Richelieu Valley Ry near Noyan, Que., to the International boundary. A line 5 miles long was authorized , and the line as constructed is 3.39 miles.

A company with the title of the St. Lawrence and Adirondack Ry. was incorporated by the Dominion Parliament in 1888, with power to construct a line from Salaberry de Valleyfield, Beauharnois Co., to Huntingdon, to reach the frontier of New York State, and to lease other lines. The mileage authorized was 78 miles, and of this there has been constructed 32.82 miles, viz., from the junction with the Canada Atlantic Ry. near Valleyfield to the International boundary, 19.22 miles; and from Beauharnois to a junction with the C.P.R. at Adirondack Jct., 12.90 miles. See South Western Ry. for additional information.

The Southwestern Ry. company was incorporated by the Dominion Parliament in 1888 to construct a railway from Caughnawaga to the Atlantic and Northwest bridge over the St. Lawrence, and to the International boundary near Dundee, Que. The company passed by lease under the control of the St. Lawrence and Adirondack Ry. in 1896.

Northern Empire Ry.—The Dominion Parliament in 1908 incorporated a company with this title, having for its object the construction of a railway, including branches, of 2,000 miles, located as follows: from the International boundary east of Cardston, Alta., in tp. 1, r. 20, 21, 22 or 23, w. 4th mer., through Lethbridge to Fort McMurray, thence northwesterly via Fort Vermillion, through Yukon Territory via Dawson City, to the boundary between Yukon and Alaska, with a branch from near Victoria, Alta., to Edmonton, Alta. Nothing in the way of construction has yet been undertaken. (April, 1908, pg. 245.)

Orford Mountain Ry.—The company has not reached any decision as to what, if any, construction will be done on its line during the summer. It has partially completed its extension from Mansonville, Que., to the International boundary, near North Troy, Vt., and has also in contemplation an extension from Windsor Mills to Bromptonville, Que., about 8 miles. The work is being done under the charge of R. K. Harris, Chief Engineer of the company, Eastman, Que. (Sept., 1908, pg. 619.)

Owen Sound and Meaford Ry.—A local company was incorporated in 1905 by the Dominion Parliament to construct a line of 20 miles to connect Owen Sound and Meaford, Ont. In 1908 an extension of time for the construction was granted, but up to the present time nothing has been done. The company was given definite power to undertake the work, in event of the failure of the Manitoulin and North Shore Ry. to construct this portion of its line by a certain date. Negotiations were also carried on with the G.T.R. to construct the line, but nothing has been done, and the latest development of the plans to ensure direct communication between these towns on the shore of the Georgian Bay is the proposal of an Owen Sound livery proprietor to run a motor bus at stated intervals daily. (April, pg. 249.)

Pontiac and Renfrew Ry.—This company was incorporated by a Dominion charter in 1888, with power to construct a railway from between Braeside and Arnprior, Ont., to the Pontiac Pacific Jct. Ry., between Quyon and Smith's stations, and thence to Desert, Que., about 80 miles. It has constructed a line from Wyman's station on the Pontiac Pacific Jct. Ry. to the Bristol iron mines in Pontiac county, Que., 4.25 miles. The line has not been operated for some years. It was originally constructed by the Drummond interests of Montreal, and has recently passed into the hands of the Canada Iron Corporation, Ld.

Prince Albert and North Saskatchewan Ry.—This company was incorporated by the Dominion Parliament in 1906, with power to construct a railway of 230 miles from Prince Albert to Pas Mission, Sask. Nothing has been done to date in the way of construction. (Oct., 1906, pg. 585.)

Prince Edward Island Tunnel.—The question of the winter communication between P.E.I. and the mainland is brought forward in one form or another at every session of the Dominion Parliament. The advocates of a direct railway service believe that the construction of a tunnel is the only real solution of the questions, and the argument which they present is that the Government should have a thorough survey made so as to settle once and for all the feasibility of such a tunnel. A partial survey was made in 1895, and upon this the present Government made an estimate showing that a tunnel could be constructed for about $10,000,000, and it was thought if the tunnel would not cost more the province was entitled to it. A. L. Fraser, M.P., speaking in the House of Commons recently, said that 75% of the people on the island wished this matter to be settled one way or the other, and the only way to satisfy them would be to have a proper survey made and a report presented as to the cost of the tunnel.

TATE FLEXIBLE STAYBOLT

Recognized as the Standard of all Flexible Stays.

Over 2,000,000 Bolts in Service in the United States.

COMPLETE INSTALLATION

Rigidity of Firebox construction is unquestionably the main source of injury to the material make-up of the locomotive boiler. The heat absorbing surfaces must expand freely to enable each portion to accommodate the difference of expansion between the outer shell and firebox plates without producing strains detrimental to other portions of the structure.

The Tate Flexible Staybolt has been applied to several fireboxes covering the entire staybolt area, and over a service period of two years no expenditures have been made for maintenance and the complete assemblage was pronounced as good as when first installed.

The Tate Bolts were longitudinally adjusted in certain rigid localities to compensate for the difference of expansion between the outer shell and firebox.

The general use of the Tate Flexible Staybolt will eliminate staybolt breakage, and largely, if not entirely, fire sheet cracking, flue and seam leakage.

FLANNERY BOLT COMPANY

Suite 328 Frick Building **PITTSBURG, PA.** B. E. D. STAFFORD, Gen. Manager

——MADE AND SOLD IN CANADA BY——

CANADA FOUNDRY COMPANY, LIMITED

HEAD OFFICE AND WORKS, TORONTO, ONT.

DISTRICT OFFICES: Montreal, Halifax, Ottawa, Winnipeg, Vancouver, Rossland

If the cost would be out of proportion to what was expected the tunnel would not be asked for because the expenditure would not be justified. If these surveys were made and the estimates prepared the people would be satisfied, but until this was done they would be continually asking for a tunnel. They did not want anything unreasonable, but they wanted the terms of confederation carried out, and until this question of the feasibility of a tunnel is got out of the way they will feel that they could not have continuous communication with the mainland. No action was taken by Parliament, but the Ministers promised to keep the matter before them. (April, pg. 249.)

Quebec and Lake Huron Ry.—In 1900 the Dominion Parliament incorporated a company with this title to construct a railway of 500 miles from Quebec to the mouth of French River on Georgian Bay. The project was part of an ambitious plan with which W. Seward Webb, then President of the Rutland Rd., was interested, in connection with which local companies were chartered in Quebec, New Brunswick and Nova Scotia. The plans fell through, the only construction undertaken being the Cape Breton Ry. in Nova Scotia. The Q. and L. H. charter was renewed by the Dominion Parliament in 1904 and 1906, but beyond some preliminary surveys nothing has been done. (Feb., 1907, pg. 89.)

Quebec and New Brunswick Ry.—A company with this title was incorporated by the Dominion Parliament in 1900 to construct a railway from Connor station, Madawaska county, to St. Charles Jct. on the I.C.R., or St. Anselme on the Quebec Central Ry., or Chaudiere Jct., Que., and extensions of time were granted in 1903 and 1908. The length of the line authorized was 130 miles, but beyond some grading in 1902 near Connor nothing has been done. At the recent session of the Dominion Parliament an act was passed further extending the time for construction and varying the route, so that connection might be made with lines in the U.S. (Mar., pg. 175.)

Quebec Midland Ry.—A company with this title was incorporated in 1906 by the Dominion Parliament, for the purpose of construsting a railway of 140 miles from the boundary between Ontario and Quebec at Lake Abitibi to the west shore of Lake Mattagami, Que. The company has not yet reached the construction stage. (April, 1906, pg. 455.)

Quebec, Montreal and Southern Ry.—We are advised that beyond the completion of the extension from Pierreville to Fortierville, Que., which was opened for traffic in June, the company has not any further construction in hand. The Delaware and Hudson Co., which owns the Q., M. and S. Ry., has not yet authorized the carrying on of any further extension of the line, at present terminating at Fortierville, to the Quebec Bridge. (June, pg. 415.)

Quebec, Saguenay and St. Lawrence Ry.—A company was incorporated by the Dominion Parliament in 1903 with this title, having power to construct a line from the Bay of Seven Islands to the Saguenay River between Lake St. John and Tadousac, thence to Quebec, with branches to St. Alphonse, Murray Bay and St. Paul's Bay, about 450 miles. This charter is owned by the interests developing the pulp and power plant on the St. Anne's River, and the wharf, etc., at Clarke City, Seven Islands Bay, under the title of the North Shore Ry. Power and Navigation Co. This company has constructed a railway of about 9 miles from Clarke City to the falls of the St. Anne River. (April, 1906, pg. 195.)

Quinze and Blanche River Ry.—This company was incorporated by the Dominion Parliament in 1907, power being given to construct a railway from Dymont, Ont., on the T. and N. O. Ry. to Des Quinze Lake, Que., about 30 miles. and construction has been started near Quinze Rapids. (Mar., pg. 175, and Sept., 1908, pg. 619.)

Red Deer Valley Ry.—In 1899 the Dominion Parliament incorporated a company with this title to construct about 120 miles of railway, and extensions of time for its construction were granted in 1891, 1894, 1897, 1899, 1900, 1903 and 1905. The lines authorized were from Calgary northeasterly to the Red Deer River in tp. 32, r. 21, 4th mer., thence to tps. 30 to 32, r. 22; also from Cheadle station to a junction with the Calgary line in tp. 26, r. 25; with branches from the main line in tp. 24, r. 29, to between Sheppard and Calgary, and from the main line in tp. 29, r. 23, easterly to Red Deer River. No portion of these lines has yet been constructed.

Regina and Hudson's Bay Ry.—The Dominion Parliament in 1903 incorporated a company with this title, power being given to construct a line from the International boundary between the 2nd and 3rd principal meridian to Regina, thence northerly to Craven, Longlaketon, Strassburg, Carrot River and The Pas, with a branch from Craven to Big Quill Lake, a total of about 600 miles. The time for construction was extended in 1905, but up to the present nothing has been done. (Feb., 1905, pg. 51.)

Rocky Mountain Ry. and Coal Co.—The Dominion Parliament in 1891 incorporated a company with this title for the purpose of constructing a railway from Anthracite on the C.P.R. northerly to Cascade River, to the south forks of Red Deer River, and to Red Deer Forks coal mine, about 50 miles. Extensions of time for construction were granted in 1894 and 1903, but no construction has been undertaken.

Saskatchewan Valley and Hudson's Bay Ry.—In 1907 the Dominion Parliament incorporated a company with this title to construct the following lines of railway: from Edmonton, Alta., to Smoky Lake; from Prince Albert, Sask., to Pelican Lake and Fort Churchill; and from Smoky Lake to Ile a la Crosse Lake and Pelican Lake. These projected lines have a length of about 1,500 miles, but up to date nothing in the way of construction has been done. (Mar., pg. 175.)

Southern Central Pacific Ry.—A company with this title was incorporated by the Dominion Parliament in 1903, and was given power to construct a railway from Vancouver via Kootenay Pass to Old Man River, Alta., thence to Hudson's Bay not less than 100 miles north of Fort Churchill. In 1906 it was given an extension of time for construction, and was also authorized to construct a branch from its main line near Skaist River, B.C., via Kamloops and Yellow Head Pass through Alberta to Cold Lake on the main line. The length of lines authorized is estimated at 2,000 miles, but so far no construction has been undertaken. (May, pg. 357.)

St. Maurice Valley Ry.—In 1904 the Dominion Parliament incorporated a company with this title to construct a railway from Three Rivers to Shawinigan Falls and Grand Mere, Que., and thence to a junction with the National Transcontinental Ry., 250 miles. In 1905 an act was passed authorizing the company to enter into agreements with other companies. The company has constructed a line from Three Rivers to Grand Mere, 22 miles of which is operated by the C.P.R. (June, pg. 415.)

Temagami, Cobalt and Temiskaming Ry.—Under this title the Dominion Parliament in 1906 incorporated a company, with power to construct a railway of about 100 miles from Lake Temagami to the Quinze rapids of the Ottawa River, Ont. Nothing in the way of construction has been done. (May, 1906, pg. 255.)

Temiskaming and Northern Ontario Ry.—The Commissioners returned to Toronto, June 11, after a trip of inspection over the line. The chairman stated that a spur line will be constructed from Haileybury to the wharf, and another, the construction of which will be taken in hand at once, from New Liskeard station to the centre of the town. This latter spur will be extended to the government wharf as soon as the latter is built. The report upon the traffic prospects of the Elk Lake and Gowganda districts has been prepared by Engineer Cole, and the Chairman said the Commissioners are most favorable to the extension if the conditions warrant, and this will be demonstrated within the next three or four months.

Reports from North Bay, June 15, state that the instrumental survey for the line from Charlton to Gowganda has been completed to about six miles from Gowganda, and that by the end of August, the location plans will have been completed. The total length of the line will be about 50 miles and the estimated cost is about $2,000,000.

It is proposed to set up a creosoting plant for the treatment of all bridge timber and ties. (June, pg. 415.)

Trans-Canadian Ry.—This company was incorporated by the Dominion Parliament in 1895 to construct a railway about 3,000 miles long from Quebec, passing north of Lake Winnipeg, through the Yellow Head Pass, to Port Essington, or Port Simpson, B.C. In 1902, 1904 and 1908 extensions of time for the construction of the line were granted. No definite construction has yet been undertaken. (Sept., 1908, pg. 621.)

Vancouver, Fraser Valley and Southern Ry.—The Dominion Parliament in 1906 incorporated a company with this title to construct a railway of about 100 miles from Vancouver to New Westminster, thence to the International boundary, and from New Westminster bridge to Chilliwack and Ladner's Landing, B.C. The company has not yet undertaken any construction. (May, pg. 359.)

Vancouver Island and Eastern Ry.—During the session of the Dominion Parliament of 1908 a company was incorporated with this title to construct a railway of about 900 miles from Victoria to Seymour Narrows and from Bute Inlet, B.C., to Edmonton, Alta., with power to operate a car ferry across the Narrows. The company has not yet arranged to

undertake any construction. (Sept., pg. 621.)

Vancouver, Westminster and Yukon Ry.—A company with this title was incorporated by the Dominion Parliament in 1901, with power to construct the following lines: from Vancouver to New Westminster; from Vancouver to Squamish Valley, to Lillooet, Quesnel and Hazleton or other point on the Skeena River, thence to Dawson and to the western boundary of the Yukon Territory, with branches easterly to Tete Jaune Cache and Edmonton, Alta. It was granted extensions of time for construction in 1905 and 1906. The lines authorized total about 2,000 miles, and there has been constructed the line from Vancouver to New Westminster, 14.81 miles, which has been sold to the Vancouver, Victoria and Eastern Ry. and Navigation Co., a line owned by the Great Northern Ry., U.S. So far as the remaining mileage authorized is concerned the charter is still operative. (June, pg. 417.)

Western Alberta Ry.—The Dominion Parliament in 1898 incorporated a company with this title to construct a railway about 350 miles long from the International boundary west of r. 20, 4th mer., to the Sarcee Indian reserve, through Canmore and Anthracite to the easterly base of the Rocky Mountains. In 1900, 1903, 1905 and 1908 the company obtained extensions of time for construction. Up to the present, however, nothing in the way of construction has been done. (June, 1908, pg. 407.)

White Horse and Alsek Ry.—The Dominion Parliament in 1904 incorporated a company with this title, with power to construct a railway from White Horse, Yukon Territory, to the International boundary on the west, 150 miles. An extension of time for construction was obtained in 1906, but up to date no contruction has been taken in hand. (See Alsek and Yukon Ry., Oct., 1908, pg. 711.)

Winnipeg and North Western Ry.—This is the title of a company incorporated by the Dominion Parliament in 1907, with power to construct about 1,800 miles of railway located as follows: from Winnipeg via Stonewall and Mossy Portage to Carrot River valley, thence westerly via Fort la Corne to the Lobstick River, with branches from Prince Albert to Battleford, Sask.; from Saddle Lake to Lake La Biche, Sask.; and from Fort Victoria to Athabaska Landing and to Edmonton, Alta. Nothing in the way of construction has yet been done. (May, pg. 359.)

The Toronto Board of Control has practically decided to recommend to the City Council, that a steel bridge be constructed over the G.T.R. and the C.P.R. on Dundas St. (Brockton bridges) to carry the street railway tracks. The present bridges, while not unsafe, require strengthening.

The Toronto, Hamilton and Buffalo Ry., recently advised the Hamilton, Ont., Council, that on June 15, it would comply with the Railway Commissioners' order to sound locomotive whistles when approaching crossings, unless a by-law was passed by the Council to relieve it of this obligation. It was decided not to pass such a by-law, but the company is to be asked to abate the alleged nuisance of ringing automatic bells on shunting locomotives when they are not in motion.

Telephones in Railway Stations.

D'Arcy Scott, Assistant Chief Railway Commissioner, has given judgment respecting the installation of telephones in railway stations, which, after modification, was concurred in by Chief Commissioner Mabee and Commissioner McLean, as follows:

The Board has heard applications from the Peoples' Telephone Co. and the Caledon Telephone Co. for an order to compel certain railway companies to permit telephone companies to install their instruments in a number of railway stations. Under sec. 245 of the Railway Act, the Board may grant such an order, and may impose such terms as it deems just and expedient, but in determining them, shall not take into consideration any contract giving exclusive or other privileges to any other telephone company by the railway company, with regard to the installation or maintenance in its stations of the instruments of such telephone company. The only points to be considered then are, whether such telephonic connection will be of public benefit, and if so, what terms should be imposed on the telephone company seeking the privilege. It will be a saving of time if the Board lays down certain general principles upon which it will act when such applications come before it. If the telephone company's instruments are in general use in the district surrounding the station in question, and it appears that the installation of a telephone in the station would be of substantial convenience to the public having business with the railway company, and would not be unduly oppressive or inconvenient to the railway company, then I think the Board should grant the application. As nearly all telephone companies in Canada are incorporated by provincial laws, and are consequently not under the Board's jurisdiction difficulty might be experienced in compelling such a company to comply with terms and conditions the Board might desire to impose, unless the company was bound to do so by contract. I, therefore, suggest that, where the Board is of the opinion that the application of a telephone company for an order to compel a railway company to permit the installation of a telephone in the station should be granted, that before any order is issued, the telephone company be asked to execute an agreement in the following, or like form, in which I have set out fair and reasonable conditions upon which such order should be granted:

This agreement made the —— day of ——, in the year of Our Lord 19—, by and between hereinafter called the "Railway Company" of the first part, and hereinafter called the "Telephone Company" of the second part. Whereas, the telephone company is desirous of placing a telephone instrument in the station of the railway company at in the Province of . And whereas, the railway company is willing to permit the said telephone instrument to be placed in its said station upon the terms and conditions hereinafter stated. Witnesseth, that in consideration of the premises, it is hereby agreed by and between the parties hereto, as follows: 1. Upon the terms and conditions hereinafter stated, the railway company will permit the telephone company to install a telephone instrument in its said station, the telephone company to pay the railway company a rental of $1 per annum for the privilege, to be paid on the 1st day of Jan. in each year, during the continuance of this agreement.

2. The telephone instruments shall be placed and maintained at the said station without damage to the railway company's property, and entirely at the risk and expense of the telephone company, free from any rental or other charge to the railway company, and the telephone company will not seek to hold the railway company responsible for any damage to said instrument, no matter how such damage may occur.

3. The telephone company may erect and maintain such poles and wires on and across the lands of the railway company as may be necessary for the installation and operation of the said telephone instrument, provided that such poles shall be placed, and such wires strung, to the satisfaction, and under the supervision of a duly authorized official of the railway company, and at such places only as he shall designate.

4. The said telephone instrument shall be of the most modern and efficient type in use by the telephone company; it shall be a desk or wall instrument, whichever the railway company may desire; it shall be placed in such position in the said station as the railway company may indicate, and shall be connected by private wire with the central of the telephone company.

5. The railway company, its officials, agents, and employes, shall have service from, to, and through the said telephone instrument with local and rural subscribers, over the telephone lines of the telephone company, without charge therefor.

6. The telephone company may, with the approval of the Board of Railway Commissioners, remove its telephone instrument from the said station, and its poles and wires from the property of the railway company at any time upon giving the railway company 30 days' notice in writing of its intention so to do. All damage done to the property of the railway company in removing the said telephone instrument, poles, and wires, shall be repaired by, and at the expense of the telephone company.

7. This agreement shall terminate at any time upon the order of the Board of Railway Commissioners granted on the application of the railway company, or otherwise, and the telephone company will, at all times, carry out and obey any order of the said Board, with regard to the installation, maintenance, operation or removal, of the said telephone instrument, poles, or wires, and hereby submits itself, in so far as this contract is concerned, to the jurisdiction of the said Board.

In witness whereof the parties hereto have executed these presents.

Upon such an agreement being signed for each of the stations in which the telephone companies before us desire to install instruments, I think the order asked for should be issued. My suggestions in this matter, apply only to cases where one or two telephone companies desire to put their instruments in a railway station; if a third or more companies desire the privilege, a special application should be made to the Board, otherwise a railway company might be put to much inconvenience.

Location of Switch Stands.—The Board of Railway Commissioners' Secretary has issued the following circular:—"In view of the numerous accidents which have occurred, owing to the location of switch stands being too close to the track, the Board considers it advisable that railway companies subject to its jurisdiction, be required to remove all switch stands and other obstructions, to a distance 6 ft. clear of the main line, and in cases where high switch stands cannot be removed to this distance, they be replaced by a dwarf switch. The Board, therefore, proposes to issue a general order, requiring within a reasonable time, the removal of all such switch stands as above set out, or the replacing, by dwarf switches, as well as the removal of all other obstructions."

The G.T.R. put in force June 1, a reduced tariff of tolls for vehicles and other traffic over the Victoria Jubilee Bridge, Montreal.

The work of colonization in British Columbia is receiving much attention from the two railway companies principally interested. The C.P.R. is looking forward to the development of the Lillooet Valley as a tourist and health resort, and is planning an hotel there. The G.T. Pacific Ry. is arranging a campaign to attract settlers to the valleys in the interior of the northern portion of the Province.

Orders by the Railway Commissioners.

Beginning with June, 1904, we have published in each issue summaries of orders passed by the Board of Railway Commissioners, so that subscribers who have filed our paper have a continuous record of the Board's proceedings. No other paper has done this.

The dates given of orders, immediately following the numbers, are those on which the hearings took place and not those on which the orders were issued. In many cases orders are not issued for a considerable time after the date assigned to them.

7048. May 21.—Authorizing N. St.C. & T. Ry. to construct standard trestle.

7049 to 7053. May 21.—Authorizing G.T.P.R. to construct railway, at grade, across various highways in North Alberta.

7054. May 22.—Authorizing G.T.P.R. to take possession of a portion of the C.N.R. right of way, St. Boniface, Man.

7055. May 20.—Ordering that the Elgin & Havelock Ry. be restrained from collecting tolls, or fares, or from collecting money for service of any kind performed until a by-law authorizing the preparation and issue of tariffs of tolls has been approved by the Board.

7056. May 20.—Ordering that the Salisbury & Harvey Ry. be restrained from collecting any tolls, or fares, or from collecting money for service of any kind performed until a by-law authorizing the preparation and issue of tariffs of tolls has been approved by the Board.

7057. May 20.—Authorizing H. P. Leonard, Roblin, Man., to institute proceedings against the C.N.R. for failure to run its passenger trains on Feb. 1 between Dauphin, Man., and Humboldt, Sask.

7058. May 22.—Extending for one month from date of order time during which the C.N.R. may cross G.T.R. spur to Edward's mills, Rockland, Ont., for construction purposes.

7059. May 22.—Temporarily approving Bell Telephone Co.'s form of agreement with Belmont Telephone Co-operative Association, Colchester Northern Municipal Rural Telephone System, Lobo Telephone Co., and Zorra Telephone Association.

7060. May 25.—Authorizing Superior & Western Ontario Ry. to join G.T.P.R. tracks at Velora Jct., Ont.

7061 to 7065. May 21.—Authorizing Bell Telephone Co. to erect wires across G.T.R. at 5 points in Hamilton and Peterboro, Ont., and St. Martins Jct., Que.

7066. May 22.—Authorizing C.P.R. to construct a branch line for W. A. McGowan, Durham, Ont.

7067. May 22.—Authorizing N. St. C. & T. Ry. to construct bridge over the Government raceway at St. Catharines, Ont.

7068. May 25.—Authorizing B.C. Telephone Co. to erect wires across E. & N. Ry. at Nanaimo, B.C.

7069 to 7072. May 19.—Dismissing Kettle River Valley Ry. applications for orders sanctioning the construction of a crossing under the V. V. & E. Ry. & Nav. Co's Granby spur on Columbia & Western Ry. right of way; a crossing under the C. & W. Ry.'s Granby spur, a connection with the C. & W. R., and a crossing of the C. & W. R.

7073. May 25.—Extending to Oct. 1, 1909, time within which interlocking plant between G.T.R. and C.P.R. and Ontario & Quebec Ry. east of Weston rd., West Toronto, Ont., is to be installed.

7074. May 26.—Approving Spokane & B.C. Ry. Standard Freight Tariff C.R.C. No. 6.

7075 to 7081. May 25.—Authorizing G.T.P.R. to construct railway across various highways in Saskatchewan and Alberta.

7082. May 25.—Authorizing the town of Barrie, Ont., to lay pipe under G.T.R. at Bayfield.

7083. May 19.—Dismissing complaint of Stark Brothers Co., Ltd., Toronto, Ont., complaining that Central Ontario Ry. rate of 7c. per 100 lbs. on a car of corn from Buxton to Bannockburn, Ont., is excessive.

7084. May 19.—Dismissing complaint of Downing's American Despatch, General Merchandise Forwarders, Montreal, against C.P.R. overcharge of the local rate from Fort William, Ont., to Winnipeg, Man., on a carload of liquor shipped from England. The judgment is given on another page.

7085. May 25.—Dismissing application of the Times Publishing Co. for order directing the C.P.Ry., the G.N.W. Telegraph Co. and the Western Union Telegraph Co. to transmit press messages to the Marconi Wireless Telegraph station, Glace Bay, N.S., at the same rate as charged to other points along the Atlantic Coast of Canada. The judgment is given on another page.

7086. May 19.—Dismissing complaint of C. E. Plain & Co., Ottawa, alleging excessive rates charged by C.P.R. on shipment of apples from Picton to Smith's Falls, Ont., as compared with the rate charged from Picton to Ottawa.

7087. May 18.—Rescinding orders 6167 and 6366, Feb. 4 and 22, respectively, directing express companies operating in Canada and subject to the Board's jurisdiction to classify for the transportation of acetylene gas when shipped under the so-called "safety storage system," as it appeared to the Board that it has no jurisdiction to make the said orders. The judgment is given in full on another page.

7088, May 25.—Amending order 6033, Jan. 13, calling for light to be placed at the M.C. Rd. crossing Erie Ave., Leamington, Ont., by providing that same be kept burning all night.

7089. May 27.—Rescinding order 5223, Aug. 26, 1908, authorizing G.T.R. by-law 28 by approving the same.

7090. May 26.—Authorizing Man. Government Telephones to erect wires across C.P.R. at Ash ave., Winnipeg Beach.

7091, 7092. May 27.—Authorizing B.C. Electric Ry. to erect electric light and power wires across C.P.R., Bute St., Vancouver, B.C.

7093. May 19.—Authorizing G.T.R. to make a refund to the British-American Oil Co., Toronto. This order is given in full on another page.

7094, 7095. May 27.—Authorizing Alberta Government to erect wires across C.P.R. at Hardisty Station and Bawlf, Alta.

7096. May 27.—Authorizing People's Telephone Co. to erect wires across G.T.R. at John St., Forest, Ont.

7097, 7098. May 27.—Authorizing Alberta Government to erect wires across C.P.R. at Chin and Claresholm, Alta.

7099. May 27.—Authorizing People's Telephone Co. to erect wires across G.T.R., 4th con. east of Forest, Ont.

7100. May 27.—Authorizing Western Counties Electric Co. to erect wires across G.T.R. at Elgin St. subway, Brantford, Ont.

7101. May 27.—Authorizing Bell Telephone Co. to erect wires across G.T.R. near Unionville station, Ont.

7102, 7103. May 28.—Approving location of the C.N.Q.R. freight shed at St. Tite, and freight shed and waiting room at Heronville, Que.

7104. May 28.—Rescinding order 7055, May 20, prohibiting Elgin & Havelock Ry. from collecting tolls until filing of by-law, by approving said by-law.

7105. May 28.—Approving location of the C.N.Q.R. proposed station and freight shed at Garneau Jct., Que.

7106. May 28.—Approving location of the Q.M. & S. Ry. station, Nicolet, Que.

7107. May 26.—Authorizing Brantford Gas Co. to lay pipe under the B. & H. Electric Ry., Alfred St., Brantford, Ont.

7108. May 27.—Authorizing Consumers' Gas Co., Toronto, to lay gas main under C.P.R., Osler St., Toronto.

7109. May 26.—Authorizing North Carievale Rural Telephone Co. to erect wires across C.P.R. at sec. 5, tp. 3, r. 31, and sec. 31, tp. 2, r. 31, west 1st meridian, Sask.

7110. May 26.—Authorizing Thunder Creek Rural Telephone Co. to erect wires across C.P.R. between secs. 35 and 36, tp. 2, r. 32, west 1st mer., Sask.

7111. May 28.—Authorizing C.P.R. to construct highway bridge at Le Jeune St., Three Rivers, Que.

7112. May 18.—Authorizing M.C. Rd. to cross with two additional tracks, Sandwich St., Windsor, Ont., and temporarily approving structure pending completion of permanent structure.

7113. May 29.—Authorizing Markdale village, Ont., to lay water main under C.P.R. on Main St.

7114. May 29.—Extending until Dec. 1, 1909, time within which to receive approval of proposed tariffs of tolls of Bell Telephone Co.

7115, 7116. May 29.—Temporarily approving until Dec. 1, 1909, the Canadian, Dominion, National and American Ex. Cos.' forms of contracts.

7117. May 29.—Extending until Dec. 1, 1909, time within which North American Telephone Co. may charge such tolls as it was authorized to charge immediately previous to July 13, 1906.

7118. May 29.—Extending until Dec. 1, 1909, time within which the United States and the Great Northern Ex. Cos. may continue to use contracts, by-laws, regulations, declarations, and notices, as provided in sec. 353 of the Railway Act.

7119. May 29.—Extending until Dec. 1, 1909, time within which the Maritime Ex. Co. is permitted to use its present forms of freight and money receipts.

7120. May 29.—Extending until July 4, 1909, time within which the Chatham, Wallaceburg & Lake Erie Ry. is to equip all its cars with air brakes.

7121 to 7123. June 2.—Authorizing St. Marys, Kirkton & Exeter Telephone Co. to carry wires across G.T.R. at Main St., Granton, and public crossing at Rannock, Ont.

7124. June 2.—Authorizing R. Curtis, Okanagan Landing, B.C., to lay water main under C.P.R. at Okanagan Landing, B.C.

7125. June 2.—Authorizing city of Brantford to lay sewer pipe under G.T.R. west of Market St. bridge, Brantford, Ont.

7126. May 29.—Authorizing C.P.R. to construct branch line across public road allowance near Rathwell, Man.

7127. May 29.—Authorizing G.T.R. to reconstruct overhead bridges in iron, one between Dumfries and Grand River, and one between Harrisburg and St. George, Ont.

7128. June 2.—Authorizing J. G. Dunn, St. Etienne, Que., to erect electric light wires across G.T.R. at Tullochgorum Rd., Que.

7129. May 31.—Authorizing C.P.R. to construct bridge 2.5 over Lowry's Creek, Guelph branch, Ont.

7202,7203. June 10.—Recommending to the Governor-in-Council for sanction, agreements entered into June 8 and 9 respectively, between the C.N.R. and the Saskatchewan North Western Ry. and the C.N.R., and Alberta Midland Ry., for amalgamation.

7204. June 9.—Approving G.N.W. Telegraph Co.'s by-law no. XI., authorizing I. McMichael, General Manager, and G. D. Perry, Secretary-Treasurer, to prepare and issue tariffs of tolls to be charged, and to specify the person to whom, the place where, and the manner in which such tolls shall be paid.

7205. May 31.—Ordering M.C. Rd. at its own expense, to provide and maintain gates at the crossing of the W.E. & L.S.R. Ry., between townships of Sandwich West and Sandwich East, Essex Co., Ont., within 90 days from date of this order.

7206. June 10.—Authorizing C.P.R. to construct and operate branch line for the Roche Percee Coal Mining Co., Roche Percee, Sask.

7207. June 9.—Amending order 5280, Sept. 15, 1908, which authorized the G.T.P.R. to open that portion of its line from mileage 3.0 to mileage 54.3, and limiting the speed to not exceeding 16 miles an hour, by extending the speed limit to 30 miles an hour, and rescinding order 7132, June 2.

7208. June 9.—Authorizing C.P.R. to reconstruct 8 bridges in its Pacific, Ontario, Lake Superior and Atlantic Divisions.

7209. June 9.—Authorizing C.P.R. to construct branch lines for E. Hodder, Tees & Percee, and T. H. Blow, Calgary, Alta.

7210. June 9.—Authorizing C.P.R. to construct bridges 23.6, 10.9, and 19.6, on its Sirdar section, B.C.

7211. June 9.—Authorizing C.P.R. to construct bridge 4.2 over Chicot Creek on its Eustache branch, Que.

7212. June 10.—Authorizing C.P.R. to reconstruct bridge 0.77 on its Eastern Division, and 139.98 on its Central Division.

7213, 7214. June 9.—Authorizing Bell Telephone Co. to cross G.T.R. north of Otterville Station, Ont.; and the M.C. Rd. west of North Buxton, Ont.

7215. June 9.—Authorizing C.N.Q.R. to erect telegraph wires across the Quebec, Jacques Cartier Electric Co.'s power wires at Ancienne, Lorette Road, mileage 3.25 from Hedleyville Jct., Que.

7216. June 8.—Authorizing Canadian Machine Telephone Co. to erect wires across T.H. & B.R., Brantford.

7217. June 9.—Authorizing Bell Telephone Co. to erect wires across T. H. & B. Ry. west of Silverdale Station, Ont.

7218. June 11.—Authorizing Q.M. & S. Ry. to open for traffic that portion of its line from the east side of the river at Pierreville to the present terminus at Fortierville, Que., about 49 miles.

7219. June 9.—Authorizing Port Hope Telephone Co. to erect wires across G.T.R. at two points in Hope tp., Durham Co., Ont.

7220 to 7226. June 11.—Authorizing Q.M. & S. Ry. to construct its railway, at rail level, across highways at 7 points in St. Gregoire and St. Philomene parishes, Que.

7227. June 10.—Authorizing C.P.R. to construct spur for the International Harvesters Co., Saskatoon, Sask.

7228. June 11.—Authorizing Vancouver & Lulu Island Ry. to construct its Westminster & Eburne branch across Kerr Rd., at station 221, and Cemetery Rd., at station 101, South Vancouver, B.C.

7229. June 11.—Authorizing C.P.R. to construct spur line for D. Stamper, Knechtel Furniture Co. and City of Moosejaw, near Moosejaw, Sask.

7230 to 7232. June 14.—Approving location of C.P.R. station at Blairton, Chapleau, and Erindale, Ont.

7233. June 11.—Approving location and details G.T.R. station at Powassan, Ont.

7234. Jun. 14.—Authorizing town of Park Hill, Ont., to lay pipe underneath G.T.R.

7235. June 14.—Authorizing G.T.R. to reconstruct three overhead bridges between Darlington and Dunbar, on its Eastern division.

7236. June 14.—Authorizing C.P.R. to operate seven bridges on its Laggan section, B.C.

7237. June 14.—Authorizing town of St. Pierre, Que., to lay sewers under G.T.R, and Montreal Park and Island Ry.

7238. June 14.—Authorizing Lobo Telephone Co. to erect wires across C.P.R., near Melrose station, Ont.

7239. June 14.—Authorizing Bell Telephone Co. to place wires under M.C.R. at Metcalfe, St., St. Thomas, Ont.

7240. June 14.—Authorizing Walkerton & Lucknow Ry. to cross the Hanover Portland Cement Co.'s narrow gauge railway in Brant township, Bruce county, Ont.

7241, 7242. June 15.—Authorizing the C.P.R. to reconstruct bridge 66.5 on its Woodstock section, bridges 27.34 and 27.71 on its Lake Superior division, and bridge 53.1, on its Smiths Falls section, Eastern division.

7243. June 15.—Authorizing C.P.R. to construct spur for Knechtel Furniture Co., Hanover, Ont.

7244. June 15.—Authorizing G.T.R. to construct spur line near Greenwood Ave., Toronto.

7245. June 15.—Authorizing Bell Telephone Co. to erect wires across G.T.R. at Walkerville, Ont.

7246. June 16.—Ordering British Yukon Ry. Co., British Columbia Yukon Ry. Co., Pacific & Arctic Ry. & Nav. Co., and White Pass & Yukon Ry. to file within 30 days tariffs of companies' tolls covering all through traffic received at Skagway and destined to White Horse or any intermediate point.

7247. June 15.—Approving by-law of Ottawa and New York Ry. Co., authorizing H. K. Gays, G.P.A., Ottawa; F. J. Balch, G.F.A., Ottawa; and F. E. Herriman, Coal Traffic Manager, New York City, to prepare and issue tariffs of tolls.

7248. June 15.—Authorizing J. G. Dunn, of St. Etienne, Que., to place electric light wires across G.T.R. at Howick station, Que.

7249. June 15.—Authorizing J. P. Ernst, of New Hamburg, to place wires across G.T.R., near Baden station, Ont.

7250. June 15.—Authorizing Canadian Machine Telephone Co. to place wires across G.T.R. in Brantford township, Ont.

7251. June 16.—Authorizing C.P.R. to construct spur line to the Constructing & Paving Co.'s premises, North Toronto, Ont.

7252. June 14.—Rescinding order 6881, amending order 6424, ordering M.C.R. to protect highways in village of Dutton, Ont., by folding fence gates.

7253. June 14.—Rescinding order 6880, amending order 6440, ordering M.C.R. to protect highways in village of Rodney, Ont., by folding fence gates.

7254. June 15.—Directing Canada Southern Ry. to construct highway crossing over its line to connect highway laid out by Canboro township, Ont.

7255. June 14.—Reporting to Governor in Council for sanction by-law of Q.M. & S. Ry., re spitting in cars and on railway premises.

7256. June 14.—Recommending to Governor in Council for sanction, by-law adopted by Napierville Jct. Ry., re spitting in cars and on railway premises.

7257. June 14.—Rescinding order 6882, amending order 6423, ordering M.C.R. to protect with folding gates highways in village of West Lorne, Ont.

7258. June 16.—Approving location of C.P.R. station at Kleinburg, Ont.

7259. June 17.—Authorizing C.P.R. to construct its railway across road allowance and to divert road in Medonte tp., Ont.

7260. June 17.—Authorizing C.P.R. to construct spur line near Toronto St., Regina, Sask.

7261. May 31.—Ordering that all railway companies in Ontario weigh all coal carried by them received from foreign countries, at the port of entry, and also on demand of consignees at destination. This order is given fully on another page.

7262. June 16.—Approving location and plans of C.P.R. station, at Espanola, Ont.

7263. June 11.—Authorizing C.P.R. to construct spur lines in Moose Jaw, Sask.

7264. June 16.—Authorizing Bell Telephone Co. to erect wires across C.P.R., near Dumfries, Ont.

7265. June 16.—Authorizing Bell Telephone Co. to erect wires across G.T.R., at King St., Berlin, Ont.

7266, 7267. June 16.—Authorizing Farmers' Telephone Co. to erect wires across C.P.R. in Brighton parish, N.B.

7268. June 16.—Authorizing Laird tp., Ont., to erect wires across C.P.R., Algoma branch, between Laird and McDonald tps., Ont.

7269, 7270. June 16.—Authorizing Farmers' Telephone Co. to erect wires across C.P.R. in Northampton parish and in Woodstock, N.B.

7271, 7272. June 16.—Authorizing Laird tp., Ont., to erect wires across C.P.R. in McDonald tp., Ont.

7273. June 16.—Authorizing Norfolk Co. Telephone Co., to erect wires across M.C.R., near Waterford, Ont.

7274, 7275. June 16.—Authorizing Farmers' Telephone Co. to erect wires across C.P.R. near Newburg Jct. and near Hartland station, N.B.

7276. June 16.—Authorizing Welland County Lime Works, to lay gas pipe under G.T.R., in Wainfleet tp., Ont.

7277. June 16.—Ordering Great Northern Ry. operating Vancouver Westminster & Yukon Ry. to forthwith file and publish rates on lumber, shingles, and articles taking the same rates in the special tariffs of the C.P.R. via New Westminster or Vancouver, B.C.

7278. June 8.—Dismissing application of village of Coteau, Que., for order directing G.T.R. to open Omaha St. and Rue de l'Eglise.

The Board of Railway Commissioners will after the next sitting, which opens July 6, adjourn until Sept. 7.

Makers of Base Supported Rail Joints for Standard and Special Rail Sections, also Girder, Step or Compromise, Frog and Switch, and Insulating Rail Joints, protected by Patents.

C. P. R. Betterments, Construction, Etc.

Tobique Gypsum and Colonization Ry.—This company, incorporated by the Dominion Parliament in 1888 to construct 80 miles of railway from the New Brunswick Ry. at Perth Centre to Plaster Rock, thence to the proposed Restigouche and Victoria Colonization Ry. at Nictaux, N.B., constructed 28 miles from Perth Centre to Plaster Rock, N.B. It is more generally known as the Tobique Valley Ry., and was leased in 1892 to the C.P.R.

Windsor St. Station, Montreal.—The work of clearing away the buildings on the land between Donegana and Bisson Streets, is in progress. The buildings facing on Windsor St., down to St. Antoine St., are to be sold and removed as soon as possible. The plans for the enlargement of the station show three large entrances, one at the corner of Osborne St., the present one being closed; one where Donegana St. is at present located, and the third at the corner of St. Antoine St. From St. Antoine St. to Osborne St., the roof will be on the same level, and with the grade for the distance down Windsor St., the building will be 9 stories high, at St. Antoine St., surmounted by a tower. Near this corner an elevator will be provided to take passengers to the tracks, which will be on a level with Osborne St. The train shed will extend from Donegana St. to St. Antoine St., the entire length of the building, thus providing space for about 25 tracks. It is anticipated that the increased office accomodation provided will mean the centralization of all the Co.'s offices in the new building; with the exception of the city ticket office and telegraph office. The extension will be built in the same style as the present structure. The plans have been completed and as soon as these have been passed by the city the work will be pushed through. The cost is estimated at $1,500,000.

Montreal Subway.—The Railway Commissioners have ordered the C.P.R. to replace the crossing at Iberville St., by a subway, the plans to be filed at once; the work to be started within 30 days, and completed within six months after the approval of the same. The only question left open is the width of the subway, and this is to be decided by the Board's Chief Engineer.

Campbellford, Lake Ontario and Western Ry.—The Dominion Parliament in 1904 incorporated a company with this title for the purpose of constructing a railway from the C.P.R. between Blairton and Ivanhoe to Cobourg, Port Hope, Newcastle, Bowmanville, Oshawa and Whitby to the C.P.R. near Toronto. The length of the authorized line is 120 miles; extensions of time for construction were obtained in 1906 and 1908, but up to date nothing has been done.

West Toronto Yards.—The company's plans for the extension of its yards at West Toronto, Ont., have been laid before the York Township council. The company has secured all the land between Dundas St. and St. Clair Ave. for the purpose. The area acquired affords room for the laying of 20 additional tracks, for which the company desires the council's permission to close Jane St., and in return the company proposes to construct a subway or a foot bridge. Residents ask for a 40 ft. subway. The question is under consideration, and will be definitely decided at a future meeting. It is understood that the carrying out of the plans may involve the construction of an additional track between West Toronto and Leaside Jct.

Islington Spur Line.—Surveys have been completed for the construction of a spur line from the old Credit Valley line, near Islington, generally southerly to the G.T.R. Toronto-Hamilton line. The object in view in laying out this line is to afford a direct connection into and out of the yards at West Toronto, for freight via Hamilton, thereby saving the present haul into and out of Toronto.

Hamilton and Guelph Jct. Ry.—We are advised that the press reports referred to in our last issue that construction will be started upon this line are somewhat premature. Some preliminary surveys have been made, but nothing further has been done.

Berlin, Waterloo, Wellesley and Lake Huron Ry.—A company with this title was incorporated by the Dominion Parliament in 1903, with power to construct a line from Berlin to Waterloo, Wellesley Village, Glen Allan, Listowel and Goderich; and in 1904, when an extension of time for construction was granted, power was obtained to extend its lines from Wellesley to Stratford, Clinton and Mayfield, Ont. No construction has been done by the company, but it has taken over the Galt, Preston and Hespeler Ry. and the Preston and Berlin Ry., both of which are operated under lease by the C.P.R.

St. Marys and Western Ontario Ry.—This company was incorporated in 1905 by the Dominion Parliament, with authority to construct a line of about 100 miles from the C.P.R. between Woodstock and London to St. Marys, thence to Exeter and Sarnia, Ont. The company has constructed a line from St. Marys to Embro, Ont., effecting a junction there with an extension of the Tillsonburg, Lake Erie and Pacific Ry. from Ingersoll, Ont. Both the lines are operated by the C.P.R.

The official figures of the voting on the by-law in Blanshard tp., granting the company a bonus for the extension of its line from St. Marys to Exeter, May 21, shows that instead of being defeated, as was at first reported, it was carried by a majority of 76 votes.

Walkerton and Lucknow Ry.—A company with this title was incorporated by the Dominion Parliament in 1904, with power to construct a line from Walkerton to Lucknow, via Teeswater, and from Walkerton to Hanover, Ont. The company has constructed the line from Saugeen on the C.P.R. Owen Sound line to Walkerton, 37.7 miles.

Georgian Bay and Seaboard Ry.—The Dominion Parliament in 1905 incorporated a company with this title to construct a railway from Georgian Bay between Port Severn and Penetanguishene to the Ontario and Quebec Ry. (C.P.R.) between Cavanville and Maberly, Ont. The C.P.R. has constructed a line from Coldwater Jct. on its Toronto-Sudbury line to Victoria Harbor on Georgian Bay, 11.50 miles. Surveys have been made from Coldwater Jct. to various points on the O. and Q. Ry.

Port Arthur, Ont.—W. Whyte, Second Vice-President, was in Port Arthur, Ont., May 31, in connection with the rearrangement of the company's assessment there.

A writ has been issued by the company seeking damages from the city on account of the giving way of the city dam at Current River, during the summer of 1908, which caused the washing out of about a mile of track.

Winnipeg City.—The agreement between the company and the Winnipeg city council is under discussion between the company's officials and the railway committee of the city council. A number of clauses have been agreed upon, including the construction by the C.P.R. of a footpath at St. James, and the right of the city to construct a bridge at Salter St. when necessary. Other points are in process of adjustment.

Brandon, Man.—Plans are said to be in preparation for the enlargement of Brandon station, at a cost of about $10,000.

Saskatoon to Wetaskiwin.—It is expected that the line between Saskatoon, Sask., and Wetaskiwin, Alta., will be completed this year. At present it extends from Saskatoon to Wilkie, Sask., and easterly from Wetaskiwin to Sedgewick. The intervening section, from Wilkie to Sedgewick, about 130 miles, has been graded and is ready for track laying.

Kininvie Branch.—The location plans for the construction of a branch line to be known as the Kininvie branch have been approved by the Board of Railway Commissioners. The branch will start from near Kininvie station on the transcontinental line, about 45 miles west of Medicine Hat, Alta., and run in a northwesterly direction for 162.5 miles to the Calgary and Edmonton branch near Red Deer or Innisfail. The maximum gradient will be 0.5% westbound and 0.4% eastbound, and the maximum curvature 8 degrees. The work is average prairie, and there are no bridges. A contract for the work has not yet been let.

Langdon to Alix, Alta.—We are officially advised that while the original intention was to start this line from Cheadle, it was found expedient to change the location of the starting point to Langdon, Alta. Langdon is a station on the transcontinental line 21 miles east of Calgary, Alta., and Alix is a point about 40 miles in a northerly direction therefrom.

Lethbridge, Northerly.—The company's application for the approval of plans for a new line from Lethbridge, Alta., northerly, came before the Board of Railway Commissioners, at Ottawa, June 18. The point of junction with the existing line from Macleod to Calgary, has not been decided, but it is said that it will be at High River or Aldersyde. The company owns considerable land at Aldersyde, and if this point is selected it will involve the construction of a steel bridge across High River.

Kootenay Central Ry.—This company was incorporated by the Dominion Parliament in 1901 to construct a line from Fort Steele to Elko, and to the International boundary; also from Fort Steele to Windermere and Golden, B.C., with branches not exceeding 10 miles each. It was granted extensions of time for construction in 1903 and 1904. The length of lines authorized is about 200 miles, but up to the present no construction has been undertaken.

Vancouver, B.C.—In reference to press reports as to the construction of machine shops at Vancouver, we are advised that the company has made no appropriation therefor.

Port Simpson, B.C.—With reference to the reports mentioned in our last issue that the company had under consideration the desirability of constructing a line

from Edmonton via Yellow Head Pass to Port Simpson, B.C., Montreal despatches quote C.P.R. officials as stating that the report is absurd, but that if any line is to be constructed by the C.P.R. from Edmonton in the future it will be into the Peace River Valley.

Esquimalt and Nanaimo Ry.—The plans or the extension of the E. & N. Ry. from French Creek to Alberin, Vancouver Island, B.C., have been approved by the Board of Railway Commissioners, and it is understood that bids will be asked for the grading and other construction work at an early date.

Minneapolis, St. Paul and Sault Ste. Marie Ry.—W. Whyte, Second Vice-President C.P.R., was in Montreal, June 5, in connection with the proposal to construct a line from Thief River Falls to Duluth, Minn., to connect with the Duluth South Shore and Atlantic Ry. It was subsequently anounced that the work on the new line will be pushed forward with all speed, and it was expected to have 100 miles completed and in operation this year. (June, pg. 423.)

C. P. R. Mechanical Conference.

A general meeting of the master mechanics of the seven great divisions of the C.P.R. was held at Fort William recently for the purpose of considering the methods used at different points on the system and the possibility of improving the construction of the company's locomotives or general practice. In addition to the master mechanics of the various divisions, the following mechanical officials were in attendance: H. H. Vaughan, Assistant to the Vice-President; Grant Hall, Superintendent of Motive Power, Western Lines; L. R. Johnson, Assistant Superintendent Motive Power, Angus Shops, Montreal; C. Kyle, Supervisor Trains and Engines; S. J. Hungerford, Superintendent, Winnipeg shops; G. I. Evans, Chief Locomotive Draughtsman, Montreal; A. C. Frith, Chief Draughtsman, Mechanical Dept., Winnipeg. G. J. Bury, General Manager Western Lines, was also present and took a keen interest in the proceedings throughout. Seventy-three subjects were discussed, and in the majority of cases a definite conclusion was arrived at. It is the intention to hold these meetings periodically in future so that the entire experience of the company's master mechanics from the Atlantic to the Pacific may be drawn upon to improve the company's locomotive construction and enable the management to adopt the most economical methods of maintaining the motive power.

In connection with the report mentioned in our last issue, that the C.P.R. had decided to establish plants at two or three points on its line for creosoting ties, we are advised that at present the company does not propose making any experiments in the direction indicated.

During Apr., 13 employes were killed and 19 injured in the course of their work on Canadian railways. Of the fatalities, 7 were due to being run over, 2 to explosions of dynamite, and one each to being struck by a passing object, to machinery, to falling material and to electric shock. Of the other accidents, 4 were due to falling material, 3 each to derailments and to falls, 2 each to explosions of dynamite, to being caught between cars, to a boiler explosion, and to being run over, and one to machinery.

Grand Trunk Veterans Association.

Among those entitled to the Ontario Government's free grant of 160 acres of land in New Ontario for services in repelling the Fenian Raid in 1866, are nearly 100 Grand Trunk Ry. veterans who have an organization, the Grand Trunk Veterans Association, with headquarters in Toronto, Major J. A. Carlaw, being President, H. T. Meredith, Treasurer, and Jno. Earls, Secretary. Several meetings of the veterans have been held during the past few years, and while some of them decided to locate their claims promptly or sell their certificates, the majority decided to await the final location of the G.T. Pacific Ry. west of Lake Abitibi, and to ask the Government to set apart a township so that they could locate together. The Government acceded to the request and set apart Lennox tp., Sudbury district. A meeting was held in Toronto in June to decide upon the best mode of selection, and to draw for and allocate the lots.

The Manual of Statistics.—The thirty-first annual issue of the volume bearing this title and published by the Manual of Statistics Co., 20 Vesey St., New York City, has been issued. The information given within the 1,094 pages of this annual with reference to railroad, industrial and other securities is of such a character as to make it of value to everyone who has any business connection with them, or is interested in the movements of the shares and stocks of the various companies on the exchanges of the continent. The financial reports quoted in the descriptive articles of the different companies are the latest available, and the comparisons with the figures of other years is interesting. The Canadian companies noted in the volume are those in which United States capital is interested, or on the boards of which U.S. capitalists are represented. The price of the volume is $5.

The Chicago Municipal Engineer states that since the elevation of the railway tracks in that city, there have been 1,380 fewer fatal accidents, and 2,510 fewer non-fatal accidents in connection with the railways.

The Department of Agriculture has made arrangements with the Canadian Northern Quebec and the Quebec and Lake St. John Rys. for the provision of special iced refrigerator cars for the transportation of cheese in carloads, between July 5 and Sept. 11, without extra charge.

The action of J. Battle, T. Conlon, of Thorold, Ont., and J. Armstrong of Toronto, contractors, against the C.P.R., claiming the difference between their contract price for the construction of a part of the company's Toronto-Sudbury line, and that paid to another construction firm under a contract for another portion of the same line, was dismissed with costs, at St. Catharines, Ont., June 2.

G. T. R. Betterments, Construction Etc.

Lachine, Jacques Cartier and Maisonneuve Ry.—At the recent session of the Quebec Legislature an Act was passed incorporating a company with this title for the purpose of constructing a railway from Lachine to Hochelaga Ward, Montreal, or to Maisonneuve, passing in the rear of Montreal mountain, with power to extend the line from the starting point to Dorval, on one side, and to the northern end of Montreal Island on the other. The company is authorized to enter into agreements with other railway companies, and to construct docks, dockyards, wharves, slips, piers, warehouses and elevators, and to operate steam and other vessels for the conveyance of cargo and passengers upon any navigable waters which its railways reach or connect with. The company shall not exercise any of its powers within the limits of Montreal harbor, without the consent of the Harbor Commissioners. The provisional directors are:—A. Bergerin, A. Wainwright, E. A. Bernard, Montreal; and Hon. W. Mitchell, Drummondville, Que. This line we are advised has been partially surveyed, but it has not yet been definitely determined when construction will be started.

Bonaventure Station.—A Montreal dispatch says the G.T.R. has plans completed for a station to replace the present one, that it will be built much on the lines of the St. Louis, Mich. Union Station. It is said that the elevation of tracks in the city will be gone on with at the same time and that the total expenditure will be about $2,000,000. We were officially advised June 24, that nothing is known at G.T.R. headquarters of any new plans that have recently been completed for a proposed station. The officials have on a number of occasions, during the past 10 or 12 years, figured on new plans, but nothing has been definitely determined. The report referred to is probably due to the preparation of the Montreal city council to make application to the Board of Railway Commissioners for an order requiring the elevation of the tracks to Bonaventure station, which would doubtless require the reconstruction of the station.

Carlsbad Springs, Moose Creek, Ont.—The line in the vicinity of Carlsbad Springs, Ont., is being raised. A large area of land has been acquired at Moose Creek, 20 miles further on for use as a ballast pit, in connection with the ballasting operations on this line. It is also intended to erect a new station at Moose Creek.

Ottawa Station and Hotel.—The Minister of Public Works reported June 1, that the G.T.R. had paid the Dominion Government the purchase price of the hotel site on Major's Hill Park. On the same day it obtained from the City Council a permit for the erection of the hotel, the estimated cost of which is placed at $864,000. The plans filed with the application for the permit show that granite will be used up to the first floor; the remainder of the building being of Ohio or Indiana sandstone—the roof being copper-covered. The building will front on Rideau St., and there will be entrances on Mackenzie Ave., along which its length will run. The main entrance to the hotel will be reached through a large portiere, entering upon a hall. Opening off a spacious rotunda on the ground floor are lounging rooms, parlor, garden, tea room and reception room, a general dining room and a ladies' dining room. There will be reception rooms, a large foyer, banquet hall and ballroom on the first floor; and a music gallery will be so arranged as to overlook the dining rooms and the lounge. On the first floor there will be 35 bedrooms and some parlors, from which several suites of state apartments can be made up. The remaining floors are to be entirely given up to bedrooms, of which there will be in all 350, of which 210 will be provided with private baths, and 62 with stationary washstands with hot and cold water connections. All corridors on the upper floors will have a uniform width of nine feet, and the main ones will lead directly to fire escapes. A subway will lead from the hotel to the station, the entrance to the latter being slightly below the level of the basement floor. Tenders are being asked for the erection of the building. The company started about 100 men on the preparation of the site May 27.

The erection of the annex to the present Central Station is being proceeded with, and it is expected that it will be well on to completion by November. The new building will be 300 ft. long, 85 ft. wide, and 40 ft. high. The foundations will be of blue lime stone, the main walls of buff brick, and the cornices and face work of Ohio sandstone. Over the approach there will be an iron and glass canopy and overhead a large clock. This annex will provide for the carrying on of the work of the station pending the removal of the existing station, and the erection of the new structure, of which it is to form a part. The work is being done by the G.T.R., under Ottawa Terminals Co.'s charter.

Kingston, Smith's Falls and Ottawa Ry.—At the annual meeting of shareholders at Kingston, Ont., June 1, the G.T.R., was represented by F. Scott, its Treasurer. The retiring directors were re-elected. Local reports state that the line will be under construction within two years.

Cobourg Freight Sheds.—A press report states that the company has appropriated $50,000 for improvements at Cobourg, Ont. These include a new station, freight sheds and additional yard accommodation.

Midland to Cobourg, Ont.—A. S. Going, has been making a survey of the company's lines between Midland and Cobourg, Ont., with a view of securing a route which will avoid the present heavy gradients. The route between Midland and Millbank has been laid out, and Mr. Going is preparing for completing the work. One route proposed between Millbrook and Cobourg is to run over the old Harwood and Rice Lake route, which the G.T.R. owns, but which is not in use, for about four miles north of Cobourg, then proceed across country touching Plainsville and on to Millbrook.

We were advised June 17, that while the company has been making surveys during the last five or six years for the purpose of getting a more convenient connection between the old Midland Ry. (which runs from Brockville to Midland, Ont.), and the main line between Port Hope and Cobourg, nothing final or definite has been determined upon.

Guelph Station.—The question of the erection of a new station at Guelph, Ont., has been under discussion recently between a representative of the G.T.R. law department and the City Council, and the Mayor, said it would be a matter of only a short time before it was finally settled. The only difficulty is the settlement of the question of the closing up or the diversion of Neeve St.

Stratford to Listowel.—Steel rails, 80 lbs. to the yard, are being laid between Stratford and Listowel, Ont.

Stratford to Goderich, Ont.—Relaying between Goderich and Thamesville, with 80 lb. steel rails is practically completed. This work is being carried out because of the increasing freight traffic.

London Track Elevation.—The Mayor stated June 8, if something is not done by the G.T.R. within a resonable time with regard to the question of track elevation, the Board of Railway Commissioners will take up the question and deal with it. The members of the Board are conversant with the situation, and know what is required.

London, Eng., Offices.—The company has opened a suite of offices at 17-19 Cockspur St., London, Eng., for the use of passengers. Canadians visiting London can use this address for their correspondence, write their letters there, and make appointments, etc. (June, pg. 411.)

The Canadian Society of Civil Engineers, held its annual summer excursion June 23, when Windsor, Ont., was visited, and the works of the M.C. Rd.'s Detroit River tunnel inspected.

The Central Railway and Engineering Club's annual excursion took place June 19, when the members travelled from Toronto to Jackson's Point over the Toronto and York Radial Ry.

The township of Lennox, Sudbury District, Ont., has been set apart by the Ontario Government for the G.T.R. veterans of the Fenian Raid, and selection of lots (¼ sections) may now be made by or for those entitled to them.

Judgment was delivered in the Supreme Court, June 11, on the appeal of R. Z. Walker, I.C.R. station agent, Fredericton, N.B., against conviction for a breach of the Scott Act, by receiving and warehousing intoxicating liquor. In delivering judgment, the Chief Justice, held that the police magistrate's decision to convict was not justified. The I.C.R., was constructed under the British North America Act, and being the property of the Crown and operated in the public interest, could not be interfered with by any act of Parliament, unless that act was made specially applicable to it.

The railway to be constructed across the Andes, from Arica in Chile to La Paz in Bolivia, for which a contract has been let to Sir John Jackson, Ltd., London, Eng., will have a length of 300 miles, and in crossing the divide will attain a height of over 12,000 ft. The first 50 or 60 miles will be across a desert, and the next 50 miles through the Andes, and the last 200 miles will be over the high tableland upon which La Paz, the highest city in the world, is built. At present the only means of transit to the coast is by mule trains, in which two mules have to carry water for every mule carrying baggage. The first work which the contractors will carry out will be the provision of a water supply for the desert section of the line.

THE ELECTRIC HEADLIGHT

The following letter was received under date of May 8, 1908, from Mr. J. W. Cleary, Travelling Engineer Pyle-National Electric Headlight Co.:

"I learn from_____the Master Mechanic here, that an engineer running between_____ and_____discovered a broken rail with the Pyle-National Electric Headlight and made the stop without ditching his train. One or two pairs of wheels got off, but that was a small affair to what it would have been where a foot of the rail was broken off. Also an engineer running east of here found some cars shoved out on the main line. He saw them with the 'Electric' and made the stop without hitting them."

Railway Commissioners' Traffic Orders

Summaries of other traffic orders passed are given on another page under the heading of Orders by Railway Commissioners.

LIQUOR FREIGHT ENGLAND TO FORT WILLIAM.

7084. May 19.—Re complaint of Downing's American Despatch, general merchandise forwarders, Montreal, complaining against overcharge made by C.P.R. of local rate from Fort William, Ont., to Winnipeg, on a carload of liquor shipped from England to Fort William, instead of a pro rata proportion of lake and rail rates agreed upon between the C.P.R. and the steamship companies, upon hearing the complaint in the presence of counsel for the railway company, the complainants being represented at the hearing, and what was alleged, it is ordered that the same be dismissed.

Chief Commissioner Mabee gave the following judgment:—In this case the whole matter seems to us to be a question of fact, or, at least in so far as it may be necessary to determine the application it must turn upon a question of fact. The applicants allege that they were duly appointed agents of Jacques & Co. and were parties along with the C.P.R. Co., to this lake and rail through freight tariff on general merchandise from London and a number of other places, via Quebec, Montreal and so on, and points between Kenora and Strathcona and a number of other places named upon the tariff. It would seem that Jacques & Co. have no office in Great Britain, that they entered into some sort of an arrangement with the Downing's Despatch Co., whereby the Despatch Company should receive a certain percentage upon freight directed over this route covered by this tariff. The Despatch Company assuming that they had authority to do so, issued through bills of lading in their own name upon their own forms for this traffic, and they assumed by that act to bind all the parties who were named as carriers in this joint tariff. When this particular shipment arrived at Fort William the C.P.R. Co. refused to recognize the authority of Downing's American Despatch Co. to bind them by issuing a through bill of lading, and they charged instead of the through rate under the tariff their local rate from Fort William to the destination. The applicants asked that the C.P.R. be ordered to refund to them the difference between what would have been their charge on the through rate governed by the joint tariff, and the local rate which had been charged. The Despatch Company I suppose having paid, or the consignee perhaps having been compelled to pay in order to get the goods released, this sum, and then I presume the consignee had had recourse back on the Despatch Company and it has had to make a refund. It seems to us there is not sufficient evidence here, even for the moment assuming, which perhaps is a matter of some doubt, that Jacques and Co. could have authorized some agent there to bind the C.P.R. Co.; that as a matter of fact they did not have any agent and did not intend that the Despatch Company should have any such agency or authority to do what they attempted to do in the case in hand. A letter was produced by counsel for respondents, from Jacques & Co. in which they repudiate having given the Despatch Company authority to issue this through bill of lading upon their own forms. The applicant, Mr. Halloway, who appeared, produced a letter in which he confirmed the arrangement made orally with Jacques & Co. under which they were to be paid certain commission for diverting this traffic, but there is nothing in the letter which he produced which would be read as showing that Jacques & Co. were intended to confer upon the Despatch Company—again assuming they had the power to do it, and as to which it is not necessary to say anything now—the authority to issue bills of lading of the kind they assumed to issue. It was simply a correspondence showing that upon this traffic they were to be paid the commission mentioned in the correspondence. So that we find on the question of fact, that Jacques & Co. did not confer upon the Despatch Company a general agency which would be necessary to confer in order to authorize them to issue bills of lading of the kind issued in this case. Finding that fact it is not necessary to consider further whether—even if there had been sufficient evidence of the attempt to establish an agency of that sort—whether Jacques & Co. would have had the authority to appoint an agent there who could bind the various carriers in the course of transit including the respondent. The result is that the application failed and it must be dismissed.

CRUDE OIL SHIPMENTS.

7093. May 31.—In the matter of the complaint of the British American Oil Co., Toronto, that the G.T.R. unjustly discriminated against crude oil shipments from Stoy, Ill., to Toronto, by refusing to carry it at the published and filed joint tariff 5th class rate, in accordance with the official classification and at the same rate as animal and vegetable oils, in carloads; and that the company refused to deliver at Toronto cars containing crude oil from Stoy, except upon the payment of 12½c. per 100 lbs., which additional rate had been paid under protest and which the company refuses to refund, upon hearing the application, the evidence adduced, the argument of counsel for the complainants and the G.T.R. and C.P.R., and what was alleged, it is declared that the legal rate chargeable upon the shipments complained of was 20c. per 100 lbs., the joint tariff 5th class rate under the official classification, published and filed with the Board, which rate is still in force; and it is further ordered that the G.T.R. be, and it is hereby, authorized to refund to the complainants the difference between the said rate of 20c. per 100 lbs. and the rate of 32½c. per 100 lbs. charged and collected by it on the said shipments.

CARRIAGE OF VALUABLE ORES.

7164. June 3.—Re application of C.P.R. Co., for order making general and applicable to all railway companies subject to the Board's jurisdiction, the form of release or special contract, respecting carriage of silver and other valuable ores, approved upon the application of the G.T.R. Co. It is ordered that the form of release or special contract respecting the carriage of silver and other valuable ores, approved by order 6972, of May 6, 1909, as published in the Railway and Marine World for June be extended to apply to all railway companies under the Board's jurisdiction, the companies being authorized to use the form upon their respective lines until the Board shall hereafter otherwise order and determine.

The following is the form:—

Release or Special Contract respecting the carriage of silver and other valuable ores.

.....(Consignee)

.....Destination.

Description of Property .....

"In consideration of the..... and its connecting lines receiving for transportation over their lines at.....station .....ore consigned to..... .....at.....station, and carrying same at the rates mentioned in the freight tariff in force at the time of shipment,.....do hereby undertake and agree that no claim in respect of any loss of or damage to such ore for which the said company and its connections, or any of them, may be responsible, will be made against the said company, or its connections, or any of them, for an amount exceeding $500 per net ton of such ore, and that in case of any such loss or damage arising from which the said company or its connections, or any of them, shall be liable, any claim therefor shall be computed and paid upon the basis of the actual weight of the ore lost or damaged and of the value thereof which shall not, however, exceed in any case the amount of $500 per net ton as herein provided. The rates fixed by this tariff are made in consideration of the shipper giving an undertaking and guaranty to the railway company that in case of any loss or damage to the ore, the railway company shall not be held responsible for an amount exceeding the actual value of the ore lost or damaged, which value, however, shall not exceed in any case the sum of $500 per net ton."

WHITE PASS AND YUKON RAILWAY RATES.

7246. June 16.—Re application of Board of Trade of Dawson and the White Pass route, the White Pass and Yukon Ry. Co., the Pacific and Arctic Ry. and Navigation Co., the British Columbia-Yukon Ry. Co., The British-Yukon Ry. Co., and the British-Yukon Navigation Co. It is ordered:

1. That the White Pass and Yukon Ry. Co., the Pacific and Arctic Ry. and Navigation Co., the British Columbia Yukon Ry. Co., and the British Yukon Navigation Co. be added as parties to these proceedings. That this application in so far as it affects or is directed against the British Yukon Navigation Co. be dismissed.

That the British Yukon Ry. Co., the British Columbia Yukon Ry. Co., the Pacific and Arctic Ry. and Navigation Co., and the White Pass and Yukon Ry. Co., or one or more of the said companies do within 30 days file with the Board pursuant to the Railway Act, tariffs of the companies tolls covering all through traffic reecived at Skagway and destined to White Horse or to any intermediate point or points between the International boundary line between Alaska and British Columbia upon the line of railway, and White Horse; and covering all through traffic received at any point or points upon the railway between White Horse and the International boundary and destined to Skagway. That for the purpose of filing such tariffs, the said companies or some or more of them enter into the necessary agreements (if any such are not now in existence). That the said tariff shall cover and include at least all the class and commodity rates now in existence upon the White Pass and Yukon route. That the Board shall be informed of the proportion in which the said tolls is divided or allotted between the said companies if any such division or allotment is continued or made.

WEIGHING COAL IN ONTARIO.

7261. May 31.—Re application of Retail Coal Dealers' Association for an order that all railway companies weigh all coal carried by them, received from foreign countries, at the port of entry, and for other matters: it is ordered that, in the event of any consignee of any car or cars of bituminous coal, shipped from the United States, desirin to have such car or cars weighed at the port of

PROPRIETORS

ARTHUR M. GRANT,
MANAGER

entry, he shall be at liberty to give a written notice to the agent of the railway company, receiving for delivery or furtherance such car or cars at such port of entry, before the said coal is received by such railway company, that he requires the same or any car or cars of such consignment weighed; and upon the receipt of such notice it shall be the duty of the company to weigh free of charge, at such port of entry, all cars covered by the notice. Any consignee may give a general or continual written notice that he requires all cars consigned to him weighed as above provided. For such weighing at the port of entry, the cars to be weighed may remain coupled one to another in a train. On notice in writing from a consignee of such coal, to the freight agent of the railway company hauling the same at the point of destination, within 24 hours of the arrival of the coal at the point of destination and before the car or cars containing same have been unloaded, that he wishes the car weighed, the company shall weigh any car of such coal at the scales nearest to the point of delivery; and for such service the railway company may charge and collect from the consignee, 5c. for every ton of coal in the car, with a minimum $1, and a maximum $2 per carload; but no such charge shall be made and no amount collected for such service, if the weight of the car is more than 500 lbs. less than the weight of the coal at the port of entry, or if the coal is not weighed at the port of entry, then the weight shown by the waybill to be in the car at the time of shipment, plus the weight of the car itself as shown by the tare. On notice in writing from a consignee of such coal, to the freight agent of the railway company hauling the same at the point of destination, within five hours from the unloading of any car containing such coal, that he wishes the empty car weighed, the company shall weigh the same at the scales nearest the point of delivery; and for such service the railway company may charge and collect from the consignee $1 a car; but no such charge shall be made and no amount collected for such service, if the actual weight of the car exceeds the tare marked on it by more than 500 lbs. This order shall only apply, in case the port of entry or point of delivery is in the Province of Ontario. Any person or company affected by this order may, after one year from the date hereof, apply to the Board to vary or rescind it.

VANCOUVER, WESTMINSTER AND YUKON RY. RATES.

7277. June 16.—Re complaint of British Columbia Mills, Timber & Trading Co., Burnaby, B.C., alleging excessive freight rates charged on Vancouver, Westminster & Yukon Ry., from Vancouver to Burnaby: Upon hearing this application, and hearing what was alleged on behalf of the applicant as well as the railway company, and the parties agreeing, and upon the consent of the C.P.R. Co., it is ordered that the Great Northern Ry. Co. operating the V.W. & Y. Ry., shall forthwith file and publish rates on lumber, shingles, and articles taking the same rates in the special tariffs of the C.P.R. Co., via New Westminster or Vancouver in connection with the C.P.R. as follows:—From points on the V.W. & Y.R. Co.'s line between Vancouver and New Westminster, not inclusive, to points on the C.P.R., except such points as may be reached directly by the G.N.R. or its connections; joint rates based upon 1c. per 100 lbs. higher than the rates established from Vancouver by the C.P.R.; the V.W. & Y.R. to be allowed 2½c. per 100 lbs. Order 6613, Feb. 23, 1909, is rescinded.

SUPPLEMENTS TO CANADIAN FREIGHT CLASSIFICATION.

7295. June 14.—Re application of Canadian Freight Association, through W. R. MacInnes, Chairman of Advisory Committee, under section 321 of the Railway Act, for an order approving proposed supplements to Canadian classification, namely: no. 1, submitted to the Board Jan. 25, 1909; the other, also no. 1, submitted March 4, 1909: Whereas, by order 7023, of May 10, 1909, the additions and changes embodied in the proposed Supplements to Canadian Freight Classification 14, were approved, subject to the exception, amongst others, that the proposed advance in the rating of tinned copper boiler sides or sheets be withdrawn pending consideration by the Canadian Manufacturers' Association and the Montreal Board of Trade of the similarity for classification purposes between these articles and other articles of copper in the Canadian classification 14, pg. 19, items 10 and 16, statements from the bodies named to be filed with the board in time for the traffic sittings on June 15; and whereas statements on behalf of the bodies named have been filed as required under the said order—upon reading the same; and upon the report and recommendation of the Chief Traffic Officer of the Board. It is ordered that order 7023, approving additions and changes in proposed supplements to Canadian Freight Classification 14, subject to exceptions and additions named in the order, be amended by striking out clause 4, directing the withdrawal of the proposed advance in tinned copper boiler sides or sheets, and substituting therefor the following clause, viz:—"That the proposed advance in rating on tinned copper boiler sides or sheets embodied in the said proposed supplements to Canadian Freight Classification 14, be approved."

SPECIAL COMMODITY RATES.

7325. June 22.—Re application of Canadian Freight Association, through W. R. MacInnes, Chairman of the Advisory Committee, under sec. 39 of the Railway Act, for an order rescinding clause "h" of order 3258, July 6, 1907, which provides "that no special commodity rates now existing, which may be lower than the corresponding class tariff rates herein prescribed, shall be advanced by reason of the changes herein ordered, or without the sanction of the Board": Upon hearing the application in the presence of counsel for the C.P.R., the G.T.R. and the C.N.R. companies, the Canadian Manufacturers' Association and the Montreal Board of Trade being represented at the hearing, and upon the report of the Chief Traffic Officer of the Board; and it appearing that the said clause has served the purpose for which it was intended, it is ordered that order 3258, dated July 6. 1907, be amended by striking out clause "h."

The Morrissey, Fernie and Michel Ry. has filed a copy of its by-law fixing tolls for switching at Michel, with the British Columbia Government, and the same has been approved.

Recent Provincial Legislation.

The acts passed at recent sessions of the Provincial Legislatures affecting transportation interests include the following:

NEW BRUNSWICK.

Canadian Terminal Ry.—Extending time for construction.

Maritime Steamship Co.—Authorizing exemption from taxation in County of Charlotte.

Moncton Electric Tramway Co.—Amending act of incorporation and extending time for construction.

New Brunswick Coal and Ry. Co.—Authorizing granting of loan by the Government for betterment of railway.

New Brunswick Docks and Terminals Co.—Incorporation.

St. John City.—Authorizing city to transfer harbor property and privileges to harbor commission.

St. John Valley Ry. Co.—Incorporation.

Tobique and Campbellton Ry.—Extending time for construction.

Twin Tree Mines Ry.—Amending act of incorporation, altering location of terminals and changing name to Northern New Brunswick and Seaboard Ry. Co.

QUEBEC.

Angus Short Line.—Incorporation.

Dominion Line Co.—Amending charter. (The company constructed a railway from Dudswell, Que., to the lime quarries, 4.80 miles, which is operated by Hereford Ry., leased to Maine Central Rd.)

Grand Lake and Bell River Ry.—Incorporation.

Hull Electric Co.—Respecting company's power.

Lachine, Jacques Cartier, and Maisonneuve Ry.—Incorporation.

Matane and Gaspe Ry.—Extending time for construction.

North Eastern Ry.—Defining company's powers and extending time for construction.

Quebec and Lake St. John Ry.—Extending time for construction of branch lines and extensions.

Quebec and Saguenay Ry.—Extending time for construction.

Quebec County Ry.—Extending time for construction.

Quebec Public Utilities Commission.—To create a commission.

The Spokane and British Columbia Ry. (Kettle Valley Lines) has registered its Standard Passenger Tariff C.R.C. 6 with the Board of Railway Commissioners, providing for a maximum passenger fare between all stations in British Columbia at 4c. a mile.

Vancouver, B.C., press reports state that an agreement has been signed under which the Union Pacific Rd., the Northern Pacific Ry., and the Great Northern Ry. will enter Vancouver from Tacoma, Wash., jointly, and thus obviate the construction of separate tracks.

Hon. W. Pugsley, Minister of Public Works, whose name has been mentioned in the report of the New Brunswick Commission on the financing of the New Brunswick Coal and Ry. Co., which took over the old Central Ry., has entered an action against the old directors of the company for an accounting of all subsidies and other monies from either Dominion or Provincial Governments, as well as proceeds of all bonds, debentures, etc. It is expected that the action will be tried in the fall.

HEAD OFFICES AND WORKS: SYDNEY, CAPE BRETON, CANADA

Canadian Northern Ry. Construct'on.

Canadian Northern Quebec Ry.—The construction of the cut-off between Garneau Junction and Quebec, is being proceeded with rapidly, and it is expected to get it completed by July 31. Over 500 men are at work.

The St. Leon Ry. Co. was incorporated by the Dominion Parliament in 1907, to construct a line of railway from Louisville, Maskinonge Co., northward to Alexis, with branches from St. Leon to Three Rivers, and to Lake Maskinonge, Que. No construction has been undertaken.

Canadian Northern Ontario Ry.—On the line between Hawkesbury and Ottawa construction is being pushed forward rapidly and it is expected that the line will be completed to Ottawa during Aug. The plans for the entrance into Ottawa were approved by the Minister of Railways June 18.

Matters in connection with the projected line from Toronto to Ottawa, are still in process of settlement. A deputation from the Lanark County Council waited on the Minister of Railways, June 18, to ask that the line be located through that county, and a deputation from Smiths Falls appeared in opposition, as the line is wanted through that district. The Minister said the arguments presented would be fully considered when the matter came up for settlement.

The Board of Railway Commissioners gave judgment, June 1, confirming the agreement made between the C.N.O.R. and the G.T.R. and C.P.R., by which the first named was to pay $1 a car in and out of the Union Station, Toronto, and that the C.N.O.R. should not be called upon to contribute towards fixed charges. The judgment was given upon an application for an order to compel the C.N.O.R. to pay one-third of the fixed annual charges of Toronto Union Station.

At Parry Sound, about three miles of line is under construction, to connect the C.N.R. with the C.P.R. This line will give both companies access to the water front, and enable them to make connection with the principal industries of the town. The C.P.R. has constructed its half of the line, and the remaining 1.50 miles is now under construction by the C.N.R. It will be operated and maintained jointly.

There are over 1,000 men at work on the extension from Selwood Junction, Ont., towards Port Arthur, and it is expected to get about 32 miles completed this season.

Schomberg and Aurora Ry.—In 1896 the Dominion Parliament passed an act authorizing the construction of a line from between King and Newmarket to Schomberg, Ont., and in 1906 a further act was passed authorizing the construction of additional lines to Beaton and Collingwood, Oshawa to Bowmanville, from Bond Lake to Big Bay Point—and from Barrie to Sutton, Ont. The total mileage authorized is 135 miles, and of this there has been constructed 15 miles from near Bond Lake, on the Metropolitan Division of the Toronto and York Radial Ry., to Schomberg. The line is owned by Mackenzie, Mann & Co. interests and is operated by steam.

Nipigon Ry.—An act was passed by the Dominion Parliament in 1902 incorporating a company with this title to construct a railway from Nipigon station on the C.P.R. transcontinental line, to Lake Superior, and to Nipigon Lake, Albany River and James Bay, a total of about 500 miles. An extension of line was obtained in 1904 for the construction of the line, and the charter subsequently passed into Mackenzie, Mann & Co.'s possession. No construction has been done.

Duluth, Winnipeg and Pacific Ry.—We are advised that it has not been decided when the line from Virginia to Duluth, Minn., will be constructed. This line is the southerly extension of the Duluth, Rainy Lake and Winnipeg Ry., which connects with the Canadian Northern Ry. at Fort Frances, Ont., and which was recently acquired by C.N.R. interests.

The company is reported to have filed a mortgage to secure $1,250,000 of bonds, to provide funds for the construction of the proposed line from Virginia southerly to Duluth, Minn. (June, p. 427.)

Canadian Northern Ry.—Good progress is being made with the erection of the Winnipeg Union Station. The original contract with Peter Lyall & Co., called for a basement, ground floor, two office floors, and an attic. A further contract has been made for the addition of another office floor. The total cost of the building will be about $1,250,000.

In Manitoba the construction in hand for the present includes the extension of the Rossburn branch from Russell, westerly for 40 or 50 miles. From Hallboro, a line is to be constructed through Rapid City for about 60 miles. The Oak Point line is being extended from Oak Point northerly and northwesterly, and 15 miles is being constructed from Ochre River easterly.

In Saskatchewan a line is being constructed from Maryfield southwesterly. The Goose Lake line, which now ends about 75 miles from Saskatoon is being further extended. An extension is also under construction from Prince Albert westerly, for 30 miles. This extension will, it is understood, ultimately connect with the main line at or near Battleford.

There have been some large real estate transactions in Regina, Sask., recently, and on June 8, it was reported that the C.N.R. had secured options on a large area in the city for terminal purposes. The company's Winnipeg officials state that the C.N.R. is not buying any land in Regina.

The freight sheds at Saskatoon, Sask., have been completed and opened for business. Tenders have been asked for a passenger station at Saskatoon. The plans provide for a building, including a covered way of about 40 ft., 224 ft. in length, with a projecting roof at either end. The waiting rooms, and other public offices are on the ground floor; upstairs there will be the operating offices, and there will also be a third floor, the use of which is not yet specified.

Construction has been started from Vegreville, Alta., to Camrose, the objective point of the line being Calgary. D. D. Mann, Vice President, stated recently that this section of the line would undoubtedly be constructed during the summer.

The company's application for the amalgamation with it of the Saskatchewan North-Western Ry., and the Alberta Midland Ry., was heard by the Board of Railway Commissioners at Ottawa, June 10. These two companies were incorporated under charters granted by the Saskatchewan and Alberta Legislatures, to construct certain lines of railway, as branches of the C.N.R., for which guarantees of bonds were given.

In 1899 the Dominion Parliament passed an act incorporating the Edmonton and Slave Lake Ry., with power to construct a railway, having a length of 400 miles from Edmonton via Athabasca Landing and Lesser Slave Lake to Peace River. In 1902 and 1904 acts were passed extending the time for construction. There was completed in 1906, a section of the line extending from Edmonton to Morinville, 21.50 miles, which is being operated as the C.N.R. Morinville branch.

Work is in progress upon an extension of this line from Morinville towards Athabasca Landing, the point at which the navigable waters of the Mackenzie River basin is reached. It is said that in course of time the line will be extended into the Peace River Valley. M. McCrimmon, Edmonton, Alta., is the contractor. (May, 1908, pg. 319.)

It is under the E.Y. and P. Ry. charter, that the C.N.R. route from Edmonton to the Pacific Coast is being surveyed, and its amalgamation was provided for in the act granting aid towards the construction of the line. The preliminary plans for the line from Edmonton to Vancouver and New Westminster, B.C., have been approved, but it is not expected that construction will be undertaken this season. The distance between the Yellowhead Pass and Vancouver is about 500 miles, and T. H. White, who is in charge of the surveys, said June 6 that he expected the location survey would be completed by the end of the year, as very satisfactory progress was being made. From Yellowhead Pass the route surveyed follows the Fraser River for about 40 or 50 miles to opposite Tete Jaune Cache, and thence through a low pass to the head waters of the North Thompson River, via Cranberry and Bridal Lakes. A fourth survey party with C. F. Hannington in charge, has been started at the head waters of the North Thompson River working west; and J. Irvine is working from 50 miles up the North Thompson River, and is running east to meet Hannington's party. J. V. Nimmo has been detached from the North Thompson survey, and with a party is now working down the Fraser River from Lytton, and W. K. Gwyer is working in the Yale district to meet the Nimmo party. As soon as this gap is covered the location of the line to the coast, and also between Lytton and Kamloops along the main Thompson River will be undertaken. The object of all these surveys is to locate a route from the Yellowhead Pass and the mouth of the Fraser River, to Tete Jaune Cache, over by Cranberry Lake, and Albreder Lake to the head waters of the North Thompson River and down it to the junction with the South Thompson at Kamloops. The route down the Thompson River from Kamloops will be on the opposite bank to that occupied by the C.P.R. From above Lytton where the Thompson joins the Fraser River, the line will take the same side of the river as the C.P.R., but at a lower level, and crossing it under one approach to the cantilever bridge at Cisco flat.

The Company's right of way and townsite agents reached Kamloops, May 31, and are reported to be arranging for securing land for terminal purposes, station sites, etc. (June, pg. 427.)

The Hudson's Bay Company

THE COMPANY OFFERS FOR SALE

Farming and Grazing Lands in Manitoba and the Northwest Territories

ON EASY TERMS OF PAYMENT

Town Lots for Sale at Winnipeg, Ft. William, Edmonton, Prince Albert, etc.

The Company has General Stores at Winnipeg, Vancouver, Calgary, Edmonton, and other places where purchasers will find the best of goods at moderate prices.

Transportation by the Company's Steamers, brigades of boats and canoes throughout the Territories not traversed by railways.

Full information at the Company's Offices, Winnipeg, or 1 Lime St., London, E.C.

National Transcontinental Railway.

Quebec Bridge and Ry. Co.—The Minister of Railways returned to Ottawa, June 11, from New York, where he had been in consultation with the engineers, who are preparing plans for the reconstruction of the bridge over the St. Lawrence River at Quebec. He stated that the report as to the plans would be ready at an early date. While nothing definite has been given out it is said that the Commissioners will recommend that the present piers be utilized for the new bridge, and that the central span be 1,600 ft., instead of 1,800 ft., as in the structure which collapsed. This reduction of 200 ft. will be effected by the construction of two new piers, one at each side of the river, 100 ft. towards the centre from the present ones. The bridge will be constructed on the cantilever principle, the towers standing on two piers each, instead of on single piers as in the old plans. The material to be used it is said will be nickel steel. The new bridge will cost, it is stated, about $6,000,000.

Quebec Terminals.—The Dominion Premier, visited Quebec, June 7, and discussed the question of the purchase of the Champlain market for a terminal site for the N.T.R.

National Transcontinental Ry.—The section from Winnipeg easterly to the junction with the G.T.P.R. branch from Fort William to Lake Superior Jct., was reported completed, so far as the grading is concerned, June 8, and engineers representing the G.T.P.R. and the N.T.R. Commission, have been going over the line preparatory to its being taken over for operation by the company. This inspection is being made for the purpose of fixing the cost, upon which the company is to pay the percentage named in the Act as rental. Should the two engineers disagree, C. Schreiber, the Dominion Government's consulting engineer, is the final arbitrator. The length of the piece of line is 240 miles, and the cost of construction has been heavy. Track laying is being gone on with from both ends. Already 70 miles of track has been laid from Winnipeg to the Winnipeg River, where a bridge is being built, and 20 miles from Lake Superior Jct. westerly. The gangs are laying about three miles of steel a day, and it is expected that the 150 mile gap will be closed by the end of July, and everything got ready for the opening of the line by Sept. 1.

Grand Trunk Pacific Ry.—It is expected that by Sept. 1, the company will be able to have its line in operation from the head of the lakes to Edmonton, Alta., a distance of about 1,200 miles.

The work of tracklaying between Wainwright and Edmonton, Alta., has been interferred with, it is reported, by wet weather, and has been closed down altogether at intervals. In some places the rails are said to have sunk two or three feet in the mud. It is confidently expected, however, that track will be laid into Edmonton, by the middle of July. The weather has also interfered with the work west of Edmonton, but tracklaying is being pushed forward as fast as circumstances will permit, so as to enable the company to haul in material for the construction of the big bridge across the Pembina River.

On the line already in operation between Winnipeg and Wainwright, Sask., the company is proceeding with the work of station building and otherwise providing facilities for carrying the increasing traffic.

Location surveys for the line to Vancouver, are being proceeded with along the valley of the North Thompson River.

At Prince Rupert, C. M. Hays, President, stated recently, it was expected that of the first 100 miles there would be completed by Oct. 1, the section to the Copper River. The sale of lots at the Prince Rupert townsite took place at Vancouver, B.C., May 25 to 29, and it was reported that over $1,000,000 was realized.

Pacific, Northern and Omineca Ry.—In 1902 the Dominion Parliament incorporated a company with this title, to construct a railway having a total length of about 900 miles, from Kitimat Inlet on the Pacific coast, via Hazelton to Teslin, or Atlin Lake, or both, and from Hazelton to Peace River Pass, and thence to Edmonton, Alta. Extensions of time were granted in 1904 and 1906. The charter came into the possession of the G.T. Pacific Ry., and a section of the line is now under construction.

G.T.P. Branch Lines.—E. J. Chamberlin, General Manager, stated recently that the company was preparing to let contracts for all its branch lines in Western Canada, so that construction could be gone on with. The Mayor of Regina, stated that W. Wainwright, Fourth Vice-President G.T.R., had informed him that the first line to be constructed would be that from near Yorkton to Regina, and that it would be finished this year if men and money could do it. Contracts have been awarded to McMillan Bros. & Kenny, Winnipeg, for the section from Melville towards Regina, Sask., 35 miles; and to Rigby & Hyland, Fredericton, N.B., for the section from Melville to Yorkton, Sask., 25 miles. Tenders have also been received for the construction of a branch line from Biggar, northerly to Battleford, Sask., 49 miles. It is also hoped to be able to start construction this year on lines north and south from Melville, Sask. (June, pg., 439).

Great Northern Ry. Lines in Canada.

A Winnipeg press despatch referring to railway construction work in Manitoba and the other western provinces says that under the name of the Great Northern Ry. the Hill interest operations are practically nil, but there are at least a dozen companies operating under local charters actively engaged in constructing short lines, or in surveying for short lines, which when connected will form a formidable rival to existing lines in Canada, as seven or eight of them will give direct connection between the projected main line in Canada and the main line in the U.S., making outlets for Canadian wheat which, of course, will be taken direct to Minneapolis mills.

Jas. Fisher, K.C., the legal representative of the G.N.R. in Winnipeg, stated May 27 that all surveys for the G.N.R. direct air line between Noyes, N.D., and Winnipeg had been completed, and he had no doubt but that the line would be constructed this year. A contract had not yet been let, but it was not too late, as the line would be only 60 miles long.

The company's plans for entering Winnipeg have been filed with the Railway Department, but not with the city council. The plans show that in order to come into the city by surface tracks it will be necessary to cross Leonard, Ellen, Isabel, Nena, Tecumseh, Brant, Xante and McPhillips Sts. The company proposes to put in subways at Nena and Isabel Sts., the two main avenues.

Brandon and Southwestern Ry.—The Dominion Parliament in 1890 incorporated a company with this title to construct a line from tp. 1, r. 23 or 24, w. prin. mer., to the C.P.R. near Brandon, and extensions of time for construction were granted in 1894, 1896 and 1898. In 1899 it was given power to construct an additional line from tp. 1 to the western boundary of Manitoba, and in 1900 to construct lines to Gladstone, Cameron and Winnipeg, with a number of branches. This latter act also granted an extension of time for construction, and a further extension was granted in 1903. The original mileage authorized was 70 miles, and no construction has taken place.

Kaslo and Lardo-Duncan Ry.—The Dominion Parliament in 1877 incorporated a company with this title to construct a railway of 150 miles from Kaslo to Lardo, thence to Upper Kootenay Lake, to the mouth of the Duncan River, to the headwaters of the Duncan River, with a branch from the mouth of Lardo River to Lardeau on Arrow Lake. The time for the construction of the railway was extended in 1900 and in 1905, but up to the present there has been no work done.

Vancouver, Victoria and Eastern Ry. and Navigation Co.—Vancouver press reports state that the company will start construction shortly upon its proposed wharves on Burrard Inlet. A spur in connection with the work is under construction from the head of False Creek, and will be completed by June 30.

It is reported that 80% of the grading between Hedley and Princeton, B.C., on this line has been completed. Tracklaying from Keremeos will be started as soon as there is no danger from high water, but Chief Engineer Kennedy says he cannot state when the steel will be laid into Princeton. The grading has reached a point near the Similkameen bridge, where a temporary structure will be put up for construction purposes. Plans have been prepared for a tunnel and a roundhouse at Princeton, for terminal purposes during the construction of the Ashurta branch, and the main line up the Tulameen. A number of spurs and side tracks are also to be constructed in the vicinity for the handling of the output of the V.F.M. Co.'s colliery. (June, pg. 417.)

The Canadian Northern Ry. is reported to have purchased the Empire Hotel, Winnipeg, adjacent to the Fort Garry station, at present under construction.

The C.P.R. Winnipeg shop employes held a picnic June 29, when a special train conveyed the party to Selkirk, where a programme of sports was gone through.

The Montreal Locomotive Works has delivered two 4-wheel locomotives to the Quebec Contracting Co., details of which were given in our May issue; 14 locomotives to the C.P.R., already noted, and one small contractors' locomotive.

W. J. Christie has been nominated by the Canadian Northern Ry., to represent the company's interests in the investigation into the requests of its Winnipeg employes, for increases of pay, etc. J. G. O'Donoghue will represent the men.

Railway Finance, Meetings, Etc.

Alberta Ry. and Irrigation Co.—Approximate net profits from all sources, exclusive of land sales, for Apr., $10,089 against $18,220 for Apr., 1908. Cumulative net profits, for ten months ended Apr. 30, $342,641. Approximate railway traffic receipts for May, $22,293, against $15,294 for May, 1908. Aggregate railway traffic receipts for 11 months ended May 31, $287,942.

Canada Southern Ry.—Following are the directors elected at the annual meeting at St. Thomas, Ont., June 2, of which Nicol Kingsmill and W. B. Kingsmill, Toronto, acted as Chairman and Secretary, respectively:—W. K. Vanderbilt, F. W. Vanderbilt, C. M. Depew, W. H. Newman, W. C. Brown, H. McK. Twombly, H. B. Ledyard, E. A. Wickes and J. E. Brown. The same directors were also elected for the Niagara River Bridge Co., and the Niagara Island Bridge Co.

Canadian Northern Ry.—An issue of $3,000,000 C.N.R. Winnipeg terminal bonds has been purchased by the Dominion Securities Corporation, Toronto.

There has been deposited with the Secretary of State at Ottawa, a mortgage dated May 18, made between the C.N. Ry. Co., the National Trust Co., Toronto, the British Empire Trust Co., London, Eng., and the King represented by the Province of Saskatchewan, securing an issue of 30 year 4% guaranteed stock or bonds on specified lines of railway to be constructed in Saskatchewan.

Central Ontario Ry.—Following are the officers and directors for the current year:—President, C. E. Ritchie; Vice-President, J. J. Warren; General Manager, G. Collins; other directors, J. H. Moss, and C. B. Stockdale.

Dominion Atlantic Ry.—Gross earnings for Apr., $85,250, against $76,978 for Apr. 1908. Aggregate gross earnings for 4 months ended Apr. 30, $286,200, against $278,037 for same period 1908.

Grand Trunk Pacific Ry.—A deed of trust made by the company to the Royal Trust Co., as trustee, the G.T.R. being guarantor, securing $10,000,000, 4% mortgage bonds, due 1919, was deposited with the Dominion Secretary of State, June 8.

G.T. Pacific Railway Branch Lines.—A London, Eng., press despatch, May 29, says the issue of £1,000,000 of bonds of the G.T. Pacific Branch Lines Co., has been oversubscribed.

Lake Superior Corporation.—The following officers were elected for the current year, at a meeting of the directors held in New York, June 11:—President, C. D. Warren, Toronto; Vice-President, J. T. Lea, Philadelphia, Pa.; second Vice-President, T. J. Drummond, Montreal; third Vice-President, J. F. Taylor.

London and South Eastern Ry.—The annual meeting was held at London, Ont., June 22, when the report for the year was submitted. Following are officers and directors for the current year: President, W. J. Reid; Vice President, T. H. Smallman; Secretary and Treasurer, J. W. Little; other directors, M. Stevely, J. Labatt, J. M. Dillon and M. Masuret.

Quebec and Lake St. John Ry.—Traffic earnings for May, $45,483.43, against $52,879.12 for May, 1908. Aggregate traffic earnings for 5 months ended May 31, $226,030.42, against $200,867.26 for same period, 1908. Mileage operated 285.6 miles, against 240.279 at same period, 1908.

Quebec Central Ry.—Gross earnings for Apr., $80,344.40; expenses, $56,784.77; net earnings, $23,559.63, against $100,762.01 gross earnings; $65,907.47 expenses; $34,854.54 net earnings for Apr., 1908. Aggregate gross earnings for 10 months ended Apr. 30, $843,395.60; expenses, $600,300.99; net earnings $243,094.61, against $908,119.87 gross earnings; $635,135.44 expenses; $272,984.43 net earnings for same period 1907-08.

St. Marys and Western Ontario Ry.—Application is being made to the Board of Railway Commissioners for sanction of a lease to the C.P.R., dated Feb. 25, 1909, of the lines and appurtenances of the St. M. and W.O. Ry.

Temiskaming and Northern Ontario Ry.—Railway receipts for Apr., $161,869.50; expenses, $72,014.36; net earnings, $89,855.14; ore royalties, $10,952.71. Approximate receipts for May, $126,000; expenses, $65,000; net earnings, $61,000.

Toronto, Hamilton and Buffalo Ry.—Following are the directors for the current year:—Sir. Thos. G. Shaughnessy, W. C. Brown, W. H. Newman, H. B. Ledyard, J. N. Beckley, D. McNicoll, C. F. Cox, E. B. Osler, W. P. Torrance, W. L. Scott. They represent the New York Central and Hudson River Rd., and the C.P.R., which own the line jointly. The company does not issue a report.

July Birthdays.

Many happy returns of the day to—

J. H. Black, Superintendent Temiskaming and Northern Ontario Ry., North Bay, Ont., born, near Smith's Falls, Ont., July 8, 1874.

M. S. Blaiklock, Engineer Maintenance of Way, G.T.R., Montreal, born at Quebec, July 19, 1859.

D. E. Blair, Superintendent of Rolling Stock, Montreal St. Ry., Montreal, born at St. Thomas, Montmagny, Que., July 25, 1877.

D. C. Coleman, Superintendent Car Service C.P.R. Western Lines, Winnipeg, born at Carleton Place, Ont., July 9, 1879.

Geo. Collins, Director and Manager Central Ontario Ry., Trenton, Ont., born at Kingston, Ont., July 20, 1860.

D. D'E. Cooper, Canadian Freight Agent Lehigh Valley Rd., Toronto, born at Buffalo, N.Y., July 8, 1862.

John Corbett, General Foreign Freight Agent C.P.R., Montreal, born in Lanarkshire, Scotland, July 19, 1863.

E. J. Coyle, ex-Assistant General Passenger Agent C.P.R., Vancouver, B.C., born at Stayner, Ont., July 23, 1870.

S. E. Dewey, Travelling Freight Agent G.T.R., New York City, born at Beckenham, Kent, Eng., July 4, 1879.

J. F. Dolan, City Passenger and Ticket Agent Richelieu and Ontario Navigation Co., Montreal, born at Kingston, Ont., July 1, 1868.

F. C. Foy, Canadian Passenger Agent, New York Central Lines, Toronto, born there, July 5, 1881.

J. A. Goodearle, General Manager Turbine Steamship Co., Toronto, born at Kingston, Ont., July 4, 1867.

J. H. Gordon, Travelling Freight Agent, C.P.R., Winnipeg, born there, July 21, 1883.

W. R. Haldane, ex-General Freight Agent C.P.R., Vancouver, B.C., born at Galashiels, Scotland, July 6, 1867.

J. H. Hanna, ex-Division Freight Agent G.T.R. at Hamilton, Ont., now at Calgary, Alta., born at London, Ont., July 27, 1867.

R. K. Harris, Chief Engineer, Orford Mountain Ry., Kingsbury, Que., born at Maitland, Ont., July 20, 1866.

A. D. Huff, Division Freight Agent G.T.R., Ottawa, born at Chatham, Ont., July 17, 1866.

C. A. Jaques, General Manager Merchants-Montreal Line Steamers, Montreal, born there July 15, 1849.

J. P. Kavanagh, Local Manager Ogdensburg Coal and Towing Co., Montreal, born at Plattsburg, N.Y., July 17, 1862.

E. W. Kolb, Assistant Superintendent Sleeping, Dining and Parlor Cars and News Service, C.P.R. Central Division, Winnipeg, born at Cincinnati, Ohio, July 22, 1878.

D. T. Lawrence, Manager National Despatch-Great Eastern Line, Boston, Mass., born at Marysville, Ohio, July 20, 1871.

T. J. Maguire, Accountant Quebec Central Ry., Sherbrooke, Que., born at Quebec, July 31, 1860.

R. Preston, Master Mechanic, Central Division, C.P.R., Winnipeg, born at Toronto, July 28, 1863.

J. E. Quick, General Baggage Agent G.T.R., Toronto, born at Richmond, Ontario Co., N.Y., July 10, 1851.

G. G. Ruel, Chief Solicitor Canadian Northern Ry., Toronto, born at St. John, N.B., July 5, 1866.

P. E. Ryan, Secretary National Transcontinental Railway Commission, Ottawa, born there July 26, 1876.

Geo. Stephen, General Freight Agent Canadian Northern Ry., Winnipeg, born at Montreal, July 5, 1876.

R. F. Struthers, Chief Inspector of Time Service, C.P.R., Winnipeg, born at Stratford, Ont., July 31, 1879.

T. Tait, Chairman Board Railway Commissioners for Victoria, Melbourne, Australia, born at Melbourne, Que., July 24, 1864.

H. T. Wilgress, Agent C.P.R. Pacific Steamship Service, Yokohama, Japan, born at Lachine, Que., July 29, 1857.

Cost of Stopping and Starting Trains.

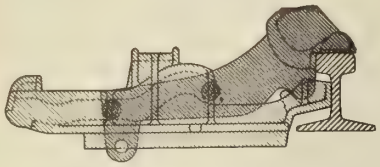
Luther Starratt, locomotive engineer, Truro, N.S., writes as follows: "Please state what it costs to stop and start a two car passenger train, also passenger trains up to 10 cars and the same in freight service."

We would be pleased to receive answers to this enquiry from any of our readers.

Railway Lands Patented.—Letters patent covering lands in Manitoba, Saskatchewan, Alberta and British Columbia were issued during Mar., as follows:—

	Acres.
C.N.R.	45,033.96
G.T.P.R.	1,277.00
Manitoba Southwestern Col. Ry.	80.00
	46,390.96

Manitoulin & North Shore Ry.—We were advised June 16 that no contract had been let for the first section of the extension of this railway. It was expected, however, that a contract would be let and construction proceed without delay. Surveys have been made for one line between Sudbury and Little Current, but it is expected that a revision survey will enable such alterations to be made as will reduce the cost of construction considerably.



The Pennsylvania Railroad System has an average of one Hayes Derail for every two and seven-tenths miles of road.

That's pretty fair evidence of merit; but there are other convincing reasons why you cannot do better than to install our derails:

We are derail specialists; we have done nothing but manufacture derails and attachments for five years.

Our derails have been tried out under every possible condition and have thoroughly proven their efficiency.

We make it our business to have you entirely satisfied with every piece of material we ship you. We want not only your first order but your continued future patronage.

Let us ship you a trial order from our works at Hamilton, Ontario.

Address: Hayes Track Appliance Co., Geneva, N.Y.

MAINLY ABOUT PEOPLE

F. H. Phippen, General Counsel, C.N.R., has been appointed a K.C. for Ontario.

Chevalier J. Heney, an old-time contractor, died at Ottawa, June 8, aged 88 years.

Sir Wm., Lady, and Miss Van Horne, returned to Canada, June 11, from Great Britain.

Scott Griffin, Manager Canadian Northern Express and Telegraph Companies, is visiting England.

Wm. Whyte, Second Vice-President C.P.R., returned to Winnipeg June 7 from a short visit to Montreal.

Miss B. Brodeur, daughter of the Minister of Marine, was married at Montreal, June 16, to J. G. de Lorimier.

Lord Strathcona is reported to have offered an ornamental fountain to Ottawa, to be erected in Strathcona Park.

F. Jno. Bell has resigned as director and Secretary-Treasurer of the Canadian Crocker-Wheeler Co., Ltd., Montreal.

Wm. Whyte, Second Vice-President C.P.R., Wininpeg, has been re-elected a director of the Imperial Bank of Canada.

Hon. L. P. Brodeur, Minister of Marine, sailed for England, June 25, to attend the Imperial Conference on Naval Defence.

Sir Robt. W. Perks, head of the Montreal and Georgian Bay Canal Co., addressed the Empire Club, Toronto, recently.

R. B. Angus, director C.P.R., and Miss Angus returned to Montreal from Great Britain, on the s.s. Empress of Ireland, June 11.

C. S. Gzowski, of Macdonell, Gzowski & Co., railway contractors, Vancouver, B.C., was married in Toronto, June 5, to Mrs. Patterson.

Col. H. H. McLean, M.P., Vice President St. John, N.B., Ry., sailed on the C.P.R. s.s. Empress of Britain, June 18, for England.

J. F. Lash, youngest son of Z. A. Lash, K.C., Director C.N.R., was married at St. James' Cathedral, Toronto, June 5, to Miss G. C. Baldwin.

W. Whyte, second Vice-President C.P.R., has been elected first W.M. of Assiniboine Lodge of Freemasons, newly instituted in Winnipeg.

A. D. MacTier, assistant to Vice-President, C.P.R., with Mrs. MacTier and family, sailed from Montreal, June 18, on a visit to Great Britain.

Lady Shaughnessy and family left Montreal towards the end of June, to spend a few months at their country home, St. Andrews, N.B.

M. S. Blaiklock, Engineer Maintenance of Way, G.T.R., Montreal, was elected a member of the Canadian Society of Civil Engineers, June 12.

M. J. Butler, Deputy Minister of Railways and Canals, and Chairman Government Railways Managing Board, has been made a Companion of the Order of St. Michael and St. George.

Mrs. D. McNicoll, wife of the Vice President C.P.R., was a passenger on the C.P.R. s.s. Empress of Britain, which sailed from Quebec, June 18.

D. McNicoll, Vice President and General Manager C.P.R., returned to Montreal June 4, after an inspection trip over the company's Ontario lines.

G. E. Smyth, Assistant General Manager Great Southern and Western Ry., Ireland, and Mrs. Smyth visited relatives in Montreal and Toronto during June.

G. J. Bury, General Manager, and C. E. E. Ussher, Assistant Passenger Traffic Manager, C.P.R. Western lines, were in Vancouver, B.C., during June.

Sir Wm. C. Van Horne and Sir H. Montagu Allan are Canadian Directors of the International Banking Corporation which is opening business in Japan.

Lady Reid and Miss Reid have given an observation pavilion to the Alexandra Hospital for Contagious Diseases, Montreal, in memory of the late Sir Robert G. Reid.

R. Kerr, Passenger Traffic Manager, C.P.R., returned to Montreal June 5 from Chicago, where he had been attending the meetings of the Western Passenger Association.

Earl Fitzhugh, only son of E. H. Fitzhugh, Third Vice-President G.T.R., died at Saranac Lake, June 2, where he had been staying for some time on account of his health.

A. M. Grantham, Purchasing Agent Toronto Ry., has recovered from an attack of ptomaine poisoning, which developed while on a fishing expedition on the Nipigon River.

H. E. Curry, resident engineer on construction, National Transcontinental Ry., on section near Lake Nipigon, Ont., was drowned there recently. He formerly resided at Kingston, Ont.

W. R. Haldane, who relinquished his duties as General Freight Agent, C.P.R. Pacific Division, on account of ill health, is at present undergoing treatment at a sanatarium at Alma, Mich.

G. H. Merrick, freight clerk, C.P.R., Winnipeg, was presented with a travelling bag, June 4, on his removal to Brandon, Man., where he has been appointed City Ticket Agent, C.P.R.

Hon. R. W. Scott, formerly Secretary of State, and father of D'Arcy Scott, Assistant Chief Railway Commissioner, has received the honor of knighthood on the occasion of the King's official birthday.

In our list of birthdays of transportation men for June in our last issue, Allan Purvis, Superintendent, District 3, Pacific Division, C.P.R., Nelson, B.C., was stated to have been born in 1864, instead of 1878.

Hon. G. P. Graham, Minister of Railways and Canals, will sail for Europe, July 2. He will be absent about 2 months, and during that time intends to study transportation problems on the Continent.

In announcing the death of N. L. Lusher, steamship and passenger ticket agent, and Canadian Passenger Agent, L. and N.W.R. Eng., at Montreal, in our June issue, the name was inadvertently spelt Luther.

T. Grimes, General Yardmaster, C.P.R. Toronto Terminals, West Toronto, was sentenced to three years in the penitentiary, June 4, for defrauding the C.P.R. of various sums of money by means of padded pay rolls.

F. W. Morse, formerly Second Vice-President and General Manager, G.T.P.R., who sailed from New York for Europe, Jan. 21, after his resignation from the G.T.P.R. management, returned to Canada recently.

The list of subscriptions to the South African Memorial Association includes: Z. A. Lash, K.C., director C.N.R., $1,000; E. B. Osler, M.P., director C.P.R., $500; Wm. Mackenzie, President C.N.R., $500; and Æmilius Jarvis & Co., $200.

F. W. Peters, Assistant to Second Vice President, and W. B. Lanigan, Assistant Freight Traffic Manager, Western Lines, C.P.R., Winnipeg, attended meetings of the Associated Boards of Trade at Saskatoon, Sask., during June.

H. Swinford, who was recently appointed General Agent, Northern Pacific Ry., at Vancouver, B.C., was the chief guest at a dinner given by the Winnipeg Garrison Officers recently, on his leaving Winnipeg, where he occupied a similar position.

Of the total of over $18,000,000 paid out by the life assurance companies in Canada during 1908, among the largest policies paid were the following: John Torrance, ship broker and agent, Montreal, $49,259; and J. I. Tarte, formerly Minister of Public Works, $27,000.

B. Robb, son of W. D. Robb, Superintendent Motive Power, G.T.R., along with a number of engineering students of McGill and other universities, is taking a summer course of practical mechanics at the G.T.R. locomotive repair shops, Stratford, Ont.

Jas. Ross, former C.P.R. contractor, now President of the Dominion Coal Co., and associated with other industrial enterprises, who some years ago presented the Ross Memorial Hospital to Lindsay, Ont., proposes to add a nurses' home to his benefaction.

R. W. and Mrs. Long, of London, Ont., who celebrated the fiftieth anniversary of their wedding recently, are the parents of R. W. Long, G.T.R. Division Freight Agent at Hamilton. Mr. Long was for many years before his retirement in the employ of the G.T.R.

A. Price, General Superintendent, and R. J. Lydiatt, Trainmaster, District 3, Western Division, C.P.R., returned to Calgary, Alta., June 4, from St. Louis, Mo., where they had been attending the Y.M.C.A. Railway Department's International Conference.

A London, Eng., paper, dated May 29, states that D. D. Mann, Vice-President C.N.R., was among the arrivals in England by the s.s. Laurentic. This is incorrect; Mr. Mann was in Toronto at the time, and though his passage was booked on the Laurentic, he did not sail.

P. H. Roy, Secretary-Treasurer Eastern Valley Ry. Co., ex-President of the Banque de St. Jean, Que., and a former Speaker of the Quebec Legislature, was sentenced to 5 years in the penitentiary recently for making false returns in connection with the bank which failed some time ago.

Lawford Grant, Manager for Canada of the British Insulated & Helsby Cables, Limited, has been appointed Honorary Secretary-Treasurer for Canada for the Institution of Electrical Engineers of London, Eng., in succession to Prof. R. B. Owens, late of McGill University, Montreal.

W. S. Cookson, Assistant General Passenger Agent, G.T.R., Chicago, Ill., has been elected Chairman Michigan Passenger Association. This position was hitherto held by G. W. Vaux, then Assistant

B. W. FOLGER, General Manager, Toronto

General Passenger Agent, G.T.R., Chicago, Ill., now General Passenger Agent, G.T.R., Montreal.

E. A. Evans, General Manager, Quebec Ry. Light and Power Co., was elected Second Vice President, and A. A. Dion, General Superintendent Ottawa Electric Co., was appointed a member of the managing committee of the Canadian Electric Association, for the current year, at its annual meeting, June 17.

W. R. Allan, of Allan, Lang, Killam & McKay, general insurance agents, Winnipeg, and who is also Canadian Northwest Agent for the Allan Line, and is a son of the late Andrew Allan, of Montreal, was married there, June 1, to Mrs. Killam, widow of the late A. C. Killam, K.C., Chief Railway Commissioner for Canada. Mr. and Mrs. Allan are now in Europe.

Jas. Dunsmuir, principal owner of the Wellington Colliery Co., with its railways on Vancouver Island, and its steamship lines trading along the Pacific Coast, and formerly principal owner of the Esquimalt and Nanaimo Ry., has asked the Dominion Government to relieve him of his duties as Lieut.-Governor of British Columbia, a position which he has held since 1905.

L. B. Merriam, who recently resigned his position as Division Engineer on the G. T. Pacific Ry. at Winnipeg, has opened an office in the Builders' Exchange Building there, and will pay special attention to municipal engineering, as well as undertaking railway and irrigation works. He is a member of the Canadian Society of Civil Engineers and of the Western Society of Engineers.

E. W. Kolb, who has been appointed Assistant Superintendent Sleeping, Dining and Parlor Cars and News Service, C.P.R. Central Division, Winnipeg, was born at Cincinnati, Ohio, July 22, 1878, and entered railway service at the age of 17, with the Pullman Co., at St. Augustine, Fla., and remained with that company ever since, chiefly in the southern winter service. During the past three years he was, during the summer months, in C.P.R. service. When he left the Pullman Co., he was Service Inspector of Dining Cars.

O. V. Dotts, who has been appointed Superintendent Sleeping, Dining and Parlor Cars and News Service, C.P.R. Central Division, Winnipeg, was born at Philadelphia, Pa., April 3, 1875, and entered the Pennsylvania Rd. service in 1890, in the passenger department, remaining with that company until his present appointment, principally in the Dining Car and Restaurant Department. When he left the P. Rd. service he was Assistant to the Assistant Superintendent Dining Cars and Restaurants, which position he had held for 4 years.

V. Kistler, who has been appointed District Freight and Passenger Agent, G.N.R., Grand Forks, B.C., was born at Clyde, Ohio, Sept. 4, 1881, and entered railway service July 1, 1901, since when he has been, to Sept. 1, 1901, stenographer Freight Claim Department, Lake Shore and Michigan Southern Ry.; Sept. 1, 1901, to June 1, 1902, stenographer Assistant Traffic Manager's office, Erie Rd.; June 1, 1902, to Jan. 1, 1906, stenographer and clerk General Freight office, G.N.R.; Jan. 1, 1906, to May 15, 1909, Travelling Freight Agent G.N.R.

H. R. Charlton, G.T.R. General Advertising Agent, was the recipient recently of an interesting souvenir of the early days of railways in Canada. It consisted of an annual pass issued in 1863 by the Great Western Ry., now part of the G.T.R., signed by T. Swinyard, as General Manager, to H. P. Dwight, then Superintendent Montreal Telegraph Co. It is interesting to note that both Mr. Swinyard and Mr. Dwight are over 80 years of age, the latter now being President G.N.W. Telegraph Co., and the former having retired from active business several years ago.

C. H. Temple, who has been appointed Assistant Superintendent of Motive Power, C.P.R., Winnipeg, was born at Montreal in 1862, and entered railway service in 1874, since when he has been, to 1881, office boy and apprentice, G.T.R., Belleville, Ont.; 1881 to 1886, mechanic and mechanical clerk in the Mechanical Superintendent's office, G.T.R., Montreal; in 1886 he was appointed foreman, C.P.R. shops at Yale, B.C., and subsequently, to 1902, he acted as foreman at Kamloops, Vancouver, North Bend and Revelstoke, B.C. In 1902 he was appointed Master Mechanic, C.P.R., Pacific Division, and transferred to a similar position, C.P.R. Central Division, Winnipeg, Jan., 1905.

R. E. Larmour, who has been appointed General Freight Agent, Central Division, Winnipeg, was born at Brantford, Ont., Sept. 26, 1868, and entered railway service Aug., 1884, at Stratford, Ont., as office boy in the office of his father, who was then Division Superintendent, G.T.R., remaining there until 1886; since when his record has been: 1886 to 1888, clerk in office of General Manager, Great Eastern Fast Freight Line, Detroit, Mich.; 1888 to 1890, Accountant to General Superintendent, Chicago and Grand Trunk Rd., Detroit, Mich.; 1890 to 1892, G.T.R. Local Freight Department, Detroit, Mich.; 1892 to 1898, Transfer Clerk, Through Freight from Wabash Rd. to G.T.R., at Windsor, Ont.; 1898 to Nov., 1899, Chief Clerk Freight Office, C.P.R., at Fort William, Ont.; Nov. 1899, to May, 1900, Acting Agent, Fort William; May, 1900, to Aug., 1900, Chief Clerk, Superintendent's Office Fort William; Aug., 1900, to Feb., 1903, Agent, Port Arthur, Ont.; Feb., 1903, to Feb., 1905, Freight Claims Agent, Pacific Division, Vancouver, B.C.; Feb., 1905, to Feb., 1906, Freight Claims Agent, Central and Western Divisions, Winnipeg; Feb. to Aug., 1906, City Freight Agent, Winnipeg; Aug., 1906, to June, 1908, Freight Agent, Fort William, Ont.; June to July, 1908, General Agent, Fort William, Ont.; July, 1908, to June, 1909, General Freight Agent, Kootenay and Boundary District, Nelson, B.C.; from 1898, all service with C.P.R.

Fair Visitor—"Why are all vessels spoken of as 'she'? It's because they glide so gracefully, isn't it?"

Mariner—"No, miss. It's because their riggin' costs so much."

A New Englander was travelling in Texas on a new railway.

"Hello, neighbor!" he called out to a fellow traveller. "How about the southbound train? How often does it run?"

"She's a try-weekly," said the Texan. "She runs down one week and tries mighty hard to get back the next."

American Railway Master Mechanics Association.

The President for the year 1908-09, H. H. Vaughan, Assistant to the Vice President C.P.R., in opening the 42nd annual convention at Atlantic City, N.J., June 16, gave a comprehensive historical sketch of the organization and work of the Association, and the many investigations and tests undertaken by it, which have been of considerable value to engineering in general, and railway engineering in particular. The history of the Association was shown to be the history of the development of the locomotive on this continent, and the services of the Association were claimed to be unique, as in other countries, similar organizations are non-existent, development being left to the individual. In dealing with the future of the Association, he pointed out the changes in motive power which are impending. The steam locomotive is faced by the electric locomotive, and while the articulated locomotive has increased the field of steam propulsion, the results and experiences with electricity as a motive power should be at the disposal of the members of the Association, so that they may be adequately equipped when the time arrives for making the change. He said that members have paid attention to the technical side of motive power rather than to the business side, and suggested that more attention should be given to the commercial side of the business in which they were engaged, and recommended properly prepared performance sheets as having a bearing on the commercial and financial questions under their charge. The locomotive repair shops of the country spend annually about $80,000,000, and there is no reason why properly trained observers should not prepare information about one operation after another, which, with a systematic exchange of information would tend to economy. He also advocated closer relations with railway clubs, as the latter are more to be depended on as sources of information than are circular letters, and many of the minor questions at present coming before the convention could with advantage be discussed in the clubs. A union with the Master Car Builders' Association was strongly favored, which he considered would obviate the giving up of two weeks to these annual meetings.

Subsequently a committee was appointed to report on the recommendations contained in the President's address.

The report of the committee on motor cars covering the development of motor cars on steam railways led to a discussion, in the course of which H. H. Vaughan, declared against the steam motor car as an anomalous arrangement. He considered that unless there is a future for the gasolene engine, there is nothing in motor cars for the railways at present.

Among other subjects discussed were, the grading of lumber for railway use; the revision of standards; the standard decimal gauge; safety appliances for locomotives; bank versus level firing; superheating; tender truck types, etc.

Michigan Central Rd.—We are advised that the company intends starting the erection of a 20-stall round house and a passenger station at Windsor, Ont., early in July. (June, pg. 415.)

ATTENTION, MASTER CAR BUILDERS!

The M. C. B. rules of interchange provide for the use of THE STEEL BACK BRAKE SHOE on your freight equipment.

The use of OUR STEEL BACK SHOE will mean a saving in brake shoe maintenance, brake heads and brake beams.

THE STEEL BACK BRAKE SHOE is an economy on all railway equipment.

LET US PROVE IT TO YOU

American Brake Shoe and Foundry Company

NEW YORK MAHWAH, N.J. CHICACO, ILL.

THE HOLDEN CO., Limited, Agents, 302 St. James St., MONTREAL

Transportation Appointments.

The information under this head, which is almost entirely gathered from official sources, is compiled with the greatest care, so as to ensure absolute accuracy. Anyone who may notice any error in our announcements will confer a favor by advising us.

Canadian Government Railways.—F. P. Brady, Member Canadian Government Railways Board of Management, has also been appointed General Superintendent. Office, Moncton, N.B.

Canadian Northern Ry.—O. C. Bishop, heretofore dining car conductor, has been appointed Inspector Sleeping and Dining Car Service, vice J. E. Durham resigned. Office, Winnipeg.

E. H. Williams is reported to have been appointed Locomotive Foreman at Kipling, Sask.

Canadian Pacific Ry.—F. L. Hutchinson has been appointed Manager Chateau Frontenac Hotel, Quebec, vice C. L. DeRouville transferred to Hotel Vancouver, Vancouver, B.C.

A. Dixon, General Foreman, West Toronto shops, will in future have charge of all matters which came under the jurisdiction of R. Preston, Superintendent, who has been promoted.

Jno. Morton has been appointed night locomotive foreman at Kenora, Ont., vice A. J. Gibbons resigned.

H. W. Wills, manager of the Royal Alexandra Hotel, Winnipeg, has also been appointed Superintendent of Western hotels, with jurisdiction over hotels west of Lake Superior. Office, Winnipeg.

R. E. Larmour, heretofore General Freight Agent Kootenay and Boundary district, Nelson, B.C., has been appointed General Freight Agent, Central Division,vice W. C. Bowles transferred. Office, Winnipeg.

C. H. Temple, heretofore Master Mechanic, Central division, Winnipeg, has been appointed Assistant Superintendent of Motive Power, Western lines. Office, Winnipeg.

R. Preston, heretofore Superintendent West Toronto shops, has been appointed Master Mechanic, Central Division, vice C. H. Temple promoted. Office, Winnipeg.

O. V. Dotts, heretofore Assistant Superintendent Sleeping, Dining and Parlor Cars and News Service, has been appointed Superintendent same service, Central Division, vice C. C. Barclay resigned. Office, Winnipeg.

E. W. Kolb has been appointed Assistant Superintendent Sleeping, Dining and Parlor Cars and News Service, Central Division, vice O. V. Dotts promoted. Office, Winnipeg.

G. B. Williams, heretofore Inspector Refrigerator Service, Western lines, Winnipeg, has been appointed Car Service Agent, Central Division, vice F. T. Anderson, car distributor, transferred. Office, Winnipeg.

R. A. Gamble has been appointed Inspector Refrigerator Service, Western lines, vice G. B. Williams transferred. Office, Winnipeg.

R. H. Rogers, heretofore Assistant General Baggage Master, has been appointed General Baggage Master, Winnipeg, vice W. R. White appointed station master, Winnipeg.

J. Moore, heretofore District Master Mechanic, district 1, Pacific division, Revelstoke, B.C., has been appointed Foreman of repair track, Winnipeg.

J. H. Scott, heretofore Chief Despatcher, District 4, Western Division, Cranbrook, B.C., has been appointed Chief Dispatcher, District 4, Central Division, Souris, Man., vice J. E. Ryan transferred.

G. H. Merrick, of the General Passenger Agent's office, Winnipeg, has been appointed city ticket agent at Brandon, Man.

R. F. Chapman, heretofore Chief Dispatcher at Moose Jaw, Sask., has been appointed Chief Dispatcher at Saskatoon, Sask.

N. S. Fraser, heretofore Chief Dispatcher at Revelstoke, B.C., has been appointed Chief Dispatcher at Moose Jaw, Sask., vice R. F. Chapman transferred.

C. D. Andrews has been appointed chargeman at Lanigan, Sask., vice G. S. Sellars transferred.

J. A. Jenson, heretofore car foreman at Stettler, Alta., has been appointed car foreman at Swift Current, Sask., vice D. Smyth transferred.

F. T. Anderson, heretofore Car Distributor, Winnipeg, has been appointed Car Service Agent, Western Division, vice A. J. MacMillan who has resigned. Office, Calgary, Alta.

D. Smyth, heretofore car foreman at Swift Current, Sask., has been appointed car foreman at Stettler, Alta., vice J. A. Jenson transferred.

F. W. Bergman, has been appointed Manager Banff Springs Hotel, Banff, Alta.

R. W. Drew, District and Travelling Freight Agent, Saskatoon, Sask., has been appointed acting General Freight Agent, Kootenay and Boundary District, vice R. E. Larmour, transferred. Office, Nelson, B.C.

J. E. Ryan, heretofore Chief Dispatcher, District 4, Central Division, Souris, Man., has been appointed Chief Dispatcher, District 4, Western Division, Cranbrook, B.C., vice J. H. Scott transferred.

E. E. Austin, heretofore District Master Mechanic, District 3, Pacific Division, Nelson, B.C., has been appointed District Master Mechanic, Pacific Division, Revelstoke, B.C., vice J. Moore, transferred.

C. A. Cotterell, heretofore Chief Dispatcher at Saskatoon, Sask., has been appointed Chief Dispatcher at Revelstoke, B.C.

W. C. Bowles, heretofore General Freight Agent, Central division, has been appointed General Freight Agent, Pacific division, vice W. R. Haldane, who has relinquished his duties on account of ill health. Office, Vancouver, B.C.

T. L. Roberts, heretofore General Fuel and Locomotive Inspector, Winnipeg, has been appointed acting Master Mechanic, Pacific division, during the absence of S. Phipps on leave.

C. L. DeRouville, heretofore Manager Chateau Frontenac Hotel, Quebec, has been appointed Manager Vancouver Hotel, Vancouver, B.C.

Chicago, Milwaukee and St. Paul Ry.—T. Donald, formerly Travelling Freight Agent at Minneapolis, Minn., has been appointed Commercial Agent at Winnipeg, vice J. I. Gillick transferred to Aberdeen, S.D., on account of ill health.

Commercial Express Line, Grand Trunk Despatch, Lackawanna-Grand Trunk Line, Milwaukee and Michigan Line, Reading Despatch. A joint circular signed by the General Traffic Manager, Erie Rd., and Chairman, Commercial Express Line; the Vice-President Delaware, Lackawanna and Western Rd.; the Chairman, Lackawanna-Grand Trunk Line; the Freight Traffic Manager, New York Central and West Shore Rds., and Chairman, Grand Trunk Despatch and Milwaukee & Michigan Lines; the Freight Traffic Manager Lehigh Valley Rd., and Chairman Reading Despatch, and the Freight Traffic Manager, G.T.R., states that the office of Manager of the Commercial Express Line, Grand Trunk Despatch, Lackawanna-Grand Trunk Line, Milwaukee and Michigan Line and Reading Despatch, has been discontinued in each case. The operation of these fast freight lines for the routing and handling of through freight traffic eastbound and westbound, will be continued under the direct supervision of the railways interested. Correspondence relating to the accounting affairs of these lines should, until otherwise advised, be addressed to I. W. Gantt, who has been appointed Treasurer pro tem., with office, Brisbane Building, 403 Main Street, Buffalo, N.Y.

Grand Trunk Pacific Ry.—R. W. Jones, heretofore Division Engineer, Edmonton, Alta., is said to be about to be appointed District Engineer, St. John, N.B., vice G. C. Dunn transferred.

D. Smith, heretofore shop foreman at Rivers, Man., has been appointed Locomotive Foreman at West Fort William, Ont., in charge of the locomotive and car works there, vice W. P. Agnew, who has left the company's service.

B. B. Kelliher, Chief En ineer; J. G. LeGrand, Bridge Engineer; K. J. C. Zinck, Assistant Engineer, and 11 other engineers, have been transferred from Montreal to Winnipeg.

G. C. Dunn, heretofore, District Engineer, St. John, N.B., has been appointed Divisional Engineer, east of Edmonton, Alta., with headquarters at Winnipeg, vice L. B. Merriam resigned.

C. W. Johnston, heretofore Travelling Passenger Agent, G.T.R., Montreal, has been appointed chief clerk to General Passenger Agent, G.T.P.R., at Winnipeg.

R. C. W. Lett, has been appointed Travelling Passenger and Colonization Agent. Office, Winnipeg.

G. W. Robb, heretofore Assistant Master Mechanic, has been appointed Master Mechanic, in charge of Motive Power, Cars and Shops, vice W. Gell resigned on account of ill health. Office, Rivers, Man.

W. E. Mann, heretofore Branch Lines Engineer, Winnipeg, has been appointed Division Engineer, Edmonton, Alta., vice R. W. Jones.

Grand Trunk Ry.—By agreement with its eastern connecting railways, the G.T.R. has assumed the supervision of the solicitation in the West of the traffic of the following fast freight lines:—Commercial Express Line, via Erie Rd.; Grand Trunk Despatch, via West Shore Rd.; Milwaukee and Michigan Line, via N.Y.C. & H.R. Rd.; Lackawanna-Grand Trunk Line, via Delaware, Lackawanna and Western Rd.; Reading Despatch, via Lehigh Valley Rd.; National Despatch-Great Eastern Line, via Central Vermont Ry., Boston and Maine Rd., and Maine S.S. Co.

I. W. Gantt, heretofore Division Freight Agent, Toledo, Ohio, has been appointed Assistant General Freight Agent, office Buffalo, N.Y. He will have charge of traffic from connectin railways at the Niagara frontier; from connecting railways when from points south of the Michigan-Indiana State line destined to points east of the Detroit and

Reid.

Great Northern Ry.—V. Kistler has been appointed Division Freight and Passenger Agent, Grand Forks, B.C., vice P. H. Burnham, appointed Assistant General Freight Agent, St. Paul, Minn.

Inland Navigation Co.—W. J. King, heretofore General Agent, Toronto, has been appointed General Agent at Montreal, vice H. W. Cowan.

H. J. Truscott has been appointed acting General Agent, Toronto.

Michigan Central Rd.—A. A. Ingram has been appointed Solicitor at St. Thomas, Ont., vice W. B. Kingsmill, resigned.

The Minneapolis, St. Paul & Sault Ste. Marie Ry. Co. having leased the Wisconsin Central Ry., is now operating the same as a part of its system under the name of the Chicago division. All persons holding positions on the Wisconsin Central Ry. are subject to the authority and control of the M.S.P. & S.S.M.R. Co.'s general officers, and will be governed accordingly in the transaction of business, heretofore managed by similar officers of the W.C. Ry.

C. W. Gardner, heretofore Auditor, has been appointed Comptroller. Office, Minneapolis, Minn.

R. Toombs has been appointed Auditor, R. Kirkwood Assistant Auditor, and A. A. Bell Auditor Traffic Accounts. Their jurisdiction will cover the entire system, including Chicago division.

P. Swenson's jurisdiction as Superintendent of Bridges and Buildings is extended over Chicago Division. All employes of that department will report to him, at Minneapolis.

New York, New Haven and Hartford Rd.—J. F. Stevens, Vice President, has resigned to accept service elsewhere. It is reported that he has been appointed to a position in the Great Northern Ry. in connection with its operations in the Canadian West.

Northern Pacific Ry.—W. E. Belcher, formerly General Agent Freight Department, Detroit, Mich., who was mentioned in our last issue as having been assigned to other duties, has been appointed Travelling Freight Representative in the Detroit territory, with headquarters at Detroit, Mich.

Wisconsin Central Ry.—H. N. Paist has been appointed Assistant Treasurer. Office, Minneapolis, Minn.

See also Minneapolis, St. Paul and Sault Ste. Marie Ry.

Railway Rolling Stock Notes.

The I.C.R., between May 17 and June 15, received 3 second class sleeping cars from the Silliker Car Co., Halifax, N.S., and 2 baggage cars from the Preston Car and Coach Co., Preston, Ont.

Between May 13 and June 14, the Canadian Locomotive Co., Kingston, Ont., delivered 6 mogul locomotives to the G.T.P.R., and one 6-wheel saddle-tank locomotive to the Hamilton Steel and Iron Co., Hamilton, Ont.

The Canadian Northern Ry., between May 15 and June 15, received the following additions to rolling stock:—25 stock cars and 100 flat cars from the Crossen Car Mfg. Co., Cobourg, Ont.; 290 box cars from the Canada Car Co., Montreal, and 305 box cars from Rhodes, Curry & Co., Amherst, N.S.

The G.T.R., since Jan. 25, has ordered 6 first class cars and 4 parlor buffet cars to be built at its Montreal shops; and has received 5 baggage cars and 25 cinder cars. Of the 25 eight-wheel locomotives ordered from the Montreal Locomotive Works, none had been delivered up to the middle of June, and of the 25 moguls ordered from the Canadian Locomotive Co., Kingston, Ont., 12 have been delivered.

The C.P.R., between May 12 and June 13, ordered the following rolling stock: 1 hump switching locomotive, 1 mail and express car, 63 box cars, 2 refrigerator cars, 7 stock cars, at its Angus shops; 2 vans at its Farnham shops; 15 mixed traffic locomotives, from the Montreal Locomotive Works; and one steel coal car from the Dominion Car and Foundry Co., Montreal.

The May report of the G. T. Pacific Ry. shows that it owns the following rolling stock:—86 locomotives, 18 first class coaches, 10 second class coaches, 6 mail and express cars, 12 baggage cars, 18 combination cars, 6 sleeping cars, 3 official cars, 9,000 box cars, 1,278 flat cars, 45 cabooses, 700 Hart convertible ballast cars, 376 construction cars, 5 gondola cars, 11 steam shovels, 2 wrecking cranes, 2 coaling cranes, 1 pile driver, and 1 ditcher.

The C.P.R., between May 12 and June 13, received the following additions to rolling stock: 5 freight locomotives, 8 dining cars, 16 baggage and express cars, 4 mail and express cars, 1 tourist car, 6 second class cars, 4 observation library cars, 296 stock cars, 17 ballast cars, 1 sample coal car, from its Angus shops; 8 vans from its Farnham shops; 131 steel coal cars from the Dominion Car and Foundry Co., Montreal; 2 69-ton cranes, 1 75-ton crane, 3 ballast unloaders, 4 spreaders and 9 ballast plows, from the U.S.

The C.P.R., has added to its equipment 22 observation cars, for use on its transcontinental line. The observation room is 28 ft. long and provided with large windows on each side and the rear, the rear windows reaching to within 12 ins. of the floor, so that passengers have an unbroken view of the passing scenery. The walls are finished in padouk, a wood similar to Spanish mahogany but of a deeper red. The furnishings include 18 large armchairs of various designs of the same wood, upholstered in morocco. Some of the chairs are fitted with a small tray rest, pivoted to the arm for light refreshments, prepared in a buffet situated in the car. Each car is also provided with a selected assortment of books in a cabinet placed at the end of the observation room, at the left of which is an escritoire provided with stationery, etc. In the centre of the car is a large smoking room, similar in design, but finished in English oak, and in front of this are situated a state room and drawing room, each provided with toilet accommodations. The rear ends of the cars have spacious platforms enclosed by massive brass railing and gates, and deck chairs are provided and about 15 passengers accommodated.

The Montreal Locomotive Works is building two 10-wheel locomotives for the New Canadian Co., of which the following are chief particulars:—

Weight in working order	198,500 lb.
Weight on drivers	84,000 lbs
Weight on engine truck	25,500 lbs
Wheel base, driving	20 ft. 6 in
Wheel base, engine	29 ft. 8 in
Wheel base, engine and tender	49 ft. 0 in
Cylinders	18 in. by 24 in.
Driving wheels, diameter	51 in.
Boiler, type	Extended wagon top
Boiler, diameter	54 in.
Boiler, pressure	160 lbs
Firebox	90 3-16 in. by 33 7-8 in.
Tubes, no. and diameter	198, 2 in.
Tubes, length	12 ft. 3 in.
Brakes	Westinghouse
Capacity of tank	3,500 imp. gals
Style of tank	V shape, sloping front
Tender truck	4 wheel arch bar
Tender journals	4¼ in. by 8 in.

Following are details of the 15 ten-wheel mixed traffic locomotives which are being built for the C.P.R., by the Montreal Locomotive Works:—

Weight in working order	194,700 lbs.
Weight on drivers	143,000 lbs.
Weight on engine truck	51,700 lbs.
Wheel base, driving	14 ft. 10 in.
Wheel base, engine	26 ft. 1 in.
Wheel base, engine and tender	54 ft. 4¼ in
Valve gear	Walschaerts
Cylinders	22½ in. by 28 in.
Driving wheels, diameter	63 in.
Boiler, type	Extended wagon top.
Boiler, diameter	69 in.
Boiler, pressure	180 lbs.
Firebox	103 in. by 70½ in.
Tubes, no. and diameter	240, 2 in. and 24, 5 in.
Tubes, length	14 ft. 4 in.
Brakes	Westinghouse
Tank, capacity	5,000 Imp. gals.
Tank, type, C.P.R. standard, semi water bottom.	
Tender truck	4-wheel pedestal type.
Tender journals	5½ in. by 10 in.

"You know, Miss Blank," said the proprietor of a railway station restaurant, "there is a great deal in having your sandwiches look attractive."

"Yes, sir, I know it," replied the girl; "I have done everything I could. I have dusted those sandwiches every morning for the last ten days!"

"Has your son had any success as a lawyer?"

"Well, no, to tell the truth, he hasn't. He has been practising now for nearly eleven years, and he has never been elected to the Legislature, or been appointed receiver for anything, or even become president of any railway company. It begins to look as if he may have to eke out a living just practising law."

A Review of
The Literature of Reinforced Concrete
LEON S MOISSEIFF
A List of Current Books on
CEMENT, CONCRETE, LIMES
and Allied Subjects, with Descriptive Notes
COMPILED BY
THE ENGINEERING NEWS BOOK DEPARTMENT
220 BROADWAY NEW YORK

has been issued in an endeavor to answer the hundreds of letters we have received, requesting information on cement and concrete literature, and which could not be answered individually in detail.

More than 100 books have been listed and described sufficiently to permit the selection of the best books to suit any special requirements.

The pamphlet is of practical value to everyone interested in any way in this form of construction, and every Engineer, Contractor, Manufacturer and Builder should have a copy, which will be sent to any address on receipt of 5 cents, to cover cost of mailing. The supply is limited—if you want a copy, get it NOW. Use the attached coupon.

WALKERVILLE, ONTARIO.

The Tehuantepec Route.

The question of establishing a route for the shipment of western grain from Pacific coast ports, has been taken in hand by the C.P.R., and other transportation companies, and investigations which have taken place have led to the inauguration of a connected service from British Columbia to Salina Cruz, Mexico, thence via the Tehuantepec National Ry., to Puerto Mexico, connecting with Atlantic steamships. The main link in the route, the Tehuantepec National Ry., is owned by an English company, with Sir Weetman D. Pearson as President, and S. Pearson and Son, Ltd., as managing directors. The railway, which is 188 miles long, connects the Pacific port of Salina Cruz with Puerto Mexico on the Atlantic, across the Tehuantepec isthmus.

Arrangements have been completed with the Canadian Mexican Pacific Steamship Line for the continuation of the Pacific service from B.C. ports to Salina Cruz, and with the Elder-Dempster Co., for the Atlantic service between Puerto Mexico and ports in Eastern Canada; while trans-Pacific and trans-Atlantic connections have also been arranged from the ports respectively. A monthly service will be operated from Montreal and Eastern Canada points via Tehuantepec to Victoria, Vancouver and all B.C. ports and inland points, which it is claimed will enable the Eastern Canadian manufacturer to compete with European manufacturers there.

The route to Europe, via Tehuantepec, for western grain is considered to be the most feasible yet, if the facilities for handling grain in bulk are provided. The cost of sacks and sacking for the grain, such has been proposed is too great, while it is not considered a necessity, as it is when shipping round the Horn or through the Suez canal, when the wheat is likely to be damaged in crossing the equator. Several schemes are at present under discussion for the erection of elevators on the B.C. coast, to deal with western grain, and while the Tehuantepec National Ry. at present has no elevator accommodation at either port, such construction is under consideration by the directors, and it is anticipated that a definite move will shortly be made to enable the railway to deal with grain. F. W. Peters, Assistant to Second Vice President, Winnipeg, was in Mexico recently when he conferred with Sir Weetman Pearson, and the suggested facilities were discussed.

Rescuscitation After Electric Shock.

J. Murphy, Electrical Engineer, Board of Railway Commissioners, made the following report April 29: "Yesterday, while inspecting a wire crossing at the Elgin St. subway at Brantford, Ont., I learned from the G.T.R. section foreman some particulars regarding the death by electric shock of one of their sectionmen on April 8. The foreman assured me that a small burn on one finger of deceased was the only visible sign of injury on the latter's body. In reply to my inquiry as to whether anyone had attempted to revive the deceased by means of artificial respiration, the foreman replied, 'Oh, no, the doctor said he was dead, and his body was carried away.' I proceeded to explain to the foreman that many persons shocked into insensibility—and apparently dead—had been revived by the same method that is employed to revive persons apparently dead from drowning, and that so many cases of complete revival were well known that it was always worth trying, and trying constantly for several hours, to revive anyone who had been shocked into insensibility, no matter how many pronounced the victim dead. To my astonishment, the foreman replied: 'I guess you are right because one of our gang used to be a lineman and he had some fingers burnt right off. He says he was stone dead for two hours—but they brought him back.' With this knowledge so close at hand it seems very strange that no attempt was made to revive the man above referred to. One of the first things I did when I became connected with the Department of Railways and Canals three years ago was to have copies of an illustrated sheet, entitled, "Resuscitation from Apparent Death from Electric Shock," distributed amongst the various places belonging to the Department where electrical energy was generated, received, or used. I am attaching a copy of this sheet. In view of the circumstances outlined above, it is, in my opinion, very desirable to have the railway companies directed to supply the information contained in this sheet to all their employes without delay. An unfortunate circumstance in connection with this question is that some medical men—apparently not familiar with the fact that many persons have been revived who would otherwise have died—actually interfere and deter willing persons in their well-meant attempts by announcing that the victim is dead. On the other hand, generally speaking, the medical profession now recognizes the value of the means described and illustrated in the attached sheet."

The Secretary of the Board of Railway Commissioners has issued a circular letter to railway companies, asking what steps have been taken by them to notify their men as to the methods of resuscitation suggested by Mr. Murphy.

ELECTRIC RAILWAYS.

Canadian Street Railway Association.

The annual meeting held at Winnipeg recently was probably the most successful in the Association's history. Representatives of eastern member companies assembled in Toronto May 29 and left that night in a special car placed at their disposal by the C.P.R., travelling by that line to Winnipeg, where they arrived early in the afternoon of May 31, being welcomed at the station by Wilford Phillips, Manager, and other Winnipeg Electric Ry. officials.

Meetings were held at the Royal Alexandra Hotel on May 31, June 1 and 2, J. E. Hutcheson, President, occupying the chair. A. W. Warnock, G.P.A., Twin City Rapid Transit Co., Minneapolis, Minn., attended as a special delegate from the American Street & Interurban Railway Association and spoke at length on matters of mutual interest to the two associations. The Hull Electric Co. was unanimously elected to membership in the Association.

The Secretary-Treasurer, Acton Burrows, presented a report coverin the Association's work for the year and dealing, among other matters, with membership, annual returns to Dominion Government, the transfer question, transportation of mails and letter carriers, taxation of real estate and gross earnings, responsibility for interlocking crossing accidents, Sunday electric car service, zone fares for Ontario interurban lines, fire insurance, use and occupancy insurance, and statistics of employes' wages. Reports were presented by the special committee on transfers and on transportation of mails and letter carriers. Papers were read on electrical franchises, their legal status and basis of valuation, on the care of interurban railway tracks and on the British Columbia Electric Ry. Co.'s Fraser Valley branch. The reading of each paper was followed by discussions thereon. There were topical discussions on the following questions:—

Accident claims and how to dispose of them.

Concrete track construction. Has past experience proven the initial expenditure for such construction justified?

Have A.S.C.E. rails of 70 or 80 lb. sections been used with entire satisfaction in paved streets? Are not the ties in such track too near the paving to be permanently satisfactory?

What improved joints can be suggested?

In considering a department of statistics, how much expenditure should be made for such information?

When should apparatus be withdrawn from service and scrapped on account of excessive repairs?

What are the rates for fire insurance paid by the several companies and have any had experience with automatic sprinklers in car houses and shops?

What is the cost per 1,000 miles to oil cars operated by the different companies belonging to the Association?

What kind of babbit is used for journal and motor bearings, what does it cost per pound, and do the different companies manufacture their own babbit?

The relative merits of aluminum and copper in the transmission of power.

Considerable time was devoted to a discussion on the various topics and a large amount of valuable information was elicited.

A standing committee on the maintenance of rollin stock was appointed.

The following officials were elected for the current year: President, D. McDonald; Manager Montreal Street Ry.; Vice-President, J. Anderson, Manager, Sandwich, Windsor & Amherstburg Ry.; Secretary-Treasurer, Acton Burrows, Managing Director and Editor in Chief, The Railway and Marine World. In consequence of the large increase in the Asosciation's work, it was decided to appoint an Assistant Secretary, and Aubrey Acton Burrows, Secretary and Business Manager of the Railway and Marine World, was elected. The following were elected members of the Executive Committee: P. Dubee, Secretary, Montreal Street Ry.; E. A. Evans, General Manager, Quebec Railway, Light & Power Co.; H. M. Hopper, Secretary-Treasurer, St. John Ry.; C. B. King, Manager, London Street Ry.; R. J. Fleming, General Manager, Toronto Ry. The by-laws having been amended by providing that the retiring President be a member of the Executive Committee for the year following his retirement, J. E. Hutcheson is ex officio a member of the committee for the current year.

The visit to Winnipe was much enjoyed by representatives of eastern companies, many of whom had not been there before. The weather was very fine and every opportunity was afforded them to see the city thoroughly. On the evening of May 31 they were the guests of the Winnipeg Electric Ry. Co. at the

EMBOSSED ALUMINUM NUMBERS

Our Signs and Numbers are made of ALUMINUM and riveted with ALUMINUM RIVETS to a BLACK JAPANNED STEEL PLATE. The great benefit of our Numbers and Signs is. that being made of Aluminum they will never CRACK, RUST or TARNISH, and can be seen much better both by day and night than any other manufactured. The Light, Glistening Aluminum Figure standing out on the Black Background makes a PERFECT CONTRAST between the Number and the Plate.

Baltimore, Md. **Chicago, Ill.**

Walker Theatre. On June 1 they were entertained at luncheon at the Royal Alexandra Hotel by the W.E.R. Co. and on June 2 they went over the company's interurban line to Selkirk and inspected the company's car barns and car shops, and also paid a visit to River Park, a beautiful summer resort owned by the company.

Montreal St. Ry. Mutual Benefit Association.

Following are extracts from the report for the year ended Apr. 30, presented at the annual meeting, June 17: A summary of the relief work done during the years shows that 554 members were disabled through sickness or injury; $9,457.40 was paid to such members; $1,697.07 was paid for medicine; $255 for pensions, and $6,566.67 for death and burial insurance. Since the organization of the Association, $27,192.72 has been paid for death and burial insurance, and $44,511.45 for sickness and injury benefits. The 5th annual picnic realised a net profit of $7,325.35. During the year $15,509.25 was invested, which, together with the sum previously invested, amounts to $48,725.50. The securities are held by the Royal Trust Co. for safe keeping. The committee of management acknowledged a special Christmas donation of $3,000, received from the Montreal St. Ry., making the total contributions received from the company, $13,910.27, which amount, added to the fees and dues received from the members, $13,008.50, and the proceeds of the picnic, and interest on investments and bank deposits, $10,395.69, makes a total revenue for the year of $37,314.46, the expenses being $24,400.76, leaves a surplus of $12,913.70.

At a meeting held June 14, the following committee of management was elected for the current year:—W. G. Ross, President; J. Delaney, R. M. Hannaford, A. S. Byrd, J. Hughes, J. Gagne, N. Lachance, W. Butler, A. Arel, A. Leblanc, H. G. Taylor, A. Gaboury, D. McDonald; P. Dubee, Secretary-Treasurer. After the meetings, the members proceeded in 10 special cars to Dominion Park, where supper was served, followed by a concert.

Height of Street Car Steps.

The question of the height of street car steps came up before the Ontario Railway and Municipal Board recently, after a number of adjournments to enable certain tests to be made as to the practicability of the addition of another step to the cars. In delivering judgment, June 2, J. Leitch, K.C., Chairman of the Board, said:—

This is an application filed by Dr. Helen MacMurchy on Sept. 10, 1908, with the Board for the purpose of having a regulation or order made fixing the height of the first step on street and electric railway cars at from 9 to 12 in. from the ground, and the other steps with a rise of from 7 to 9 in., one above the other. The application was served on all street and electric railways under the Board's jurisdiction and upon the clerks of the different municipalities in which such railways are operated. The only municipalities that took an active interest in the matter were the city of Toronto and the then city of West Toronto. A. O. Graydon, City Engineer, London, Ont., wrote a letter to the Board in which he expressed the opinion that a 12 in. step should be the maximum height for street cars and that anything over that should be prohibited by law. An order was made by the Toronto Board of Control Sept. 21, instructing the city Solicitor to represent Dr. MacMurchy on this application, and from that time on the controversy was between Toronto and the Toronto Ry. Co., and was confined to the company's cars and operating conditions in Toronto. Dr. MacMurchy called the most eminent medical gentlemen in the city to testify, who gave it as their opinion that the height of the first step from the ground should be as near 12 in. as possible. This was only one aspect of the case. The Board could not overlook the difficulties and possibilities connected with operation. It appeared from the evidence that there was little difficulty, if any, in reference to the steps on the Toronto Ry. Co.'s single truck cars. It was the double truck open cars that were complained of. It appearing to the Board that the difficulty and expense of lowering the bodies of open double truck cars so as to permit of lowering the steps was insuperable, they suggested that the application should be adjourned and that the Toronto Ry. Co. should equip a double truck open car with three steps instead of two, in order to test the feasibility of having the first step not higher than 12 in. from the ground. The matter was consequently adjourned for several weeks, and the Toronto Ry. Co. did equip a double truck open car with three steps instead of two. In actual operation the Board found that, while the three steps would be very convenient and comfortable, they extended out so far into the street as to render them very dangerous to pedestrians and vehicles, and the adoption of such car steps would involve a reconstruction of the car barns, repair pits, etc. It was clear to the Board that the difficulty could not be solved in this way. The Board then instructed its Engineer, J. F. H. Wyse, to ascertain if the longitudinal seats in the Toronto cars could be taken out and replaced by lateral seats with an aisle down the centre of the car, for the reason if this was feasible the difficulty in reference to the height of the steps would be solved. By reason of the narrow devil strip in the city of Toronto, the Board's Engineer found it impossible to operate a car with a wider inside breadth than 80 in. Under these conditions it would only be possible to have lateral seats 32 in. wide with an aisle of 16 in. Every expert car operator or builder consulted by the Board and the Engineer was of the opinion that seats 32 in. wide with an aisle of 16 in. would be impracticable, and the scheme of changing the seating had to be abandoned. The Toronto Ry Co. built another car as an experiment to assist the Board in coming to a conclusion. M. Power, the company's Master Car Builder, built this car so that the body came to within 38 in. from the ground. The Board is of opinion that this was so close down that there was no margin of safety left for the operation of the brake rods or the compressed air pipes. The Board has come to the conclusion that to be safe the floor of the car should be not less than 40 in. above rail level. From the evidence adduced the Board is of opinion, as to all cars hereafter built and put in operation, it would be safe in standardizing the steps of open double truck cars at from 14 to 16 in. for the first step, and 14 and 12 in. for the two upper steps. On open single truck cars from 12 to 15 in. for the first step, and 12 and 9 in. for the two upper steps would be reasonable. On closed double truck cars the first step should be from 14 to 16 in. from the ground, and on closed single truck cars from 12 to 15 in.

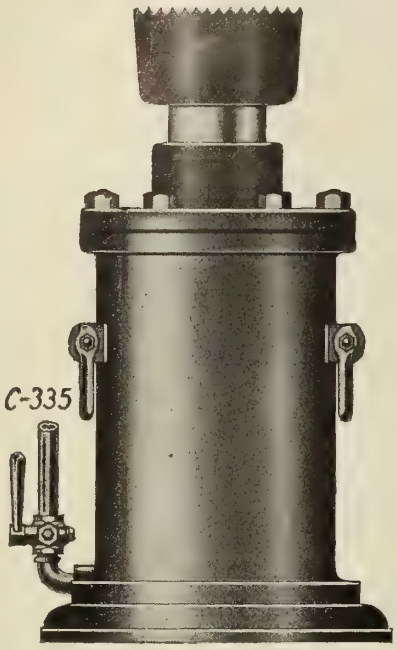
A regulation will be promulgated by the Board to the above effect. As the conditions of operation in Toronto are more difficult than in any other city or town in Ontario, the regulation will apply to all street and electric railways under the Board's jurisdiction. The Board makes no order as to costs.

Militia Versus Street Cars.

An important issue has arisen at Winnipeg as to whether the militia or electric cars have the right of way on the streets. On June 1, the 90th Rifles were on parade, proceeding from the drill hall across Broadway to the University grounds. Part of the leading company had crossed the track, when a car approached and appeared to be slowing up. A captain ordered the motorman to stop, but the car went on for a few yards. The Captain jumped on the fender and some of the rest of the company scattered to avoid the car. The motorman and conductor were hauled from the car by riflemen, the car being left on the track, and the motorman and conductor were taken under guard before the officer commanding the regiment, and after being detained by him for some two hours, they were marched through the streets to the police cells, escorted by a guard of ten armed riflemen. When the case was heard in the police court, the motorman testified that he thought he could get over the crossing ahead of the regiment, but on getting closer found he could not do so and he applied the emergency brake. The wheels skidded, and when the car stopped the fender was partly over the crossing. The evidence of the conductor, who is also a corporal in the 90th regiment, showed that the car did not completely block the crossing, and that after it stopped, the balance of the regiment could easily have crossed in front of it. Counsel for the railway company contended that the Militia Act only applied in times of war or riot, when troops were on active service.

The Police Magistrate, Hon. T. Mayne Daly, in giving judgment said: "It seems the desire of the company not to let this matter stand, but to know exactly what their rights are on the city streets. I find that there is an entire absence of the word 'wilful' in the section of the act referred to. In the act regarding the handling of His Majesty's mails there is the word wilful, and it is an indictable offence to wilfully delay the mails. The question raised in this instance is of more importance in that it is a question of whether the militia of Canada have the right of way. To my mind there is not the slightest doubt that they have. This despite the fact that the company has secured a charter from the city which has been passed upon by the provincial legislation that they have the right of way under any circumstances. A militia corps proceeding to drill is under orders and is lawfully pursuing its course as prescribed in the act. In my opinion it is not necessary that the interference should be wilful to come within the act. The fact of the motorman having seen

Compressed Air-Jacks



For short lifting around car and repair shops and manufacturing plants.

Rand Jacks are built in several styles from 4 to 30 thousand pounds capacity.

All of the latest construction, fitted with safety check valves for holding the load if the hose becomes detached or burst.

We carry in stock or can make quick delivery of all compressed air appliances and Rand Air Compressors.

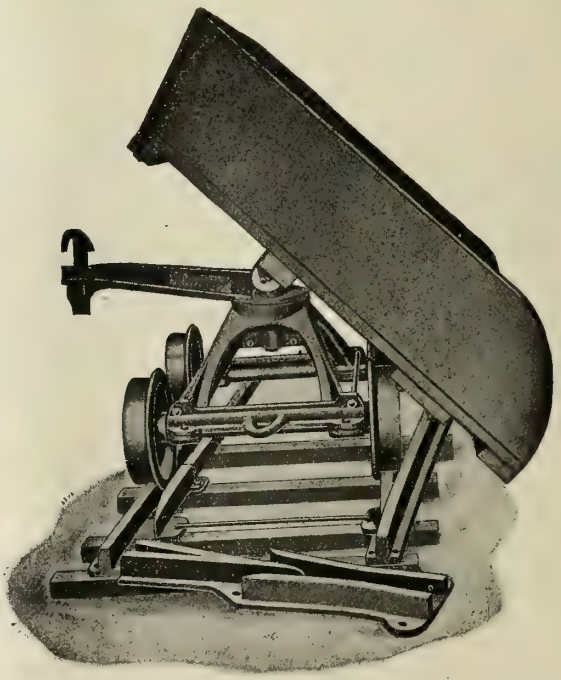
Champion Revolving Dump Car



The CHAMPION CAR is radically different from any now on the market. It is simple, strong, compact and being built entirely of iron except the bed, is extremely durable. The bed revolves and may be dumped on either side or end. Write for catalogue of cars and drums.

The Canadian Road Machine Co., Limited
HAMILTON, CANADA

the troops approaching should have dictated to him that he should have stopped the car. It would almost seem that he did not know what his duties were under the circumstances and he was going through anyway. I find from the evidence given that there was an obstruction as charged. If it were only a question of whether the obstruction were wilful I would find in his favor. But it is probably best to find what were his rights. In this case the rights of the militia are paramount, first because they are His Majesty's troops, and secondly because the militia act covers that very point. Entirely to show the standing of the motorman I will fine him $5 so that the case may be carried to a higher court. It must not be forgotten, however, that the motorman, like the troops, was acting under orders from his superiors. He had orders from his superior officers and was carrying them out as he saw best. I hope that no bad blood will result from this action."

The case against the conductor was dismissed. The motorman's conviction is being appealed by the company.

Niagara, St. Catherines and Toronto Ry.

Following are extracts from the directors' report for the year 1908: During this period your company suffered, in common with other transportation companies, in the general business depression throughout the country, and, in view of the conditions prevailing, the returns shown may be considered satisfactory. With the exception of the completion of the construction under way, referred to in the last annual report, no new work was undertaken during the year. The permanent improvement work on the main line is now finished with the exception of the change of line at Merriton, which will receive consideration during the coming year. The Welland divison was completed as far as the Welland River, and opened for traffic on May 1. During the summer a pile bridge was constructed across the river, and the line extended into the town of Welland. Connection was subsequently arranged with the Toronto, Hamilton and Buffalo Railway at this point. This, with the business developed locally, should result in a large increased revenue to your company. The company has constructed spur tracks into the Lincoln Paper Mill, Merriton, and the Hedley-Shaw Milling Co.'s plant, Thorold. Arrangements have been made for the construction of a branch line into the Welland Vale Manufacturing Co.'s plant at St. Catharines, all of which promise considerable freight business. The equipment and rolling stock has been maintained in a high state of efficiency, notwithstanding the fact that all our passenger cars are in almost daily use. Owing to the increased mileage operated and the additional traffic requirements, the question of further purchase of equipment will receive early attention. The company's steamers will receive the usual repairs during the winter, and will be in first-class shape for next season's business. While the company handled considerably more tonnage last year than the previous year, the revenue was somewhat less, due to the reduction in fruit rates ordered by the Railway Commission, as well as to the cutting of rates by the large freight boats which handled business in opposition to your boats across the lake from Port Dalhousie.

St. John, N. B., Ry. Report.

Following are extracts from the report for the year ended April 30, 1909, presented at the annual meeting, June 9: The year's business showed a net profit, after providing for the interest on bonds and all other charges, of $52,980.58, out of which the directors have declared two half-yearly dividends of 3%, amounting to $48,000, leaving a balance of $4,980.58, which has been transferred to profit and loss account. The roadbed, rolling stock, buildings and other property have been efficiently maintained. The agreement with the city of St. John for the removal of snow and repairs of streets has been renewed for 10 years, from April 1, 1908. This agreement now covers all the company's tracks in the city. While the general business of the company shows a satisfactory increase for the last year, the net earnings from the street railway have not increased. This is due to the extra car service provided, and the loss in operating the street railway system on the west side of the harbor.

Projects, Construction, Betterments, Etc.

Brantford and Hamilton Ry.—In 1904 the Dominion Parliament incorporated a company with this title for the purpose of constructing an electric railway connecting Brantford and Hamilton, Ont., 23 miles. The line has been constructed and is in operation. The charter passed out of the hands of the original holders to the Dominion Power and Transmission Co., Hamilton, and it is being operated in connection with the other lines owned by that company. (Jan., pg. 51.)

British Columbia.—A U. S. press report states that J. T. Lanigan of Chicago, Ill., is interested in a company which proposes to construct 100 miles of electric railway in the vicinity of Vernon, B.C.

A Vancouver press report states that the construction of an electric railway about 100 miles in length to serve the fruit growing districts on both sides of the Okanagan River is under consideration. The route of the projected line is from Vernon, along the west side of the lake as far as Summerland; and, another line on the east side of the lake as far as Kelowna, a distance of nearly 40 miles. It is proposed to use water power for generating electricity. J. F. Lanigan, of Chicago, Ill., who is interested in the undertaking, has returned after an inspection of the routes, and stated in Vancouver, that there was no reason why the line could not be in operation within 18 weeks. The company is reported to have been incorporated under the provincial laws.

British Columbia Electric Ry.—The General Manager states in connection with the company's franchise in D. L. 301 and Hastings townsite, that it has a perpetual franchise on certain streets only, and that there is nothing to prevent any other company or corporation obtaining a franchise upon other streets at any time. (June, pg. 447.)

The taxpayers of South Vancouver by a majority of 730 out of a total poll of

1,032, granted the B.C.E. Ry. a franchise May 29. A date has been fixed for the voting on the by-law for a franchise in Coquitlam municipality, but all the details have not been settled.

A contract has been let to Naylor Bros., Huddersfield, Eng., for the enlargement of the hydraulic tunnel connecting lakes Coquitlam and Buntzen. The capacity of the tunnel will be trebled by the improvement, which is undertaken in connection with the construction of the new dam at the outlet of Lake Coquitlam.

Buffalo, Niagara and Toronto Ry.—The Dominion Parliament in 1906 incorporated a company with this title to construct an electric railway of 40 miles from Niagara-on-the-Lake to Fort Erie, with branches from St. David's to St. Catharines; from Fort Erie to Port Colborne, and from the main line near the crossing of Welland River into Welland. It has not done anything in the way of construction. (Dec. 1907, pg. 927; see also Fort Erie and Buffalo Bridge Co., Mar., pg. 214.)

Calgary, Alta.—All the material for the construction of the municipal street railway, was reported to have been delivered June 5. The first portion of the line to be completed and opened, will be that of the fair grounds. (June, pg. 447.)

Chatham, Wallaceburg and Lake Erie Ry.—A company with this title was incorporated by the Dominion Parliament in 1903, with power to construct 75 miles of electric railway located as follows: from Chatham to Wallaceburg and Petrolia; Chatham to Rondeau, with branches to Dresden, and Blenheim, Ont. Of these lines there has been constructed a line from Wallaceburg to Lake Erie, 21.50 miles. (May, pg. 365.)

Cobourg, Port Hope and Havelock Electric Ry.—The Northumberland-Durham Power Co., has obtained from the Dominion Government a lease of the remaining portion of the water power at Healey Falls. The development of this power will, it is said, proceed concurrently with the construction of the Trent Valley Canal. It is said that the C.P.H. and H.E. Ry., when it is constructed, will be operated by power obtained from this source. (May, pg. 365.)

Edmonton Radial Ry.—The work on the 5½ mile extension of this line is approaching completion. The rails recently ordered were 600 tons of 60 lb., and 200 tons of 80 lb., and it is anticipated that the whole will be ready for operation early in Aug. Lubbock and Matheson, Edmonton, Alta., are the contractors.

Egerton Tramway Co.—See Pictou County Electric Co.

Hamilton, Galt and Berlin Ry.—This company was incorporated by the Dominion Parliament in 1903 and an extension of time for construction was granted in 1905. The line, which is to be operated by electricity, will be about

WANTED.—Position with Canadian Electric Railway to take charge of traffic transportation or employment and inspection department. Capable of organizing and installing modern system in either. Fifteen years experience. At present employed by one largest American Electric Railway properties. References from present and past employers. Canadian citizen. Box 4325, care The Railway and Marine World.

New Ways To The Woods

The six railways of the Canadian Northern Railway system offer the widest choice of new territories for the fisherman, canoeist, camper and hunter.

IN NOVA SCOTIA the Halifax and Southwestern Railway, from Halifax to Yarmouth, serves seven hundred miles of ocean shore; two score generous trout streams and the famous Rossignol lake system.

IN CAPE BRETON, sixty miles of the Gulf of St. Lawrence shore is skirted by the Inverness Railway, which gives easy access to the Margaree valley—far-famed for its salmon fishing.

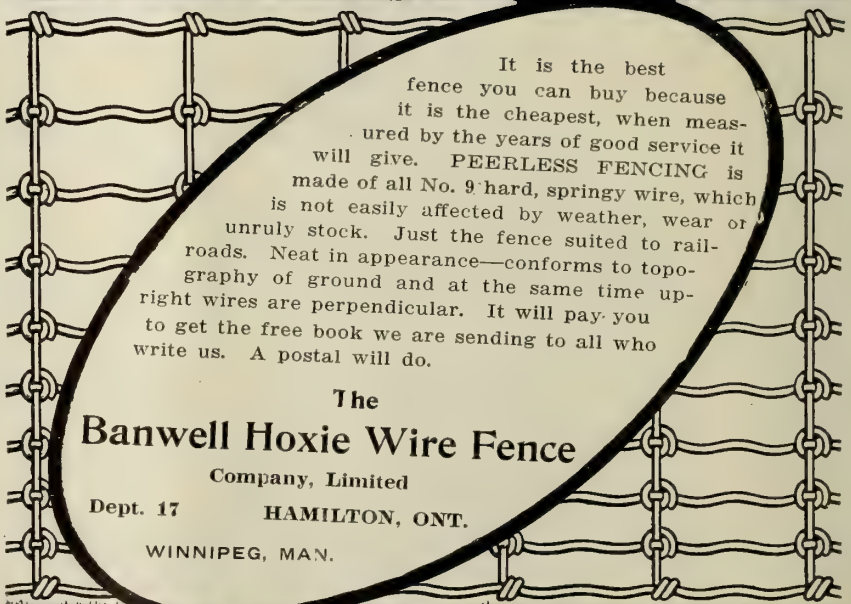
IN QUEBEC, the Canadian Northern. Quebec and Quebec, and Lake St. John Railways give easy access to the Saguenay, Upper St. Maurice, the Batiscan, the La Tuque game and fish preserve, and the valleys of the St. Lawrence and Ottawa. All good fishing waters, abounding with ouananiche, trout and bass.

IN ONTARIO, the entire range of the Muskokas, the Georgian Bay hinterland, the French, Pickerel, Still and Maganetawan rivers—well stocked with bass, mascalonge, and pickerel, are best reached by the Canadian Northern Ontario Railway.

IN WESTERN ONTARIO and the prairie provinces, the Canadian Northern Railway serves over three thousand miles of splendid territory. The Rainy River section follows the old Dawson fur trail, which is the finest canoe trip on the continent. There is an amplitude of sporting opportunities for the camera hunter, the fisherman and canoeist.

For literature and general or special information inquire of the information Bureau, Canadian Northern Railway System, Toronto.

PEERLESS
The Fence that saves Expense



It is the best fence you can buy because it is the cheapest, when measured by the years of good service it will give. PEERLESS FENCING is made of all No. 9 hard, springy wire, which is not easily affected by weather, wear or unruly stock. Just the fence suited to railroads. Neat in appearance—conforms to topography of ground and at the same time upright wires are perpendicular. It will pay you to get the free book we are sending to all who write us. A postal will do.

The
Banwell Hoxie Wire Fence
Company, Limited
Dept. 17 HAMILTON, ONT.
WINNIPEG, MAN.

STRONGER
Than Stock-Weather and Wear

40 miles, and will connect up Hamilton, Galt, and Berlin, Ont.

Hamilton, Waterloo and Guelph Ry.—A line 90 miles in length from Hamilton to Elmira, and from Hamilton to Elora and Fergus, Ont., was authorized to be constructed by a company with this title, which was incorporated by the Dominion Parliament in 1906. Up to date, nothing in the way of construction has been done. (Mar., pg. 215.)

Huron and Ontario Ry.—Originally incorporated by the Dominion Parliament in 1896, to construct a railway from Port Perry to Kincardine, Princeville to Kincardine, Walkerton to Goderich, and a connection between Lucknow and Kincardine, this company obtained various additional powers in 1903, 1906, 1907 and 1909, and proposes to develop its lines as electric rather than steam railways. The total mileage authorized is 250 miles, but no construction work has yet been started. (Jan., pg. 53.)

Manitoba Radial Ry.—This is the title of a company incorporated by the Dominion Parliament in 1907, having for its object the construction of a line of 160 miles from Winnipeg to Clandeboye, Lake Manitoba; to Grand Rapids on Lake Winnipeg with a branch from Winnipeg to Stonewall and Lake Francis, Man. No construction has been undertaken to date, but an extension of time for construction was granted at the recent session of Parliament. (April, pg. 281.)

Montreal and Southern Counties Ry.—This company was incorporated by the Dominion Parliament in 1897 to construct a railway from the northern limit of Chambly Co., to Sherbrooke, Que., 80 miles. It obtained additional powers as to construction, connection and amalgamation with other lines in 1898, 1902 and 1905, and has an arrangement with the G.T.R. for a line over the Queen Victoria Jubilee Bridge, and with the Montreal city council for the entrance of its lines into the city. The lines in Montreal and St. Lambert are now under construction. Contracts have been placed for steel rails, special track work, spikes, switch ties, tubular poles, brackets, trolley poles, etc. The companies obtaining contracts include Montreal Steel Works and Canadian Ramapo Iron Works. (June, pg. 449.)

Niagara Gorge Rd.—The damage done by the ice jam to this railway was sufficiently repaired to permit traffic to be opened on the outer track, May 23, and the inner track was opened up at a later date. The principal part of the cost, about $18,000, was for the removal of ice on the road, which varied from a few feet at the whirlpool, to 25 and 30 ft. at the lower end near Lewiston, N.Y. (May, pg. 367.)

Niagara, Queenston and St. Catharines Ry.—This company was incorporated by the Dominion Parliament in 1903, and authorized to construct 30 miles of electric railway from St. Catharines, via Queenston and Niagara-on-the-Lake, back into St. Catharines, Ont. An extension of the time for construction was granted in 1906, but up to date no work has been done. (May, 1906, pg. 275.)

Niagara, St. Catharines and Toronto Ry.—This company was incorporated by the Dominion Parliament in 1899 to acquire the St. Catharines and Niagara Central Ry., and extend the same to Fort Erie, also to Toronto via Hamilton, with a branch from St. Catharines to Port Dalhousie, Ont. The mileage authorized by the new act was 130 miles, and of this 30 miles has been constructed. Extensions of time were granted in 1905, 1906 and 1908. (June, pg. 449.)

We have been advised that nothing has been decided as to the construction of the projected extension to Port Colborne.

Nipissing Central Ry.—In 1907 the Dominion Parliament incorporated a company with this title to construct a railway from Latchford to Blanche River, Windigo, and to the National Transcontinental Ry. at Matagami River; also from Latchford along Montreal River through Barr and Willison tps. to the National Transcontinental Ry.; also from Latchford to Temagami station on the T. and N. O. Ry., with some branch lines. The length of the lines authorized is 500 miles. The company was granted an extension of time for construction in 1908, but up to the present time no work has been done.

Work is reported to have been started on the construction of the section of the line from Cobalt to Haileybury, and it is expected to have it completed and in operation by Sept. The route will be on the west side of the T. and N. O. Ry. at North Cobalt, which will be made the point from which the line will be operated. (May, pg. 367.)

Ontario West Shore Ry.—The question of the appointment of an independent engineer to check the progress certificates, came up at a meeting of the Ashfield tp. council, June 19. A statement credited to the council's solicitor, says that municipalities have no power under the Railway Act to make such an appointment. The certificates are made out by the company's engineer, who is liable to a severe penalty for any falsification. The same question has already been raised at the Goderich council, where it was referred to a special committee with instructions to consult the Ontario Railway and Municipal Board. Considerable progress has been made between Goderich and Kincardine, and it is said that the line will be running in "due time." The operations in connection with the Maitland River power development scheme, which is considered to be a necessary feature for the success of the railway, will probably be pressed forward at an early date, and it is anticipated that the question of an agreement between the two companies will be brought before the Ontario Legislature at its next session.

Ottawa and St. Lawrence Electric Ry. We were advised June 16, that there have been no surveys made to date for this projected railway, but it was expected to start them in the near future. The line as projected will have a total length, including three branches, of about 250 miles, the main line being 201.50 miles in length. It will start at Ottawa, run south to Morrisburg, thence westerly to Brockville, then north through Perth, Lanark, White Lake to Arnprior, then east through Fitzroy, Harborne, and Brittannia to Ottawa. The branches are from Kenmore to Russell, four miles, from Morrisburg easterly to the Interprovincial boundary, about 30 miles, and from Darling, Lanark county, to High Falls, about 15 miles. It is proposed to get the power from Ottawa, the Clints Falls, Fitzroy, the Madawaska River near White Lake, and Morrisburg, with probably a steam plant in the vicinity of Brockville. The total cost would approximate $3,000,000. It is said that construction may be started this season. The distances between the principal points on the projected main line are: Ottawa to Morrisburg, 44 miles; Morrisburg to Brockville, 33.5 miles; Brockville to Perth, 42 miles; Perth to Arnprior, 46 miles; Arnprior to Ottawa, 36 miles; total 201.50 miles. A. H. N. Bruce, Ottawa, is Chief Engineer. (June, pg. 449.)

Ottawa Electric Ry.—Work was started June 1 upon the construction of the loop line at the end of Elgin St. The work was expected to be completed within 15 days. (Apr., pg. 283.)

Pictou County Electric Co.—The franchise, plant and line of the Egerton Tramway Co., at Stellarton and New Glasgow, N.S., has been acquired by the P. C. E. Co., which has also acquired the New Glasgow Electric Light Co. The company operated 8.10 miles of electric lines. The company proposes to add to its power equipment, and is reported to have placed orders for additional power plant.

Quebec and Saguenay Ry.—In connection with the report that interests allied with this company had secured a controlling interest in the Quebec Ry., Light and Power Co., and that the rearranged company will undertake the construction of the projected Q. and S. Ry. from St. Joachim to Murray Bay, we are advised that no proposition for such an extension has been brought before the Q. Ry., L. and P. Co. (June, pg. 449.)

Quebec Ry., Light and Power Co.—See Quebec and Saguenay Ry.

Thorold and Lake Erie Ry.—The Dominion Parliament in 1904 incorporated a company with this title to construct an electric railway from Thorold to Port Colborne, thence easterly to Fort Erie, and westerly to Brantford, Ont., about 80 miles. An extension of time was granted in 1906, but up to date no construction has been done.

Three Rivers, St. Maurice and Champlain Ry.—In 1905 the Dominion Parliament incorporated a company with this title, to construct an electric railway from Three Rivers westerly through Pointe au Lac, Temachiche, and other places to Maskinonge parish, and from Three Rivers easterly to St. Anne de la Parade parish, Que., about 60 miles. The company has not undertaken any construction.

Toronto, Niagara and Western Ry.—The Dominion Parliament in 1903 incorporated a company with the title of the Toronto and Hamilton Ry., with power to construct an electric railway from Toronto to Hamilton, 40 miles. In 1904, 1906 and this year extensions of time for construction were granted and in 1906 the name of the company was changed to the Toronto, Niagara and Western Ry. (May, pg. 369.)

Vancouver Island Power Co.—Notice has been given of an application for a license under the Water Act, in the Malahat and Renfrew districts. The proposed works comprise a plant for the generation of electricity, and the construction of a dam across a stream flowing into a small lake about 1,000 ft. east of the Jordan Meadows in the Malahat district. The company, with office at Victoria, has a capital of $75,000, and has power to generate electricity for a

number of purposes, including the propelling of tramways, etc.

Windsor, Chatham and London Ry.—A company bearing this title was incorporated by the Dominion Parliament in 1906, with power to construct an electric railway of 120 miles from Windsor to Chatham and London, Ont. It obtained an extension of time for construction in 1908, but up to the present time it has not done any work. (Apr., 1908, pg. 283.)

Electric Ry., Finance, Meetings, Etc.

Berlin and Waterloo St. Ry.—The Berlin Light Commission and the Waterloo Town Council have held several meetings, with a view of deciding the amount which Berlin will pay to Waterloo for the right to operate its street railway in Waterloo, Ont. Waterloo ask 5% of the gross receipts, but the Berlin authorities refuse this, and decline to make any offer. The Waterloo Council proposes to appeal to the Ontario Railway and Municipal Board.

B.C. Electric Ry—Gross operating earnings for Apr., $188,071; working expenses, $109,267; net operating earnings, $78,804; renewal funds, $13,958; net earnings, $64,846; approximate income from investments, $13,550; net income, $78,396, against $153,725 gross operating earnings; $95,352 working expenses; $58,373 net operating earnings; $10,750 renewal funds; $47,623 net earnings; $11,036 approximate income from investments; $58,659 net income for Apr., 1908. Aggregate gross earnings for 10 months ended Apr. 30, $1,900,352; net earnings, $861,531, against $1,643,985 gross, and $785,789 net for same period, 1907-08.

Egerton Tramway Co.—See Pictou County Electric Co.

International Railway Co.—The accounts of the Commissioners for the Queen Victoria Niagara Falls Park for the year, 1908, show a receipt of $10,000 as rental from the I. Ry. Co.

Kingston, Portsmouth and Cataraqui Ry.—A letter has been sent by H. W. Richardson, President, to the Kingston, Ont., Council, offering to sell the line to the city, for a sum equal to that invested in 1905, plus 6% interest. The operating of the line has not paid the company. The company purchases its power from the city at 1.66c. a kilowatt hour. The matter is being considered by the finance committee. The question of purchasing the line has been discussed upon more than one occasion. During the spring of 1905, when the line was in the hands of the bondholders, they offered to sell to the city for $125,000, but this was declined, a suggestion being made that $50,000 be offered, but this was not done.

London St. Ry.—Gross earnings for May, $19,172.85; operating expenses, $14,191.27; net earnings, $4,981.58, against $18,891.22 gross earnings, $14,385.32 operating expenses, $4,505.90 net earnings for May, 1908. Aggregate gross earnin s for 5 months ended May 31, $89,809.25; operating expenses, $67,246.16; net earnings, $22,563.09, against $86,356.90 gross earnings, $66,928.59 operating expenses, $19,428.59 net earnings for same period, 1908.

The directors declared an interim dividend of 3%, June 17, payable July 2.

Montreal St. Ry.—Total earnings for May, $329,339.28; operating expenses,

$184,147.58; net earnings, $145,191.70; city percentage on earnings, $28,005.30; interest on bonds and loans, $14,386.85; rent leased lines, $498.67; surplus, $102,-300.88, against $313,678.91 total earnings; $169,723.59 operating expenses; $143,-955.32 net earnings; $26,595.72 city percentage on earnings; $19,422.34 interest on bonds and loans; $444.43 rent leased lines; $97,492.83 surplus for May, 1908. Aggregate total earnings for 8 months ended May 31, $2,437,055.68; net earnings, $912,972.76; total charges, $261,-756.86; surplus, $651,215.90; against $2,-341,551.62 aggregate total earnings; $855,928.09 net earnings; $270,571.05 total charges; $585,357.04 surplus for same period, 1907-08.

Pictou County Electric Co.—This is the title of a company which has taken over the Egerton Tramway Co. of New Glasgow, N.S., and the New Glasgow Electric Light Co. The N.G.E.L. Co. carried on the business of supplying electric light and power in New Glasgow, Stellarton, and the vicinity, and supplied power to the E.T. Co.

Quebec Ry. Light and Power Co.—The annual meeting was held at Quebec, June 23. The following directors were elected for the current year to replace the previous board, which resigned: W. G. Ross, Managing Director Montreal St. Ry., President; Hon. R. Mackay, J. N. Greenshields, N. Belleau. This constitutes an entirely new control of the company, rumors of which have been current for some time. (June, pg. 451.)

Toronto Ry.—Gross earnings for Apr., $298,258; operating expenses, maintenance, etc., $153,594; net earnings, $144,-664, against $273,329 gross earnings; $161,826 expenses; $111,503 net earnings for Apr., 1908. Aggregate gross earnings for 4 months ended Apr. 30, $1,160,026; net earnings, $541,602, against $1,077,097 gross and $440,854 net for same period 1908.

Approximate earnings for May, $323,-322.95, against $295,809.05 for May, 1908.

Winnipeg Electric Ry.—Gross earnings for Apr., $192,400; expenses, $96,900; net earnings, $95,500, against $172,700 gross earnings; $93,500 expenses; $79,200 net earnings for Apr., 1908. Aggregate gross earnings for 4 months ended Apr. 30, $827,500; net earnings, $410,000, against $680,700 gross and $347,600 net for same period 1908.

Electric Railway Notes.

The Winnipeg Electric Ry. is building 30 or more electric cars this year at its Fort Rouge car shops. They will be 45 ft. long and 7 ft. platforms, and seating accommodation for 50 passengers.

The time within which the Chatham, Wallaceburg and Lake Erie Ry., was ordered by the Board of Railway Commissioners to equip all its cars with air brakes, was extended recently to July 4.

The Mexico Electric Tramways, Ltd., incorporated under the Imperial Parliament of Great Britain and Ireland, has been licensed under the act respecting extra provincial corporations to carry on its executive and administrative Toronto, as its attorney.

Electric railway enterprise in Canada is beyond anything we have imagined, if the mention of the Toronto and New York Radial Ry., by the Manitoba Free Press, in reporting the Canadian Street Railway Association's meetings in Winnipeg recently, can be taken as evidence.

The municipal census of London, Ont., for the current year shows that the population is still under 50,000, consequently there cannot be a vote, under the act passed by the Ontario Legislature last session, upon the question of the operation of the street cars on Sundays.

The question of the operation of the street railway in Kingston, Ont., is likely to remain unsettled, the directorate being divided on the subject. H. W. Richardson, the President, is opposed, whilst W. F. Nickle, the Secretary-Treasurer, is favorable to the running of cars on Sunday, which it is claimed the company's charter permits.

The board of conciliation at Winnipeg has filed a decision giving the Winnipeg Electric Ry. Co.'s men a nine-hour day with an increase of pay, and some minor changes in the condition of working. The arbitrators direct that there shall be no discrimination by either parties to the agreement against any man for being or not being a member of the union.

At a meeting of the St. Thomas, Ont., Board of Works, June 15, permission was granted the Southwestern Traction Co., to lower the subway at First Avenue one foot, to allow freight cars to pass over the M.C.R. Complaint was made that the company is violating its agreement by hauling freight cars through the city at other times than permitted by the agreement, and that the speed of its passenger cars is too high.

The Ontario Court of Appeal has dismissed the defendants' appeal in the case of Bradenburg v. Ottawa Electric Ry. Co. Plaintiff E. Bradenburg, mining engineer, was riding in a car of defendants last year in Ottawa when he sustained serious injuries. He was at the time under an agreement for his services with five years to run at a yearly salary of $6,000. He was awarded $30,000 damages. The award stands.

The cost of cleaning the snow off Montreal streets upon which the street railway operates, last winter was $219,-308, for which the Montreal St. Ry. Co. is alleged to be liable, under the by-law for $109,654. The company has paid $60,000. For the winter of 1907-08, the company withheld $20,000, on the ground that the cost was excessive, and the question is before the courts. The company before the commencement of the winter of 1908-09 offered to take over the whole work on the understanding that the cost would not exceed $3,000 a mile.

The claim of the St. Catharines, Ont., council against the Niagara, St. Catharines and Toronto Ry., for $4,451.95, the cost of construction of a portion of the asphalt block paving between the rails on Ontario St., St. Catharines, was dismissed in the Divisional Court, Toronto, June 3. It was held that the agreement with the company provided only for macadamizing the space between the rails, and as the portion of the street in question was, and continued to be macadamized, and as the space between the rails has been laid by the company and under the direction of, and as required by the Board of Works, there was no liability as to the asphalting.

James Anderson, Manager and a director of the Sandwich, Windsor and Amherstburg Ry., who has been elected Vice President of the Canadian St. Ry. Association, was born on a farm near Ayr, Ont., June 20, 1851. At the age of 19, he entered the old Great Western Ry. Co.'s service, and after serving a few years, was appointed a conductor, which position he held until Nov., 1883, when he resigned and went into the grocery business as a member of the firm of Robinson & Anderson, which partnership was continued for 10 years. In June, 1893, he sold his interest to his partner, and associated with Jno. Davis, W. J. Tucker, Dr. Coventry, W. J. Pulling, of Windsor, and the late Robt. Thomson and Wm. Hendrie, of Hamilton, purchased the Sandwich, Windsor and Amherstburg Ry., which was operated under that ownership for eight years. When it passed into the hands of the present owners, the Detroit United Ry. Co., in 1901, the D.U.R. Co. appointed Mr. Anderson General Manager, and the road has since extended to Amherstburg and Tecumseh, and now operates 35 miles of line. Mr. Anderson married in 1879 Anna M. Smith, daughter of the late Sidney Smith, of Acton, Ont., and has two sons and one daughter. He is a Scotch Liberal and a Presbyterian.

Duncan A. L. McDonald, Manager Montreal St. Railway Co., and Montreal Park and Island Ry. Co., who has been elected President of the Canadian St. Ry. Association, was born at St. Thomas, Montmagny, Que., June, 1859, and removed to Montreal in 1875. He entered the Montreal St. Ry.'s service in 1881 as a driver in order to acquire a thorough knowledge of street railway work from its very commencement. He was soon changed to conductor, and after about twelve months service in that capacity was appointed roadmaster. In 1886 he severed his connection with the company and engaged in other business. Anticipating the progress that the trolley system would make, he went to St. Paul and Minneapolis, Minn., in 1889, and secured a practical knowledge of the operation of electric tramways. He returned to Montreal in 1892, and re-entered the Montreal St. Ry.'s service as inspector, and in 1894 was appointed Superintendent of Transportation, which position he held until 1898, when he resigned to become General Manager of the East Parisian Tramway Co. with headquarters at Paris, France, in which position he organized the Parisian system to a high state of efficiency. In 1903 he returned to Montreal, having been offered the position which he now holds. He is a director of the Montreal Park & Island Ry. Co., President of the Pay-as-you-enter Car Company, director and late President of the Automobile Club of Canada, and a member of the Civil Engineers' Society of France, and is also interested in the direction of several other corporations.

Grain Elevator Notes

The Brackman-Kerr Milling Co., has erected a 50,000 bush. elevator at Hobbema, Alta.

The Canada Grain Co., is said to be arranging to erect an elevator at Auburn, Ont., during this year.

The British American Grain Elevator Co., is reported to be erecting 9 elevators on the C.N.R., between Brandon, Man., and Regina, Sask.

The Consolidated Elevator Co., is reported to have placed a contract for the erection of an elevator plant at Fort William, Ont., with a capacity of 1,700,000 bushels.

The Alberta Pacific Elevator Co., is arranging for the construction of an elevator at Daysland and Strome, Alta., this year. Applications for elevator sites at Daysland, Alta., have been received from the Alberta Grain Co., Strathcona, Alta.; J. Richardson & Son, Kingston, Ont., and the Great West Grain Co.

The Department of Trade and Commerce has taken up the question of grain shortages, and is reported to have an inspector looking into the methods of elevator management on both sides of the lakes, with a view to the adoption of some regulations for the removal of the complaints.

The Consolidated Elevator Co., has let a contract to J. Stewart & Co., for the construction of a 1,000,000 bushel addition of reinforced concrete to its present elevator capacity at Fort William, Ont. The cost is estimated at $250,000, and the addition will be ready for operation early in 1910.

The work on the Ogilvie Milling Co.'s elevator at Fort William, Ont., it is stated, will be commenced at once, the contract having been let to the Barnett and McQueen Co., Fort William. A press report states that when the elevators at present building and contemplated are completed, the elevator capacity at Fort William will be 20,000,000 bush., and of Fort William and Port Arthur, combined, 30,000,000 bush. Elevators are in course of erection for the Empire, Western, and G.T. Pacific companies; contracts have been let for the erection of the new Consolidated and the Ogilvie elevators, and the Muirhead and Black contract will be let immediately.

Grain Elevator Capacity.

A circular issued by the railway companies operating in Manitoba, Saskatchewan and Alberta, gives the elevator capacity of the West as follows:

	Bushels.
C. P. R. terminals	14,752,405
C. P. R. interior	29,041,490
C. N. R. terminals	7,000,000
C. N. R. interior	10,875,500
G. T. P. R. interior	1,374,000
Midland Ry. interior	235,000
Hudson Bay interior	435,000
Alberta Ry. & I. Co.	294,000
Total	64,007,395

The number of elevators in the provinces are situated on the various lines as follows: C.P.R., 975; C.N.R., 396; G.T.P.R., 46; Midland Ry., 8; Hudson Bay Ry., 15; Alberta Ry. and Irrigation Co., 15.

MARINE DEPARTMENT.

Lake Navigation History.

The Nautical Gazette is publishing "A history of the first century of steam navigation" in instalments. No. 46 deals with Lakes Ontario and Erie, as follows:

"Up to 1816 three steamboats, the Accommodation (1809), the Swiftsure (1813), and the Malsham (1814), all Canadian boats, had been built for service on the St. Lawrence, the latter having accommodations, it is said, for 1,000 passengers. The engines of these vessels were constructed by Bolton & Watt, at their Soho works, Birmingham, England, the builders of the engine of the North River steamboat of Clermont in 1806. In 1816 the Frontenac, the first Canadian steamboat to navigate Lake Erie, was built at Finkel's Point, 18 miles above Kingston, Ont., being launched on Sept. 7 of that year. She was built by Teabout & Chapman, of Sackett's Harbor, N.Y., and was owned by a company made up of citizens of Kingston, Niagara, Queenston, York and Prescott, all Canadians. She was 170 ft. long over all, and of 700 tons. Her engine was built by Bolton & Watt, and her entire cost was $100,000. The Frontenac was placed on the Prescott and York (Toronto) route, on June 5, 1817, and made a round trip each week. Her commander, Capt. James Mackenzie, remained in charge until she was totally destroyed by fire at Niagara, in 1827.

"To an American steamboat named Ontario, however, belongs the honor of having been the first to navigate Lake Ontario—or any of the Great Lakes for that matter—this vessel having been built at Sackett's Harbor, N.Y., in 1816. In the Albany Advertiser of Aug. 16, 1816, we find the following item regarding this vessel:

"'Steam Boat on Lake Ontario.—We are requested to state for the information of the public that the Sackett's Harbour steamboat is expected to be in operation in all the month of September next, to ply between Lewiston and Ogdensburg. She will carry freight and passengers.'"

"The Ontario was built by C. Case, Sackett's Harbor, N.Y., in 1816, her official measurements, filed in the collector's office at the port in which she was constructed, being 232 tons, 112 ft. in length from stem to stern, 28 ft. breadth, and 8 ft. 3 ins. depth 'from spar deck to keel.' Her first trip was made in April, 1817, or two months in advance of that of the Frontenac, and over a year before the famous Lake Erie steamboat Walk-in-the-Water started on her first voyage. The Ontario was constructed under a grant obtained from the heirs of Robert Fulton, and her engine, of 28 horse-power, was built by S. Sexton, on the plan of those used in the Fulton steamboats. When the Ontario started out on her first trip she encountered heavy weather on Lake Ontario, and the waves lifted her paddle-wheels bodily, tearing the main shaft from its bearings, smashing the paddle-boxes and wrecking things generally. She was with difficulty got back to port, where repairs were made and the matter of securing the outboard bearings in a more rigid manner effected, after which she proved a conspicuous success, plying on Lake Ontario for many years. Her owners were E. Camp & Co.

"The Ontario's success as a passenger packet was immediate and it is said she made handsome returns to her owners on their investment. An item from the New York Evening Post in the summer of 1817, soon after she went into service, will show how well the craft was patronized:

"'Oswego, Aug. 7.—The Steam Boat Ontario, Capt. Mallaby, touched here this morning from Niagara on her way to S. Harbour, Ogdensburg, etc. She was so much crowded with passengers that the captain was under the necessity of leaving a number of applicants at Niagara, for want of more extensive accommodations. Among those left was the Russian Minister and suite. It could scarcely have been anticipated by the most sanguine friends of the steam boat establishment on this lake, that this route would so soon have become so fashionable.'

"C. Case, the builder of the Ontario, afterward constructed other steamboats at Sackett's Harbor, among which were the Brownville, and the Charles Carroll, in 1831, and the Wm. Avery in 1833.

In 1817 another American steamboat was built for use on Lake Ontario. She was named Sophia, and was placed on the route between Sackett's Harbor and Kingston, Ont. She was much smaller than the Ontario, being only 67 ft. 8 ins. long, 18 ft. 2 ins. beam, and 4 ft. 7 ins. deep, and of 50 tons, official figures. A. S. Robberts was her builder and J. P. Allaire, the New York engine-builder, was the constructor of her machinery.

"In the year following the Sophia's advent the Canadians set afloat their second Lake Ontario steamboat, the Queen Charlotte, which was launched on April 22, 1818. She was constructed in the same yard as that in which the Frontenac was built, and largely from material left over from the building of the latter vessel. Ward Bros., Montreal, furnished the machinery, and she is described as being a very substantially-built craft, though of limited dimensions. For twenty years she plied from Prescott, on the St. Lawrence, to the Carrying Place at the head of the Bay of Quinte. The hull was finally broken up in Cataraqui Bay."

If any of our readers have any facts in their possession in regard to the above-mentioned matters, or if any of the statements made are not in accordance with facts, we would be pleased to receive correspondence on the subject.

Notices to Mariners

The Department of Marine has issued the following:—

No. 38. May 21. 95.—Quebec, Gulf of St. Lawrence, Magdalen Islands, Grindstone Island, hand fog horn at Etang du Nord light station. 96.—Quebec, River St. Lawrence, mouth of Saguenay River, Prince shoal, position of gas and bell buoy. 97.—Quebec, River St. Lawrence, above St. Thomas de Montmagny, gas buoys placed temporarily for dredging purposes. 98.—Quebec, River St. Lawrence, Orleans Island, west end, Maranda rocks, change in character of buoy.

No. 39. May 21. 100.—British Columbia, Vancouver Island, east coast, Stuart channel, Boat harbor, uncharted rock. 101.—British Columbia, Juan de Fuca Strait approach, Swiftsure Bank, gas, whistling and bell buoy withdrawn.

No. 40. May 22. 102.—Ontario, Lake Ontario, entrance to Presqu'Ile Bay, Salt Point light re-established. 103.—Ontario, Lake Huron, Goderich, shoal south of outer breakwater marked by buoy, caution.

No. 41. May 27. 104.—Quebec, River St. Lawrence, Port-neuf-en-bas, change in position of range lights. 105.—Quebec, River St. Lawrence, below Quebec, Orleans channel, off Pointe au Pavillon, buoy established. 106.—Quebec, Richelieu River, Chambly wharf light discontinued.

No. 42. May 28. 107.—Ontario, Lake Ontario, Kingston harbor approach, Myles shoal, gas buoy placed temporarily for experimental purposes. 108.—Ontario, Lake Ontario, Kingston approach, Penitentiary shoal, gas buoy established. 109.—Ontario, Lake Erie, Port Stanley, light on west pier moved inwards.

No. 43. June 4. 110.—Nova Scotia, Cape Breton, names of certain geographical features fixed. 111.—New Brunswick, Chaleur Bay, Caraquet Island, lighthouse and light improved. 112.—Ireland, south-west coast, Mizen Head, fog signal established. 113.—Scotland, west coast, Stourhead lighthouse, alteration of light.

No. 44. June 7. 114.—Ontario, Detroit River, Windsor, shoal. 115.—Ontario, St. Joseph Channel, Shoal Island lighthouse burned down, temporary light.

No. 45. June 7. 116.—Nova Scotia, south coast, Beaver Island, fog alarm established.

No. 46. June 8. 117.—Quebec, River St. Lawrence, Bicquette Island, temporary light. 118.—Quebec, Richelieu River, St. Jean, open lantern replaced by lighthouse tower.

No. 47. June 9. 119.—Quebec, River St. Lawrence, St. Roch Shoals, change in

FENCE TALK NO. 6

The Page "High Carbon" "Empire" Fence is a fence that outclasses them all, at every point of fence-value. It's the strongest wire-fence made, and it will outlast two—yes, three—ordinary wire-fences.

It is not an expensive fence, although every upright and every horizontal wire is made of 9-gauge steel. Not expensive even though its horizontals are High-Carbon Galvanized Steel wire guaranteed to stand 2,400 lbs. tensile strain without breaking as compared with "hard drawn" wire, that breaks at 1,800 lbs. and less.

Decidedly not expensive, because the toughness of the wire, the springiness and the solid-joint lock-knot, insure that this fence will stretch tighter, stand up better, and never sag, even though but two posts are used as against three on any other fence.

With all its betterments, that no other fence even approaches, a Page "Empire" Fence costs less, in the first place and in the long run once it's up, than any fence made.

Shall we prove that to you? Ask nearest Page place for free booklet that tells about the many kinds of Page Fence (including "Empire") and shows how you can prove any fence before purchasing.

The Page Wire Fence Co., Ltd., Walkerville, Toronto, Montreal, St. John, Vancouver, Victoria.

"Page Fences Wear Best"

Duplicators

With the typewriter in universal use, every business man and every professional man as well, has use for a duplicating machine of some kind, for making easily and quickly a number of facsimile copies of a typewritten original.

We sell several devices for the purpose: The Hectograph at $3.50; the Box Neostyle, $15; the Rotary Neostyle, $35; and the modern Flexotype, which produces 10,000 perfect typewritten letters an hour.

UNITED TYPEWRITER COMPANY

Adelaide Street E., Toronto

THE CLIFTON HOTEL

NIAGARA FALLS, CANADA.

Rates $4 per day up, American Plan. For weekly rates and further information, address: GEORGE R. MAJOR, Manager.

OPEN THE YEAR ROUND

The only Hotel that Commands an Unrivalled View of Both Falls.

HOW TO REACH THE CLIFTON HOTEL.

Arriving on Grand Trunk Railway or Wabash Rd., at Niagara Falls, Ont. Hotel bus meets all trains or take trolley to hotel—7 minutes. Arriving on Michigan Central Rd., Canadian Pacific Railway, at Victoria Park station—Hotel bus meets all trains, only three minutes' walk from station to hotel.

International Railway (trolleys), connecting with Niagara Navigation Co. steamers at Queenston, to or from Toronto, pass the door.

IMPORTANT

Guests coming to the Hotel should see to it that they are taken to The Clifton Hotel, CANADIAN SIDE, and also that their mail is addressed "Care of The Clifton Hotel, Niagara Falls, CANADA." To insure prompt delivery, don't forget to make Canada plain in the address.

The U.S. Hydrographic Office has issued the following:—

No. 22. May 29. 1072.—Lake Huron, Martin reef, light vessel established, gas buoy withdrawn.

No. 23. June 5. 1140.—St. Marys River, Sailors' Encampment, blasting in channel, caution.

Atlantic and Pacific Ocean Marine.

C. Holdsworth, General Manager, Union Steamship Co. of New Zealand, was in Montreal, June 14, on his way from New Zealand to England for a holiday trip.

The White Star-Dominion Line s.s. Megantic ran her trial trip at Belfast, Ireland, June 4, after which she proceeded to Liverpool, Eng., and sailed for Montreal, June 17. She is a sister ship to the s.s. Laurentic, and is similar in all respects but in machinery, which is composed of reciprocating engines only as against the combination of reciprocating and turbine engines of the s.s. Laurentic.

Speaking in the Senate recently, the Minister of Trade and Commerce said, while referring to amendments to the Ocean Steamships Subsidies Act, "I may remark that the Union Steamship Co. have been requesting an increase in their subsidy, which I am afraid, in the present state of finances, looking at the volume of trade, we can hardly give." The company receives a subsidy of about $230,000 a year for service between Canada and New Zealand and Australia.

The Plant Line s.s. Halifax, which was running between Havana and Florida during the winter, has been overhauled at Halifax, N.S., and is to be run during the summer between Charlottetown, Port Hawkesbury, Halifax and Boston.

The Quebec Steamship Co.'s s.s. Campana, inward bound, grounded near St. Valier, about 20 miles below Quebec, June 17. The passengers were landed safely and subsequently the vessel was raised, and after examination abandoned to the underwriters.

Press reports from Montreal are again busy with the statement that the White Star-Dominion Line is planning to invade the Pacific ocean as the result of an agreement with the G.T.P.R., with Prince Rupert, B.C., as its headquarters. The rumor is chiefly based on the statement made by C. M. Hays, President G.T.P.R., some time ago to the effect that should the company enter the ocean steamship business it would probably be by arrangement with some ocean steamship company, and not on its own account.

A proposal was made at the recent session of the Dominion Parliament to subsidize a steamship line between Eastern Canada and New Zealand and Australia and possibly South Africa. It was stated that a company had offered to establish such a line, to sail eight times each year with vessels having a deadweight capacity of 6,000 tons, in return for a subsidy of $250,000 a year for three years. The matter is to be brought up at the next session, and in the meantime some enquiries will be undertaken regarding the possibility of such a line becoming a paying business.

The Minister of Marine recently announced that the deepening of the St. Lawrence ship channel to 30 ft. will be practically completed this year, and in order to cope with the growing requirements of deep draught vessels using that route it was necessary to further deepen the channel. The work of deepening to 35 ft. will in all probability be taken in hand next year, so that the largest of ocean going vessels can utilize the channel with complete safety. A dredge for operation in the channel for this purpose is at present under construction at the Government dockyards, Sorel, Que.

A press despatch, which evidently emanated from Montreal, and which has been reproduced in most of the newspapers throughout the Dominion and in various U.S. periodicals, in the latter part of May and early in June, states that A. Piers, Manager C.P.R. Steamships, who recently sailed for England, "is understood to carry with him instructions from the C.P.R. executive to place with one of the big British shipbuilding firms orders for the immediate construction of two new Empress liners for the Atlantic service." We have at various times given denials on official authority to similar statements. We were advised, May 27, by letter over the signature of Sir Thos. G. Shaughnessy, President, that "there is no foundation for these periodical reports about orders having been placed for the construction of some new steamers for our Atlantic line."

Maritime Provinces and Newfoundland.

Capt. J. G. Rayne, a well-known West Indies captain, died at Barrington, N.S., June 2.

H. Cann and Sons, Yarmouth, N.S., have sold their steam tug Marina to F. R. Eaton for use on the Gaspe route.

Capt. G. W. J. Bissett, commander of the Dominion Government s.s. Lansdowne, died at St. John, N.B., June 4, aged 64.

The name of the schooner Annie, no. 80,886, registered at St. Andrews, N.B., has been changed by order in council to Fred Greene.

J. F. L. Parsons, Agent of the Department of Marine at Halifax, N.S., died there, June 14, aged 68. He occupied the position for 15 years.

Capt. C. Barkhouse, Liverpool, N.S., has been appointed a Fishery Officer in the Fisheries Protection Service with the rank of Master Mariner.

The name of the schooner Maggie Roach, no. 74368, registered at Richibucto, N.B., has been changed by order in council to Maude Weston.

Sandy Point, N.S., a customs preventive station, has been established a customs out-port and warehousing port, under the survey of Shelburne, N.S.

The Reid Newfoundland Co., recently purchased the s.s. Dromedary in Glasgow, Scotland, to replace the wrecked s.s. Virginia Lake in the Labrador mail service.

The Dominion Department of Marine is reported to have purchased the schooner W. J. Foley from H. Le Blanc, Tusket Wedge, N.S., for use on the lakes as a lightship.

Capt. F. Wollard, of Yarmouth, N.S., who was sentenced to 16 years in the penitentiary at St. John's, Nfld., in 1903, for shooting one of his crew, has been released and pardoned.

The British Admiralty surveying ship, Ellinor, has resumed her summer work, surveying along the Newfoundland coast.

The Quebec Steam Whaling Co., Ltd., received tenders recently for the purchase of its whaling plant, which included the steamer Falken.

N. A. Currie, formerly chief engineer Dominion Atlantic Ry. s.s. Boston, and at one time second engineer Dominion Government s.s. Stanley, has been appointed inspector of marine boilers and machinery for Nova Scotia, succeeding J. P. Esdaile, deceased.

The Government ice-breaking steamship Earl Grey, which is to be operated across the Northumberland Straits, was launched at Barrow-in-Furness, Eng., June 18. The ceremony was performed by the Countess of Antrim, on behalf of the Dominion Government.

Capt. C. N. Mylius, who was for 41 years a commander of Allan Line and other steamships and subsequently, to the date of his retirement about 15 years ago, was master of the mail steamer Newfoundland, running between Halifax and St. John's, died at Halifax, June 12.

The contract for the dredging to be done on the western side of St. John harbor, near Beacon Bar, recently awarded by the Public Works Department, was signed May 10, and the work immediately commenced. The dredge Iroquois, with a capacity of 250 cubic yards an hour, up to a depth of 27 ft., is at present working there, and arrangements have been made to place an additional dredging plant on the contract, so that the work may be pushed through as speedily as possible.

The Home Steamship Co.'s s.s. Morien, which was launched at Sunderland, Eng., May 20, is on her way to Halifax, N.S., with a cargo of pipe for that city, in charge of Capt. C. M. Burchell. Her dimensions are:—Length, 215 ft.; beam, 31ft. She is equipped with electric light and

has three hatches, respectively, 21 ft., 25 ft., and 44 ft. She has been specially designed and built for the coal trade, and is considered one of the finest collier coasters. After discharging her cargo, she will proceed to go on charter with the North Atlantic Collieries.

The Sincennes McNaughton Line's steam tug, Sin-Mac., which has been built for that company at Dumbarton, Scotland, underwent trials of her machinery there, June 3, when she ran at about 13 knots an hour. The dimensions are: length, 138 ft.; breadth, 26 ft.; depth, 14 ft. Her equipment includes the most up-to-date arrangements for the speedy handling of vessels, and in addition to all the necessary tugboat fittings, she has a large salvage pump and a fire pump. The vessel is fitted with electric light, and water ballast is arranged for in the cellular double bottom under the engine, and in the fore and aft peaks.

The collier Fornebo has just performed a smart bit of work. She arrived at Quebec recently, in the afternoon, from Sydney, N.S., with a cargo of 7,000 tons of coal, and proceeded to Montreal, where she arrived at 4 p.m. the following day, discharged her cargo there and passed Quebec outbound at 4.30 p.m. on the third day. Thus she made the run from Quebec to Montreal, discharged 7,000 tons of coal there, and returned to Quebec in a little over 40 hours, which is certainly fast work. The Norwegian steamer Wacousta has also done some fast work. She left Quebec, May 25, at 11 p.m., proceeded to Sydney, N.S., where she loaded 5,700 tons of coal and reached Quebec at 2.30 a.m. May 31, notwithstanding the fact that she was detained 29 hrs. by fog.—Shipping Illustrated.

An order in council has been issued granting permission for the changing of the name of the steamboat Phantom to Mabel Reid, under which name the vessel has been registered at St. Andrews, N.B.

The Home Steam Ship Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $95,000 and office at Sydney, N.S., to own and operate steam and other vessels, and to carry on the business of common carriers within and without the Dominion. The provisional directors are: J. T. Burchell, J. A. Young, F. A. de Young, H. C. Harrington and H. Ross, Sydney, N.S.

In our June issue we gave a report to the effect that the Bras d'Or Steamship Co., was building a steamboat at Shelburne, N.S., which it hoped to launch about June 1. This vessel which is being built to take the place of one controlled and operated by the Bras d'Or Steamship Co., is, however, owned by the North Shore Steamship Co. The dimensions of the new vessel, which is named Aspy, are:—Length, 124 ft.; breadth, 25ft.; depth, 9 ft. The machinery consists of a compound engine, 15" by 32", supplied with steam from a Scotch boiler, 10 ft. by 11' 6", and she is equipped with electric light. When completed she will be operated in the passenger and freight trade of the north shore of Cape Breton, calling at St. Ann's, Ingonish, Aspy Bay, and Bay St. Lawrence.

Following are the vessels, with their captains and chief engineers, of the Black Diamond Steamship Co., operated by the Dominion Coal Co., Glace Bay, N.S., for the current season. Of those named, the Bonavista, Cabot, Cacouna, Cape Breton, Coban and Louisburg, are owned by the company; the remainder

C.P.R. LANDS

The Canadian Pacific Railway Company have 9,000,000 acres of selected lands for sale in Manitoba, Saskatchewan and Alberta.

Maps, as enumerated below, showing these lands in detail, will be sent free on application.

Map No. 1—Winnipeg to Second Meridian	$ 8.00 to $15.00 per acre.
Map No. 2 - South-Eastern Saskatchewan, 2nd to 3rd Meridians	10.00 to 25.00 per acre.
Map No. 3—Main Line, 3rd Meridian to Range 10, W. 4th Meridian (generally)	8.00 to per acre.
Map No. 5 South-Western Alberta	8.00 to 15.00 per acre.
Map No. 6—Part of Alberta, Edmonton, Battle and Saskatchewan Rivers Districts—4th Meridian to Range 7, West 5th Meridian	10.00 to 25.00 per acre.
Map No. 7 - Part of Western Saskatchewan, 3rd to 4th Meridians	10.00 to 25.00 per acre

All prices are subject to change without notice.

TERMS OF PAYMENT

An actual settler may purchase not more than 640 acres on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal, with interest, in nine equal instalments annually thereafter, as shown in the following table:

160	Acres at	$ 8.00	per acre,	cash payment	$191.70	first year's interest	$ 65.28	and nine instalments of	$160.00
"	"	9.00	"	"	213.70	"	"	"	73.46	"	"	180.00
"	"	10.00	"	"	239.70	"	"	"	81 62	"	"	200.00

Province of Quebec Marine

The Department of Marine received tenders June 29, for about 625 tons of steel plates and shapes required for the construction of elevator dredge no. 26, to be built at the Government shipyard, Sorel.

A deputation representing the Quebec Harbor Commission visited the Montreal harbor, June 2, and inspected the works completed and in progress there, with the view to the carrying out of a number of improvements in the Quebec harbor.

The two vessels operated by Revillon Bros., Montreal, during the current season, with their officers are as follows: Minawa, W. P. Moore, captain; J. Fowler, chief engineer—and Ombabika, G. A. Patton, captain; E. Drinkwater, chief engineer.

It is announced that the aids to navigation in the St. Lawrence Channel between Montreal and Quebec, in Lake St. Louis and the Ottawa River, have been placed under the Marine Departments' staff at Montreal instead of at Quebec as heretofore.

The Montreal Harbor Commissioners' large floating crane which was built in England last year, and which should have arrived at Montreal nearly a year ago has at last reached its destination. The crane broke loose from the tug towing it last year and was subsequently picked up on the north west coast of Scotland and towed to Barrow-in-Furness, Eng.

La Compagnie de Navigation Canada has been incorporated under the Quebec Companies Act, with a capital of $20,000 and office at Montreal, to own and operate steam and other vessels, and to carry on a general business in navigation, towage, the construction of wharves and other works connected with navigation. The provisional directors are:—L. Lacouture, L. E. Morin, Jr., Montreal; A., G. W., and H. L. Couture, Sorel, Que.

The S.S. Torgorm from the West Indies consigned to the Robt. Reford Co., Montreal, collided with and sank, the river steamboat Pierreville, owned by Niquet et Freres, Pierreville, June 14, near Ile aux Raisins. The crew escaped in the boats. The Pierreville is a paddle wheel steamer with engine of 8 n.h.p. She was built at Pierreville, Que., in 1906, her dimensions being, length, 100 ft.; breadth, 24 ft.; depth, 3.7 ft.; with a tonnage of 121 gross, 76 register. A notice has been issued to mariners that the wreck is located right in the channel and advising caution to both incoming and outgoing vessels.

An act passed at the recent session of the Dominion Parliament defines the extended boundaries of Montreal harbor, and empowers the corporation controlling the harbor to maintain and operate tracks and harbor lines and move cars by any motive power for the carriage of goods, and for such purpose to build, purchase or otherwise acquire rolling stock and machinery of all descriptions. The previous acts are amended by confining the corporation powers to the harbor of Montreal, as apart from the port of Montreal, as defined by sub-sec. 1, sec. 5 of the Montreal Harbor Commissioners' Act 1894, which is under the jurisdiction of the Minister of Marine.

Ontario and the Great Lakes.

Capt. Wm. Nanson, a well known lake navigator, died at Port Hope, June 3, aged 59.

The Inland Navigation Co.'s steamboat, Stadacona, was launched at Detroit, Mich., May 29.

The ratepayers of Toronto defeated a by-law, June 5, to raise $700,000 for the completion of the construction of a sea wall on the west side of the city.

Polson Iron Works, Ltd., has applied to the Toronto city council for a site for the construction of a shipbuilding plant, including a large floating drydock.

The Niagara Navigation Co. has completed the repairing of its wharf at Lewiston, N.Y., which was wrecked during the recent ice jam in the river.

Captain Robert Clapp, who retired from the command of the Niagara Navigation Co.'s steamboat Corona, about two years ago, owing to a paralytic stroke, died at Picton, Ont., June 13.

The Northern Navigation Co.'s s.s. Ionic has had 5 ft. of new steel welded to her starboard propellor shaft, and a few other repairs completed at Duluth, Minn.

Residents on both sides of the Detroit River are agitating for a reduction of the fare from 10c. to 5c. for passages charged by the Detroit, Belle Isle and Windsor Ferry Co.

The board of conciliation appointed to deal with the longshoremen's troubles at Owen Sound consisted of D. Ross, Barrie, chairman; Wallace Nesbitt, K.C., and J. G. O'Donoghue.

Capt. G. Moulton, of the Toronto Ferry Co.'s ferry steamboat Mayflower, was presented with a gold mounted pipe by the crew, June 3, on the completion of 19 years service with the company.

B. W. Renaud, has been appointed Superintendent Bisco-Gowganda Transport Co., at Biscotasing. The company is said to be building a large number of scows and launches for service on the route.

Plans for the construction of proposed coal and general freight docks at lots 13 and 11, concession K, Fort William, have been filed with the Minister of Public Works, and application has been made for approval of same.

In carrying out some excavations at Merriton, one of the locks of the original Welland canal has been unearthed. This structure was a part of the construction which was commenced in 1824, and completed 5 years later.

A report is current that the operation of the Kingston drydock is about to pass from the Government into private hands, and the Canadian Locomotive Co., or interests intimately connected therewith, has been named as the future owner.

The Department of Marine is erecting an octagonal wooden lighthouse tower on the summit of the northern Lawyer Island, Chatham Sound, replacing the old one. The work will be completed and the light exhibited from the new tower during the present season.

J. C. Eaton, Toronto, President Turbine Steamship Co., and Hamilton Steamboat Co., has recently purchased a pleasure yacht, named Tekla, which he has had equipped with a wireless telegraph system in connection with a station erected on the T. Eaton Co.'s store, Toronto.

An order in council has been passed declaring Owen Sound harbor, comprising all the waters of Owen Sound harbor, and the navigable portions of all streams flowing into it, south of a line drawn due west, astronomically from the northern extremity of Squaw Point, to be a public harbor.

The s.s. Iron Age, owned and commanded by Capt. W. J. Willoughby, Windsor, was destroyed by fire, June 4, near Bar Point in Lake Erie. The captain and crew escaped in a small boat. The vessel, which was a wooden steamer, was valued at $32,000, but was only insured to the extent of $5,000.

The Pelee and Lake Erie Navigation Co. is reported to have purchased the steamboat Saugatuck in the U.S., for operation between Pelee Island and the mainland. Another report states that the steamboat Ossifrage, formerly owned by the Algoma Central Steamship Line, has been acquired for a similar purpose.

Sir Robt. W. Perks, who has been in Canada in connection with the proposed Georgian Bay canal scheme, returned to England by the s.s. Laurentic June 19. It is stated that the Premier has conveyed to him the impossibility of the Dominion Government guaranteeing the bonds of the company during the present fiscal year.

The Keystone Transportation Co.'s steamboat Key West, arrived at Montreal, June 6, from England, and was followed by the Keyport later on. These vessels, details of which were given in our last issue, will be operated in the interests of the Montreal Light, Heat and Power Co., carrying coal between Lake Erie ports and Montreal.

The Thornbury Transportation and Reduction Co., Ld., has been incorporated under the Ontario Companies Act, with a capital of $500,000, and office at Thornbury, Ont., to own and operate steam and other vessels, and to carry on a reduction works, etc. The provisional directors are: K. Davidson, M. Vail and G. G. Athery, Meaford, Ont.

The Board of Conciliation appointed under the Labor Disputes Act, in the case of the complaints of the Owen Sound longshoremen against the C.P.R., consisting of W. Nesbitt, K.C., D. Ross and J. G. O'Donoghue, has reported, recommending an increase of 2c. an hour in the men's pay. A minority report has been sent in on behalf of the men suggesting further increases.

At a joint meeting of the St. Catharines and Toronto boards of trade, June 9, a resolution was adopted to the effect that it is highly desirable that the enlargement of the entire canal system from Port Colborne to the Atlantic Ocean be proceeded with, and to such dimensions as will permit the passage of

Frame Welded and Engine Returned to Service in Twelve Working Hours

This isn't any pipe dream but a simple statement of what actually occurred last May at one of the large railroad shops using the Thermit Process. It is also a statement of what can be done at YOUR SHOPS if you adopt the Thermit Process. Quickness in making repairs is not the only advantage of our method, however, as we fuse a REINFORCEMENT of STEEL around the welded section which makes this part stronger than ever before and less likely to break under the same strains that caused the first fracture.

Frames and mud rings are welded without removing them from the engine. The process is also particularly advantageous for welding driving wheel spokes, connecting rods and for other general repair work.

Full particulars are given in our new pamphlet No. 25-N.

MIDLAND TOWING & WRECKING CO., LIMITED, MIDLAND, ONT., CANADA

FIRST-CLASS TUGS FOR WRECKING, RAFT TOWING, ETC.
STEAM PUMPS, DIVERS, JACKS, HAWSERS AND LIGHTERS

the largest lake vessels from the head of the lakes to the seaboard.

The Toronto Cuban Grape Fruit Co., Ld., has been incorporated under the Dominion Companies Act, with a capital of $100,000 and office at Toronto, to carry on the business of nurserymen, etc., and in connection therewith to build, acquire and operate steam and other vessels. The provisional directors are: J. Robson, F. W. Sawtell, A. A. Raynor, A. E. Longbottom, L. M. Heal, Toronto.

The Montreal River Navigation Co., Ltd., has been incorporated under the Ontario Companies Act, with a capital of $40,000, and office at Cobalt, Ont., to acquire and operate steam and other vessels, and to conduct a general passenger and freight business on the lakes and rivers of Northern Ontario. The provisional directors are: A. G. Smith, Latchford, Ont.; R. J. Jemmett, and H. H. Lang, Cobalt, Ont.

The Western Drydock and Shipbuilding Co., is reported to have signed an agreement with the Port Arthur city council for the construction of a large drydock and shipbuilding plant there, capable of repairing and building the largest lake vessels. A by-law is being prepared for submission to the public vote granting a subsidy for the proposed works. A. Bowerman, Southampton, Ont., represented the company in the negotiations.

The Union Mining and Transport Co., Ld., has been incorporated under the Ontario Companies Act, with a capital of $40,000 and office at Toronto, to carry on a general mining business, and to build, purchase or otherwise acquire and operate steam and other vessels, and to carry on the business of common carriers. The provisional directors are: I. M. Scott, Lambton Mills; F. R. Baumhard and R. F. Stibbard, Toronto.

The Port Stanley Navigation Co.'s steamboat, Lakeside, which arrived at Port Stanley from Cleveland, O., on its first trip for this recently incorporated company, was built at Toledo, O., in 1901. She is 156 ft. long, with 28 ft. beam and tonnage, 225 register. She has license to carry 650 passengers. It is stated that a guarantee of $7,000 has been given for the operation of the vessel between Port Stanley and Cleveland for the season to Sept. 15.

The U.S. Lake Survey reports the levels of the Great Lakes for May, in feet, above tide water, as follows: Superior, 601.65; Michigan and Huron, 580.84; Erie, 572.54; Ontario, 247.16. It was anticipated that during June, Superior would rise 3¾ ins.; Michigan and Huron, 3 ins.; Erie, 2½ ins.; Ontario, 1 in. Compared with the average May levels of 10 years, Superior is 8¾ ins. lower; Michigan and Huron, ½ in. higher; Erie ¼ in. lower, and Ontario 7¼ ins. higher.

The Sault Ste. Marie Dry Dock and Shipbuilding Co., Ld., has been incorporated under the Ontario Companies Act, with a capital of $1,000,000 and office at Sault Ste. Marie, Ont., to construct and operate dry docks, marine railways; to build, repair and equip ships and other vessels, and to carry on all kinds of business connected with the operation of a dry dock and marine railway. The provisional directors are: J. O'Boyle, W. H. Plummer, W. O'Brien, W. H. Hearst and J. McKay, Sault Ste. Marie, Ont.

A deputation, consisting of those interested in the project, was received by the Premier and Minister of Public Works, at Ottawa, June 11, when it was stated that the town of Sault Ste. Marie had voted a bonus of $100,000 towards the construction of a drydock, payment to be made in 20 annual instalments of $5,000. The Government is being asked to grant assistance to the project by the payment of 3% on $500,000, annually for 20 years. The matter was promised consideration.

The Fort William Milling Co., Ld., has been incorporated under the Dominion Companies Act, with a capital of $100,000 and office at Montreal, to carry on throughout Canada the business of grain dealers, and to own and operate all necessary equipment for the conduct of the business of transportation by water in connection with the company's business. A. J. Brown, K.C.; G. H. Montgomery, R. C. McMichael, R. O. McMurtry, F. G. Bush, G. R. Drennan and H. W. Jackson are provisional directors.

The Port Stanley Navigation Co., Ld., has been incorporated under the Dominion Companies Act, with a capital of $10,000 and office at St. Thomas, Ont., to acquire and operate sheds, docks, wharves, elevators, steamboat terminal facilities, steam and other vessels, and to aid by bonus, guarantee, etc., any person or firm engaged or interested in navigation and the transportation of passengers and merchandise. The provisional directors are: W. R. Jackson, B. F. Ronsinger, T. Donley, J. R. Green, J. Griffin, St. Thomas, Ont.

In response to questions in the House of Commons recently, the Minister of Public Works stated, that the amount spent on the Honora dock, Manitoulin Island, during the 1908 season, was $2,591.98, and that the work continued from Sept. 16 to Dec. 31. The dimensions of the dock, which was built in 1904, are shore approach, 175 ft. by 20 ft. wide on top; woodwork, 280 ft., consisting of 7 cribs, each 20 by 20 ft., and an outer block 40 by 20 ft., standing 6 ft. above low water, and with a depth of water of 23¼ ft. at low water.

Replying to a question in the House of Commons recently, as to whether or not the proposed Waterways and Boundaries Treaty would prevent the construction of the proposed enlargement of the St. Lawrence and Welland canals, or the construction of the proposed Georgian Bay canal without the consent of the Commissioners, because of the fact that these works, or either of them, might reasonably be expected to affect the height of water in Lakes Huron, Erie and Ontario, the Minister of Justice reminded the questioner that the whole subject of the treaty is still under consideration.

The Fort Erie and Buffalo Ferry Co., Ltd., has been incorporated under the Dominion Companies Act with a capital of $20,000, and office at Fort Erie, Ont., to operate a ferry between Fort Erie, Ont., and Buffalo, N.Y.; to own and operate steam and other vessels for the transportation of passengers and merchandise; to act as common carriers, forwarders, wharfingers and warehousemen; and to construct, own and use such docks, terminal facilities, etc., as may be convenient or necessary for the purposes of the company. The provisional directors are: B. F. Matthews, P. B. Troupe, J. J. Foster, W. E. Hunt, A. C. Mackintosh, W. J. Hawley, C. E. Harris and R. Jeffrey, Fort Erie, Ont.

An order in council has been passed, rescinding clause 43 of the general regulations governing ports, as added to by order in council, Feb. 19, 1907, and substituting the following therefor: "All through-bound vessels in passing through the St. Clair River in the vicinity of the St. Clair middle grounds, and of Stag Island, in the harbor of Sarnia, shall keep to the right, that is to say, all up-bound boats shall pass through the eastern channel, and all down-bound boats shall pass through the western channel. This rule shall apply to through-bound vessels only, and not to vessels running between local points in the river, which vessels may take either channel, conforming to the ordinary rules of the road for the Great Lakes."

The Dominion Government steamboat Simcoe, which recently arrived in Georgian Bay from England, for the lighthouse and buoy service there, has been the cause of some alarm amongst a section of the daily press, which seems anxious to serve its readers with something sensational, without regard to facts. Statements as to her construction and equipment have been made to show that she is specially adapted for speedy transformation into an armed cruiser and prepared to carry heavy guns,

THE NORTHERN NAVIGATION COMPANY'S STEAMBOAT WAUBIC.

"which, as is known for a fact, the Canadian Government has, for the present, stored away at some Georgian Bay port." An official statement was issued recently that the description as published in the daily papers was entirely erroneous. The Simcoe is not a cruiser but a buoy boat, and if she performs any fisheries protection work it will be only incidentally.

The survey board appointed some time ago by the U.S. Congress to enquire into the feasibility of constructing a navigable waterway from the Great Lakes to the Gulf of Mexico, reports that a 14 ft. channel is practicable, and may be constructed by any one of six different plans. A combined plan giving varying depths of 8 ft. and 9 ft. at different points was recommended, costing approximately $158,697,462, with an annual maintenance cost of $6,810,000. In concluding its report, the board says: "Such a depth (14 ft.) is greater than required for successful river navigation and less than required for economical lake or ocean navigation, and if adopted would require for common use on lake, river and gulf a type of vessel not now in existence, and which, if designed, would be less economical than modern lake or ocean vessels in use on those waters or than towboat and barge navigation on the connecting waterway."

The Northern Navigation Co.'s steamboat Waubic, the keel of which was laid March 15, was launched at Collingwood, June 1. She is of steel construction, with triple expansion engines driving twin screws, with a speed of 16 miles an hour, and has been specially designed for the requirements of the tortuous channels of the 30,000 islands of Georgian Bay. The main deck, in addition to engine and boiler space, accommodates baggage, smoking and toilet rooms. The entrance hall in quarter sawn oak, forms an attractive lobby, from which ascends the stairway to the saloon above. The purser's office is located in the lobby and aft it is the dining saloon, finished in natural woods with large observation windows. The general saloon is designed in colonial style, in ivory white enamel with crimson carpet and furnishings. The staterooms are located aft of the saloon and are provided with all modern conveniences. The vessel is lighted throughout by electricity and she is provided with a powerful searchlight. There is accommodation for upwards of 600 passengers. Her dimensions are, length, 142 ft.; breadth, 25 ft.; molded depth, 9 ft.. She was placed on her route June

NIAGARA NAVIGATION CO., LIMITED

Notice is hereby given that an interim dividend of four per cent. (being at the rate of eight per cent. for the year) has been declared upon the Capital Stock of this Company, and the same will be payable on the 2nd of July, 1909.

The Transfer Books will be closed from June 16 to June 30, 1909, both days inclusive.

By order of the Board.

B. W. FOLGER, General Manager.

N. F. Loomer, Letelier, Man., has patented a boat propelling device at Washington, D.C., under no. 923,283.

The U.S. steamboat Grand Forks, arrived at Winnipeg, June 7. This is reported to be the first steamboat to arrive from south of the boundary in 28 years.

Among the subjects discussed at the annual meetings of the Western Canada Associated Boards of Trade, at Saskatoon, June 15 to 17, was that of the navigation of the North Saskatchewan River.

The Dominion Government has chartered a vessel from Capt. Ross of Medicine Hat, Alta., for use in the fisheries service on Lake Winnipeg. She is about 50 ft. long with 11 ft. beam, and draws about 4 ft. of water. She was taken from Collingwood to Fort William, and from there was shipped by rail to Winnipeg.

The Peace River Trade and Navigation Co., Ld., has been incorporated under the Dominion Companies Act, with a capital of $1,000,000 and office at Montreal, to conduct a general trading business, and to act as common carriers. The provisional directors are: F. S. Lawrence, Fort Vermillion, Alta.; W. D. Lighthall, C. A. Harwood, E. Greenwood and G. S. Wilson, Montreal.

The steamboat Winnitoba, built by Capt. Bellefeuille, at the mouth of the Seine River, has dimensions, as follows: length, 186 ft.; breadth, 44 ft.; with a draught of 4½ ft. She has been specially designed for service on the Red River and passage through the St. Andrews Locks, to the lake. The engines will develop 500 n.h.p., driving side wheels. There are 41 staterooms with promenade and hurricane decks, and she will probably be licensed to carry 1,000 passengers. It was anticipated that she would be in service by July 1.

The plant of the Pioneer Navigation and Sand Co., Winnipeg, which was offered for sale recently, includes the steamboats Alexandria and J. M. Smith. The former was built in Winnipeg in 1902, her dimensions being:—length, 84 ft.; breadth, 19.8 ft.; depth, 3.2 ft; tonnage, 164 gross, 38 register. The latter vessel was built in Winnipeg in 1905, and has dimensions:—length, 120 ft.; breadth, 21 ft.; depth 4 ft.; tonnage, 179 gross, 122 register. Both vessels are described in the schedule of sale as stern wheel paddle steamers, but in the Canadian register for 1907, the Alexandria, appears as, Alexandra, and is given as a screw driven vessel.

The completion of the construction of the whole of the works connected with the St. Andrews locks and dam, is expected by about Oct. 1. The structures which were begun in 1900, consist, in the main, of abutments on each bank of the river, 7 large piers, 100 ft. apart, the lock with outer and retaining walls strengthened by a pier, and a permanent dam between the piers. The piers will carry a steel traffic bridge, from which a movable dam will be operated. The dimensions of the lock are: length, 200 ft.; width, 45 ft.; depth at lowest stage of water over sills, 9 ft.; lift, 21 ft.

Following are the vessels of the Rat Portage Lumber Co., St. Boniface, Man., for the current season, with their captains and chief engineers respectively:—

Empress	M. McRitchie	H. Johnston
Ethel Banning	J. W. Johnston	F. Gaudreau
Kingfisher	J. J. McKenzie	J. Smith
Mary Hatch	F. Mongrain	G. Shearer
Wendigo	J. Shovedice	C. Johnson

B.C. and Pacific Coast Marine.

The name of the steamboat R. P. Rithet, no. 85316, registered at Vancouver, B.C., has been changed by order in council to Baramba.

Capt. C. Barnes, Victoria, has been appointed a Fishery Officer in the Fisheries Protection Service with the rank of Master Mariner.

D. A. Foster is captain, and J. Watt, chief engineer for the current season of the steamboat, City of Quesnel, operated by T. Marion, Quesnel.

The Dominion Government is negotiating with the British Admiralty concerning the acquirement of a cruiser, suitable for a training ship and for the fisheries protection service on the Pacific coast.

Brown and McCabe Stevedores, a company incorporated in the U.S., with a capital of $100,000 and head office at Portland, Ore., has been licensed to carry on its business in B.C., with P. G. Groves, Vancouver, as its attorney.

The Pacific Woods Co., Ld., has been incorporated under the B.C. Companies Act, with a capital of $100,000, to carry on the business of timber merchants, etc., and to own and operate steam and other vessels and carry passengers and freight.

E. L. Kinman, managing director Island Dock and Warehouse Co., Vancouver, was arrested there, June 2, for assault and resisting a police officer, in attempting to secure a landing at Deadman's Island on behalf of his company.

The Malahat Sand and Gravel Co., Ld., has been incorporated under the B.C. Companies Act, with a capital of $25,000, with power, among other things, to own and operate steam and other vessels and to carry on business as carriers of passengers and freight.

The Union Steamship Co.'s s.s. Coquitlam, which sailed from Vancouver, May 26, for northern coast ports, returned to port the following day with a fire in the engineer's room. One death, and serious injuries to four men were reported as a result.

The Howe Sound and Northern Construction Co., Ld., has been incorporated under the B.C. Companies Act, with a capital of $10,000, to carry on a general business of builders, contractors, etc., to own and operate steam and other vessels, wharves, warehouses, etc., and to act as carriers by land and water.

The steamboats operated by the White Pass and Yukon Ry., for the current season, are, Casca, Dawson, Gleaner, Selkirk, Victorian and White Horse. The Gleaner runs between Caribou and Atlin, and the others make daily sailings from White Horse. The season extends from June 1 to about the end of Oct.

The Vancouver Towing and Lightering Co., Ld., has been incorporated under the B.C. Companies Act, with a capital of $75,000, to take over the tugs, barges, etc., of J. D. Foreman, Vancouver, and to carry on the businesses of general carriers, railway and forwarding agents, warehousemen, bonded and common car men, etc.

The Dry Belt Settlements Utilities Ltd. has been incorporated under the B.C. Companies Act, with a capital of £50,000, to acquire and develop properties in the province, and in connection therewith to build, acquire and operate railways and tramways worked by steam, electricity or other motive power; and telephone and telegraph lines.

High water in the Skeena River has stopped the navigation of Kitselas canyon. The Hudson's Bay Co., has arranged to transport freight to the canyon by boat, and round the canyon by teams, where it will be transhipped to another of the company's vessels. It is anticipated that the waters will subside early in July.

The Canadian Mathews Gravity Carrier Co., Ld., has been incorporated under the B.C. Companies Act, with a capital of $100,000, to acquire patents and to manufacture articles similar to those manufactured by a company of similar name in the U.S.; and to carry on the businesses of ship owners, ship brokers, freight contractors and general carriers by land and sea.

Rear-Admiral Kingsmill, left Victoria, June 10, for Ottawa where, he will, it is said, report to the Government as to the advisability of making Esquimalt the headquarters of the Pacific coast lighthouse and fisheries protection service. He will sail for England shortly in company with the Minister of Marine, to attend the Imperial Conference on naval matters, when the future of Esquimalt harbor, the establishment of a training ship in the Pacific coast, and other matters will be discussed.

The Vancouver Shipmasters' Association at a recent meeting endorsed the proposed new regulations for navigation in Vancouver harbor, and withdrew its suggestions as to the line to mark the limit for a 7-knot speed, which had been drawn from Brockton Point to the Indian Mission church, and to substitute a line from Brockton Point to the incinerator at Heap's Mill. It was also agreed that an investigation be made into the matter of operating launches between upcoast points without certified masters, and that action be taken if deemed necessary.

The Minister of Marine stated in the House of Commons recently that prices were being asked for a lifeboat to replace the one wrecked at Bamfield Creek some time ago. In the meantime, a temporary boat has been placed on that station. He also said that, regarding the wreck of the gasolene surf boat, which cost $25,000, his information was that the boat was left in an exposed condition and the crew was on shore and no one in charge of the boat at all. The men who should have been in charge have been dismissed.

N. Thompson, President Vancouver Drydock and Shipbuilding Co., returned to Vancouver June 5, from Ottawa, and reported that he had succeeded in obtaining the promise of a subsidy of 3% of the total cost of the dock for 20 years. An option is said to have been secured on a site at the east end waterfront. The proposed dock will be a steel pontoon floating structure, 500 ft. long, capable of accommodating vessels of 10,000 tons. The estimated cost is quoted as $1,250,000, and the President proposes to go to England shortly in connection with the financing of the scheme.

The rate war which has been waged between the C.P.R. and the International Steamship Co., on the Victoria, Van-

couver and Seattle route, has come to an end by the withdrawal by the latter company of its vessel from the service. In announcing the discontinuance of the service the President said: "In withdrawing the Iroquois from the Vancouver route, we realised that it would not be possible for the steamer, under the advanced rates, to show any earnings. Between the Canadian Pacific's fancy steamers, the rail lines, and the Iroquois, business would be so divided that our steamer could not operate at a profit. So she has been temporarily taken off, but next winter she will resume service on this run."

St John, N. B., Shipping Statistics.

The St. John, N.B., Board of Trade has issued a pamphlet giving a record of the shipments from the port during the 1908-09 winter season, and a comparative table of exports for the past 12 years. The summary for the 1908-09 season, is as follows:—

	Values
Wheat, 6,806,485 bush.	$8,345,348
Barley, 527,998 bush.	
Oats, 341 bush.	
Peas, 10,893 bush.	
Hay, 12,068 tons	150,338
Flour and meal, 678,754 packages..	2,034,346
Cheese, 90,022 packages	957,084
Butter, 2,551 packages	23,985
Eggs, 1,228 packages	8,924
Meat, 80,327 packages	4,278,117
Cattle, 22,923	1,684,160
Sheep, 149	745
Horses, 63	15,400
Lumber, 21,169 stds.	641,385
Other lumber, 3 583 tons	352,329
Apples, 78,934 barrels	236,927
Lard, 222,554 packages	1,339,239
Manufactures, 285,274 packages.....	2,873,046
Miscellaneous, 84 393 packages	1,023,467
Furs estimated	600,000
	$24,564,840

During the past season, the number of sailings was 108, showing a total registered tonnage of 474,620 tons, against 111 sailings and 473,934 tons for the previous season. In 1895-96, there were 22 sailings from the port with a register tonnage of 50,892, and the increase has been gradual each year since. The record season was that of 1906-07 when there were 116 sailings with a register tonnage of 482,895. It is interesting to notice the average tonnage per vessel, which in the first mentioned season was approximately, 2,315 tons, in 1906-07, the record season, 4,165 tons, and in the 1908-09 season, 4,395 tons. For the season 1897-98 the number of sailings was 58, with a register tonnage of 102,316 tons, and cargo value, $4,848,768; so that the past season shows an increase of approximately 100% in the number of sailings, 365% increase in the register tonnage, and 410% in the cargo value.

Sault Ste Marie Canal Accident.

The lock gates of the Canadian canal at Sault Ste. Marie were wrecked June 9, by the Gilchrist Co.'s s.s. Perry G. Walker. It is stated that through mistaken signals, the vessel rammed the lower gates, while the C.P.R. s.s. Assiniboia was in the lock, and the Pittsburg Steamship Co.'s s.s. Crescent City was entering at the upper end, the upper gates being still open. The consequence was that the upper gates were wrenched from their fastenings by the force of the water, and the Assiniboia and Crescent City swept through the lock to open water, at tremendous speed. The Assiniboia ripped a hole in the Perry G. Walker with her port anchor, and the Crescent City in overtaking the Assiniboia struck her and was similarly damaged. Of the three vessels, the Assiniboia was the one to suffer least damage, and after an examination, it was decided that it was not sufficiently serious to detain the vessel. She therefore proceeded to Owen Sound with her passengers, and later to Collingwood, where she was docked for thorough examination. The Canadian lock, which is 900 ft. long by 60 ft. wide, was completed in 1896. The work of repairing the lock was immediately taken in hand, but considerable difficulty was experienced at the outset, owing to the impossibility of stopping the torrent of water rushing through. The moveable dam was lowered with the exception of one leaf which was badly twisted. The new gates were, however, placed in position, and the canal opened for traffic June 21. The Minister of Railways and Canals visited the canal while the work was proceeding. Enquiries have been held, in camera, on board the Perry G. Walker, as to the causes of the disaster, and it is stated that the cause was a mistake by the engineer of a signal to go full speed astern, he instead going full speed ahead.

A New Toronto Tug.

The steam tug, Erl King, which the Polson Iron Works has built at Toronto for the Frank Simpson Contracting Co., is constructed on a combination of ideas decided on after visits paid to a number of shipbuilding yards on the American continent. The hull is of composite frames 2" by 2" by ¼", spaced 18" centres; sheer plate ⅜" by 18", Keel plate ½" by 14", margin plate, ⅜" by 14"; planking, white oak dressed to 3"; deck plank, 3" B.C. fir; and it is divided into 4 water-tight compartments by steel bulkheads, one between engine and boiler-room, one between boiler-room and crew's quarters, and one between crew's quarters and the forepeak. The vessel has a mean draught of 6' 4" when the forepeak is filled with water. The water bunkers are also constructed of steel, and the stiffening bars are rivetted to the floor plate and house coaming, and extend to the top of the cabin, making the steel frame for the deck house. The shaft is 5", horseshoe thrust bearing; iron stern tube with brass and lignum vitæ bearing 21" long; solid wheel 6 ft. diar.; 9 ft. pitch; boiler pressure 145 lbs., with fires from forward; coal capacity 17 tons. One of the features of the vessel is the solid cast steel stern and stern post, each cast in one piece weighing 800 lbs and 950 lbs. respectively. The rudder frame is also of cast steel. On her recent trial trip with 144 lbs. of steam, she made 12 3-5 miles an hour over a measured course, turning 133 rev. a minute. When under full headway she will come about, when the wheel is put hard up, in 200 ft., with an extreme list of 3½" at the water line. Her dimensions are:—Length, 52 ft.; breadth, 14.5 ft.; depth, 8 ft.; tonnage, 46 gross, 25 register, and she is equipped with engine of 6 n.h.p., drivin a screw. She is being used in connection with the dredging plant in and around Toronto harbor. The work of construction was executed under the direct supervision of W. Newman, Superintendent for the owning company.

Grounding of the s.s. Odland.

Capt. L. A. Demers, F.R.A.S., Chief Examiner of Masters and Mates, assisted by Capt. Bain and Mr. Raymond, Director of the Corporation of Pilots of Quebec, held an investigation at Quebec, June 15, into the circumstances attending the grounding of the s.s. Odland, on a shoal off Point a Pic on the north shore of the River St. Lawrence, whilst in charge of Pilot Alphonse Asselin, branch no. 69. The court found Asselin solely responsible for the grounding, but taking into consideration his former good reputation and also the straightforward and direct manner in which he gave his testimony, therefore inflicted upon him the minimum penalty of $50, to be paid in two instalments.

The facts of the case as adduced are as follows: The Odland, flying the Norwegian flag and in charge of a crew of that nationality, has been plying off and on in the River St. Lawrence chartered by F. Carbray & Son, Quebec. Asselin took charge of the vessel at Quebec and piloted her down to St. Simeon, where she loaded pulp wood destined for Erie, Penn. On May 31 the vessel left St. Simeon, five miles east of Cape Salmon, laden with pulp wood, it being the intention to call at Murray Bay to obtain clearance papers. The pilot claims that he was unfamiliar with the river in the vicinity of Murray Bay and in his endeavor to bring the vessel as close as possible in order to facilitate the work of the crew in pulling ashore and thereby gaining time, thought proper to hug the land as closely as he deemed advisable. At 8 p.m. on May 31 the vessel struck on the shoal extending from Point a Pic, the existence of which is marked by a red buoy. The pilot avers that he knew only through hearsay that the buoy was there, and that he had not previously seen it. It has been proved that although the pilot was unfamiliar with the river in the vicinity of Murray Bay, he did not take any extra precautions to ascertain the position of his vessel from the land which, in the court's opinion, would have been the proper action under the circumstances. Moreover, it has been adduced that no direct courses were given to the wheelsman to steer by, but instead he was merely instructed to keep certain land objects so many points on the starboard side of the vessel, which mode of navigation in the court's opinion is unsatisfactory, indefinite and unsafe. The pilot was also guilty of neglect when, knowing the existence of a buoy marking the shoal which extends from Point a Pic, he failed to advise any of the officers on duty in order that they might keep a keen lookout for it and report to him when sighted. The evidence shows that the weather was clear, calm and no wind, that the sun had just set and that objects were still clearly discernible, and it appears according to testimony that if the buoy had been looked for it could have been seen a mile or a mile and a half distant with the aid of glasses. The pilot's evidence conclusively shows that the man at the wheel, though of limited experience and youthful years, nevertheless steered the vessel to his entire satisfaction, and therefore in the court's opinion no blame can be attributed to the wheelsman, and the crew of the ship being strangers were unaware of the existence of any danger in the course of the vessel. If, however, this court was empowered with

jurisdiction, it would certainly censure the Captain, who was then on duty, for not familiarizing himself with the dangers and obstacles along the coast, notwithstanding the fact that there was a pilot on board, the court holding that the master is still the responsible man. Under the existing weather conditions, which were most favorable, it is conclusive that the mishap could have been avoided if even the most elementary precautions had been taken by the pilot whilst navigating his ship.

Northern Navigation Co.'s s. s. Hamonic.

The trial trip of the s.s. Hamonic took place June 12 and 13, when, at the invitation of the Northern Navigation Co., and the G.T.R., a number of press representatives from Ontario, Quebec and Michigan, joined the officials of the two companies in a run on the vessel. A G.T.R. special train left Toronto at 8 a.m., June 12, for Collingwood, where the party embarked. A call was made at Owen Sound, and Sarnia was reached about 12.30 p.m. June 13, where, after inspecting the recently erected terminals, the party returned on a special to Toronto.

Prior to arriving at Sarnia, a presentation of silver plate was made to the vessel, for which the press representatives subscribed about $250, and acknowledged by Capt. Foote. Votes of thanks were also extended to the Northern Navigation Co., and the G.T.R., and responded to by C. H. Nicholson, Traffic Manager, Northern Navigation Co., and C. M. Hays, Second Vice President and General Manager, G.T.R.

Among the officials present, representing the G.T.R., were: C. M. Hays, Second Vice President and General Manager; A. E. Beckett, Solicitor; L. C. Stanley, Attorney, Detroit, Mich.; W. E. Davis, Passenger Traffic Manager; G. W. Vaux, General Passenger Agent; J. D. McDonald, District Passenger Agent, Toronto; J. E. Quick, General Baggage Agent; L. L. Grabill, Assistant General Baggage Agent; H. R. Charlton, General Advertising Agent; E. W. Smith, Superintendent Dining and Parlor Car Service; C. A. Hayes, General Freight Agent; R. W. Long, Division Freight Agent, Hamilton; J. W. Kneeshaw, Assistant Stationery Agent, Detroit, Mich.; G. B. Filgiano, Auditor Passenger Accounts; W. G. Brownlee, General Transportation Manager; H. G. Kelley, Chief Engineer; M. S. Blaiklock, Engineer Maintenance of Way; W. D. Robb, Superintendent of Motive Power; J. Coleman, Superintendent Car Department; F. Price, Superintendent Car Service; W. W. Ashald, Superintendent of Telegraphs; H. E. Whittenberger, Superintendent Eastern Division; W. R. Tiffin, Superintendent Northern Division; F. W. Egan, Superintendent Western Division; and representing the Northern Navigation Co.: W. J. Sheppard, President; H. Y. Telfer, Vice-President; H. H. Gildersleeve, Manager; C. H. Nicholson, Traffic Manager; C. A. Macdonald,, Comptroller.

The contract for the construction of the vessel was made in Mar., 1908. H. Calderwood, Toronto, acted as inspecting engineer during construction, with F. Kirby, Detroit, Mich., as consulting naval architect. She is a single screw driven vessel, of 5,264 tons gross, and has dimensions: length, over all, 365 ft.; between perpendiculars, 341 ft; breadth, molded, 50 ft.; depth, molded, to main deck, 18.6 ft.; to spar deck, 24 ft.; to awning deck, 35 ft.; depth water ballast tank in freight holds, 4 ft.; in engine-room, 5.9 ft. The engines are quadruple expansion with cylinders, 24, 35, 52 and 80 ins. diar., by 42 ins. stroke, supplied with steam by 6 Scotch boilers, 12½ by 11 ft., at 250 lbs. to the sq. in., developing about 6,200 h.p. There is accomodation for 400 first-class passengers, 70 second-class passengers, and about 100 of a crew. The dining saloon has a capacity for about 180 passengers. She has been constructed with strict regard to the rules of the Bureau Veritas and the Great Lakes Register, and under the inspection of the last named; her rating is therefore of the highest possible for lake service. In addition to the passenger accommodation named, she has capacity for 3,000 tons of package freight, or 100,000 bush. of grain below the main deck. The estimated cost of the vessel was placed at $500,000. During 1908, the company entered into a 10-year contract with the G.T.R. and G.T.P.R. for the exchange of passengers and freight. At her first short trial towards the end of May, she averaged about 19 miles an hour, while during the trip, June 12, the average was about 15 miles an hour. When the machinery has settled down, it is anticipated that a speed of 21 miles will be attained. The vessel is in charge of Capt. R. D. Foote, formerly of the company's s.s. Huronic, with S. Brisbane as chief en ineer.

A full description of the vessel was given in our Jan. issue, and illustrations in our June and July, 1908, issues.

Grain Shortages in Vessels.

In introducing a bill into the House of Commons, during the recent session, to amend the Manitoba Grain Act, J. A. Currie, M.P., Simcoe, said: This bill is intended to correct a grievance under which the vessel men suffer. Most of the grain from the North-west is shipped by rail to the head of the lakes and then carried by steamers to the terminal elevators on the lakes, or to the seaboard. The law at present provides for the inspection of this grain, and that the certificates should follow it to the seaboard; which is a very wise provision. It provides also that the grain shall be weighed into the terminal elevator on the Great Lakes by special weighmen, and there is no provision in the law which renders it compulsory that the grain shall be weighed into the vessel and out of the vessel again. The result of that has been great loss to the steamship interests on the Great Lakes. The following were the net shortages, in bushels, charged against the different companies named last year:—

Northern Navigation Co.	3,160
Montreal Transportation Co.	10,357
Canadian Northwest Steamship Co.	1,152
Midland Navigation Co.	7,592.06
Farrar Transportation Co.	3,913.30
Canadian Lake and Ocean Navigation Co.	5,557.48
Canadian Lake Transportation Co.	2,819.38
St. Lawrence and Chicago Steam Navigation Co.	6,005
F. E. Hall & Co.	380
S.S. "Seguin"	1,264
Inland Navigation Co.	4,773.68
Collingwood Shipping Co.	785.42
Mathews Steamship Co.	652
Turret Crown	1,028
Net shortage in outturns	50,439.32

There does not seem to be any method by which vessel owners can find out how this grain flies out of the hatches, but at all events it is alleged to disappear somewhere during transport on the lakes. The shortages charged for in the statement I have given are far in excess of what they naturally should be; so much so that it simply meant that these steamship companies were, last year, robbed out of $50,000, when the shortages actually should not have amounted to more than 5,000 bush. all told, allowing for shrinkages and everything else of that kind. The Dominion Marine Association held a meeting here and presented a memorial to the Minister asking that something should be done in this respect. It also adopted a uniform bill of lading which provided that vessel owners would not be responsible for shortages except to the extent of half a bushel for every 1,000 bush. carried. There was a deadlock between the shippers and the carriers, with the result that this arrangement has now been broken, and the steamer interests have to fall back on the same old rules that prevailed before, and there is no doubt that this year they will be unjustly taxed with a shortage of 75,000 bush. There is plenty of money in this business for all concerned; there is no necessity for there being any graft on the part of anybody. The law now provides that the official weighmen at the head of the lakes shall be remunerated out of charges on the grain, and the government is not out one cent on that score. The bill provides for the repeal of sub.-sec. 4, sec. 19 of cap. 83, R.S.C., 1906, and the substitution therefor of a new subsection, as follows: "No grain shall be received into or shipped from a public terminal elevator or an eastern transfer elevator, without being officially weighed, unless both the owner and the carrier, or their duly authorized agents order otherwise."

The bill did not reach its final stages before the session closed.

Dominion Canal Statistics.

In submitting the canal statistics for the year ended Dec. 31, 1908, J. L. Payne, Comptroller of Statistics, states that it has been possible to prepare the report earlier this year on account of the changes in the method of tabulation. The freight carried on the Dominion canals during the year aggregated 17,502,820 tons against 20,543,639 tons in 1907, a decrease of 3,040,819 tons. The traffic for 1908, though below that for 1907, which was the largest on record, was largely in excess of the record for all years prior to 1907. The decrease in traffic in 1908 from the total for 1907 was made up of 2,568,658 tons in east-bound and 472,161 tons in west-bound traffic, and almost wholly related to U.S. business passing through Canadian canals. The following statement shows the tonnage passing through Dominion canals, and also shows that while there was a decrease of 3,129,661 tons in the traffic between U.S. ports, there was an actual increase of 88,842 tons in the business affecting Canadian ports:

	1907. Tons.	1908. Tons.
Canadian to Canadian ports	4,196,891	4,320,668
Canadian to U.S. ports	1,117,830	839 457
U.S. to U.S. ports	13,052,837	9,923,176
U.S. to Canadian ports	2,176,081	2,419,519
	20,543,639	17,502,820

The decrease in traffic tonnage related very largely to iron ore, of which 10,105,016 tons passed through the canals in 1907, and 7,402,672 in 1908. Of wheat, oats and barley, there were considerable increases. There was also an increase of tonnage of Canadian vessels using the canals, of 451,878 tons over the preceding year. The report for 1908 introduces a table showing the origin of cargoes, as follows:

Canal.	Canada. Tons.	U.S. Tons.
Welland	776,245	927,208
St. Lawrence	1,261,651	747,451
Chambly	379,674	123,602
Ottawa	258,527	
Rideau	77,519	12,121
St. Peters	72,015	
Trent Valley	81,690	
Murray	12,595	13,306
Sault Ste. Marie	2,092,231	10,666,985
	5,012,147	12,490,683

The capital expenditure on the Dominion canals, to Mar. 31, 1908, exclusive of the outlay by the Imperial Government on the Carillon and Grenville canal, records of which were destroyed by fire in 1852, are:

St. Peter's	$ 648,547.14
Lachine	11,801,058.03
Beauharnois	1,636,690.26
St. Lawrence River and canals	3,365,317.57
Lake St. Louis	298,176.11
Lake St. Francis	75,906.71
Cornwall	7,234,182.60

Tay	489,599.23
Sault Ste. Marie	4,779,613.84
Soulanges	6,955,317.59
	$93,442,874.58

Marine Insurance Gambling.

The President of the Board of Trade has introduced a bill into the British House of Commons, having for its object the prohibition of gambling in the loss of vessels by maritime perils. The bill provides that, if any person effects a marine insurance without having any bona fide interest in the safe arrival of a ship or in the safety of the subject-matter insured, or a bona fide expectation of such interest, or if any person in the employ of the owner, and not being a part owner of a ship, effects insurance in relation to the ship, and the contract is made "interest or no interest," or "without further proof of interest than the policy itself," or "without benefit of salvage to the insurer," or any other like term, the contract shall be deemed to be a contract by way of gambling on loss by maritime perils, and the person effecting it shall be guilty of an offence, and shall be liable, on summary conviction, to imprisonment for a term not exceeding 6 months or to a fine not exceeding £100, and in either case to forfeit any money he may receive under the contract. Any broker and any insurer through or with whom such contract is effected shall be guilty of an offence and liable on summary conviction to the like penalties if he acted knowing that the contract was within the meaning of this act. Proceedings under this act shall not be instituted without the consent of the Attorney-General, nor against a person (other than a person in the employ of the owner of the ship in relation to which the contract was made) alleged to have effected such contract until an opportunity has been afforded him of showing that the contract was not by way of gambling on loss by maritime perils, and any information given by that person for that purpose shall not be admissible in evidence against him in any prosecution under this act. The bill also provides that the term "owner" as used includes a charterer; and that any person, not being in the employ of the owner of the ship insured, may appeal against conviction.

Vessels Removed from the Register.

The following vessels were removed from the Canadian register during May, for the reasons assigned:—Steam: Kootney, Vancouver, B.C., 5 tons, wrecked; La Reine, Winnipeg, 15 tons, burnt; Lyon C., Montreal, 13 tons, broken up; Minnehaha, Collingwood, 22 tons, foundered. Sailing: Edith, Maitland, N.S., 45 tons, abandoned at sea; Fauna, Windsor, N.S., 120 tons, wrecked; Lakeside, Yarmouth, N.S., 726 tons, stranded; Lost Heir, St. John, N.B., 15 tons, broken up; Marcella Butler, Halifax, N.S., 38 tons, abandoned; Persia, Windsor, N.S., 578 tons, sold to foreigners; Rossignol, Liverpool, N.S., 199 tons, lost; Strathcona, Halifax, N.S., 27 tons, transferred to Newfoundland.

Government Harbors and Piers.

The Dominion Parliament at its recent session passed an amendment to the Government Harbors and Piers Act deleting sub-section 1 of section 1 of the act, and substituting the following therefor:

16. If the minister deems it desirable to lease to any provincial government, municipal council, harbour commission, shipping company, or railway company any wharf, pier or breakwater under the control of the minister, tenders by public advertisement for such lease shall be invited by the minister for a term not exceeding three years, and the Governor in Council may thereupon lease such wharf, pier or breakwater upon such terms and conditions as are agreed on: Provided that nothing in this section shall interfere with the public use of such wharf, pier or breakwater; and provided further that the lessee of such wharf, pier or breakwater shall not charge wharfage tolls or dues in excess of the tolls and dues established under the authority of this act by the regulations for the government of breakwaters, piers or wharfs in Canada as approved from time to time by the Governor in Council.

Sub-section 3 was also amended by the addition of the following:

The minister shall submit within one month after the meeting of parliament a statement of the leases and the conditions thereof made under the provisions of this act.

Ocean Steamship Subsidies.

The following clause has been added to the Ocean Steamships Subsidies Act:—"The Governor in Council may enter into contract or contracts for a term or terms not exceeding in all 10 years with any individual or company, for the performance of a steamship service between a port or ports in Canada and a French port or ports, on such terms and conditions as the Governor in Council deems expedient, and may grant therefor a subsidy not exceeding $200,000 a year, based upon a minimum service of 15 round voyages a year, and a subsidy therefor not exceeding $100,000, and so in proportion for a more frequent service. The amount required for the payment of this subsidy shall be paid out of the Consolidated Revenue Fund of Canada."

The object of this amendment is to

diminish by three the number of voyages required to earn the minimum subsidy of $100,000, previously granted. Under the clause which the present one replaces, the number of voyages required was 18, at a stipulated average speed of 10 knots an hour, and under the new clause, while the number of voyages is decreased by 3, the average speed is raised to 12 knots an hour. It is announced that a contract for such service for one year has been made with the Allan Line.

The Giving and Accepting of Commissions.

The Minister of Marine and Fisheries recently dismissed a number of the Department's employes as the result of the report of Mr. Justice Cassels, upon his investigation. If not the main ground for the dismissal of these officials, one of the grounds was that they had accepted commissions from the firms from whom supplies were purchased for the Government lighthouses, vessels, etc. That the practice has been carried on for years in the service, and that it is the almost universal custom in the mercantile marine, and prevails to a very great extent in nearly every branch of commercial life, is no answer to the charge that the acceptance of such commissions is immoral, if not dishonest. No man can conscientiously give the best of service to his employer, if at the same time he is receiving a commission from merchants from whom he is making purchases for such employer. Men who are scrupulously honest in every respect pay and receive these commissions without giving the slightest thought to whether they are doing right or wrong, merely because it is an established custom. When an established custom is found to be a bad one, it should be abandoned. In abandoning such a custom, whether by a moral awakening among those who follow it, or by the force of a judicial enquiry, some men must suffer. It is true that those most guilty may not suffer, but the lesson has to be learned. The custom of commission paying, and commission taking is a bad one, from an economical as well as from a moral standpoint, and the sooner this is recognized the better it will be for those placed in positions of responsibilty, as well as for the entire community.

Reciprocating Engines and Turbines.

In a discussion at the last meeting of the Institution of Naval Architects in England of the best method of combining the reciprocating engine and the steam turbine in the propulsion of steamships, the proposition was made that the best results would be obtained if the reciprocating engine were of the compound type. A member of the Institution claims that the consumption of 100 lbs. of steam per hour at an initial pressure of 10 lbs. to the square inch would give 2.4 horse-power in a reciprocating engine, and 4.18 h.p. in a turbine. The wide difference between 2.4 and 4.18 h.p. can, of course, be secured only when the steam is of low pressure. The impossibility of carrying the expansion in a reciprocating engine down to the low point that is possible in a turbine, is due to the fact that the low-pressure piston would have to be of such enormous size and weight, that the additional power secured by the increased expansion of the steam would be used up in overcoming the increased friction due to the heavy moving weights. In tramp steamers, and all steamships with a full model at the stern, it is advisable to use a large propeller running at a low rate of revolution. In a triple-screw vessel of this class, it is suggested that the best arrangement would be to use a compound reciprocating engine for the centre propeller, and propellers running at a high speed of revolution driven by two turbines in the wings. It is stated that in the new White Star liners Olympic and Titanic, which, however, are vessels of fine form, the wing propellers will be driven by reciprocating engine, and the centre propeller by a low-pressure steam turbine.

Dominion Ex. Co's Appointments.

W. Walsh, heretofore Assistant to the General Manager and who has also acted as Superintendent of the Southern Division, has been appointed General Superintendent, Lines east of Port Arthur, Ont., office, Toronto. The position of Assistant to the General Manager has been abolished.

D. J. McFeggan, heretofore Chief Clerk, office of Assistant to the General Manager, has been appointed Superintendent Southern Division, office, Toronto.

G. Ford, heretofore Superintendent Western Division, has been appointed General Superintendent, Lines west of, and including Port Arthur, Ont. Office, Winnipeg.

W. M. Gordon, heretofore General Agent, Winnipeg, has been appointed Superintendent Western Division. Office, Winnipeg.

J. Blackhall, heretofore in charge of Money Order Department, has been appointed Superintendent Money Order Department. Office, Toronto.

W. H. Plant, heretofore in charge of Traffic Auditing, has been appointed Auditor Traffic. Office, Toronto.

H. C. Anderson, heretofore in charge of Money Order Accounts Auditing, has been appointed Auditor Money Order Accounts. Office, Toronto.

J. Richardson, has been appointed Line Auditor.

Among the Express Companies.

W. W. Williamson, General Auditor Canadian Ex. Co., Montreal, sailed from Quebec in the s.s. Canada, in June, on a visit to England.

The Maritime Ex. Co. has been granted an extension of the time to Dec. 1 within which it is permitted to use its present forms of freight and money receipts.

The Dominion Ex. Co., has removed its office at New Liskeard, Ont., from the station to the town proper, with L. J. Boland, formerly of North Bay, in charge.

The Board of Railway Commissioners has temporarily approved, until Dec. 1, the forms of contracts issued by the Canadian, Dominion, National and American Ex. Cos.

The Canadian Northern Ex. Co. has opened an office at Lavenham, Man., and has reopened its offices at Sparrow Lake, Lake Joseph and Footes Bay, Ont., for the summer season.

The Board of Railway Commissioners has extended until Dec. 1 the time within which the United States and the Great Northern Ex. Cos. may continue to use contracts, by-laws, regulations, declarations and notices as provided in sec. 353 of the Railway Act.

The claim of the Dominion Ex. Co., to recover $1,300 from John Maughan & Son, was dismissed at Toronto, recently. The claim was for money orders issued by the firm as agents of the company, but it was shown that the orders were signed by H. Maughan, who is not a partner in the firm, and who has since left the country.

At the annual convention of the Associated Boards of Trade of Western Canada, held at Saskatoon, Sask. June 15 to 17, among the subjects discussed were, express charges over the Alberta Ry. and Irrigation Co.'s line, and the question as to the advisability of compelling express companies to deliver goods to all parts of cities and towns.

The Dominion Ex. Co.'s appeal against the judgment of the Court of Revision which upheld an assessment of $450 made on the company's agency at Alliston, Ont., was successful at Toronto, June 10. The town claimed $12.52 taxes and seized a wagon and scale valued at $100 for non-payment. The assessment has been disallowed, and an injunction granted against the proposed sale of the property seized.

Carriage of Acetylene by Express.

In re the application of the Commercial Acetylene Co., of New York, for an order directing express companies operating in Canada and subject to the Board's jurisdiction to classify for transportation of acetylene gas when shipped under the so-called safety storage system, and in the matter of the Board's jurisdiction to make order 6167 of Feb. 4, 1909, directing express companies to carry acetylene gas under rules and regulations prescribed in Official Classification 15, the Board of Railway Commissioners issued order 7087, May 18, rescinding orders 6167 and 6366 of Feb. 4 and 22.

Chief Commissioner Mabee gave the following judgment:—The applicants ask for an order compelling the express companies operating in Canada to accept and carry a commodity manufactured by them, consisting of gas absorbed in asbestos encased in copper or metal tanks. The companies have refused to carry these tanks upon the ground that they are dangerous, or liable to explode, but in the view we take of the matter it is not necessary to deal with the validity of these objections or with the nature of the contracts between the express companies and the railway companies. The fundamental question is whether the Board has power to require express companies to carry any class of commodity they object to or refuse to accept. The group of clauses from sec. 348 to 354 of the Railway Act are, with sec. 317, sub-sec. 6 and sec. 2, sub-sec. 9, the provisions relating to express companies, and show the control that Parliament has conferred upon the Board over them. Is there anything in these sections that empowers the Board to require these companies to grant the applicants' request? The main group of clauses is headed "Express Tolls" and generally speaking they refer chiefly to tariffs and conditions and contracts limiting liability for carriage, and as to these matters all the provisions of the Act relating to freight tolls and tariffs, so far as applicable, are to apply to express companies. Sec. 352 provides that the Board may by regulation, or in any particular case, prescribe what is carriage or transportation of goods by express. Sec. 353, sub-sec. 3 (b) provides that the Board may in any case or by regulation "prescribe the terms and conditions under which goods may be collected, received, cared for or handled for the purpose of sending, carrying, or transporting them by express, or under which goods may be sent, carried, transported or delivered by express by any such company, person or corporation," and it was upon this section that the principal argument was based in support of the Board's jurisdiction. It does not seem to us that this can fairly be read to mean more than that when an express company decided to carry any particular class of goods, the Board may prescribe the terms and conditions under which the collection, receipt, care for and handling of the same shall take place, and this view is strengthened when this clause is found among a group of sections that do not seem to be dealing with anything except tariffs, tolls, and contracts or conditions limiting liability. The "terms and conditions" governing the collection, receipt and handling of goods that the Board might deem proper to impose under this sub-section, relate to the extent to which liability may be impaired, restricted or limited under sub-sec. 3 (a). The Act does not confer upon the Board as wide jurisdiction over express companies as it does over railway companies, and of course jurisdiction is limited to such matters that the Act plainly and clearly covers. There should be no straining after jurisdiction, and as we read this clause it is limited as above indicated. It was also argued that sec. 353 (1) gave jurisdiction, but we think this relates only to contracts "limiting liability" after a company has decided to accept or collect for carriage any particular commodity. Whether it was the intention of Parliament to limit the control of express companies to tariffs, tolls, conditions and contracts or not, it seems to us the above is the only fair reading of the Act, and we are of opinion that express companies are at liberty to exercise their own discretion in refusing to carry by express any particular commodity. This judgment was concurred in by Assistant Chief Commissioner Scott and Commissioner McLean.

Telegraph and Cable Matters.

The Government wireless telegraph station on the Tarte pier in Montreal harbor was opened for business June 25.

The C.P.R. telegraph department is reported to have made a survey for the erection of a telegraph line to Gowganda, Ont.

J. Kent, Manager C.P.R. Telegraphs, left Montreal June 3 on his annual inspection trip through the maritime provinces.

The C.P.R. Telegraph Department has opened offices at International Pier, N.S.; Hemlo, Hurkett, Naughton, Rockcliffe (night only), Ont.; Winnipeg Beach, Man.; Bulyea and Froude, Sask.; and has closed its offices at Stinson, Ont.; Pearce and Shepherd, Alta.

An Ottawa dispatch says, the Civil Service Commissioners have appointed C. P. Edwards of Montreal to be Superintendent of Government wireless telegraph stations under the Department of Marine.

The C.P.R. telegraph staff at Saskatoon, Sask., has recently been moved to larger quarters in Second Ave. Saskatoon is now the repeating station for the territory extending from the main line northerly as far as the wires extend, and westerly to Lacombe, Alta.

A proposal has been submitted to the Pacific Cable Board for the introduction of a reduced rate on the deferred delivery system for cable messages which are not urgent. Such messages would not be delivered until 24 hrs. after being handed in, and the rate proposed is one shilling a word.

In response to a question in the British House of Commons recently, the Postmaster General said that it had been reported to him that damage to one of the trans-Atlantic cables had occurred in the vicinity of Ireland, which had been attributed by the cable company to trawlers. He said he appreciated the seriousness of the interruptions, and he hoped that the steps it was proposed to take to inspect trawlers, with the view of minimizing such danger would prove effective.

The telegraph operators' union has recently reorganized its methods of management. The C.P.R. system has been classed as System Division 1, under one management and one treasury. It has been divided into districts as follows:—Pacific, Western, Central, Lake Superior, Ontario, Eastern and Atlantic, each with separate officers and committee, which, with the President and Secretary, comprise the central executive. C. E. Hill, Toronto, is President, and D. Warner, Winnipeg, Secretary-Treasurer, for the current year.

E. H. Millington, Superintendent, M. C. Rd. Telegraphs, Detroit, Mich., died at St. Thomas, Ont., June 22, following a paralytic seizure June 8, while addressing a Y.M.C.A. meeting there. He was born in Guelph, Ont., in 1860, was educated at St. Thomas, and learned telegraphy in the G.N.W. Telegraph Co.'s employ at London, Hamilton and Montreal. He held the position of Superintendent since 1902, with headquarters at Detroit, Mich. In addition to taking an active part in Y.M.C.A. work, he was connected with the Detroit West Railroad Association and the Detroit Trans-

portation Club, and was also a Royal Arch Mason, Knight Templar, and member of the Railroad City Tent Knights of the Maccabees.

The Telegraph Age has prepared statistical information, showing the various railways on the American continent which have adopted telephones for train despatching, with the mileage on which it is adopted. The results show a total mileage of all the important railways of 213,552 miles, of which 6,681 miles of single track and 4,951 miles of double track, are operated by telephone. Of the Canadian railways reporting, the C.N.R. shows a total mileage of 3,355 miles, 443 miles of single track being operated by telephones; C.P.R., total mileage, 10,396 miles, with 96 miles single track and 18 miles double track operated by telephone; G.T.R., total mileage, 4,644 miles, over none of which the telephone system of train despatching has been adopted. The C.N.R. and C.P.R. contemplate extensions of the system, and the G.T.R. proposes to adopt telephone despatching over portions of its line in the near future.

The 28th annual convention of the Association of Railway Telegraph Superintendents, was held at Detroit, Mich., June 23 to 25, under the presidency of W. J. Camp, Superintendent C.P.R. Telegraphs, Montreal. The association was formed in 1882. W. W. Ashald, Superintendent G.T.R. Telegraphs, Montreal, and W. Marshall, C.P.R. Telegraphs, Toronto, were on the committee in charge of the entertainment of visiting superintendents. On June 25, a trip to Port Huron was arranged at the invitation of the G.T.R., where opportunity was afforded of inspecting the St. Clair Tunnel, recently electrified by the G.T.R., after which the party returned to Detroit by boat. Among the papers read were those on the Necessity for Censoring Railroad Telegrams; the Difference between the Trouble Shooter and the Division Lineman; the Advantages or Disadvantages of using Cable in bringing Telephone and Telegraph Wires into Local Offices; Efficient Office Organization; Telephone Construction; Benefits of Standards in Telegraph and Telephone Construction; Dry Batteries; Wireless Telegraphy; Wire Testing and Care of Wires, and Pole Preservation.

Telegraph Rates for Press Messages.

The Board of Railway Commissioners passed order 7085, May 25, as follows: Re the application of the Times Publishing Co., of London, Eng., with Canadian head office in Ottawa, under the Railway Act and the Act, chap. 61, 7-8 Edward VII., amending the Railway Act, for an order directing the C.P.R. Co.'s Telegraphs, the Great North Western Telegraph Co. of Canada, and the Western Union Telegraph Co. to transmit press messages to the Marconi Wireless station at Glace Bay, N.S., at the same rate as charged to other points along the Atlantic coast of Canada, upon hearing the application in the presence of counsel for applicant and the telegraph companies, the evidence adduced, and what was alleged, it is ordered that the application be dismissed.

Chief Commissioner Mabee gave the following judgment:—We have come to the conclusion that there is not sufficient information before the Board upon which we would be justified in granting the order asked for by the applicants. They desire an order that the C.P.R. Co.'s Telegraphs, the G.N.W. Telegraph Co., and the W.U. Telegraph Co. transmit press messages to the Marconi wireless station at Glace Bay at the same rate as is charged to other points along the Atlantic coast of Canada. They allege that while the usual rate on press messages from Ottawa to Canadian Atlantic coast points is 35c. per 100 words at night, and 50c. per 100 words in the day time, the telegraph companies charge private message rate on all press messages to Glace Bay intended for transmission by Marconi wireless, and that these charges are excessive and discriminatory. It appears from what took place in the discussion that there is in fact as between the cable companies on the one hand and the Marconi system on the other discrimination in favor of the former or against the latter. On the other hand it seems that under the present existing rates as charged, that the sender of a message via Glace Bay over the Marconi system, as a matter of fact pays some 20c. or 30c. less to the land line for delivering at Glace Bay to the Marconi system than the same sender would pay to the cable company, as the share that the cable company under its existing contract with the land line would pay to the land line for the delivery of a message of the like number of words to the cable company at the coast, so that, in so far as the existing charges being discriminatory, and in favor of the cable companies as against the Marconi system, the facts are otherwise. As to the larger system of discrimination that was discussed by counsel as to the system now in operation being alleged to be discriminatory in favor of the American press as against the press of Great Britain or the Transatlantic press, it is not necessary at present to deal with that question. The counsel who appeared in the case suggested that when the larger question of communication generally and the rates as applicable thereto was considered by the Board, and in view of there being no sufficient information before us to deal intelligently with this application, we think that is perhaps the better disposition to make of that matter in the meantime. The attempt here is really to extend the existing system which was voluntarily established by the telegraph companies as to press rates. They have an extremely low rate apparently throughout Canada, and with their connecting lines throughout the United States for press purposes. These rates are applicable or intended to be applicable in so far as Canada is concerned to that class of business that is addressed to newspapers, for publication in the various towns and cities and villages in the Dominion. There is a press rate to Glace Bay. It is said there is a newspaper there, and so I presume that from other parts of Canada the press rates would apply to the publisher of that newspaper at Glace Bay. The attempt here is to have the Board extend, against the will of the telegraph companies, this system of reduced rates for press purposes, in this particular instance, to the London Times published in London, Eng. Now, we have no information whatever as to the reasons that moved the telegraph companies to establish these low press rates. We have no information whatever as to the profit of the telegraph companies, as to whether these rates are fairly remunerative or not, and we have no information as to the volume of business of that class. All of these would be most material to enable the Board to say whether or not it was a fair thing to require the telegraph companies to give to newspapers published on the other side of the Atlantic rates upon a like basis. It was said that press rates could not apply reasonably to cable messages by reason of their being so condensed and so on, and that there was in some instances greater expense imposed upon the telegraph companies by reason of their having to have operators in the cable offices. All of these matters would have to be inquired into carefully before we could deal intelligently with the case, and say whether or not transatlantic press rates should be upon the same basis as domestic press rates. This may be a matter that will be developed when the telegraph rates are looked into as they probably will have to be before very long. All that I have said is, of course, quite apart from the question of jurisdiction that counsel raised, as to which in the meantime it will not be necessary for us to say anything. That feature of it may be deferred for consideration when the balance of the complaint is more fully developed, so that we can dispose of it in a manner that we are unable to at present.

Proposed "All Red" Cable.

At the conference of press representatives of the British Empire held in London, Eng., the following resolution was moved: "That this conference regards it as of paramount importance that telegraphic facilities with various parts of the Empire should be cheapened and improved, so as to insure fuller intercommunication than exists at present, and appoints a committee to report to the conference, at its reassembling on June 25, as to the best means to attain this object."

In moving an amendment, P. D. Ross, Ottawa, advocated an "all red" cable route by Government cable to Canada, and Government control of wires across Canada. He said he had no objection to the original motion, but sent in his notice of amendment in the hope of accomplishing something practical that morning.

He said they should discuss lines of communication, method and press organization separately, and declared that Canada was almost unanimous in favor of bringing in the State to improve the cable service with Britain. The Canadian Postmaster General and the Chambers of Commerce of the Empire favored it. Meetings in Canada had been practically unanimous in favor of it. He believed the Canadian Government had information to the effect that with a State cable the cost of commercial messages could be reduced without loss to the service. There was no reason why the British and Canadian Governments should not go into the matter.

The Earl of Crewe, Secretary of State, for the Colonies, said that on the question of cable development the Government is thoroughly sympathetic, and they would look forward to the business discussions at the conference in the hope of finding a solution of the question. The great development of wireless telegraphy must be borne in mind. The Government was constantly receiving suggestions with regard to wireless developments, the latest being one in relation to the Western Pacific.

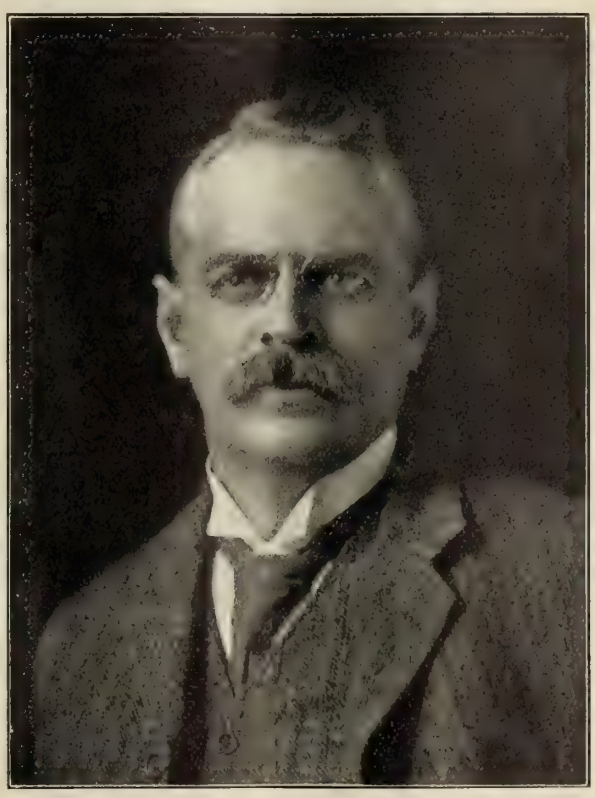
MASTER MECHANICS' ASSOCIATION.

Address of President H. H. Vaughan.

At the annual meeting of the American Railway Master Mechanics' Association, at Atlantic City, N.J., recently, the President, H. H. Vaughan, Assistant to the Vice President C.P.R., read the following address:—

In 1868 six master mechanics attending the Master Car Builders' convention at Dayton, decided to call a general meeting at Cleveland to organize an association of the master mechanics of the U.S. and Canada. At that meeting, which was held later on in the same year, 50 were present, representing many of the most important lines of railways in the country, and a constitution was adopted with the following preamble: "We, the undersigned railway master mechanics, believe that the interests of the companies by whom we are employed may be advanced by the organization of an association which shall enable us to exchange information upon the many important questions connected with our business." These words outlined the object with which the new society began its career, adopting as its purpose the discussion of the best methods of construction and operation of the locomotive at a time when it had just emerged from the experimental stage and was assuming a permanent and fairly uniform design. It has already taken its place in the world as the most powerful and economical engine of transportation, but few even who were connected with it in those days could have foreseen the development it was to undergo, or to the extent to which it would render possible the cheapening and extension of the transportation facilities of the world, the chief factor in the wonderful change that has taken place in the relation of nations, the distribution of food supplies and the growth of manufactures, cities and continents. The association so quietly started was well founded. It had chosen for its aim a work that was needed, and as the railways of the country grew, it grew with them, until now, 41 years later, we have a membership of 961, representing every railway in the U.S. and Canada, and a large number of those in foreign countries. It has been unique in its devotion to the locomotive and its problems alone, but its object has proved worthy of its attention, and we are to-day confronted with problems just as important as those which our predecessors considered, none the less vital to us because they are broader in scope and because financial considerations are now more closely connected with those which are purely technical.

I have always been deeply interested in the history of this association; I have been a great admirer of the work that it has done, and I am going to take this opportunity to speak to you of the success it has obtained, the methods it has used, and the opportunities that lie before it for the future. It is impossible to review in detail the work which has been accomplished; the mass of information contained in our proceedings is too great for individual reference. To even touch on the more important subjects would necessarily result in a mere catalogue. Figures are but a poor way of illustrating results, but in the 41 years of our proceedings, 351 reports of committees, 60 individual papers and 115 topical subjects have been presented and discussed. Of these reports and discussions it may be stated that 126 contain information of special interest at the present time, while 283 are of specific value, either in whole or in part. While this classification is to a certain extent a matter of opinion, it shows most decidedly the general excellence of the work which this association has done. It has investigated almost every conceivable subject connected with the locomotive, its construction, operation and maintenance, developing, criticising and discussing it as it progressed from the little 16-in. eight-wheeler of the sixties to the magnificent freight and passenger equipment of the present day. To say that the wonderful development that has taken place is entirely owing to the work of our associations would be an exaggeration. Apart, however, from the facts determined in our report, the improvements they have suggested, and the practice they have introduced, our meetings have, year by year, been attended by the men engaged in carrying on and advancing this work. They have presented their own views in our discussions, they have heard the views of others, and, whether speakers or listeners, have returned home from our conventions with their opinions modified, new ideas conceived and their experience broadened. With that renewed energy and interest in their work which invariably results from communication with other workers in the same field, they have put into practice suggestions which have been advanced and by their daily work have together built up that mass of knowledge and experience that has resulted in the production of the American locomotive of to-day. In such ways, as well as by the exchange of information, our association has succeeded in its object in being of benefit to the railways by whom our members are employed.



C. E. CARTWRIGHT
Division Engineer C.P.R., Vancouver, B.C.

Our work has not been limited, however, to the exchange of information, but from the very beginning our committees have done far more than obtain and report existing facts or give the opinion they have formed as a result of their inquiries. This has been an important and valuable portion of their work, and our history shows that in the large majority of cases it has been done well. The answers received to the letters of inquiry have frequently indicated a great divergence of opinion or a lack of proper knowledge, while our later experience has justified the committee's decision. Their reports have presented carefully thought out and correct conclusions, which have, through investigation and the standing of the members of the committees, been widely accepted and of valuable assist-

ance in establishing advanced practice. A development of their work to which I wish to call your attention has not, I believe, been generally awarded the credit it deserved, yet it has been the source of the greatest influence exerted by our association, and of the importance of its service to the railways. I refer to the investigation of the scientific principles underlying the questions assigned to our committees, the tests and experiments they have carried out when necessary to determine additional data, and the correct and practical conclusions they have deduced. As a result their work stands to-day as the basis of most of our scientific knowledge of the locomotive, the engineering principles on which it is designed, and the reasons for the methods by which it is operated. I do not mean that we have to look to our committee for all the knowledge that is available on the theoretical mechanics of the locomotive, or for such researches as those on the properties of steam, the strength of materials, or the chemistry of combustion. That has been the work of the mathematician or physicist, and its value in solving the practical problems of engineering is limited by the vast number of factors which enter into actual working conditions. Our work on the other hand, has been the observation and interpretation of results in a scientific manner, and through being carried on by practical men, who have established the relation between the facts they ascertained, and the theoretical principles underlying them, has been sound in its basis, and rendered general in its application.

Probably the best example is the series of experiments on exhaust nozzles, stacks and steam passages. This began with the road tests which were carefully carried out in 1879, the experiments carried out in 1890, which were independent of road conditions, the first record of that kind in our proceedings, and in 1891 tests of a high degree of scientific excellence which indicated the benefits obtained by lowering the nozzle. It was then intended to continue the experiments at Purdue, but when that laboratory was destroyed by fire a locomotive testing plant was constructed by the chairman of the committee which was, with the exception of that at Purdue, the first in existence. The experiments made upon it were the first careful and thorough investigations of the action of the blast and the result of variations in design of nozzles and stacks that had been carried out on an actual locomotive on a testing plant on which uniform working conditions could be maintained. The results were given in the report of 1894 and the great report of 1896, which will be remembered as the best report up to that time presented to this or any other society on a subject connected with locomotive engineering. Supplemented by the more recent work, this subject stands as one of the most scientifically and carefully investigated details of the locomotive, and its history is one of which our association should be proud.

The test of compound locomotives presented in 1892 marked an important advance through recording the first complete and properly conducted road test, using the dynamometer car, indicators, accurate measurement of coal and feed water, the quality of the steam, and the measurement of various losses. These methods, although previously applied along similar lines on stationary plants, yet marked a decided advance in locomotive work, and supplemented by the report on the standard method of conducting locomotive tests have assisted materially in defining conditions that should be observed if accurate results are desired.

The subject of locomotive capacity has always been well handled and our recommendations in this respect have exerted a considerable influence and have been widely used. One report is of special interest, that of 1897, in which was presented the first comprehensive study of the characteristics of the locomotive, since made familiar to us by the work at Purdue University and the St. Louis testing plant. Then, however, the subject was broadly new and such a method of treatment almost unknown, but it marked the important discovery of the locomotive as a machine with definable properties, although of wide variations, as opposed to the indefinite views on its capacity and economy which were previously held.

Other notable reports of a general character were those on high steam pressures in 1898, the loss of power from friction in the machinery of a locomotive in 1906, and the results obtained from briquetted coal in 1908. There have been many others of more detailed nature, but which indicate the valuable character of our experimental work. Among the more important are those on driving wheel tire wear, in which the forces acting were carefully analyzed and compared with the wear actually found, showing distinctly the cause of the trouble; the report on engine truck swing hangers in which indicating apparatus was used to determine the action of an engine with different types of suspension; the report on slide valves, in which the dynamometer was used in the valve stem, and the forces shown compared with those determined by elaborate calculations of the various stresses; the reports on counterbalancing which have established the allowable disturbing weight, and the specifications for materials in which laboratory tests have been compared with an enormous number of service results. Add to these reports others, which by their high degree of merit have had a far reaching effect on our railway work, such as those on ton-mile statistics, repair shops, and the education of apprentices, and the whole forms a series of progressive and leading contributions to the science of locomotive design and operation which has produced a permanent effect and has demonstrated correct principles to the entire locomotive world. For years past locomotive practice in America has been based on scientific knowledge, and such questions as the proportions of heating surface and cylinder capacity, and the designs of front ends have been decided by the analyzed experience of the entire country, or carefully conducted experiments. In foreign countries where no such association as ours has existed, these matters have been left to the judgment of the individual or what are practically rule of thumb methods. Few realize what this work has done for the railroads of the country, but the result is seen in the general success of our locomotive practice.

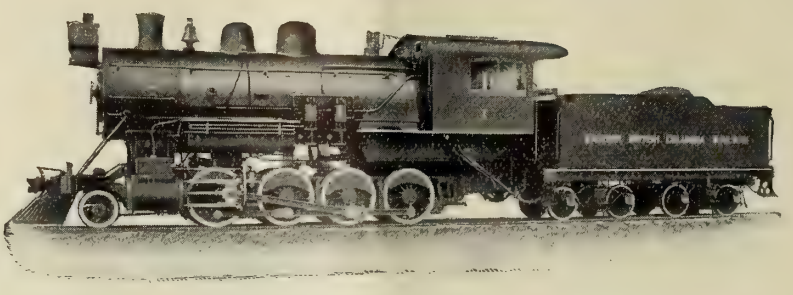
That our association has done its self-assigned work energetically and efficiently, there is no question. Its history is practically that of the modern locomotive in America, and from the years when lengthy discussions on iron versus steel for fire-box plates, the cause of boiler explosions, and the proper thickness for the shell of a boiler were the live issues at our meetings, through the periods of air brakes, injectors, high-pressure boilers, compound locomotives, and testing plants, to our present times with Mallet engines and superheated steam, the association has been untiring in its interest in each new subject that has been introduced and its members individually have shown their interest by their attendance and the large amount of time they have devoted to the work. In no other country has there been any similar society organized to consider the problems of locomotive construction and maintenance exclusively, and we may justly feel that the predominating excellence of American practice is in no small degree due to our efforts. Our work has been well done. We have formed an immense machine for the interchange of information and have added to that our expressed intention, by having also carried out o large amount of experimental investigation.

What further can we do to increase our usefulness and develop into still more important fields of work? I feel that in making suggestions I am recording my own sins of omission, and yet when a man endeavors to seriously consider such a question, ideas occur to him that previously lay dormant or unthought of, and this must be my excuse for recommending now what I have not done. Our opportunities are somewhat different from those of our great sister society, the Master Car Builders' Association. We have no such business relationships to regulate between one road and another as those involved in the interchange of equipment. The possibilities of establishing additional standards that would be extensively used are few, and indeed it is very doubtful whether standards are of much value for the locomotives of an entire country. We must consequently ask ourselves whether we are obtaining all classes of information that are of possible value, and whether our committee reports, individual papers and topical discussions could be advantageously supplemented by any other activities.

We are face to face with several changes in the development of our motive power and the department having charge of it. The steam locomotive, that has been supreme for so many years, is finding its superiority questioned by a new invention, the electric locomotive. The small railway with its individual methods is being absorbed into large systems, and superintending and recording the work under the charge of our members is becoming more difficult. The growth of the large mechanical departments has made it impossible and in fact undesirable for their heads to retain the same touch with minor mechanical and operating details that they formerly had to, and has increased the importance of the financial and business questions they should control as compared to those of a mere technical nature. Unless this association and its members concern themselves seriously with these new and larger problems, there is danger of their work being undertaken by others in place of by ourselves.

The articulated locomotive has in-

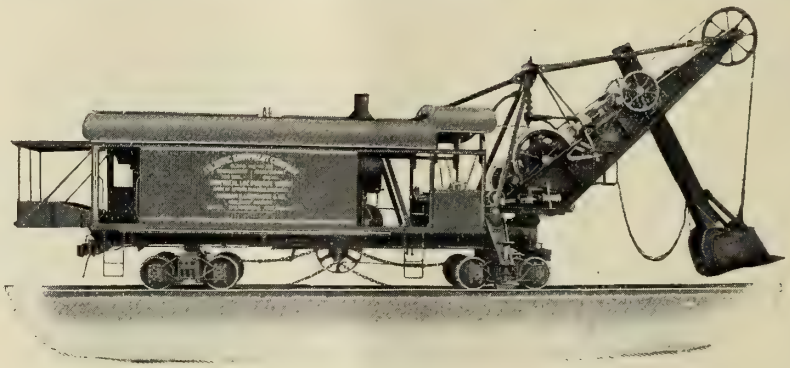
LOCOMOTIVES FOR ALL CLASSES OF SERVICE



Consolidation Type Freight Locomotive, Built for Eastern British Columbia Railway.

Total weight of engine in working order, 186,310 pounds. Weight on driving wheels, 166,100 pounds. Diameter of driving wheels, 51 inches. Boiler pressure, 210 pounds. Cylinders, 20 x 28 inches. Maximum tractive power, 39,200 pounds.

ATLANTIC STEAM SHOVEL



Direct wire rope hoist with but one sheave, instead of chain hoist with from five to seven sheaves, reduces delays and loss of time due to breakdowns, increases the efficiency of the engines, and reduces repair bills as well as fuel consumption.

Finished, interchangeable spare parts always on hand at works.

MONTREAL LOCOMOTIVE WORKS, LIMITED

BANK OF OTTAWA BUILDING, MONTREAL, CANADA

creased the field of the steam locomotive and enabled it to compete on more favorable terms with its younger and more powerful rival. We should be informed of every development in this line, the results and the experiences that are being obtained and the reduction in the cost of transportation that is being realized. We should also, I feel, know more of electric operation, so that as motive power officers we may be better informed as to its advantages and disadvantages, and may be in position to assist in deciding on the proper system to employ. The advice of men experienced in motive power matters is needed by the railways in making decisions on this question. To be of value it must be based on a thorough understanding of the subject and a familiarity with its difficulties. I would urge your giving earnest attention to this important subject, which thus far has received too little consideration by the men who best understand railway motive power conditions.

Systems of organization are changing with the changes in our railways and new methods are being introduced for watching results. We should compare experience as to the efficiency of various types of organization, obtain more information as to the best forms of records, statements that are actually found useful and successful in practical service; comparisons that can be made on a reasonable basis and are interchangeable. I believe we should endeavor to pay more attention to the commercial side of our work than we have done in the past. Excellent as our work has been, it has with few exceptions investigated the technical rather than the business problems of the locomotive. We certainly do not want to decrease our attention to technical matters, but could we not with advantage to our members and to the railways take more interest in, and exchange information with each other more fully on factors connected with the cost of operation? It is true that some years ago a standard postcard performance sheet was adopted and for a time was extensively exchanged, but it fell into disuse, and yet a properly prepared performance sheet, giving figures useful and possible of comparison, would, I feel sure, be of considerable value and interest to us all. The benefits of a membership in this association would be increased by information as to each other's cost of engine house expenses and supplies, of repairs and fuel consumption, the percentage of power in shops and out of service, and a number of other figures that have to be continually watched. Knowledge of the results obtained by others would assist us all in gauging our own performance, in more easily locating the branches in which we are deficient, and in encouraging all to a higher uniformity of accomplishment. In short, without in any way reducing the interest we have in locomotive engineering, we must take up in a far more business like and serious way the financial problems connected with the operation of the locomotive department, the form of organization that will give the best results, the commercial aspects of the work of a motive power official in conducting his department as though he were manager of a large business enterprise.

Take as an instance of comparing costs the operation of our repair shops. We manage the largest collection of factories in the world devoted to one substantially uniform product, the repairing of locomotives, and our total expenditure for this item alone amounts to about $80,000,000 a year. Each and all have the keenest interest in knowing whether our methods are the best and our costs among the lowest. A few years ago comparisons would have elicited little, but some statements of performances which were exceptionally worthy of imitation; to-day, with the progress that has been made in shop engineering, there is no reason why properly trained observers should not record time studies containing the necessary data to prepare intelligent and valuable statements about one operation after another that is performed on substantially the same parts in hundreds of shops from the Atlantic to the Pacific. Such work is possible and it has already been performed in several shops by experienced engineers. If carried on by a properly organized bureau under our auspices, it should be of the greatest value not only to the railways of this country as a whole, but to our members individually. By comparing operation by operation their results with those of other roads, and by analyzing their methods and available machinery, they would be enabled to improve the one or justify their expenditure for additions to the other. This is but one of many questions connected with the operation of our mechanical department which will occur to you, on which some systematic interchange of information would be of material assistance. What I wish most strongly to impress on you is that while still carrying on the technical work that has been so splendidly successful, we should pay more attention to the business problems under our control in which we can be of such mutual service.

Our methods of obtaining information might also, I consider, be supplemented to advantage by effecting closer relations with the various railway clubs. The circular letter has been a practical failure in obtaining general information, and I feel sure that the railway clubs would welcome reference to them of certain subjects for their opinion, especially those on which the experience of the men actually in touch with the work is required. They have a large membership, representing every section of the country and every class of men engaged in locomotive work. On many subjects their views would be of far greater value than those obtained in answer to circular letters, especially on questions similar to those suggested for topical discussion.

A valuable practice which obtained in the past, but which has been discontinued in recent years, was the appointment of a committee to report on the advancement in locomotive practice during the year. There are numerous small improvements devised in railway shops which would be collected by a committee gaining its information from the railway clubs. These improvements, while not of sufficient importance in themselves to justify a report or paper, are of considerable value in our successful operation, and presented by a commitee would have sufficient indorsement to insure their being carefully considered. Co-operation with the railway clubs would also relieve the association of the discussion of details of minor importance which have occupied so much time in the past. Such discussion is necessary, and, in fact, of the greatest value, but it more properly belongs to local societies where local conditions are understood and where it can be carried on just as efficiently and satisfactorily as when occupying the time of a national association.

Our association could, I believe, also be of considerable value with reference to the various legal questions that are arising in connection with locomotive construction and operation, by co-operation with the American Railway Association. We could provide a systematized organization for obtaining the opinions of the railways with the proper representation for each section of the country and a meeting at which important questions could be discussed. Any development in this direction must, however, come at their request, and we can simply indicate our willingness to undertake any work in which we can be of use.

The present system of holding the conventions of the Master Mechanics' and Master Car Builders' associations in two separate weeks prevents many from attending one or the other. The consequence is, the attendance is largely divided, and unfortunately so, as the majority of the members of either association are equally interested in the other. There are two remedies: the first, to hold the two conventions in one week; the second, to unite the two associations. When this was last proposed by Mr. Pulaski Leed in 1898, our executive committee was instructed to confer with that of the Master Car Builders' Association, but, although a report was made to the succeeding convention, suggesting that both conventions should be held during the same week, nothing was done. It is a reflection on the business ability of our mechanical departments to continue an arrangement that necessitates a man being away from his work for practically two weeks at the meetings of important associations, which he should, for his own sake, and that of the railway employing him, attend and take part in. There is to-day no valid reason for maintaining two separate mechanical railway associations. All the officers and members of the executive committee of the Master Car Builders' Association, with the exception of two, 75% of the members of the standing committees, and 70% of the members of the special committees, hold joint department titles.

These figures demonstrate most clearly the amalgamation that has taken place between the car and locomotive departments on our railways. They justify the statement that the time has arrived not for the absorption of one of our associations by the other, but for their uniting into one society, call it, if you please, the American Railway Mechanical Association, which would consider both car and locomotive matters. Such a step is demanded by the spirit of the times, to conserve the forces of our railway officers and economize their time. It is one of the most important questions we have to deal with, and I would impress on you the necessity for action being taken to remedy the present conditions.

The help of our association has been requested by the National Conservation Commission, and it has been informed that our resources would be at their command either for purposes of investigation or to ascertain the recommendations of our members in any respects in

which we could be of service to them. A committee was also appointed which could co-operate with them if required, or with any of their committees, but so far this has proven unnecessary, and our position has simply been that of exhibiting our willingness to perform any work that might assist this important movement. We have, however, our own share to carry of the duty of the nation to posterity. The railways are one of the largest consumers of coal, and in most cases peculiarly indifferent to the economy with which it is used. About 200,000,000 of tons are annually burned in locomotives alone, and we do not therefore need to ask in what direction we can be of service in assisting this commission. Our work is before us. We should individually, and as an association, use every means in our power to impress on our railways the importance of this expenditure, one of the largest we are responsible for. The reduction in the present rate of consumption that it is our duty to make will not only lead to an immense saving in expense, but will assist materially in the conservation of the natural resources of the country.

At our last convention several of our members were asked by members of the American Railway Association to introduce an alteration in our constitution whereby subjects involving legal, transportation, permanent way or traffic questions or for any other reason requiring such action may be submitted as recommendations to the American Railway Association. In response to this suggestion, a committee was appointed who have recommended the change which they consider advisable, which will be submitted to you at this convention. Your executive committee has carefully considered the amendment and indorse it as a progressive step in the orderly grouping of the important associations which are all working toward the development and advancement of American railway work, associations of which our own is one of the largest and oldest. An innovation, however, this amendment certainly is, and it has led me to speak to you of the work this association has done for the railways, its history, its achievements and its problems.

Canadian Pacific Safety League.—In February last at the solicitation of S. Jackson, some half dozen C.P.R. employes met at West Toronto, and as a result a second meeting was held, at which the Canadian Pacific Safety League was organized for the mutual benefit of employes by lessons gained from daily experience on the road, in the shops, etc., so as to insure strict observance of rules and the exercise of caution in handling trains, etc. The league has held 13 meetings and has 63 members enrolled, while from 200 to 300 employes have attended some of the meetings. Upwards of 30 rules and other practical topics have been discussed, and a number of rules have been obtained from the company's Rules Instructor. The league held a smoking concert recently, which was also attended by the General Superintendent, Superintendents, Assistant Superintendents, Master Mechanic, Superintendent of Shops, District Master Mechanics and other officials, General Superintendent Oborne speaking at some length. A league has also been established at Havelock, Ont.

August Birthdays.

Many happy returns of the day to—

W. E. Bishop, Manager Hamilton Steamboat Co., Hamilton, Ont., born at Brantford, Ont., Aug. 10, 1868.

J. F. Chapman, General Freight and Passenger Agent, Bay of Quinte Ry., Thousand Islands Ry., Oshawa Ry., and Deseronto Navigation Co., Deseronto, Ont., born at Frankford, Hastings Co., Ont., Aug. 25, 1863.

F. Barlow Cumberland, Vice-President Niagara Navigation Co., Port Hope, Ont., born at Portsmouth, Eng., Aug. 5, 1846.

G. H. Ham, head office staff C.P.R., Montreal, born at Trenton, Ont., Aug. 23, 1847.

W. P. Hinton, General Passenger Agent, G.T.P.R., Winnipeg, born at Hintonburg, Ont., Aug. 30, 1871.

R. Kerr, Passenger Traffic Manager C.P.R., Montreal, born at Toronto, Aug., 1845.

J. D. McDonald, District Passenger Agent, G.T.R., Toronto, born there Aug. 27, 1855.

T. McHattie, Superintendent of Motive Power and Car Department, Central Vermont Ry., St. Albans, Vt., born at Dufftown, Banffshire, Scotland, Aug. 8, 1854.

C. Montgomery, Assistant Master Mechanic Pere Marquette Rd., St. Thomas, Ont., born near London, Ont., Aug. 29, 1860.

W. E. Mullins, General Manager Costa Rica Rd., and Northern Rd. of Costa Rica, San Jose, born at Stratford, Ont., Aug. 13, 1870.

Canadian Pacific Ry.	329.12
Grand Trunk Pacific Ry.	986.36
	123,157.68

A. Z. Mullins, Commercial Agent, Grand Trunk Ry., in writing from Grand Rapids, Mich., July 7, said: "I have looked over with much pleasure the copy of the Railway & Marine World sent me a few days ago, and as it contains a lot of useful information, I take pleasure in enclosing my first year's subscription to same."

Victorian Suburban Traffic.

We are indebted to T. Tait, Chairman Victorian Railway Commission, Australia, for the following interesting particulars of the vast suburban traffic handled on the state lines. A tally was taken of the number of people passing through the barriers at the Flinders St. and Prince's Bridge stations, Melbourne, for three days, April 20, 21 and 22, as indicative of the number of passengers arriving and leaving each of these stations. While these stations have different names the platforms and tracks are connected and they are only separated by an overhead bridge, and they may therefore be regarded as practically one station. The tally shows the approximate average number of pasengers arriving and leaving this terminal to be 149,548 passengers a day. In this tally, however, account has not been taken of passengers travelling from one train to another at the station nor travelling through the station in the same train, which would no doubt appreciably increase the total number of passengers arriving and leaving the station as ascertained by the barrier tally. However, apart from these passengers who are not, as stated, included in the tally, the average of practically 150,000 passengers a day makes the Flinders St.-Prince's Bridge terminal one of the largest of the kind in the world.

In addition to this terminal the Victorian railways have two other stations which are practically terminal or city stations in Melbourne, viz., Spencer St. and Richmond, at which a very large passenger traffic is conducted. The U.S. fleet arrived in Hobson's Bay on Aug. 29, 1908, and sailed again on Sept. 5, and the number of passengers arriving and departing from the two central terminals, viz., Flinders St.-Prince's Bridge and Spencer St. stations, was as follows:—Aug. 29, 361,145,; Aug. 30, 183,958; Aug. 31, 507,870; Sept. 1, 229,164; Sept. 2, 320,902; Sept. 3, 526,283; Sept. 4, 427,812; a total of 2,557,134 for the seven days. This traffic is exclusive of the usually large inter-suburban traffic that is between stations other than to or from the two central stations named, and of a very heavy traffic to and from the stations throughout the State outside the suburban area. There were probably at least 100,000 people who came to Melbourne from outside the suburban area during the visit of the fleet.

McGillivray Creek Coal and Coke Co.—By an act passed at the recent session of the Alberta Legislature this company is given power to construct an aerial wire rope tramway from its property on sec. 17, tp. 8, range 4, west of the 5th meridian, to connect its colleries with the C.P.R. in sec. 7 in the said township and range, the tramway to be used for the carriage of freight only. For the purpose of constructing the tramway the company is given the right to expropriate certain lands, altogether not more than 5.69 acres. (April, pg. 247.)

The Interstate Commerce Commission in the matter of through passenger routes via Portland, Oregon, has ordered the Northern Pacific Ry. Co., the Union Pacific Lines, and the Chicago and Northwestern Ry. to join in the sale of through passenger tickets between Seattle and other points in the northwest and eastern destinations, via Portland, and to accord through facilities, like the checking of baggage, over this route.

Canadian Pacific Railway Articulated Compound Locomotive.

C. P. R. Articulated Compound Locomotive.

The sample locomotive of the type shown by the outline drawing on this page, and by the cuts on pgs. 559 and 561, has been constructed by the C.P.R. at its Angus shops, Montreal, for service on the Pacific Division on a 2.4% gradient. This locomotive is not quite as heavy as some recently constructed for United States roads, but presents some very interesting features, such as a reheater, to accommodate which the boiler has been cut in two sections, which makes it practically a feed water heater in the front and a steam generator in the rear section. The arrangement of the cylinders is also novel. They are located at the centre of the locomotive, one immediately forward and the other back at the point of articulation. This arrangement of cylinders has a distinct advantage in two ways, first, that it shortens the front end or overhang of the pilot forward of the smokebox, and most important of all, simplifies the receiver or low pressure steam pipe and exhaust pipes to such an extent that but one packed joint is required and the use of expansion sleeves has been dispensed with entirely. The only packed joint on the locomotive is located directly over the pin connecting the front truck or front section of the locomotive with the back, and the only movement on this joint is a swivel one. The extension and contraction have been entirely done away with. The principal details of the locomotive are as follows:

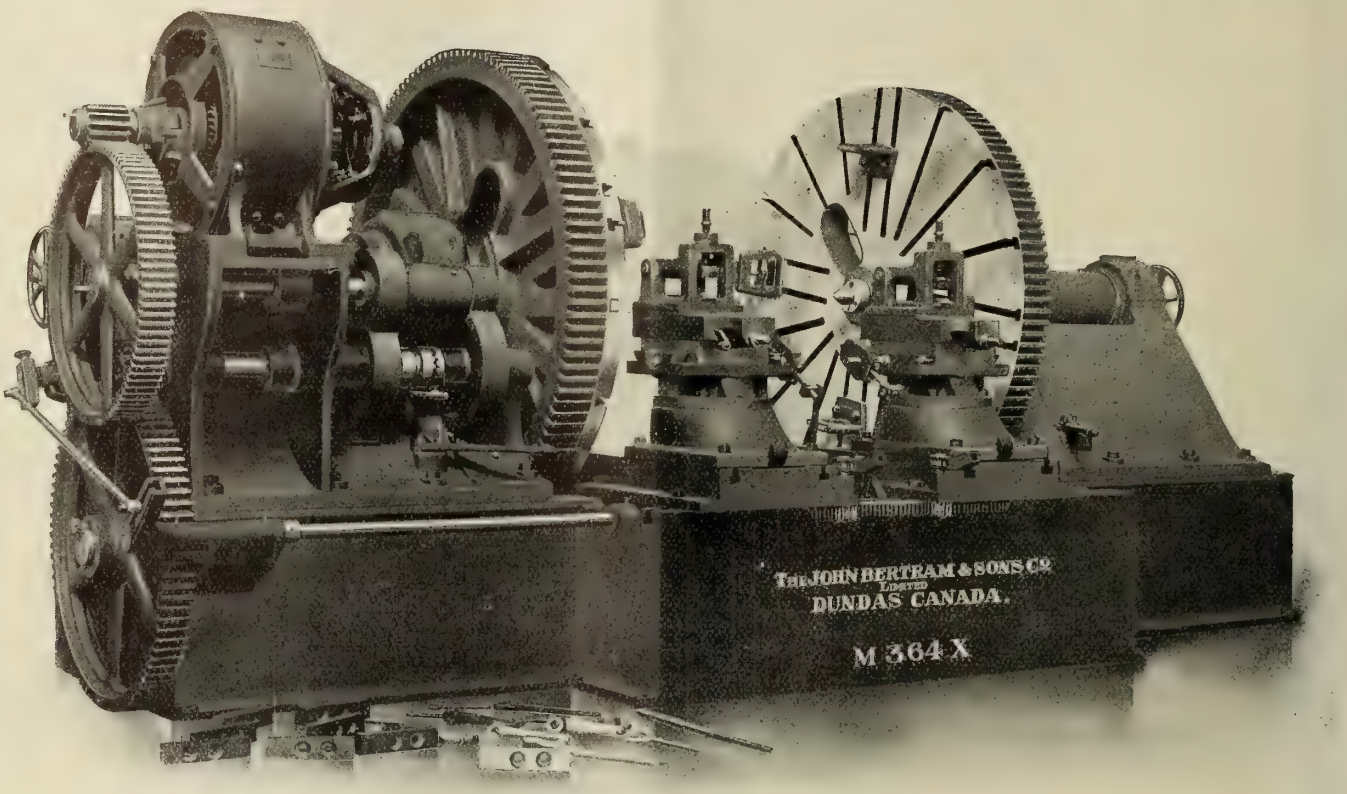
Working pressure, 200 lbs. per sq. in.
Cylinders, 22" and 32½" x 26".
Driving wheels, diameter, 57".
Firebox, length, 120".
Firebox, width, 69⅞".
Grate area, 58 sq. ft.
First ring of boiler, inside diameter, 67½".
Distance between tube sheets, front section, 102".
Number of tubes, front section, 385 2" O. D.
Heating surface, front section, 1722.5 sq. ft.
Distance between tube sheets, back section, 109".
Number of tubes, back section, 289 2" O. D.
Firebox heating surface, 180 sq. ft.
Total heating surface, 3288 sq. ft.
Heating surface, back section, 1385.5 sq. ft.
Reheating surface, 420 sq. ft.
Reheater tubes, outside diameter, 1¼".
Reheater tubes, inside diameter, 15-16".
Live steam pipes, inside diameter, 5".
Receiver pipes, inside diameter, 7".
Exhaust pipe, inside diameter, 9".
H. P. valve, inside admission, 11" diameter.
L. P. valve, outside admission, 12" diameter.
Lap, H. P., 1"; L. P., 1".
Lead, H. P., ¼"; L. P., ¼".
Exhaust clearance, H. P., ⅛"; L. P., ¼".
Light weight of tender, 59,000 lbs.
Loaded weight of tender, 134,000 lbs.
Coal capacity, 12 tons.
Water capacity, 5,000 Imperial gallons.
Weight of engine, working order, 276,000 lbs.
Weight of engine and tender, working order, 410,000 lbs.
Rigid wheel base, 10′ 4".
Total engine wheel base, 35′ 2".
Wheel base, engine and tender, 60′ 7".
Tractive effort, 57,400 lbs.
Weight on drivers ÷ tractive effort = 4.81.
Tractive effort × diam. drivers ÷ heating surface = 995.
Total heating surface ÷ grate area = 56.69.
Firebox heating surface ÷ total heating surface = 5.48.
Weight on drivers ÷ total heating surface = 83.94.

As previously mentioned the boiler consists of a feed water heater, reheater and steam generator, there being four flue sheets, the flues in the rear section being 109 ins. long and 102 ins. in the front section, the reheating compartment being 63 ins. long. The two sections are connected by two equalizing pipes, one of which is below the normal water level, and serves to maintain equal levels in the front and back sections. The other is located above the water line and allows the steam which may form in the feed water heating section to pass to the back section. The injectors discharge into a check valve, which is located underneath the bell stand on the top of the boiler and connects with the front section.

The cylinders are of the crossover compound type, the high pressure being located on the rear engine and the low pressure on the front truck. Live steam is taken from a cast iron throttle secured to the top of the boiler by studs and a ball ring, which makes it perfectly accessible at all times for inspection. This cylinder is of the inside admission type and the steam exhausts from the end of the valve chamber through a steam pipe connected to the saturated header of the reheater. The steam to the low pressure cylinder is supplied by the receiver pipe from the reheater and is admitted to the end of the low pressure steam chest, the low pressure cylinder being, therefore, end admission and central exhaust.

The reheater consists of two cast-iron headers known as saturated and superheated, which are connected together

Bertram Driving Wheel Lathes



BERTRAM NEW DESIGN 104-INCH SWING DRIVING WHEEL LATHE
Equipped with Patent Tool Holder and Teas Patent Drivers.

We manufacture a complete line of Standard and Special Machine Tools for Railway Shop work.

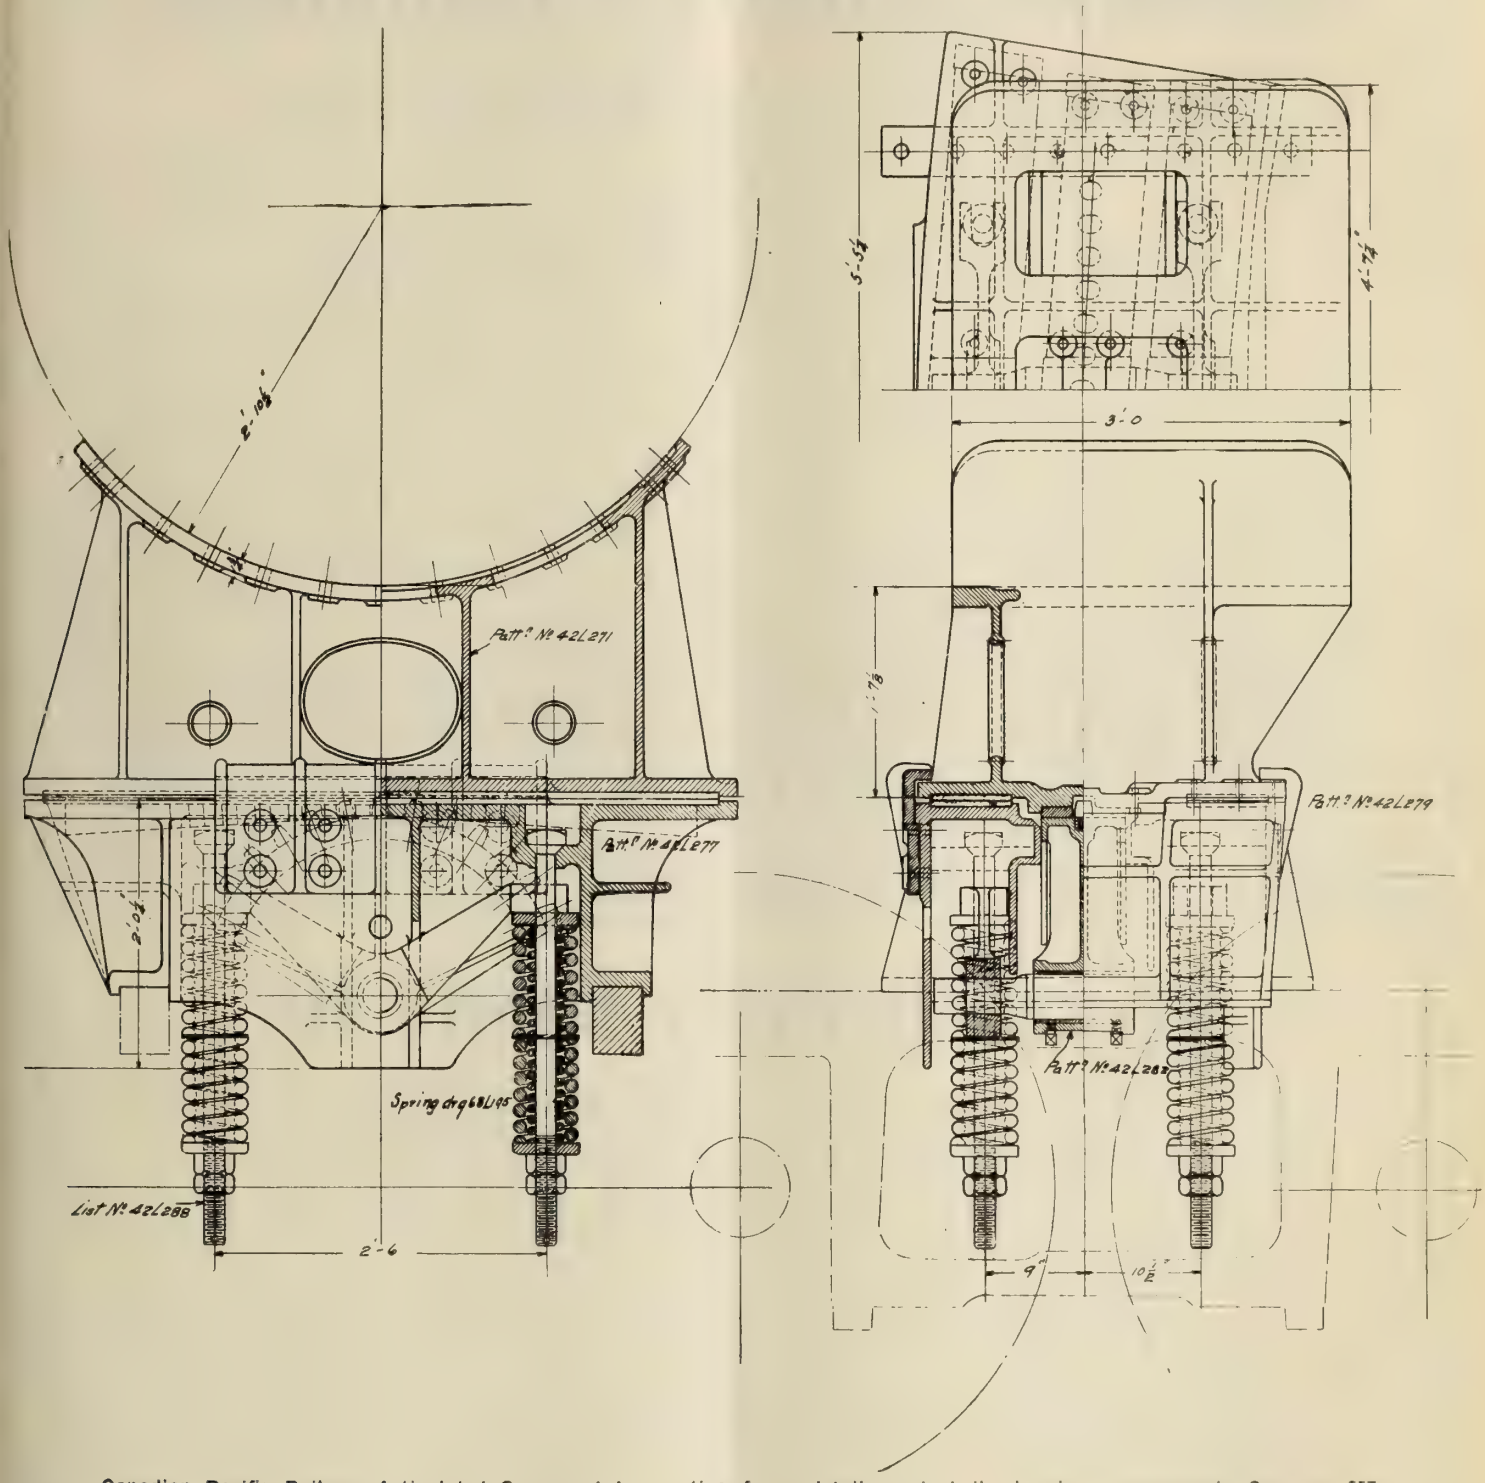
by a series of vertical pipes which extend down into the reheating compartment directly in the path of the hot gases carried from the firebox by the boiler flues. The high pressure exhaust enters the saturated header, passes through these superheated pipes and returns to the superheated header from which it passes to the low pressure cylinder. On tests already made on this locomotive, an increase of temperature between the saturated and superheated headers of 90 to 100 degrees has been obtained, and no indication whatever of cinders lying in this compartment has been observed.

The valve motion is of the Walschaert type, and is similar to that applied to other C.P.R. locomotives. The reversing and linking up of the motion is controlled by a steam cylinder operated from a handle in the cab. This gear is positive in its action, and consists of a steam cylinder 6 ins. in diameter, which furnishes sufficient power to reverse the engine under all conditions. To insure smoothness of action, an oil cylinder or dash pot of the same size as the steam cylinder has been set opposite to and in the same line. By the closing of the valve on the oil cylinder the motion is retarded gradually and brings the steam cylinder piston to rest without shock. An additional lock in the form of a latch has been provided which insures of the radius bar being carried in the desired position. The operating handle in the cab by which the gear is controlled, has three distinct movements, as follows:— 1, to lift the latch clear; 2, to turn on the steam to the desired end of the operating cylinder; 3, to open the passage in the oil cylinder or dash pot. By this arrangement the latch will first be lifted and the steam cannot be turned on until it is clear. The oil cylinder in the meantime prevents any movement until it has been opened. To stop the movement of the reverse arm the operation is reversed, that is, the first movement of the handle closes the oil valve, bringing the parts to rest gradually, shuts off the steam and finally closes the latch.

The means by which this locomotive is



Canadian Pacific Railway Articulated Compound Locomotive, frame details, main boiler bearing arrangement. See page 557.

Galena-Signal Oil Company

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated GALENA COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

GUARANTEE COST per thousand miles for from one to five years, when conditions warrant it.

Maintain EXPERT DEPARTMENT, which is an organization of skilled railway mechanics of wide and varied experience. Services of Experts furnished free of charge to patrons interested in the economical use of oils.

STREET RAILWAY LUBRICATION A SPECIALTY

Galena Railway Safety Oil

Made especially for use in Headlights, Cab, Classification and Tail-lights, and for Switch and Semaphore Lamps. Burns equally well with the long time as with the one day burner, with or without chimney, as the burner requires.

Is pure water white in color; high fire test; low cold test, and splendid gravity.

Please write to home office for further particulars.

CHARLES MILLER,

PRESIDENT

made to take the sharp curves over which it will have to operate, is very interesting and novel. The locomotive when running ahead is guided on to the curve by the front engine which itself is a truck and moves sidewise against the resistance of the sliding bearing plates and inclined surfaces of the roller centreing attachment. The arrangement of this is shown very clearly in the line drawing which is reproduced herewith. The total resistance to lateral movement at the front support is 3,990 lbs., which is composed of 1,300 lbs. frictional resistance, and 2,690 lbs. furnished by the inclined surfaces. When backing on to a curve the front truck of the tender is designed to swing the front end of the boiler outward across its support on the front truck by means of the radius bar which is connected rigidly in a horizontal direction to the frame of the rear engine. A force of 12,000 lbs. is exerted on the end of this radius bar which relieves the pressure on the flanges of the back engine and prevents any possibility of derailment.

The tender is of the standard steel construction, the outside sills of which are 10 in. and the inside 13 in. channels. The tank is of the C.P.R. standard freight design, having semi-water bottom and inclined surface to deliver the coal conveniently for the fireman. Its capacity is 5,000 Imperial gallons of water and 12 tons of coal.

We are indebted to G. I. Evans, chief draughtsman C.P.R. locomotive department, Montreal, for the foregoing very interesting description of the C.P.R.'s latest achievement in locomotive building, which there is every reason to believe will be followed by the building of a number of similar locomotives of the same type.

The Dominion Government paid bonuses for iron and steel production in Canada for the year ended Mar. 31, 1909, $2,467,306, against $2,797,861 for the year ended Mar. 31, 1908.

During May, 23 employes were killed in the course of their work on Canadian railways, and 19 injured. Of the fatalities, 9 were due to being run over, 5 to explosions of dynamite, 3 each to drowning and to falling material, 2 to falls, and one each to being struck by a passing object and to tools. Of the other accidents, 6 were due to falls, 5 to falling material, 3 to collisions, and one each to being caught between cars, to being struck by a passing object, to derailment, to an explosion of steam, and to machinery.

National Transcontinental Ry. Shops.

On page 563 is an isometric view of the N.T.R. shops to be erected near Winnipeg, and for which a contract was let recently. The numbers given below refer to similar numbers on the view.

No. 2.—THE LOCOMOTIVE SHOP comprises a tank shop 95′ x 184′ 9″, a boiler shop 110′ x 184′ 9″, and a machine and erecting shop 174′ 9″ x 615′ 7″, the size of the entire building being approximately 823′ x 174′. The shop has a self-supporting steel frame resting on concrete foundations, brick superstructure walls, wood sheathing roof, with skylights and copper ventilators. Main floor of 3″ pine. The building has 26 engine pits and two transfer tracks running through the machine and erecting shop, and one track through the boiler and tank shop. The shop is heated by hot air, forced through underground concrete ducts by engine fans. The saw-tooth roofs shewn on the drawing have been changed to two rows of skylights running longitudinally over the machine shop portion.

No. 3.—THE STORE HOUSE comprises a storehouse 62′ 6″ x 262′, surrounded by a platform 10′, 11′ and 25′ wide. The platform is of reinforced concrete, while the storehouse has a reinforced concrete floor and roof, reinforced concrete wall columns and brick walls. The ceiling is of sufficient strength to serve as a floor for a future story.

No. 4.—THE FORGE SHOP is 104′ 9″ x 264′ 9″, with a lean-to 22′ x 21′, two stories high for toilet rooms. The shop has a self-supporting steel frame resting on concrete foundations, brick superstructure walls, wood sheathing roof, with a monitor running the full length. The main floor is of cinders, and the lavatory floors are of concrete.

No. 5.—THE OIL HOUSE comprises an oil house 30′ x 40′, surrounded by platforms 10′, 12′ and 20′ wide. The platform is of reinforced concrete, while the oil house has reinforced concrete main floor, cellar floor plain concrete, reinforced concrete wall columns and roof, with brick walls. In the cellar are storage tanks for lubricating and illuminating oils.

No. 6.—THE POWER HOUSE is 154′ 9″ x 110′, having a brick wall separating the boiler room from the engine room. The steel frame of the building is self-supporting, resting on concrete foundations, brick superstructure walls, wood sheathing roof, skylights and copper ventilators, concrete floor in boiler room, oiled maple floor in engine room. The power required in the different shops will be generated in this building, and steam for all the indirect heating apparatus and direct radiating systems will be supplied from the boilers through underground mains.

No. 7.—THE LOCOMOTIVE CARPENTER Shop, Pattern Shop and Pattern Storage is a two-story building 104′ 9″ x 74′ 9″, having self-supporting steel frame resting on concrete foundations, brick superstructure walls, reinforced concrete roof and first floor, ground floor of wood. The upper story is of fireproof construction throughout. The shop is heated by steam, direct radiation.

No. 8.—THE STEEL WATER TANK has a capacity of 100,000 gallons, the base of tank is 125′ above ground. All water for fire mains and shop use will be taken from this tank, which is supplied from the Red River.

No. 9.—THE CHIMNEY is 200′ high, average inside diameter 11′.

No. 10.—THE GREY IRON FOUNDRY comprises a main foundry room 204′ 9″ x 134′ 9″, with a brass foundry partitioned off from it, a cleaning room 64′ 9″ x 82′ 4½″. On the west side of the foundry are the sand bin sheds of wood construction, while the coke and scrap bins, also of wood construction, are on the east side adjoining the cupola room. The main building has a self-supporting steel frame resting on concrete foundations, brick superstructure walls, wood sheathing roof with ventilators. Main floor, moulding room and brass foundry are of moulding sand. Cleaning room has a cinder floor. The heating system is similar to that of the locomotive shop, hot air blast.

No. 11.—THE CRUDE OIL STORAGE is 25′ x 62′, walls and floors of plain concrete, roof of reinforced concrete, with copper ventilators. In this building are four storage tanks for the fuel oil for the forges in the forge shop.

No. 12.—THE FROG AND TRACK SHOP is 64′ 9″ x 104′ 9″, with a self-supporting steel frame resting on concrete foundations, brick superstructure walls, wood sheathing roof, with copper ventilators and skylights. Main floor of 3″ pine, lavatory floor, concrete. The shop is heated by steam, direct radiation.

No. 13.—THE STORES PLATFORM is 56′ x 180′, of reinforced concrete construction, with a light steel frame superstructure 58′ x 151′. The superstructure is covered with wood sheathing roof, galvanized corrugated iron on ends and sides. The platform is designed to carry a load of 300 lbs. per sq. ft.

National Transcontinental Railway Shops, in course of erection near Winnipeg. See page 555.

Bins comprise an iron storage bin 30′ x 60′, coal storage bin 30′ x 30′, coke storage bins 30′ x 20′, scrap bins 30′ x 100′, with platforms 5′ and 10′ wide. The size of the entire building is 30′ x 210′. The stores portion is a wooden structure resting on concrete foundations; the scrap bin portion is of wood construction throughout.

No. X.—THE ROUND HOUSE has a concrete foundation supporting brick walls, wood sheathing roof. There are brick fire walls every sixth stall. It is heated by a hot air blast system similar to the locomotive shop. As shown on the drawing, it has a capacity for 18 locomotives, but it was subsequently decided to enlarge it, so as to accommodate 24 locomotives.

The Engineers Club of Toronto held its annual excursion July 16 and 17. The party left Toronto by the C.P.R. for Bobcaygeon, from whence they sailed through the Kawartha Lakes and the canal to Lake Simcoe, returning to Toronto by the Toronto and York Radial Ry.

"Well, Uncle Zeb," said his neighbor, "'your boy's come back from college, and I reckon he's got a good ejjication."

"No," groaned Uncle Zeb. "Them four years is plumb wasted. I tried 'im on a railroad guide the other day, an' he couldn't make head nor tail of it, any more'n the rest of us could!"

Orders by the Railway Commissioners.

Beginning with June, 1904, we have published in each issue summaries of orders passed by the Board of Railway Commissioners, so that subscribers who have filed our paper have a continuous record of the Board's proceedings. No other paper has done this.

The dates given of orders, immediately following the numbers, are those on which the hearings took place and not those on which the orders were issued. In many cases orders are not issued for a considerable time after the date assigned to them.

7279. June 1.—Authorizing Essex Terminal Ry. Co. to take additional lands for altering line at Windsor Fair Ground and Driving Association, Windsor, Ont.

7280. June 18.—Ordering C.P.R. early each spring, and before water commences to run, to clear away ice and snow underneath bridge over Buffalo Lake, Man.

7281. June 18.—Directing Canada Atlantic Ry. (G.T.R.) to provide crossing where the railway abuts T. Wilson's land in Carleton county, Ont.

7282. June 18.—Approving Salisbury & Harvey Ry. by-law authorizing A. Sherwood, General Manager, for Receiver, to prepare and issue tariffs of traffic tolls.

7283. June 18.—Extending for one year from June 30, 1909, the time for the use by the Vancouver, Victoria & Eastern Ry. of the crossing at rail level, of its railway by the B. C. Electric Ry. at Park Ave., Vancouver.

7284. June 8.—Authorizing C.P.R. to construct spur at Mile End, on Hyde & Webster's premises, St. Louis, Montreal.

7285. June 8.—Dismissing application of J. Ethier, Montreal, to amend order of Jan. 23, 1905, authorizing G.T.R. to take certain lands, then the property of City of Ste. Cunegonde, Que.

7286. June 18.—Approving deviation in C.P.R. main line near Steel siding, Thunder Bay district, Ont.

7287. June 18.—Authorizing Vancouver & Lulu Island Ry. to construct its Westminster & Eburne branch across the Trapp and Byrne roads in Burnaby district, B.C.

7288 to 7290. June 18.—Authorizing Toronto Suburban Ry. to erect electric wires across C.P.R. and G.T.R. in York tsp., Ont.

7291 to 7293. June 9.—Authorizing City of Edmonton, Alta., to cross at level, with its lines, the G.T.P.R. and C.N.R., and to erect power wires across the G.T.P.R. and C.N.R.

7294. June 17.—Reporting to Governor in Council for sanction Bay of Quinte Ry. by-law re spitting in cars or on railway premises.

7295. June 14.—Approving additions and changes in proposed Supplement no. 1 to Canadian Freight Classification 14; with one or two exceptions.

7296. June 19.—Approving proposed station layout of C.N.R. at Saskatoon, Sask.

7297. June 19.—Directing Grand Valley Ry. to fence certain portions of its line within 60 days.

7298. June 19.—Dismissing application of C.P.R. for order directing G.T.R. to receive passenger and baggage cars of C.P.R. and deliver same to C.P.R. at junction of Ottawa Northern and Western Ry. with Can. Atlantic Ry. near Sappers Bridge, Ottawa.

7299. June 16.—Directing Western Counties Electric Co. to erect wires across G.T. railway track and telegraph wires at Elgin St. subway, Brantford, Ont., before July 1, 1909.

7300, 7301. June 17.—Authorizing Boggy Creek Rural Telephone Co. to erect wires across C.N.R. in Saskatchewan.

7302, 7303. June 21.—Authorizing Alberta Government to erect wires across C.P.R. in centre of Bow Island; and just west of Grassy Lake, Alta.

7304. June 19.—Authorizing Bell Telephone Co. to erect wires across P.M. Rd. at St. Thomas, Ont.

7305. June 17.—Authorizing Village of Streetsville, Ont., to erect electric light wires across C.P.R.

A Practical Man's Opinion

W. E. Fowler, who recently resigned his position as Master Car Builder, Canadian Pacific Railway, in order to take a much needed rest, has a continental reputation. The splendid work he has done for the C.P.R. is evidenced by its car equipment, and his commanding position in the Master Car Builders' Association, in which he rose to the Presidency, has made him well known to the entire railway mechanical community. In response to a request for an opinion on our paper, Mr. Fowler wrote our Managing Director recently, as follows:

"The Railway and Marine World has always appealed to me, in the first place as being distinctively Canadian and patriotic, which should be a strong recommendation to every man, whether born in the Dominion or who has cast his lot with this great growing country.

"I would also state positively that there is no railroad journal with which I am acquainted which has such a comprehensive report of everything connected with railway and marine interests as does your paper, and the wealth of detail given every month is such, that for Canadian railway news there is no occasion to go farther, everything being found in your paper.

"A very special feature of your paper is the space which is devoted to personal matters connected with railway and marine men, and I am sure that every subscriber feels as I do, that this is one of the most interesting parts of your paper, touching as it does on the lives and personal affairs of every railway man of importance in the Dominion.

"I have no doubt that a very large part of the success of your paper is due to the great amount of work you put into it yourself, feeling, I suppose, that if a thing is required to be well done, there is nothing like personal execution."

Letters, such as the one above reproduced, are among the pleasant experiences of business life, and are a distinct encouragement to even better work for the future.

7306. June 18.—Authorizing G.T.R. to construct branch line on certain streets in Sarnia, Ont.

7307. June 18.—Authorizing C.P.R. to construct spur line to the Manitoba Government's premises, Gonor, Man.

7308. June 18.—Authorizing Shawinigan Water & Power Co. to erect transmission wires across Q.M. & S.R. near St. Gregoire, Que.

7309. June 19.—Authorizing C.P.R. to construct branch line at Kamloops, B.C.

7310. June 18.—Authorizing C.P.R. to construct bridge over Yamaska River, on its Eastern Division.

7311. June 21.—Approving location of the C.N.O.R. through Hisworth and Nipissing tsps., Parry Sound district, Ont.

7312, 7313. June 21.—Approving location and plans of C.P.R. station at Moffat and Mountain, Ont.

7314. June 21.—Authorizing G.T.R. to connect its track with Owen Sound Portland Cement Co. sidings, Owen Sound, Ont.

7315. June 21.—Approving change in location of E. & N.R. line from mileage 100 to 127, Alberni branch, B.C.

7316. June 21.—Authorizing London Tp. Telephone Co. to erect wires across G.T.R. two miles north of Denfield station, Ont.

7317. June 19.—Rescinding order 6520, of Mar. 15, approving plans of crossing of C.P.R. by London St. Ry. at Richmond St., London, Ont.; and directing C.P.R. to serve forthwith upon London St. Ry. plans of interlocker proposed to be installed.

7318. June 19.—Dismissing application of Village of Coteau Station for order directing G.T.R. to cease wilfully permitting its engines and cars to stand at level crossing for longer than five minutes at one time; and in shunting to obstruct public traffic on highway for longer than five minutes at one time.

7319. June 17.—Directing G.T.R. to install automatic electric bell with cut-out opposite Morrisburg station, Ont.

7320. June 19.—Approving plans of C.N.R. location through Saskatoon, Sask., also proposed subway in that city.

7321. June 21.—Authorizing U. Archambault to erect electric light wires across G.T.R. in Ste. Martine, Que.

7322. June 19.—Directing C.N.R. to install interlocking plant where its line crosses C.P.R. at Gladstone, Man.

7323. June 22.—Approving revised location of portion of C.P.R. New Westminster branch in New Westminster, B.C.

7324. June 22.—Authorizing G.T.R. to reconstruct 14 bridges on its Eastern division.

7325. June 22.—Amending order 3258, of July 6, 1907, by striking out clause "h."

7326. June 19.—Dismissing complaint of G. B. Janes & Co. of Orillia, Ont., that rates charged by railway companies on cheese box veneers are excessive.

7327. June 22.—Approving plan of proposed iron bridge, to replace wooden bridge carrying Avondale Ave., Stratford, Ont., across G.T.R.

7328. June 22.—Directing C.P.R. to install gates at crossing of Columbia Ave. leading to Evans, Coleman & Evans wharf, Vancouver, B.C.

7329. June 23.—Authorizing C.P.R. to open for traffic the portion of its second track, Ignace section, Ont., from mileage 115.0 to 119.8, and from mileage 120.0 to 127.8.

7330. June 23.—Approving Grand Valley Ry. Standard Passenger Tariff, C.R.C. 3.

7331. June 8.—Directing C.P.R. to construct a subway under its tracks at Iberville St., Montreal.

7332. June 22.—Authorizing G.T.R. to construct spur line to the Frost Wire Fence Co.'s premises, Hamilton, Ont.

7333. June 22.—Authorizing C.P.R. to reconstruct bridges 42.55 on its Lake Superior division and 0.3 on its Eastern division.

7334. June 22.—Authorizing Western Counties Electric Co. to erect wires across T.H. & B.R. on Oak St., Brantford, Ont.

7335. June 23.—Authorizing C.P.R. to

construct spur line for Asquith Milling Co., Asquith, Sask.

7336. June 23.—Rescinding order 7299, of June 16, 1909, directing Western Counties Electric Co. to maintain its electric wires across G.T.R. at Elgin St. subway, Brantford, Ont.

7337. June 22.—Amending order 7023, of May 10, 1909, approving supplement 1 to Canadian Classification 14 by striking out clause 2 of order.

7338. June 21.—Dismissing application of C.P.R. for order rescinding or varying order of committee Privy Council, dated May 13, 1898, ordering C.P.R. to leave opening in trestle bridge carrying branch line of its railway to Dixon's Mills, Peterboro, Ont., across the channel of the Otonabee River, by permitting C.P.R. to fill said opening and substitute for the trestle a solid embankment.

7339. May 4.—Ordering G.T.R. and C.P.R. to protect crossing at College St., Lennoxville, Que., by folding gates, to be installed within four months.

7340. June 23.—Authorizing C.P.R. to construct its railway across highways in Medonte tsp., Ont., at mileage 12.96, 0.07 and 0.13, on Y of Georgian Bay & Seaboard Ry.

7341. June 24.—Authorizing C.P.R. to construct additional tracks near Murray station, McKim tsp., Ont.

7342. June 24.—Authorizing C.P.R. to construct additional track across Orr St., Calgary, Alta.

7343. June 23.—Dismissing four complaints of Produce Merchants Ass'n of Montreal, also ordering absorption of wharfage and port warden's fee on cheese subsequently exported from Montreal. This order is given in full on another page.

7344. June 25.—Authorizing C.P.R. to reconstruct bridges, 20.2, Blagdon Brook, Atlantic division, and 3.4, near St. Sabine, Eastern division.

7345.—June 24.—Authorizing Miniota municipality to erect wires across C.P.R. at Arrow River, Man.

7346. June 24.—Authorizing Riverside Telephone Co. to erect wires across C.P.R. in Saskatchewan.

7347. June 23.—Authorizing Warman Village, Sask., to erect wires across C.N.R.

7348. June 24.—Authorizing Bell Telephone Co. to erect wires across M.C.R., near Welland, Ont.

7349. June 25.—Reporting to Governor in council for sanction of C.P.R. by-law 94, re spitting in cars and on railway premises.

7350. June 23.—Amending order 5102, of July 29, 1908, authorizing G.T.R. to install interlocking plant at crossing of C.P.R. east of Weston Rd., West Toronto, by providing that work of installing interlocker be performed by C.P.R.

7351. June 25.—Approving plans of Ottawa and New York Ry. drawbridge over Cornwall Canal.

7352. June 25.—Amending order 7076, of May 26, authorizing G.T.P.R. to construct railway, at grade, across a certain highway in Northern Alberta by striking out the last clause.

7353, 7354. June 25. — Authorizing C.P.R. to construct industrial spurs for Consolidated Mining & Smelting Co., Kootenay district, B.C., and George and Robinson, Macleod, Alta.

7355. June 25.—Authorizing G. Coultis & Son to erect wires across G.T.R. at King St., Thedford, Ont.

7356. June 25.—Authorizing T.H. & B.R. to construct spur to G. Ritchie's premises, Hamilton, Ont.

7357. June 25.—Authorizing C.P.R. to construct spur in Lethbridge, Alta.

7358. June 25.—Authorizing C.N.O.R. to take, for purpose of avoiding a sinkhole, part of lot 12, con. F, Medora tp., Ont.

7359. June 3.—Approving plan of crossings of Dufferin, Dunn, Jamieson, Dowling, Sunnyside, and Howard Aves. and Indian Rd., Toronto, by G.T.R. and C.P.R., and also several streets in Etobicoke tp., Ont.

7360. June 26.—Extending for 60 days from July 1, time within which work is to be done in connection with Richmond Rd. crossing, Ottawa.

7361. June 3.—Ordering G.T.R. to provide better protection at Sunnyside crossing, Toronto.

7362. June 29.—Recommending to Governor in council for approval, Niagara, St. Catharines & Toronto Ry. rules and regulations.

7363. June 29.—Approving location of C.P.R. Manitou Lake branch from mileage 0 to 51.33.

7364. June 29.—Approving location of C.P.R. Langdon north branch from mileage 45 to 60.

7365. June 29.—Authorizing Georgian Bay & Seaboard Ry. (C.P.R.) to open for traffic the portion of its line between Coldwater Jct. and to Maple Island on Hog Bay, near Victoria Harbor, Ont., 13 miles.

7366. June 29.—Approving location of C.P.R. Langdon branch, from Langdon, Alta., north-easterly from mileage 0 to 45.

7367. June 25.—Dismissing application of Transportation Bureau Montreal Board of Trade, for order directing reduction from second class rate on ingot tin, in Canadian Classification, to third class, as in Official Classification.

7368. June 28.—Amending order 7284, of June 8, authorizing C.P.R. to construct spur at Mile End, St. Louis, Montreal, across Sanguinet St., by adding the word 'indemnified" in the first line of the second clause.

7369. June 29.—Authorizing Esquimalt & Nanaimo Ry. to construct railway across highways at mileages 96.9, 91.92 and 95.93 of its Wellington and Alberni branch, B.C.

7370. June 29.—Authorizing C.P.R. to open for traffic portion of second track Kenora section, from mileage 13.8 to 16.0.

7371 to 7373. June 29.—Authorizing Alberta Government to erect wires across C.P.R. at Erskine and near Medicine Hat, Alta.

7374. June 29.—Authorizing Creston Power, Light & Telephone Co. to cross C.P.R. at Creston, B.C.

7375, 7376. June 29.—Authorizing Malahide & Bayham Telephone Association to erect wires across C.P.R. at Griffins and east of Tillsonburg, Ont.

7377 to 7386. June 29.—Authorizing Alberta Government to erect telephone wires across C.P.R. at 10 points.

7387. June 21.—Authorizing Bell Telephone Co. to erect wires across T.H. & B.R., near Cainsville, Ont.

7388. June 30.—Rescinding order 7338, of June 28, dismissing C.P.R. application for order rescinding or varying order of Railway Committee of Privy Council, of May 13, 1898, under which C.P.R. was ordered to leave opening in trestle bridge carrying branch to Dixon's Mills, Peterboro, Ont., as order 7338 dismissing application was issued by mistake.

7389. June 29.—Authorizing G.T.P.R. to construct 5 bridges in British Columbia.

7390. June 29.—Authorizing C.P.R. to construct spur for Lethbridge Brewing & Malting Co., Lethbridge, Alta.

7391. June 29.—Authorizing C.P.R. to reconstruct bridges 23.53 on its Atlantic division, and 101.5 on its Pacific division.

7392. June 29.—Authorizing North American Telegraph Co. to erect wires across Brockville, Westport and North-Western Ry. at Soperton, Ont.

7393. June 21.—Dismissing application of Red Mountain Ry. for amendment to order 2115 (making applicable the general interswitching order) prescribing the rates to be charged for interswitching between Red Mountain Ry. and Columbia and Western Ry. at Rossland, B.C., amending previous order of Feb. 14, 1906.

7394. June 28.—Authorizing G.T.R. to expropriate lands additional to those it now occupies between Wyndham St., Market St., and its right of way, at Guelph, Ont.

7395. July 2.—Authorizing Hamilton Grimsby & Beamsville Elec. Ry. to construct spur through lands owned by A. McKay, of Saltfleet tsp., Ont., to connect the H.G. & B.E.R. with the G.T.R.

7396. July 3.—Authorizing M.C.R. to construct interchange track with G.T.R. on Bathurst St., London, Ont.

7397. July 3.—Authorizing G.T.P. Ry. to construct its railway across three highways in Alberta.

7398. July 3.—Authorizing C.P.R. to construct crossing over its main line in Coleridge, Alta.

7399. July 5.—Authorizing C.P.R. to reconstruct bridge 105.6 over Victoria road, Pembroke, Ont.

7400 to 7411, June 30.—Authorizing Alberta Government to erect telephone wires across C.N.R. at 11 points, and over C.P.R. at one point.

7412 to 7423, July 2.—Authorizing Bell Telephone Co. to erect wires across C.P.R. at 5 points in Ontario, and 1 in Quebec; across the G.T.R. at 5 points in Ontario, and across the Pere Marquette Rd. at 1 point in Ontario.

7424. June 30. — Authorizing Alberta Government to erect telephone wires across the C.N.R. about a mile west of Mundare, Alta.

7425. July 5.—Authorizing Caradoc & Ekfrid Telephone Co. to erect wires across G.T.R. on town line between Caradoc and Ekfrid tps., Ont.

7426. July 5. — Authorizing Perth & Christies Lake Telephone Association to erect wires across C.P.R. at third line of Bathurst tsp., Lanark county, Ont.

7427, 7428. July 5.—Authorizing Miniota Municipality, Man., to erect wires across G.T.P. Ry. 3½ miles east and two miles northwest of Quadra.

7429. June 30.—Authorizing J. P. Ernst, New Hamburg, Ont., to erect wires across G.T.R. about 1 mile east of Baden station, Ont.

7430, 7431. July 5.—Authorizing Alberta Government to erect wires across C.P.R. ¾ mile east of Taber, Alta., and at Deveber Ave., Taber.

7432, July 5.—Authorizing Morris & Kemp to erect telephone wires across C.P.R. 1.8 miles north of Chaudiere Jct., Que.

7433. July 3.—Authorizing P. Sylvester, of St. Cuthbert, Que., to lay water main under C.P.R. one mile east of station.

7434. July 5.—Authorizing C.P.R. to

construct its railway across highway, at mileage 13.52, Glenelg tsp., Ont.

7435. July 5.—Approving proposed deviation Manitoulin & North Shore Ry. between stations 739 and 1140, between Sudbury and Little Current, Ont.

7436. July 5.—Approving location and plans of Central Ontario Ry. station and freight shed at Bloomfield, Ont.

7437. July 6.—Authorizing Alberta Government to erect wires across C.P.R. 2½ miles west of Rosenroll.

7438. July 6.—Authorizing T.H. & B.R. to reconstruct or alter bridge 45.83 in Ancaster tsp., Ont.

7439. July 6.—Authorizing Quebec city to lay water and drainage pipes under C.P.R. in St. Malo ward, Valier, Que.

7440. July 6.—Authorizing G.T.R. and C.P.R. to appeal from order dated June 9, 1909, to the Supreme Court of Canada, upon all questions of law involved, in re application of City of Toronto for order directing G.T.R. and C.P.R. to carry York and certain other streets under said companies' tracks.

7441. June 30.—Reporting to Governor in Council for sanction V.V. & E. Ry. & Nav. Co. by law re spitting in cars and on premises.

7442. July 7.—Authorizing Bell Telephone Co. to erect wires across G.T.R. at Duke and Durham Streets, Lindsay, Ont.

7443. July 6.—Authorizing British Columbia Telephone Co. to erect wires across E. & N. R. at east end of railway bridge, at Victoria, B.C.

7444. July 7.—Authorizing J. M. Bergstrom to erect telephone wires across C.P.R. at Wauchope, Sask.

7445 to 7454, July 7.—Authorizing Alberta Government to erect telephone wires across C.P.R. at different points.

7455 to 7458. July 7.—Authorizing city of Saskatoon, Sask., to lay water and drain pipes under C.N.R. and C.P.R. at four points.

7459. July 7.—Authorizing town of Chesley, Ont., to lay water main under G.T.R. at four streets.

7460. July 8.—Approving by-law of Atlantic & Lake Superior Ry. authorizing C. R. Scoles, general manager, to prepare and issue tariffs of traffic tolls.

7461. July 8.—Authorizing Hull Electric Co. to operate its cars over C.P.R. tracks in Hull, Que.

7462. July 7.—Authorizing C.P.R. to construct bridge 15.83 over Bremner River, on its Schreiber sec., Lake Superior division.

7463, 7464, July 6.—Approving plans of G.T.R. combination passenger and freight station at South Indian, and Corinth, Ont.

7465. July 8.—Authorizing city of Lachine, Que., to cross, by a subway, for pedestrians only, the G.T.R. between 15th and 16th Streets.

7466. July 8.—Authorizing C. R. Coutlee, engineer in charge of Georgian Bay Ship Canal, to construct highway crossing over C.P.R. at Temiskaming village, Que.

7467. July 6. — Authorizing Sandwich East municipality, Ont., to construct public crossing across P.M.R. at Edna Street.

7468. July 8.—Authorizing C.P.R. to construct spur line to Waterloo Mfg. Co.'s premises, Portage la Prairie, Man.

7469. July 6.—Authorizing Malahide & Bayham Telephone Co. to erect wires over M.C.R. about a mile east of Tillsonburg station, Ont.

7470. July 7.—Approving location of C.P.R.'s Moose Jaw north-westerly branch, from mileage 148.76 to 190.63.

7471. July 7.—Reporting to Governor in Council for sanction British Yukon Ry. Co. by-law re spitting in cars and on premises.

7472. July 8.—Directing railway companies to file with the Board returns of all accidents at highway crossings. This order is given in full on another page.

7473. May 4.—Respecting fences, gates for crossings and cattle guards. This order is given in full on another page.

7474. July 6.—Dismissing complaint of residents of Watford, Ont., alleging poor and unsatisfactory train service on G.T.R.

7475. July 6.—Authorizing Ottawa Terminals Ry. Co. to take lands at Ottawa for accommodation of traffic at central passenger station.

7476. July 6.—Authorizing Canada Southern Ry. to construct subway at Tecumseh road, to divert Tecumseh drain and locate water pipe along Wellington Ave, in Sandwich West tsp., Ont.

7477. July 6.—Dismissing application of Brunette Saw Mill Co. for order changing location of V.V. & E. Ry. & Nav. Co.'s railway in New Westminster, B.C.

7478. July 6.—Approving proposed deviation of V.V. & E. Ry. & Nav. Co.'s railway from Sapperton to Fraser River Lumber Co.'s Mills, at New Westminster, B.C.

7479. July 6.—Authorizing G.T.R., C.P.R., and other railway companies concerned, to appeal from order of the Board made re complaint of British Oil Company, Toronto, May 19, to Supreme Court of Canada. This order is given in full on another page.

7480. July 6.—Directing that St. Phillipe, St. Ferdinand, and Metcalfe, Sts., St. Henri, Montreal, be protected between 6 a.m. and 7 p.m. by watchmen to be appointed by the G.T.R.

7481. July 6.—Directing C.P.R. to construct highway crossing at Gainsboro Ave., Nepean tsp., Ont.

7482. July 7.—Dismissing complaint of Dominion Millers' Assn., respecting C.P.R. charges for elevating and storage of grain at Fort William, Ont. This order is given in full on another page.

7483. July 6.—Dismissing application of Town of Campbellford, Ont., for order directing G.T.R. to provide better passenger and train service connections between Campbellford and Toronto.

7484, 7485. July 9.—Authorizing C.N.Q.R. to construct its lines and tracks across public roads in St. Stanislas, Parish, Que., mileages 69.77 and 69.30, west of Quebec bridge.

7486. July 6.—Dismissing complaint of J. B. Grenier, of St. Tite, Que., alleging inefficient and unsatisfactory train service of C.N.Q.R., between Quebec and Montreal, and of lack of station accommodation at Heronville, Garneau, and St. Tite, Que.

7487. July 10.—Authorizing C.P.R. to construct bridge at mileage 97.8, Windsor section, Ontario Division, and rescinding order 5796, April 8, in so far as it authorized construction of the said bridge.

7488. July 9.—Directing G.T.R. to provide night watchman at Wellington St. crossing, Hamilton, Ont.

7489. July 9.—Authorizing switching connections between Bay of Quinte Ry. and Kingston & Pembroke Ry., at Harrowsmith, Ont.; Bay of Quinte Ry. to install and maintain semaphores at its own expense on each line of railway.

7490. July 6.—Authorizing C.N.O.R. Co. to cross and connect with Ottawa & Prescott Ry., at mileage 56.6, west of Hawkesbury, Ont.; interlocking plant to be installed.

7491. July 9.—Approving C.N.O.R. freight tariff, C.R.C. 74, for use on its line east of and including Toronto and Sudbury.

7492. July 6.—Refusing application of Rochester tsp. for order varying order 6981, May 10, authorizing construction by C.P.R. of bridge 92.1, Windsor section, Ontario Division.

7493. July 10.—Authorizing C.N.O.R. to open for traffic its line from South Nation River to Rockland, 12 miles.

7494. July 7.—Disallowing Canadian Ex. Co.'s notice of cancellation of rate of 30c. per 100 lbs. on freight shipments from Queenston, Ont., to Toronto, which was made effective by the company June 14.

7495. June 25:—Directing G.T.R. and Bay of Quinte Ry. to file a joint rate on bituminous coal from Black Rock, New York, and Suspension Bridge, N.Y., to Marlbank, Ont. This order is given in full on another page.

7496. July 6.—Authorizing Town of Prescott, Ont., to lay sewer outlet pipe across C.P.R. tracks.

7497. July 10.—Approving Atlantic, Quebec & Western Ry. Co.'s by-law authorizing A. Lemieux, General Manager, to issue traffic tariffs.

7498. July 6.—Dismissing application of Herbert Bingham, of Chrysler, Ont., and others, for order directing Ottawa & New York Ry., to rebuild its station at Chrysler, Ont., about 1,657 ft. north-westerly from its previous station site.

7499. July 6.—Dismissing application of Montreal Park and Island Ry., for authority to extend its railway along St. Denis St., Montreal.

7500. July 7.—Dismissing application of Manitoba Grain Growers' Assn., for order directing C.P.R., C.N.R., and G.T.R., to reduce charges for elevating and storage of grain at Fort William and Port Arthur, Ont. This order is given in full on another page.

7501. July 13.—Authorizing C.P.R. to construct its railway across highways in Tay tsp., Ont.

7502. July 8.—Approving location of C.P.R. and C.N.R. Union Station at Maryfield, Sask.

7503. July 9.—Authorizing C.N.O.R. to construct steel bridge over Rideau River, near Ottawa, mileage 56.9 west of Hawkesbury, Ont.

7504. July 9.—Authorizing C.P.R. to construct bridge 40.8, near branch of Elk River, Cranbrook section.

7505. July 12.—Authorizing C.P.R. to construct station at mileage 25.7, Ekfrid tsp., Ont.

7506. July 10.—Authorizing V.V. & E. Ry. & Nav. Co. to divert portions of certain streets, and to build its railway on certain streets in Princeton, B.C.

7507. July 9.—Authorizing G.T.R. to construct two additional tracks along and across Geddes St., Clifford, Ont.

7508. July 9.—Authorizing Town of Midland, Ont., to lay drain pipe under G.T.R.

7509. July 9.—Authorizing Bell Telephone Co. to erect wires across T.H. & B.R., 1½ miles west of Fenwick station, Ont.

7510. July 12.—Authorizing J. A. Lake to erect telephone wires across G.T.R. at Jackson's Point, Ont.

7511 to 7513. July 9.—Authorizing Bell

7526. July 12.—Authorizing Bell Telephone Co. to erect wires across G.T.R., 2½ miles north of Newmarket, Ont.

Location of Switch Stands.

A circular published in our July issue stated that the Board of Railway Commissioners in view of the numerous accidents which had occurred, owing to the location of switch stands being too close to the track, considers it advisable that railway companies be required to remove all switch stands and other obstructions, to a distance 6 ft. clear of the main line, and in cases where high switch stands cannot be removed to this distance, they be replaced by dwarf switches. The Board, therefore, proposed to issue a general order, requiring within a reasonable time, the removal of all such switch stands as above set out, or the replacing, by dwarf switches, as well as the removal of all other obstructions.

The matter was considered at the Board's sittings, July 7, when several railway companies' representatives showed that such an order would be practically impossible to carry out, and the Board concluded not to go any further with the matter.

The Toronto Globe, which ought to know better, in reporting a sitting of the Board of Railway Comimssioners held at Fort William recently, spoke of the Assistant Chief Commissioner as "Hon. D'Arcy Scott." The habit of giving unauthorized titles to people in official positions is getting nauseating. There is only one member of the Board of Railway Commissioners who is entitled to the prefix "Hon." and that is the Deputy Chief Commissioner, Hon. M. E. Bernier, who is a member of the Privy Council of Canada.

The Interstate Commerce Commission in the matter of the Kalispell Lumber Company et al versus the Great Northern Ry. Co., et al, has ordered the G.N.R. Co. to establish and maintain rates on lumber and other forest products from certain points on its line in Idaho and Montana to certain points on its line located on the Pembina-Port Arthur line, which are certain differentials under the lumber rates from the Spokane group. It has also ordered the G.N.R. and the Minneapolis, St. Paul & Sault Ste. Marie Ry. to establish and maintain through routes and joint rates on lumber and other forest products between certain points in Idaho and Montana, and certain points in North Dakota.

Canadian Northern Railway Finances.

Lazard Bros. & Co., of London, Eng., recently offered for subscription £600,000 4% first mortgage debenture stock, principal and interest unconditionally guaranteed by the Saskatchewan Government, and the same amount of similar stock guaranteed in the same way by the Alberta Government, the subscription price being £97 10s.%. The stocks are repayable at par in London in 1939, interest payable half yearly. The stock will also be secured in each case by a first mortgage on the railway lines mentioned below. The net proceeds of the issue will be applied by the C.N.R. Co. to the construction and equipment of railways specified in the trust deeds, in respect of which the guarantees have been authorised by the Provincial Legislatures, and for that purpose will, in accordance with the provisions of the trust deeds, be paid to the credit of a special account in the name of the Treasurer of each Province, and by him paid out from time to time against engineer's certificates. These lines are as follows:—In Saskatchewan: from the C.N.R. near Maryfield, southwesterly and westerly, about 135 miles; from the C.N.R. near Dalmeny, northerly and north-easterly, about 40 miles; from the C.N.R. near North Battleford, northwesterly, about 50 miles. In Alberta: from Strathcona to Calgary, about 230 miles; from Edmonton north-westerly towards the Peace River, about 50 miles. The stocks now issued represent a bonded indebtedness at the rate of $13,000 a mile of lines above referred to, but power is reserved under the trust deeds, subject to special sanction by the Legislatures of the Provinces, to increase the amount up to $15,000 per mile, all ranking pari passu. The stocks will also rank pari passu with similar stocks or bonds to be issued for the construction of certain other railways specified in the trust deeds, at a rate not exceeding $15,000 a mile, and with any similar stocks or bonds which may be issued for the construction of any additional railways in Saskatchewan and Alberta, which the C.N.R. Co. may hereafter be authorised to construct, and in respect of which the Governments of the Provinces may be authorised by their Legislatures to give their guarantee.

At about the same time Sperling & Co., London, Eng., offered for subscription £800,000 4% perpetual consolidated debenture stock of the Canadian Northern Ontario Ry. Co., the subscription price being 92%, interest payable half yearly. The stock is perpetual and irredeemable. The net proceeds of the issue will be applied towards the construction of a railway to be constructed from an international bridge on the Niagara River, over which an entry will be secured into Buffalo, through Niagara Falls, Hamilton, Toronto, Oshawa, Port Hope, Cobourg, Trenton, Belleville and Smiths Falls to Ottawa, where it will join the existing line to Montreal and Quebec via Hawkesbury. The prospectus states that:—"No railway could be constructed in any other portion of the Dominion, which, with the same mileage, would traverse a district so densely populated, and it will provide the C.N.R. system with a very advantageous route between five of Canada's greatest cities and the points on the Niagara River, over which passes the greater part of the commerce between Canada and the U.S." The Debenture Stock will be secured by a first mortgage on the line already constructed from Hawkesbury to Ottawa, and on the new line to be constructed from Ottawa to Buffalo. It will also be secured by a fixed mortgage upon all other C.N.R. lines, present and future, ranking after any mortgages thereon now existing or hereafter to be created for the purpose of securing either bonds or other securities of the company guaranteed by the Dominion or Provincial Governments, and by a floating charge upon the whole of the residue of the company's undertaking and property (other than land and money subsidies). The company reserves the right to issue further stock or bonds ranking pari passu with the stock now offered, provided that the principal amount of all the stock and bonds at any time outstanding shall not exceed an amount equal to $30,000 a mile of line for the time being constructed or under contract to be constructed after deducting the amount for the time being outstanding of any Government guaranteed securities secured on such line in priority to the stock and bonds, and an amount equal to the amount by which any such Government guaranteed securities exceed $30,000 per mile of the line on which they are secured as a first charge, and an amount equal to the cost price to the company of all rights-of-way or land purchased or to be purchased by the company for terminals or any other purposes in connection with the construction, operation and maintenance of its railways, and an amount equal to the cost price to the company of any bonds, stocks, shares or securities of other companies deposited hereafter with the trustees as security for the stock.

The above mentioned issues were underwritten in London, W. Mackenzie being over there in connection with the matter and returning to Toronto, July 10. Further particulars of construction work to be undertaken as a result of these flotations, are given under the head of Canadian Northern Ry. construction on another page.

C. A. Westcott, conductor on the C.N.R. Goose Lake branch, was committed for trial at Saskatoon, Sask., July 7, on a charge of misappropriating cash paid to him for transportation.

F. C. Salter, European Traffic Manager, Grand Trunk Ry., London, Eng., writes: "I read the Railway and Marine World religiously, and it certainly keeps me posted with the information I want on railway matters."

The C.P.R. is reported to have deposited with the Royal Trust Co. $2,500 to be used for the education of the son of the constable who was killed while endeavoring to capture a train robber in British Columbia recently.

The Dominion Government at various times loaned old light weight Intercolonial rails to the Halifax Cotton Co. to the value of $4,335; to the Canada Steel Co., to the value of $11,964.66, and to Lowe, Reid & Co., to the value of $1,056.61, for the construction of sidings, and has ever since been carrying the amounts as assets. A committee of the House of Commons was appointed last session to look into these matters, and as a result it was decided to no longer look upon the amounts as assets, and they will not again appear in the public accounts.

That Hard Plate

is typical of the Joyce-Cridland construction. Every one of the jacks has a tempered steel hard plate to take up thrusts due to the lever and to the load.

The frames are of crucible steel and there is not an ounce of superfluous metal anywhere. The jacks have high carbon steel bearings. The pawls and lever trunnions are chrome nickel steel.

In the automatic geared jacks force is multiplied by means of a gear and pinion and they are powerful enough to lift locomotives or loaded freight cars.

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction Betterments.

Alberta and Great Waterways Ry.—The act incorporating this company, which was passed last session of the Alberta Legislature, authorizes the construction of a railway with branches from Edmonton north-easterly to the west end of Lac la Biche, thence to Fort McMurray, and from the west end of Lac la Biche to the east end. The capital is fixed at $7,000,000, and bonds to the amount of $40,000 a mile may be issued. The work of construction is to be commenced within one year, and completed within four years, but the Lieut. Governor in council has power to grant extensions of time if the progress of the work is delayed by causes beyond the control of the company. Upon the completion of each successive 50 miles the company shall provide accommodation for freight and passengers and unless otherwise ordered by order in council the line when put in operation shall as far as practicable be continually operated with a passenger and freight service. The company may construct telegraph and telephone lines, and enter into agreements with other companies. The Government is given power to purchase the entire undertaking of the company at any time for the then fair value, but this option is not to be assigned by the Government. The provisional directors are: W. R. Clarke, B. R. Clarke, of Kansas City, Mo.; W. Bain, Winnipeg, Man.

The Legislature also passed an act authorizing the Government to guarantee the company's bonds to the amount of $20,000 a mile of its lines of railway (branches and sidings to be computed in making up the mileage, but not the mileage of terminals in Edmonton), and to the additional extent of $400,000 in respect of the cost of terminals in Edmonton. The total mileage for which bonds are to be guaranteed is not to exceed 350 miles. The company shall not, except with the Government's sanction, amalgamate with any other company, or lease or transfer the railway or its franchises, or adopt any method of placing the railway under the management or control in whole or in part of any other railway or railways in any manner whatsoever. (April, pg. 249.)

Alberta Northwestern Ry.—The Alberta Legislature at its last session granted an extension of time for the commencement and completion of this projected railway. (Oct., 1908, pg. 711.)

Alberta Oil, Coal and Wheat Ry.—See Pincher Creek, Cardston and Montana Ry.

American Midland Ry.—A despatch from Valley City, North Dakota, says this much discussed and widely advertised railway project seems to have gone up in smoke. The company proposed to construct a railway to connect up Winnipeg, Man., with a port in the Gulf of Mexico. The despatch states that the company is not properly incorporated; that it has no equipment or cash adequate to construct the line; and that the courts have decided that it cannot yet acquire land by expropriation for a right-of-way. (Sept., 1907, pg. 663.)

Calgary and Knee Hill Ry.—The Alberta Legislature at its last session granted an extension of time for the construction of the first 30 miles of this projected railway. (April, pg. 247.)

Canada Western Ry.—An engineering party is working from Fernie, B.C., in connection with this projected line. The proposed route is from Calgary southwesterly. It will probably run from 20 to 30 miles west of the present C.P.R. line to Macleod, and west of the Porcupine Hills, following as closely as possible the valley of the Old Man River to Pincher Creek. It will then follow the easiest route to the International boundary, where it will connect with a line to be constructed to Butte, Montana. The line will pass through the Sheep Creek coal fields, in which P. Burns & Co. are said to be interested, and within easy reach of the Livingstone coal fields. It will open up a large section of agricultural land in South-western Alberta, as well as afford transportation for the timber and coal resources of a large section of the foothills of the eastern slope of the Rocky Mountains. The survey party, which is in charge of —. Godard, expects to be in the field for about three months. Press reports state that construction will be started as soon as the surveys are completed. The line is being constructed in the interests of the Chicago, Milwaukee and St. Paul Ry., and its western extension the Chicago, Milwaukee and Puget Sound Ry., with a special view to securing a coal supply for the western portion of its system. (May, pg. 355.)

Fort William Terminal Ry. and Bridge Co.—There has been deposited with the Dominion Department of Public Works and with the Registrar of Deeds at Port Arthur plans and descriptions of the company's proposed bridge across the Kaministikwia River, and also plan and description of its proposed bridge across the McKellar River, at Fort William, Ont. Application is being made for an order in council approving of the plans. (July, pg. 477.)

Graham Island Ry.—The British Columbia Legislature at its last session incorporated a company with this title to construct a railway from near Lena Island, on Skidegate channel, Queen Charlotte Islands, following the valley of the Hanna Island northerly to Camp Robertson, Camp Wilson, and on to Shields Island, Rennel Sound, with a branch to Masset Inlet. The capital is fixed at $1,000,000, and the company may issue bonds for $30,000 a mile. It is authorized to make traffic and other agreements with steamship, railway, telephone or telegraph companies, and it may also own and operate steam and other vessels. The provisional directors are: P. D. Hillis, E. W. Tracksell, L. L. Butler, Z. B. Hamilton, Victoria, B.C. (April, pg. 247.)

Halifax and Southwestern Ry.—The construction of a branch line from Nictaux to the Canada Iron Corporation's mines, about 4 miles is projected. The Corporation is making surveys at Port Wade, N.S., in connection with this, for the construction of terminal facilities, and the installation of an extensive ore handling plant, with a capacity of 2,000 to 3,000 tons an hour.

Hardy Bay and Quatsino Sound Ry.—The British Columbia Legislature at its last session incorporated a company with this title to construct a railway from Hardy Bay westerly to Coal Harbour, Quatsino Sound, and branch lines. The capital was fixed at $250,000, and the company is authorized to issue bonds for $25,000 a mile of railway constructed. The company is given the usual powers to construct telephone and telegraph lines, and to enter into traffic and other agreements. The head office is to be at Victoria, and the provisional directors are: Col. H. Appleton, F. Appleton, Victoria, B.C., and F. J. Marshall, London, Eng. (April, pg. 247.)

Hudson Bay.—There are yet two survey parties in the field working out details in connection with the railway to Hudson Bay, projected by the Dominion Government. One of these is at Fort Churchill, and the other at the mouth of the Nelson River. Their work has to do with the harbors and terminals, and it is expected that they will have completed their work by the end of August.

The staff, working at Winnipeg, has practically completed the plans, the estimates and the quantities and grades of material to be excavated. It was expected that its detailed report would be in the hands of the Department of Railways by July 31.

Intercolonial Ry.—Replying to representations made by the Halifax, N.S., Board of Trade, F. P. Brady, member of the Government Railways Management Board, said, July 10, that the question of removing the old round-house and other buildings at Halifax in order to increase the yard room, was under consideration. (July, pg. 447.)

Kootenay and Alberta Ry.—The Alberta Legislature last session incorporated a company with this title to construct a railway from near Cowley, on the C.P.R. Crow's Nest branch, southwest through the Beaver Valley directly or nearly directly west to North Kootenay Pass Rocky Mountains; and from near Cowley, south easterly through Pincher Creek, the Fishburn settlement, Cardston, and thence almost directly to Coutts, or where the Great Northern Ry. reaches the International boundary. The capital is fixed at $500,000; bonds to the amount of $20,000 a mile may be issued; agreements may be made with other railway companies, and telegraph and telephone lines may be constructed. The provisional directors are: F. M. Steel, J. E. Woods and C. Kettles, Pincher Creek, Alta. (April, pg. 247.)

Northern New Brunswick and Seaboard Ry.—New Brunswick Docks and Terminal Ry. Co.—Bathurst Iron Mine Line.—These are the various titles under which the Canada Iron Corporation has power to construct a railway from its iron mines on the Nepisiquit River, in Gloucester County to Bathurst, N.B., and terminals, docks, etc., at Bathurst. The length of the line is about 17 miles. We are advised that a contract has been let to A. and W. D. Wheaton for the construction of this line. They have moved their headquarters from Amherst, N.S., to Bathurst, N.B., and are to start work at once. (April, pg. 249.)

The new line starts from the Intercolonial Ry. at Black's Cut, about four miles south of Bathurst, and runs up the valley of the Nepisiquit River for a distance of about 17 miles to the iron mines. There are no large structures to be erected. There will be a small steel bridge on concrete abutments across the Pabineau River. The line is to be substantially constructed and laid with 85 lb. steel rails. F. C. Parsons, Londonderry, N.S., is Chief Engineer for the

THE ELECTRIC HEADLIGHT

The following letter was received under date of May 8, 1908, from Mr. J. W. Cleary, Travelling Engineer Pyle-National Electric Headlight Co.:

"I learn from_____the Master Mechanic here, that an engineer running between_____ and_____discovered a broken rail with the Pyle-National Electric Headlight and made the stop without ditching his train. One or two pairs of wheels got off, but that was a small affair to what it would have been where a foot of the rail was broken off. Also an engineer running east of here found some cars shoved out on the main line. He saw them with the 'Electric' and made the stop without hitting them."

Canada Iron Corporation, and J. J. Taylor is Chief Engineer of construction.

Ottawa and New York Ry.—Plans have been approved by the Board of Railway Commissioners for the construction of a new drawbridge over the Cornwall canal.

Pacific Northern and Omineca Ry. (G.T. Pacific Ry.)—The British Columbia Legislature last session granted the company an extension of time to construct the lines previously authorized, and also gave it power to construct an additional branch line from the junction of the Skeena and Copper rivers to the junction of the Bulkley and Telkwa rivers.

Pincher Creek and Southern Ry.—A company with this title was incorporated at the last session of the Alberta Legislature, with power to construct a railway from the International boundary between ranges 22 and 29 west of the 4th principal meridian, northerly and westerly to the Pincher Creek Coal Mining Co.'s collieries in tp. 6, range 30, west 4th meridian, and tp. 6, range 1, west of the 5th meridian, and thence to the C.P.R. Crow's Nest Pass branch at or near Pincher station. The capital is fixed at $500,000; the company may issue bonds to the extent of $20,000 a mile; may construct telegraph and telephone lines, and may enter into agreements with other railway companies. The provisional directors are: R. D. Miller, O. G. Laberee, Spokane, Wash.; J. Finlay, A. C. Kemmis, Pincher Creek, Alta. (See South West Alberta Ry., Mar., pg. 175.)

Pincher Creek, Cardston and Montana Ry.—The Alberta Legislature last session changed the name of the Alberta Oil, Coal and Wheat Ry., incorporated by chap. 48 of the statutes of 6th Edward VII., to the above. Sections 5 to 49 and 51 to 54 of the incorporation act are repealed, and new sections passed. These provide that the company may construct a railway to be operated by electric, steam or other power from a point connecting with the C.P.R. in tp. 7, range 30, west of the 4th meridian, to Pincher Creek, thence easterly and south easterly to the Kootenay River in tp. 5, range 28, west 4th meridian, thence to Cardston, and southerly to the Internatnional boundary in tp. 1, range 23, west 4th meridian, a distance of 54 miles from Pincher Creek; also an extension or spur from Pincher Creek westerly and northwesterly to the Alberta-B.C. boundary, about 40 miles. The company is authorized to construct telephone and telegraph lines, and to enter into agreements with other companies. The other sections deal with the date of annual meetings, election of directors, and other general matters. (May, pg. 357.)

Portland Canal Short Line Ry.—A company with this title was incorporated by the British Columbia Legislature last session, with power to construct a railway from the head of Portland Canal, along Bear River for about 30 miles, also up American Creek, and branch lines not exceeding 10 miles long. The head office is to be at Victoria; its capital is fixed at $1,000,000, and it may issue bonds for $30,000 a mile. The company is given the usual powers as to telegraph and telephone lines, and as to amalgamating or making agreements with other companies. The provisional directors are T. F. Hopkins and M. Stewart, Seattle, Wash.

Prince Edward Island Ry.—Tenders are under consideration for the construction of a 20-stall brick and concrete engine house, foundation for turntable, foreman's office, and lavatories at Charlottetown, P.E.I. (May, pg. 357.)

Prince Rupert and Port Simpson Ry.—The British Columbia Legislature last session incorporated a company with this title to construct a railway from Prince Rupert northerly to Port Simpson, and branch lines not exceeding 10 miles long. The capital stock is $1,000,000, and bonds for $35,000 a mile may be issued. All the other powers incidental to railway companies are also conferred. The head office is to be at Victoria, and the provisional directors are M. King and H. B. Robertson, Victoria. (April, pg. 249.)

Quebec Eastern Ry.—Surveys are being made for a line to extend from the Quebec Bridge, through Lysander Falls, Inverness, and Lime Ridge, to Sherbrooke, Que. It is also proposed to construct a line from Lyster, the point of junction of the Lotbiniere and Megantic Ry. with the G.T.R., to Inverness to connect with the projected Q.E.R. The survey party is at present working between Lime Ridge and Sherbrooke.

The Q.E.R. is being promoted by interests owning the Lotbiniere and Megantic Ry., which line, it is intended, ultimately to amalgamate with the Q.E.R. A press report says that when completed the Q.E.R. will be taken over by the G.T.R. F. N. McCrea, is President of the L. and M. Ry., and also the most active promoter of the Q.E.R. (Feb., pg. 103.)

Quebec, Montreal and Southern Ry.—The Quebec provincial inspecting engineer and director of railways has completed an inspection of the line from St. Lambert to Fortierville, the terminus of the new extension, and reports that the road, stations, bridges, and equipment are in good and satisfactory condition. (July, pg. 481.)

Red Deer Ry.—The Alberta Legislature has extended the time for the construction of this projected railway, and authorized the company to construct additional lines from Red Deer, Alta., northwesterly to Sylvan Lake, and from Red Deer southerly to Pine Lake. (Mar., pg. 175.)

The Red River Valley and Hudson Bay Ry. Co. has been incorporated under Minnesota State laws, with a capital of $500,000. The incorporators are farmers, and it is desired, as far as possible, to have only farmers as shareholders. The line which the company proposes to construct will extend from Osio, in the southwestern part of Marshall County, on the Minneapolis, St. Paul and Sault Ste. Marie Ry., to St. Vincent, near the Manitoba boundary in the northwestern part of Kittson County, on the Great Northern Ry. This line will run parallel to the Red River, through a rich part of the country. The right-of-way has been secured from the farmers along the route for a considerable distance without cost; and land has been acquired in the towns of St. Vincent, Hill, Red River, Telin, Eagle Point, and Big Wood. The length of the line at present proposed is about 70 miles.

Royal Collieries Ry.—The Alberta Legislature at its last session incorporated a company with this title to construct a steam or electric railway from the C.P.R. Crow's Nest branch at or near Lethbridge to sec. 32, tp. 9, range 21, west of the 4th meridian. The capital is fixed at $50,000; it may issue bonds for $15,000 a mile; may construct telegraph or telephone lines along its route, and may enter into agreements with other companies. The provisional directors are: H. N. Galer, Spokane, Wash.; G. L. Fraser, J. B. Wilkie, Lethbridge, Alta. (Feb., pg. 105.)

Southern Alberta Ry.—The Alberta Legislature last session incorporated a company with this title to construct a railway from the C.P.R. at Medicine Hat northwesterly to the C.P.R. at Suffield, thence southwesterly to the Bow River in tp. 11, range 13, west of the 4th meridian, thence westerly to the Calgary and Edmonton Ry.; and from the above line in tp. 24, range 1, west of the 5th meridian, northwesterly to tp. 24, range 1, west of the 5th meridian. The capital is fixed at $2,500,000; bonds may be issued for $15,000 a mile; agreements may be made with other companies, and telephone and telegraph lines may be constructed. The provisional directors are: J. A. McGregor, A. M. Grace, L. Welford, Medicine Hat, Alta.

Strathcona Central Ry.—The Alberta Legislature last session incorporated a company to construct a railway from near Ellerslie on the C.P.R., westerly through ranges 24 and 25, tp. 51, west of the 4th meridian, to the North Saskatchewan River, thence northeasterly to Strathcona. The capital is fixed at $100,000; bonds may be issued for $10,000 a mile; agreements may be made with other railway companies, and telephone and telegraph lines may be constructed. The provisional directors are: R. Crockart, A. Lloyd, R. T. Purvis, Strathcona, Alta.

Temiskaming and Northern Ontario Ry.—The Commissioners have approved of the construction of a siding from Charlton, for 0.75 mile, to some mills, but as this point is on the line of the surveyed route of the suggested line to Elk Lake and Gowganda, it is locally regarded as a start upon the construction of such a line. It has been decided to construct temporary freight sheds at Charlton, pending the development of traffic. (July, pg. 481.)

Plans have been prepared for the erection of a freight station at Cobalt, and the Chairman of the Commission stated, that in the near future an improved passenger station would be erected at the same place.

The T. and N.O.R. is erecting a large and commodious station building, 151 ft. 4 ins. by 35 ft., at Cochrane, for joint use with the National Transcontinental Ry. The new building is to be of red pressed brick, with covered platforms on the north and south sides. The waiting-room, common to both lines, will be in the centre, the ticket and other offices for each company being at the sides, with ladies' waiting-room, dining-room, kitchen and baggage-room on the ground floor, while upstairs will be offices for the divisional officials, sleeping quarters for employes, and a special suite of rooms for the T. and N.O. Ry. Commissioners.

The foundations and footings are of concrete construction, the ground floor being of reinforced concrete carried by steel beams, and the exterior platforms are of concrete with granolithic surface. The walls are of deep red hard burned pressed brick with grey stone trimmings. The roof covers are green slate, and the building is surrounded by a hood. The

interior finish of the ground floor is plastered with white cement dadoes and hardwood trim, while the upper floor apartments are plastered with painted pine trim.

Tramping Lake, Sask.—At a meeting of settlers in this vicinity, June 25, a resolution was passed asking the Provincial Government to arrange for the construction of a railway through the district. The settlement is at present 40 miles from a railway.

United Gold Fields of British Columbia.—The Board of Railway Commissioners has approved the amended location plans for the railway which this company is authorized to construct from Frank to Grassy Mountain. The United Gold Fields of B.C. is a joint stock company incorporated in London, Eng., which obtained registration in Canada. In 1902 it obtained power from the Dominion Parliament to construct a railway from Frank, on the C.P.R. Crow's Nest Branch, northerly to Grassy Mountain, about seven miles, and branches not to exceed eight miles in any one case. The line from Frank to Grassy Mountain was constructed and was operated for some time as the F. and G.M.R., carrying the output of some collieries at Grassy Mountain. The landslide at Turtle Mountain on April 29, 1903, practically wiped out Grassy Mountain village and carried away or covered up about 1.50 miles of the F. and G.M.R. There were subsequently some difficulties with the contractors, and nothing has been done since in the way of restoring the line. In 1904, the company secured power from the Dominion Parliament to amalgamate with the West Canadian Collieries Co., a joint stock company also incorporated in London, Eng., originally for the purpose of developing coal mining properties in Yukon and elsewhere, and it obtained an act from the Dominion Parliament to take over the powers of the U.G.F. of B.C., and to amalgamate with or take over the Cardiff Ry. The amended plans approved of by the Railway Commission would, therefore, appear to be for the reconstruction of the F. and G.M.R., and especially for that portion carried away or buried by the landslide of 1903. (Sept., 1904, pg. 317.)

Vancouver and Northern Ry.—The British Columbia Legislature last session incorporated a company with this title to construct a railway from Vancouver following the valley of the Seymour Creek to the watershed north of Loch Lomond, thence via the valley of the easterly branch of Seymour Creek and along the valley of the Indian River to the north arm of Burrard Inlet, and a branch via the valley of Furry Creek to Howe Sound, with power to extend northerly from the main line to the Howe Sound, Pemberton Valley and Northern Ry. between the mouth of Squamish River and the junction of the Cheakamus and Chee Kee rivers; and other branch lines not to exceed 10 miles long, none of such branches, however, to be in the valleys of the Squamish, Cheakamus or Chee Kee rivers. The capital is fixed at $1,500,000, and it may issue bonds for $30,000 a mile. The company is given all the usual powers; its head offices are to be at Victoria, and the provisional directors are: C. T. Dunbar, F. C. Wade, E. J. McFeely, H. M. Burwell, C.E. (Feb., pg. 105.)

Victoria and Barclay Sound Ry.—Press reports from Victoria, B.C., state that surveys have been commenced on this projected railway. The object of the present survey is said to be to secure a line from deep water at Esquimalt Harbor, to the west coast of Vancouver Island. (April, pg. 251.)

Western Coal and Coke Co.—The Alberta Legislature last session changed the name of the Western Oil and Coal Consolidated Co. to the above.

Great Northern Ry. Lines in Canada.

Land is being purchased in the vicinity of Winnipeg for right of way, one report stating that it is for the Northern Pacific Ry. As this company is in alliance with the G.N.R., the work being done will probably have some bearing on the construction of the latter company's projected line from Emerson to Winnipeg. The N.P.R. as well as the G.N.R. owns charters enabling it to construct a considerable network of lines throughout Manitoba.

A copy of a resolution passed by G.N.R. directors was filed July 7 at Helena, Mont., announcing the company's intention to construct a line northerly from Poplar, Valley county, Mont., to the International Boundary. Poplar is a station on the G.N.R., in the Fort Peck Indian reservation, and the proposed line will follow the Poplar River valley to the boundary line between Montana and Saskatchewan. It is reported that work is to be started this season, and that on reaching the boundary line, construction will be continued to Regina, Sask., under a Canadian charter.

Vancouver, Victoria and Eastern Ry. and Navigation Co.—Tracklaying is being proceeded with rapidly upon the extension of this line westerly into Penticton, B.C. It was expected that track would be laid to the second crossing of the Similkameen River by July 31, and it is hoped to reach Twenty-mile creek by Aug. 15, to complete the bridge across that creek by the end of the month, and to get into the yards at Hedley by Sept. 1. Past Hedley, it is expected to be over the third crossing of the Similkameen River by Sept. 15, and to have the track laid into Penticton by Oct. 15. The ballasting gang is following up the tracklaying work, and it is expected to have the ballasting completed so that trains can be run into Penticton by Dec. 1. Beyond Penticton, the located line is being opened up so as to be ready for the grading gangs as they come off the section into Penticton. (July, pg. 503.)

The C.P.R. is surveying a line on the east side of the Fraser River in British Columbia, in which district C.N.R. and G.T.P.R. survey parties are also at work.

The differences between the Commissioners of the Temiskaming and Northern Ontario Ry. and McRae, Chandler and McNeill, Ltd., over the contract for the construction of the line north of Matheson, Ont., are to be fought out in court. The contractors desire to recover $200,000, which they allege to be due on account of work done up to the time the Commissioners took over the contract. The Attorney General has promised the necessary fiat, on condition that the contracting firm makes an arrangement with certain firms which advanced money to carry out the contract, with a view of obviating the necessity of more than one action.

Trade and Supply Notes

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

H. G. Nicholls, who was for several years Assistant General Manager of the Canadian General Electric Co. and the Canada Foundry Co., has resigned that position and gone into business for himself. He has organized a company, Factory Products, Limited, with offices in the Confederation Life Building, Toronto, for the purpose of acting as Canadian selling agent for representative manufacturers.

The firm of Burnham, Williams & Co., proprietors of the Baldwin Locomotive Works, Philadelphia, Pa., was dissolved July 1 by mutual consent, and its entire property and interests in the locomotive business were sold to the Baldwin Locomotive Works, a corporation organized under Pennsylvania laws. The officers of the Baldwin Locomotive Works are: J. H. Converte, President; W. L. Austin, Vice President and Engineer; A. B. Johnson, Vice President and Treasurer; S. M. Vauclain, General Superintendent; W. De Krafft, Secretary and Assistant Treasurer. All officers except Mr. De Krafft were partners in the Burnham, Williams & Co. firm.

The Falls Hollow Staybolt Co. advises us as follows:—It has received an order from the Great Southern of Spain Ry. Co., Ltd., for a carload of hollow staybolt iron bars, making the second carload order received from that company within the year. The Great Northern Ry. specified recently Falls hollow staybolt iron in five locomotives, the American Rd. of Porto Rico in three locomotives being built by the Baldwin Locomotive Works. The Ann Arbor Rd. in four locomotives, and the Detroit, Toledo & Ironton Ry. in eight locomotives ordered recently from the American Locomotive Co. During the past six months The Falls Hollow Staybolt Co. has secured some 50 new railway customers for its product in the U. S., Canada and Mexico, and has also received new business from railways in several foreign countries.

The Annual Financial Review, for 1909, which has been issued by Houston's Standard Publications, Toronto, contains reports as to the operation of Canadian financial institutions, railways and industrial concerns as well as of concerns in the United States and other countries in which Canadian capital is largely invested. In addition to the latest annual reports, the Review gives information showing the extent to which the securities of the companies are traded in on the different stock exchanges, together with the range of prices. The book gives evidence of careful compilation, and is well arranged. As giving a comprehensive survey of the joint stock corporations in which Canadians are interested it is a valuable book of reference to investors as well as to officials of companies. This is the ninth year of issue, and the present volume is the largest of the series.

Railway Commissioners Traffic Orders.

Summaries of other traffic orders passed are given on another page under the heading of Orders by Railway Commissioners.

7337. June 22.—Re order 7023, May 10, 1909, approving supplement 1 to Canadian Classification 14, with certain exceptions named in the order, amongst the exceptions being the temporary approval of the classification of silos pending a hearing by the Board. Upon hearing representatives on behalf of the Montreal Board of Trade and the Canadian Freight Association, and upon the report and recommendation of the Chief Traffic Officer of the Board, it is ordered that order 7023 be amended by striking out clause 2.

MONTREAL CHEESE RATES.

7343. June 23.—Re application of Montreal Produce Merchants' Association, for order directing that the exporter of cheese in Montreal be placed on as favorable a basis with regard to rates on export traffic as his competitor west of Montreal; that freight rates on cheese be placed on a parity with those on bacon; and complaining of alleged advance in freight rates on cheese in the past two or three years. Upon hearing the application in Montreal Dec. 22, 1908, members of the Montreal Produce Merchants' Association and counsel for and representatives of the C.P.R. and G.T.R. appearing at the hearing, the evidence adduced, and what was alleged; and upon the report of the Chief Traffic Officer of the Board; it is ordered that the application for absorption of the inward cartage charge at Montreal be refused. That, on cheese shipped from points west of Montreal to Montreal on separate rail bills of lading, the railway companies absorb the wharfage and port warden's fees when such cheese is subsequently exported from the port of Montreal; the said absorption to continue so long as it is applied in the case of cheese shipped on joint rail and ocean bills of lading to Europe; the tariffs of the railway companies to provide for such absorption to be filed and published and to become effective within 30 days from date of this order. That the application for refunds covering the seasons 1907 and 1908 be refused. That the application that the rail rates on cheese be placed on a parity with those on bacon be dismissed. That the complaint dealing with the alleged advance in rail rates on cheese to Montreal which has taken place in the last two or three years be dismissed.

CLASSIFICATION OF INGOT TIN.

7367. June 25.—Re application of Montreal Board of Trade Transportation Bureau for order directing reduction from second class rate on ingot tin, in Canadian Classification, to third class, as in the Official Classification; upon hearing the application at Ottawa, May 19, applicants being represented, and in the presence of counsel for and representatives of C.P.R. and G.T.R., and what was alleged, and upon the report of the Chief Traffic Officer of the Board, it is ordered that the application be dismissed.

INTERSWITCHING AT ROSSLAND, B.C.

7393. June 21.—Re order 2115, Nov. 16, 1906, prescribing rates to be charged for interswitching between the Red Mountain Rv. and the Columbia Western Ry. at Rossland, B.C., amending previous order dated Feb. 14, 1906; and re application of Red Mountain Ry. for amendment to said order 2115, making applicable the general interswitching order; upon hearing the application at Nelson, B.C., Mar. 5, 1909, counsel appearing for the Red Mountain and the Columbia Western Ry. Cos., the evidence adduced, and what was alleged, it is ordered that the application be dismissed.

OIL RATE, STOY, ILL., TO TORONTO

7479. July 6.—Re complaint of British American Oil Co. of Toronto, complaining that the G.T.R. unjustly discriminated against crude oil shipments from Stoy, Ill., to Toronto, by refusing to carry it at the published and filed joint tariff fifth-class rate, in accordance with the Official Classification and at the same rate as animal and vegetable oils, in carloads, and that the G.T.R. refused to deliver to complainants at Toronto cars containing crude oil from Stoy, Ill., except upon payment of 12½c. per 100 lbs., which additional rate has been paid under protest and which the G.T.R. refused to refund. Upon the application of counsel for the railway companies in the presence of counsel for complainant company, it is ordered that the railway companies have leave to appeal from the Board's order of May 19, to the Supreme Court of Canada upon all questions of law involved in the making of the order, as provided by the Railway Act, subsec. 3 of sec. 56, and that such appeal be set down for the next ensuing sittings of the Supreme Court. And it is further ordered that the railway companies do, on or before Aug. 1, furnish the solicitor for the complainant company a memorandum setting forth the questions of law proposed to be raised in the appeal to enable the solicitor to prepare his factum.

ELEVATOR CHARGES AT FORT WILLIAM.

7482. July 7.—Re complaint of the Dominion Millers' Association, under provisions of Railway Act, alleging that C.P.R. charges for elevating and storage of grain at Fort William, Ont., are excessive, and applying for an order directing the company to reduce the charges; upon hearing application in presence of counsel for applicants and the C.P.R. and C.N.R. Companies, it is ordered that the same be dismissed.

7500. July 7.—Re application of Manitoba Grain Growers' Association for order directing C.P.R. to reduce charges for elevating and storage of grain in terminal elevators at Fort William, Ont., to same charges the Company makes for similar services in elevators at Owen Sound, Ont., and for order directing that such reduction of storage tariff as may be decided upon be made to apply to C.N.R. terminal elevators at Port Arthur and terminal elevators in course of construction by G.T.P. Ry. at Fort William upon hearing application in presence of counsel for applicants and the railway companies interested, and what was alleged, it is ordered that the same be dismissed.

COAL RATE TO MARLBANK, ONT.

7495. June 25.—Re application of Canadian Portland Cement Co. under secs. 315 and 334 of Railway Act, for order directing the G.T.R. and the Bay of Quinte Ry. to establish and maintain through joint rate on bituminous coal to Marlbank, Ont., properly related to the rates in effect to points contiguous thereto; upon hearing the application on May 19, and what was alleged by counsel for applicant and the G.T.R. and the representatives of the railway companies interested, it is ordered that the said railway companies publish and file with the Board a tariff of a joint rate on bituminous coal from Black Rock, N.Y., and Suspension Bridge, N.Y., to Marlbank, Ont., of $1.43 a ton of 2,000 lbs. on a minimum weight of 15 net tons per carload, except that in the case of cars having a less marked capacity than 15 net tons, the said marked capacity, but not less than 12 net tons, shall be the minimum carload weight, the rate to become effective not later than August 23.

Accidents at Railway Crossings.

The Board of Railway Commissioners passed the following order, 7472, July 8: All railway companies subject to the jurisdiction of the Parliament of Canada shall, on or before Sept. 1, 1909, furnish to and file with the Board:—

1. A return of all highway crossings upon its railway at which an accident has happened, subsequent to Jan. 1, 1900, by a moving train causing bodily injury or death to a person using such crossing.

2. In the event of more than one accident of the character aforesaid having happened at any such crossing, such return shall so indicate.

3. That such return shall cover all accidents of the character aforesaid up to the date thereof.

4. That after the filing of the said returns with the Board, each of the companies aforesaid shall, immediately upon the happening of an accident or accidents of the character aforesaid, furnish to and file with the Board a return of all such accidents happening upon its lines subsequent to the date of the return required by par. 1 hereof.

5. The said returns shall be certified to by an officer or official of the railway company, who shal have the necessary knowledge, obtained by enquiry or otherwise, to justify such certification.

6. The said returns shall be in the form appearing as Schedule A hereto.

7. The information set forth in the said returns shall be full and explicit.

Galt Hospital, Lethbridge, Alta.—The Alberta Legislature last session passed an act revising the old charter of incorporation of this institution—granted by the old North West Territorial Legislature in 1894. The incorporators are E. T. Galt, W. M. Ramsay, Montreal; J. Galt, Winnipeg; and C. A. Magrath, Lethbridge, Alta. These with four others to be appointed annually—two by the Lethbridge Council, and two by the Alberta Ry. and Irrigation Co., or if the latter ceases to exist, by the original incorporators. The original incorporators hold office for life and vacancies are to be filled by those remaining. The object of the incorporation of the hospital is to administer as trustees the bequest made to it by the late Sir A. T. Galt, together with such other gifts and bequests as may from time to time be made to it.

The C.P.R. put in operation, July 4, a Sunday service to and from St. John, N.B., in addition to the regular week-day service. The Lord's Day Alliance has protested against the new service, but has decided not to take any steps to endeavor to have the trains discontinued.

National Transcontinental Railway.

An Order in Council has been passed appointing H. Holgate, Montreal, and A. Noble, Chief Engineer of the Pennsylvania Ry. tunnel, as special engineers to decide upon certain problems in connection with the reconstruction of the bridge across the St. Lawrence River at Quebec, upon the working out of which the board of three engineers cannot agree. It is said that the principal question about which there is a difference of opinion has to do with the foundation piers. The piers, which were erected by the old bridge company, were built for a span of 1,800 ft. centre to centre, and the board of engineers are not at one as to whether these piers are sufficiently strong to carry the added stresses which the increased weight of the new bridge will bring into play; or if it will be necessary to construct two additional piers, thereby reducing the central span to one of 1,600 ft.

The question of the material of which the superstructure will be constructed, has been given full consideration, and H. E. Vautelet, Montreal, is quoted as saying that he and his colleagues had united in favor of recommending the use of nickel in place of carbon steel. Nickel steel is harder but lighter than carbon steel, and is more expensive on account of the greater cost of working it.

Interest in construction work on the N.T.R. at present is primarily centred upon the completion of the section between Winnipeg and Lake Superior Jct., the point of connection with the G.T. Pacific Ry. branch to Fort William, Ont. The latest reports are to the effect that from St. Boniface, Man., there has been laid about 150 miles of track easterly, and from Lake Superior Jct. westerly, about 30 miles. On July 1 there had been laid 140 miles from St. Boniface end and 20 miles from the Lake Superior Jct. end, and it was expected to complete the intervening 89 miles by about the middle of August. The construction of this section of the line has been particularly heavy. With the exception of a few miles of prairie work near Winnipeg, almost the entire distance here had to be cut through solid rock. In all something like 6,000,000 cubic feet of rock has been removed, of which about 4,000,000 cubic feet came from four tunnels. The deepest rock cut was one of 84 ft. north of Wabigoon. It is upon this section of line that the differences as to classification have been most acute. For the settlement of these differences an inspection of the line has been made by H. D. Lumsden, who recently resigned his position as Chief Engineer for the Canadian Government; B. B. Kelliher, Chief Engineer G.T. Pacific Ry.; and C. Schreiber, Consulting Engineer for the Department of Railways, as arbitrator.

The construction of the line from St. Boniface into Winnipeg is being gone on with, but there are two questions in process of settlement which may delay work somewhat. They are the question of a bridge in which the Commissioners and the St. Boniface Council are involved, and the question of the crossing of the C.P.R. and C.N.R. at St. Boniface. In regard to the first it was arranged that the St. Boniface Council should provide $110,000 to have the bridge so constructed that it would be available for general, as well as for railway traffic. It is now proposed that the contribution be reduced to $75,000, and that half of the cost of maintenance be assumed. The question of the crossing of the C.P.R. and the C.N.R. came before the Board of Railway Commissioners at Ottawa, July 7, when the Commissioners gave the parties until July 26 to come to an agreement. The Commissioners sat at Winnipeg July 26, when the application of the N.T.R. was to have been reheard if the parties had not reached an understanding.

Grand Trunk Pacific Ry. Bridge, South Saskatchewan River.

GRAND TRUNK PACIFIC RAILWAY.

The South Saskatchewan River bridge, which is illustrated on this page, spans the South Saskatchewan River on the G.T.P. Ry. main line near Saskatoon, 468.5 miles west of Winnipeg. The foundations were made in the ordinary way by means of open coffer dams and concrete forms, and the noses of the river piers were provided with steel protectors. Sixty piles were used only in the foundation of the west abutment. The total amount of concrete used in the foundations, which consist of two abutments and seven river piers, was 7,600 cu. yds. The superstructure is composed of one 175 ft. through truss span, five 225 ft. and one 125 ft. deck truss spans, and one 50 ft. deck girder span. The amount of steel in the superstructure is about 2,240 tons. The total length of the bridge between parapets is 1,501 ft., and the distance from base of rail to low water 71 ft. Work was commenced on the substructure in Jan., 1907, and the entire structure completed in May, 1908.

A press despatch from Edmonton, Alta,. July 16, stated that the track laying gang working from the east, connected that morning with the line laid from Edmonton to Cloverdale bridge, thus completing the G.T.P. tracks into Edmonton. Ballasting trains were reported to be well up behind the track layers. The line has a total length of 794 miles from Winnipeg to Edmonton, and it is expected to have it fully completed to haul out this season's crop, as soon as the grain is ready to be moved. For the accommodation of Edmonton traffic, "a tentative agreement," said D. D. Mann, Vice President Canadian Northern Ry., "has been entered into between E. J. Chamberlin (General Manager G.T. Pacific Ry.) and myself, by which the new road will have the use of our terminals there for passenger and local freight business."

The track laying gang, which has completed its work on the line into Edmonton, has been started on the line westerly from that city. Grading has been practically completed to Wolf Creek, at the McLeod River, and it is hoped to get the track laid to that point this season. Bridges are under construction on this section at the crossing of the Pembina River, and also at Wolf Creek.

Foley, Welch and Stewart have been awarded a contract for building 70 miles west of Wolf Creek. Tenders have been invited for the building of 135 miles east from Copper River to Aldermere, and they will be opened Aug. 9.

Construction is going on at the Prince Rupert end of the line at a satisfactory rate. A contract is reported let to the Canadian Bridge Co., Walkerville, Ont., for the superstructures for six steel bridges on the first 100 miles easterly from Prince Rupert. The contract for the concrete substructures has been let to —. Ferguson. It is expected that track laying will be commenced at Prince Rupert in Sept.

C. Schreiber, C.M.G., is making a complete inspection of the line from Winnipeg to Prince Rupert, and expects to return to Ottawa by the end of Aug.

Grand Trunk Pacific Branch Lines.— The Ontario Railway and Municipal Board has approved of the payment of the Provincial subsidy at the rate of $2,000 cash and 3,375 acres of land a mile for the final 66.16 miles of the line from Fort William to Lake Superior Jct.

An effort is being made in Brandon, Man., to secure the construction of a G.T.P.R. branch into that city.

Surveys are being made for a line from Regina, through Estevan to Portal, Sask., on the International boundary.

The Alberta Legislature last session authorized the Government to guarantee the bonds of the company to an amount not exceeding $13,000 a mile in respect of the construction of the following lines: from the western division of the G.T.P.R. between the 111th and 113th degrees of

The 18 hour trains between Chicago and New York are protected by Hayes Derails.

You cannot go from Chicago to New York by any rail route, no matter how circuitous, without traveling over track where Hayes Derails are used.

The development of the Hayes Derail has made it possible to protect the main track in a manner unknown ten years ago. To be sure the switch point derail was in use then to some extent but its manifest disadvantages narrowly limited its field. A simple two-piece device with an unbroken main rail gave just what was needed. Low cost of material, installation and maintenance were secondary but attractive.

It is a tribute to the progressiveness of American railroads that they have been quick to avail themselves of the protection afforded by Hayes Derails.

Hayes Track Appliance Co., Geneva, N.Y.

Canadian Works at Hamilton.

longitude to Calgary and thence to the Southern boundary of the province; and from the G.T.P. branch line between Calgary and Lethbridge, north-easterly from Macleod, a distance not exceeding 40 miles. Not less than 50 miles of the lines are to be constructed by Dec. 30, and the remainder by Dec. 30, 1911.

Railway Finance, Meetings, Etc.

Albert Ry.—The books of the Dominion Finance Department show that the Albert Ry. Co. has been for years indebted to the Government for $14,725.56 on loan account, and $14,665.45 value rails loaned for construction. The line has not been operated for several years. Last session the House of Commons appointed a committee to examine into this and other similar amounts, with the result that it was decided to eliminate them from the Dominion's assets.

Atlantic and Lake Superior Ry.—See Quebec Oriental Ry.

Alberta Ry. and Irrigation Co.—Approximate net profits from all sources, exclusive of land sales for May, $5,491, against $25,196 for May, 1908. Cumulative net profits for 11 months ended May 31, $348,132. Approximate railway receipts for June, $22,284, against $13,416 for June, 1908. Cumulative railway receipts for 12 months ended June 30, $310,226.

Atlantic and Lake Superior Ry.—The London, Eng., Chancery Court has appointed the Royal Trust Co., Montreal, as receiver for a quarter of the whole preference stock, with liberty to apply it generally. The order was made on a motion in the action of Derenzy against Galindez Brothers.

There has been litigation going on in connection with this railway almost continually since its incorporation, but it was thought that all differences had been settled by the arrangements entered into in 1907. It would appear, from the present action, however, that the end is not yet.

Canadian Pacific Ry.—Application is being made by the St. Mary's and Western Ontario Ry. Co. to the Board of Railway Commissioners for the approval of a lease of its railway to the C.P.R.

Canadian Northern Quebec Ry.—At the annual meeting of this company, held in July, the following directors were elected for the current year: D. B. Hanna, Z. A. Lash, H. H. Melville, F. Nicholls, R. M. Horne-Payne, W. H. Moore, A. J. Mitchell, F. C. Annesley, Hon. J. Tessier, V. Chateauvert, T. McDougal and the Mayor of Quebec. Up to July 25, the meeting of directors for the election of officers had not been held, but it is understood that D. B. Hanna will be re-elected President for the current year.

Canadian Pacific Ry.—A press report says that the C.P.R. sold a block of about $5,000,000 of its 4% preferred stock in the London, Eng., market recently; that no offering of securities was made by the company, but, on the other hand, a bid, which is said to have been 102, was accepted.

Dominion Atlantic Ry.—Gross earnings for May, $87,450, against $86,436 for May, 1908. Aggregate gross earnings for 5 months ended May 31, $373,650, against $364,473 for same period 1908.

Great Northern Ry.—Notice is given that the second mortgage bonds of the St. Paul, Minneapolis and Manitoba Ry., maturing Oct. 1, will be redeemed at par with accrued interest, or may be exchanged dollar for dollar, with adjustment of interest for 4% bonds of the company.

Intercolonial Ry.—The public accounts show open accounts to the amount of $155,757.51, which have been unchanged for some years, but which, nevertheless, have been carried forward from year to year as Dominion assets. The Parliamentary committee appointed, last session, to overhaul these and similar assets, directed them to be no longer counted, and the House of Commons assented.

Kent Northern Ry.—Among the Dominion assets carried forward from year to year on the public accounts, is $58,334.27 as being due from the K.N. Ry., on rails loan account, representing the value of old Intercolonial Ry. rails loaned at the time of construction of the K.N.R. The House of Commons has as the result of an investigation by a special committee, last session, directed that this shall no longer be counted as an asset.

Lake Superior Corporation.—The head offices of the Lake Superior Corporation, owning the Algoma Central and Hudson Bay Ry., Manitoulin and North Shore Ry., Algoma Central Line steamships, and the electric railways in Sault Ste. Marie, Ont. and Michigan, as well as steel mills, etc., are being removed from Philadelphia, Pa., to Toronto.

Prince Edward Island Ry.—A number of open accounts, amounting altogether to $5,552.34, have been carried in the public accounts as Dominion assets for a number of years without change. As a result of an investigation, the House of Commons has directed that they be removed from the assets, and the accounts closed.

Quebec Oriental Ry.—A meeting of the shareholders was held in London, Eng., July 22, for the purpose of passing resolutions approving an agreement for the purchase of the railways from Matapedia to Caplin, and Caplin to Paspebiac, Que., known as the Baie des Chaleurs section of the Atlantic and Lake Superior Ry., to change the location of the head office from Montreal to London, Eng., to fix the remuneration of directors; to appoint an auditor; and to authorize the directors to issue bonds or other securities to the extent of $45,000 a mile, and to execute the necessary security for such bond issue.

Quebec and Lake St. John Ry.—Gross earnings for June, $51,991.14, against $57,072.36 for June, 1908. Aggregate gross earnings for 6 months ended June 30, $278,021.56, against $257,939.62 for same period 1908.

Quebec Central Ry.—Gross earnings for May, $83,989.05; expenses, $58,335.10; net earnings, $25,653.95; against $91,487.51 gross earnings; $63,364.92 expenses; $28,122.59 net earnings for May, 1908. Aggregate gross earnings for 11 months ended May 31, $927,384.65; expenses, $658,636.09; net earnings, $268,748.56; against $999,607.38 gross earnings; $698,500.36 expenses; $301,107.02 net earnings for same period 1907-08.

Temiscouata Ry.—Total earnings for Apr., $19,048.60; for May, $17,090.91.

Temiskaming and Northern Ontario Ry.—Gross earnings for May, $130,536.47; expenses, $60,321.24; net earnings, $70,215.23; ore royalties, $2,705.25. Approximate gross earnings for June, $125,000; net earnings, $60,000.

Victoria and Sidney Ry.—A call of $15 a share payable at the company's office, Victoria, B.C., July 19 was recently made on all shareholders, excepting those holding certificates numbers 80, 88, 92, and 97.

White Pass and Yukon Ry.—Aggregate gross earnings for 11 months ended May 31, $1,070,635.

Wisconsin Central Ry.—An issue of $2,500,000 new 50-year first and refuding bonds has been authorized, for the purpose of providing funds for the construction of terminals in Duluth, Minn.

Canadian Freight Association.

The Association held its quarterly meeting at Halifax, N.S., July 14 and 15. A party of about 120, including members of the Association and their wives, left Montreal July 12 at 6.45 p.m. on a special I.C.R. train and reached Halifax July 13 about 8 p.m. after a charming trip, during which the scenery of the Metapedia and Wentworth valleys especially was greatly enjoyed. At Moncton E. Tiffin, member Government Railways Managing Board and General Traffic Manager I.C.R. and P.E.I.R., joined the party, and that evening they were his guests at dinner on the dining cars. The business meetings were held at Halifax July 14; in the afternoon the ladies were given an automobile ride to the beach, and in the evening there was a band concert in the public gardens. On July 15 the party were the guests of the City Council and Board of Trade in the morning on a carriage drive through Point Pleasant Park, the citadel and the suburbs and inspected the railway terminals; in the afternoon on an excursion on the harbor, and in the evening at a garden party and dance at the Walgwoltic. Halifax was left July 16, about half the party returning by Dominion Atlantic Ry. to Digby, thence by the s.s. Prince Rupert to St. John and on by the C.P.R., the others going to Yarmouth, and thence by boat to Boston. The whole trip was greatly enjoyed and was undoubtedly one of the best trips, if not the very best, in the Association's history.

Central Station, Ottawa.—The question of the amounts which the C.P.R. has to pay for the use of the tracks and station facilities at Ottawa central station has been for some years unsettled. The C.P.R. and the Canada Atlantic Ry. never arrived at an understanding, and the matter has been under consideration since the G.T.R. took over the C.A.R. The Board of Railway Commissioners made an order July 7 directing the C.P.R. to pay the G.T.R. interest since 1898 on a capitalization of $250,000, in addition to a wheelage basis on its local trains between Ottawa and Montreal and $500 a month for through trains. A press report says that the order does not specify the rate of interest to be paid and that the companies disagree as to whether the rate should be 2½% or 5%.

The Superintendent of the Algonquin provincial park has reported to the Ontario Government that beavers are building dams in the culverts of the Canada Atlantic Ry. (G.T.R.), which runs through the park, and that the road-master is having lanterns placed in the culverts at night to keep the beavers away.

Atlantic Division Bridge Work.—The Board of Railway Commissioners has approved the plans for the reconstruction of bridge 23.51, Atlantic Division.

Windsor St. Station, Montreal.—Considerable progress has been made in the clearing away of the buildings on the land acquired for the enlargement of this station. All the buildings on Windsor St. from the present station premises to St. Antoine St. have been cleared away, and work is now in progress as far west as Mountain St. It is stated that, beyond clearing the site, nothing will be done this year.

Place Viger Improvements, Montreal.—The C.P.R. is reported to have purchased for $250,000 the Montreal Brewing Co.'s property adjoining Dalhousie Square yards, Montreal. The differences between the railway and the brewery company about the property have been the subject of many discussions, and have held up for about seven years the extension and rearrangement of the Place Viger yards. The sale of the property was made possible by the amalgamation of all the breweries in Montreal, and the centralizing of the business. As a result of the sale the legal actions which had been entered to prevent the closing up of certain streets, and the consequent isolation of the brewery premises, will be dropped, each party paying its own costs. The property is to be transferred April 1, 1910.

Plans for improvements in the station and hotel and for the laying out of the yards are under consideration.

The Nomining to Rapide de L'Orignal Extension, which runs from Nomining to Rapide de L'Orignal, Que., a distance of nearly 36 miles, is rapidly nearing completion. The grading is being done by the Toronto Construction Co., and it was expected to have the line completed ready to turn over to the company, July 31. The station at mile 17, near the village of Chemin Gouin, is completed, as also the single and double section houses; work is being rushed on the 40,000 gal. tank at mile 19, and at the station at mile 26, near the village of Val Banette. The station, tank, 2-stall engine house and coal platform at Rapide de L'Orignal are expected to be completed by Aug. 30. C. E. Deakin, Montreal, has the contract for these buildings.

Wellington St. Viaduct, Ottawa.—Considerable progress has been made by the company upon the construction of the viaduct at Wellington St., Ottawa. The work should have been completed by July 1, but as, from unavoidable causes, the company could not start work as early as was expected, the Board of Railway Commissioners granted an extension of time for its completion to Sept. 1.

Georgian Bay and Seaboard Ry.—The Board of Railway Commissioners has passed an order authorizing the opening of the portion of the line completed between Coldwater Junction and Maple Island, on Hog Bay, near Victoria Harbour, Ont., a distance of 13 miles.

Tillsonburg, Lake Erie and Pacific Ry., St. Marys and Western Ontario Ry.—It is reported that work will shortly be started at Code's Junction on an extension of the line into Ingersoll, Ont. The T.L.E. and P.R. extends from Port Burwell to Ingersoll, and in 1908, under its charter, there was constructed a line from Code's Junction into Embro village, conencting with the St. M. and W.O. Ry., from St. Mary's to Embro. The construction of this proposed piece of line would enable trains to be run through from Port Burwell to St. Marys.

In connection with the projected extension of the St. M. and W. O. Ry., from St. Marys westerly to Sarnia, Ont., it is stated that arrangements are being completed for the submission, during the winter, to the taxpayers of various municipalities of by-laws granting aid for construction.

We are advised that the extension from Code Junction to Ingersoll, when it is constructed, will be undertaken by the T., L. E. and P. Ry. Up to July 23, we have been informed, no work on the extension had been done, neither had tenders been asked for.

Victoria Harbor, Ont.—In connection with the construction of the Georgian Bay and Seaboard Ry., which is in operation for construction purposes between Coldwater Jct., on the Toronto-Sudbury Line, and Victoria Harbour, the C.P.R. is carrying on extensive construction work on the terminals close to Victoria Harbor. Docks are being constructed, yards are being laid out, and the preliminary work for the erection of a large elevator is in progress. It is said that the plans for the elevator provide that it shall have, when fully completed, a capacity of 12,000,000 bush. The Dominion Government is carrying on some extensive dredging operations so as to make the depth of water at the docks and in the approaches thereto sufficient for the largest vessels navigating the Upper Lakes.

Hawk Lake Trestle.—The trestle bridge across the end of Hawk Lake, about 25 miles east of Kenora, Ont., is in process of being filled up. Recently the filling in the centre slid away, carrying a portion of the trestle with it, causing the structure to drop from 20 to 30 ft. While the bridge was being repaired, through traffic was carried on between Winnipeg and Fort William over the Canadian Northern Ry.

Fort William Union Station.—Ground was reported to have been broken, July 13, at Fort William, Ont., for a union station building, to be used by the C.P.R. and the G.T. Pacific Ry.

Fort William-Winnipeg Second Track.—The Board of Railway Commissioners has authorized the use for traffic of the second track between mileage 13.8 and 16.0 on the Kenora section.

Winnipeg.—The new agreement between the company and the city of Winnipeg is ready for signature. Under it the company grants to the city about 1.25 acres of land in Elmwood, at the end of Louise bridge, formerly used as a right of way, to be used for street widening, etc.; it is agreed that a subway shall be constructed at McPhillips St., at a cost of $120,000, the city paying one-third of the cost; the company agrees to maintain Haymarket Square as a park, after the city fences it and lays it out; provision is made for the repair and reconstruction by the city, when necessary, of the overhead bridge at Salter St. The city agrees to close up and convey to the company the portions of Ellen and Fountain streets, on which the company's freight sheds stand.

Branch Line Plans Passed.—The Board of Railway Commissioners has approved plans for the construction of the following branch lines:—Manitou Lake branch, mileage 0 to 51.33; Langdon branch, from Langdon, mileage 0 to 45, and from Langdon northerly, mileage 45 to 60.

Lethbridge-Macleod Cut-off.—The last spans of the big bridge across the Belly River, on the Lethbridge-Macleod cut-off, were got into position June 23, and a track was laid across it. The work of rivetting up the spans and generally completing the work was expected to be completed July 15. The bridge is entirely of steel, 5,327 ft. in length, and the rail bed is 312 ft. above the water at the highest point. The spans are carried on 67 steel piers, erected on a natural rock foundation. The completion of this work will enable the company to push forward the completion of the cut-off.

Strathcona-Edmonton Bridge.—A number of the C.P.R. engineering staff have been in Edmonton, Alta., recently, in connection with the project for the construction of the projected high level bridge across the Saskatchewan River. The C.P.R. line at present terminates at Strathcona, and surveys have been made for an extension into Edmonton. This work includes the construction of a high level bridge, and the visit of the engineers was to consult with the mayor of the city and some members of the Provincial Government, in connection with the proposal, to provide for the construction of a bridge capable of carrying general as well as railway traffic.

Nelson, B.C.—An agreement has been reached by which the company will take over the Nelson city dock from the municipality.

Kootenay Central Ry.—We were advised July 10 that no definite decision had then been reached in regard to the construction of the southern end of this projected railway.

Minneapolis, St. Paul and Sault Ste. Marie Ry.—The last rails of the extension from Brooton to Duluth, Minn., were reported to have been laid July 15, and it is expected that the extension will be opened for freight traffic, Aug. 15, and for passenger traffic, Sept. 1. (July, pg. 493.)

Dominion Railway Subsidies.

The Dominion Government has entered into contracts under the act granting aid to certain railways for the construction of the following lines:—

CANADIAN NORTHERN QUEBEC RY.—From Hawkesbury to Ottawa, Ont., about 60 miles. The construction of this line is practically completed.

CAPE BRETON RY.—From Port Hawkesbury or Point Tupper, on the Strait of Canso, to St. Peters, N.S., 31 miles. This railway was constructed in 1902-03, and has been in operation since 1904. The line was constructed under a Nova Scotia charter. A Dominion subsidy was voted in 1899 for a line of 30 miles, and in 1908 the subsidy was revoted and made specially available for the C.P.R.

The International Railway Fuel Association's first annual convention was held in Chicago recently, the officers elected for the current year being: President, E. McAuliffe, Chicago, Ill.; Vice Presidents, W. C. Hayes, New York; J. H. Hibben, Parsons, Ka.; Secretary, D. B. Sebastian, Chicago, Ill.; Treasurer, J. McManamy, Grand Rapids, Mich.

MAINLY ABOUT PEOPLE

Rear-Admiral Kingsmill has been appointed Honorary Aide-de-Camp to the Governor General of Canada.

H. Calderwood, marine architect, and Mrs. Calderwood, left Toronto early in July for a trip to the Atlantic coast.

W. B. Lanigan, Assistant Freight Traffic Manager, C.P.R. Western Lines, Winnipeg, was in Montreal early in July.

H. A., and A. A. Allan, of the Allan Steamship Line, sailed from Montreal for England, July 16, on the s.s. Tunisian.

G. T. Bell, Assistant Passenger Traffic Manager G.T.R. and G.T.P.R., returned to Montreal early in July from a trip to Winnipeg.

W. R. MacInnes, Freight Traffic Manager C.P.R., Montreal, returned there recently from a short holiday in the Metapedia Valley.

Mrs. D. B. Hanna and her two daughters will leave Toronto early in August to spend some weeks at Portage La Prairie, Man.

The Misses Margaret and Edith Shaughnessy returned to Canada from England, by the C.P.R. s.s. Empress of Britain, July 9.

D. McNicoll, Vice President, and I. G. Ogden, Third Vice President, C.P.R., left Montreal, July 9, for a short fishing trip on the Rideau Lakes.

Lord Strathcona has given $500,000 to McGill University, the greater part of which is to be utilized for the reconstruction of the medical building.

J. Belliveau, of the I.C.R. mechanical office, Moncton, N.B., was presented with an oak arm chair recently by the staff on his retirement on a pension.

J. H. Sorley, City Freight Agent C.P.R., Ottawa, who recently underwent an operation at the General Hospital, Montreal, is reported to be recovering rapidly.

W. B. Bulling, Assistant Freight Traffic Manager, C.P.R. Eastern Lines, Montreal, sailed for England, June 26, on the C.P.R. s.s. Lake Manitoba, for a six weeks holiday.

H. R. Charlton, General Advertising Agent, G.T.R., and G.T.P.R., returned to Montreal, July 9, from a trip over the G.T.P.R., between Winnipeg and Superior Jct.

J. Bruce Ismay, President International Mercantile Marine Co., was a passenger on the White Star-Dominion Line s.s. Megantic, which sailed from Montreal July 3.

The Chamberlin cup, which was won by J. Devlin, July 7, in the annual match play of the Ottawa Golf Club, is donated by E. J. Chamberlin, Vice President and General Manager, G.T.P.R.

Sir Percy Girouard, heretofore Governor and Commander in Chief of Northern Nigeria, West Africa, has been appointed Governor and Commander in Chief of the East Africa Protectorate.

W. D. Reid, President Reid Newfoundland Co., and Mrs. Reid arrived in Montreal at the end of June, from St. John's, Nfld., and sailed July 2 on the s.s. Empress of Ireland for Great Britain.

The residence of the late H. C. Hammond, President of the Northern Navigation Co., 60 Grosvenor St., Toronto, has been sold to The Ewart Mission and Deaconesses Training Home. Mrs. Hammond is building another house on St. George St.

A. B. Stickney, President Chicago Great Western Ry., who was the first General Superintendent of the C.P.R. at Winnipeg in 1881 until W. C. Van Horne became General Manager, was in Winnipeg recently, having travelled over the C.P.R. from Vancouver.

Hon. L. P. Brodeur, Minister of Marine; Hon. G. P. Graham, Minister of Railways and Canals, and C. C. Ballantyne, of the Montreal Harbor Commission, were passengers on the C.P.R. s.s. Empress of Ireland, which sailed from Quebec, for England, July 2.

W. Aird was presented with a leather steamer trunk, a club bag and a steamer rug recently, on retiring from the position of inspector of locomotive building at the Canadian Locomotive Works, Kingston, Ont. He subsequently left Kingston for a trip to Scotland.

W. C. McIntyre, whose death took place as the result of an automobile accident at Montreal, June 29, held the following positions, among others: President Canadian Transfer Co., Vice President Dominion Bridge Co., Director Structural Steel Co., and President Windsor Hotel Co.

The list of honorary patrons of the proposed "Back to Montreal" celebrations, Sept. 13 to 20, includes Sir Thos. G. Shaughnessy, President C.P.R.; C. M. Hays, Second Vice President and General Manager G.T.R.; Sir H. Montagu Allan, and G. W. Stephens, Chairman Montreal Harbor Commission.

M. M. Campbell, C.E., formerly of the National Transcontinental Ry. Commission's field staff, and who had considerable experience in building inspection while located in the State of Washington, has been appointed a building inspector on the C.P.R., with headquarters at Chemin Gouin, Que.

London, Eng., papers announced recently that Harold A. and Mrs. Richardson had attended Court at Buckingham Palace, Mrs. Richardson being presented by Lady Crewe. H. A. Richardson was, at one time, a resident of Montreal and was interested in the promotion of the Montreal and Southern Counties Ry.

W. Bryce, who was recently appointed locomotive foreman, C.P.R., at Ignace, Ont., was born at Glasgow, Scotland, Aug. 22, 1872, and entered C.P.R. service Mar. 8, 1904, since when he has been to Feb., 1906, machinist; Feb., 1906, to Mar., 1908, steam shovel inspector; Mar., 1908, to Apr. 30, 1909, locomotive foreman.

E. S. Piper, President of the N. L. Piper Railway Supply Co., Ltd., who died in Toronto in March, left an estate of $43,940, of which $29,800 was stock in the company, he having held 298 shares out of 400, the rest being owned by members of his family. The whole estate was left to the widow, daughter and four sons.

Jas. Mills, member of the Board of Railway Commissioners, who underwent a serious operation in Toronto April 7, and who since his partial convalescence in a private hospital in Toronto, has been in Guelph General Hospital, left Guelph July 23, with his family to spend the summer at Forest Nook, Magnetawan River, Ont.

A. H. Baird, C.P.R. ticket agent, Paris, Ont., who died there July 17, aged 75, was born at Montreal, and moved to Paris in 1847, where he resided ever since. Among the many offices held by him during his residence there, are, Mayor, Reeve, Warden of Brant County, Chairman of Board of Education, and Chairman of the Public Library Board. He was a member of the Canadian Ticket Agents' Association, and attended most of the Association's annual trips for many years past.

Thomas King, who has been appointed Travelling Passenger Agent, G.T.R., Montreal, was born at Dunbarton, Ont., July 18, 1869, and entered G.T.R. service in the Transportation Department, Mar. 28, 1885 as telegraph operator, and filled various positions until June, 1889, since when he has been to Aug. 11, 1892, agent, Whitby Jct., Ont.; Aug. 11, 1892, to May 23, 1895, agent, Brockville, Ont.; May 23, 1895, to Nov. 4, 1897, agent, Sherbrooke, Que.; Nov. 4, 1897, to May 10, 1909, agent, Lewiston, Me.

F. W. Morse, ex-Vice President and General Manager G.T. Pacific Ry., arrived in Montreal July 2 on his return from Europe. C. M. Hays, President G.T.P.R. and Second Vice President and General Manager G.T.R., sailed from New York June 29 for England, and his car Canada being in New York, Mr. Morse travelled back in it to Montreal. This fact was magnified by a section of the daily press into a special sending of the Canada to New York to meet Mr. Morse, and the fairy story writers followed this up by an announcement that Mr. Hays would resign and be succeeded by Mr. Morse and other equally likely prophecies.

A. Z. Mullins, who has been appointed Commercial Agent G.T.R., Grand Rapids, Mich., was born at Appin, Ont., Feb. 14, 1862, and entered G.T.R. service Feb. 10, 1884, since when he has been, to May 1, 1887, telegraph operator, Komoka, Ont.; May 1, 1887 to 1888, clerk and operator, Buffalo, N.Y.; 1888 to 1889, rate clerk to Assistant General Freight Agent Through Traffic, Buffalo, N.Y.; 1889 to 1892, chief clerk to Commercial Agent, Buffalo, N.Y.; 1892 to Oct., 1896, Contracting Agent, Buffalo, N.Y.; Oct., 1896, to Apr. 1902, Agent National Despatch-Great Eastern Line, Grand Rapids, Mich.; Apr. 1902, to July 1, 1909, Agent Lackawanna-Grand Trunk Line, Detroit, Mich.

C. W. VanBuren, who has been appointed Master Car Builder, C.P.R. Eastern Lines, Montreal, entered railway service Mar., 1889, since when he has been, to Nov. 1891, carpenter, New York Central shops, West Albany, N.Y.; Nov., 1891, to Sept. 1, 1893, assistant foreman; Sept. 1, 1893, to Sept. 1, 1896, in charge of car department work, Adirondack Division, same road, Herkimer, N.Y.; Sept. 1, 1896, to July 16, 1905, car foreman on Adirondack Division and Mohawk Division, New York Central and West Shore Rds.; July 16, 1905, to July 1, 1906, General Car Inspector, C.P.R. Eastern Lines, Montreal; July 1, 1906, to July 1, 1909, Divisional Car Foreman, C.P.R., Eastern Division, Montreal.

W. C. Bowles, whose appointment as General Freight Agent, C.P.R. Pacific Division, Vancouver, was announced in our last issue, was born at Montreal, June 3, 1875, and entered railway service in 1891, since when, to 1897, he held various positions in the District Freight Agent's office, Montreal, and General Agent's office, Chicago, Ill.; Sept. 1, 1897, to Apr. 1, 1903, rate clerk Traffic Manager's office, Winnipeg; Apr. 1, 1903, to

EDW. O. FUCE

Hon. Grad., Univ. Tor. (S.P.S.)
A. M. CAN. SOC. C. E.
ONT. LAND SURVEYOR,

Consulting Civil Engineer
GALT, ONT.

Railway Location & Construction.
Reinforced Concrete Structures.

The C.P.R. has installed an airbrake testing apparatus at Toronto for the purpose of testing the brakes on each car before it is sent out of the passenger car yard to be made up into a train.

In connection with the proposal to construct a joint stockyard at St. Boniface, Man., by the railway companies entering the city, it has been discovered that the C.P.R., by an agreement made in 1881, is under bonds of $200,000 and loss of exemption from taxation on terminal properties to maintain its shops and stockyards in perpetuity in Winnipeg. It is stated that the proposed union stockyard cannot be operated successfully unless by the co-operation of the C.P.R., and that unless some readjustment is made the C.P.R. will have to withdraw from the temporary agreement.

ATTENTION, MASTER CAR BUILDERS!

The M. C. B. rules of interchange provide for the use of THE STEEL BACK BRAKE SHOE on your freight equipment.

The use of OUR STEEL BACK SHOE will mean a saving in brake shoe maintenance, brake heads and brake beams.

THE STEEL BACK BRAKE SHOE is an economy on all railway equipment.

Fowler, who has resigned the position of Master Car Builder, C.P.R., on account of ill health, was born at Weymouth, Eng., Apr. 27, 1856, and has been engaged in railway car construction since 1880. His record is as follows:—Mar., 1880, to Sept., 1882, car builder in shops of St. Louis, Iron Mountain and Southern Rd., Baring Cross, Ark.; Oct., 1882, to Nov., 1883, car builder in shops of Union Pacific Rd., Denver, Col.; Nov., 1883, to end of 1889, car foreman, same company at Denver; 1890 to 1891, general car foreman, Denver, Texas and Fort Worth Rd., Denver, Col.; 1891 to 1893, car foreman, Union Pacific Rd., Denver, Col.; 1894 to 1900, Master Car Builder, Union Pacific, D. G. and Colorado Southern Rd.; 1900 to Apr., 1902, General Car Inspector and Master Car Repairer, Southern Pacific Rd., Sacramento, Cal.; 1902 to June 30, 1909, Master Car Builder, C.P.R. He was Second Vice President of the Master Car Builders' Association, 1904-05; First Vice President, 1905-06, and President, 1906-07.

G. W. Robb, whose appointment as Master Mechanic G.T.P.R., Rivers, Man., was announced in our last iusse, entered G.T.R. service in 1880, since when he has been, to 1881, car repairer and clerk, Chaudiere Jct., Que.; 1881 to 1882, apprentice, erecting shops, Montreal; 1882 to 1884, apprentice at Brockville roundhouse, Ont.; 1884 to 1885, machinists' improver, Northern and Northwestern Ry. repair shop and roundhouse, Toronto; 1885 to 1887, machinist, C.P.R. shops, Winnipeg, and charge hand at Broadview, Man.; 1887 to 1889, foreman of roundhouse at Brackenridge and Wilmar, Minn., locomotive foreman on construction, and at Fort Budford and Glasgow, Mont., during the construction of the G.N.R. between Minot, N.D., and Great Falls, Mont.; 1889 to 1890, locomotive foreman, Chicago and Great Western Ry., Des Moines, Ia.; 1890 to 1905, general foreman, Canada Atlantic Ry. erecting shops, Ottawa; 1905 to Mar., 1909, general foreman, G.T.R. shops, and roundhouse, Ottawa (taken over from the Canada Atlantic Ry.); Mar. to June, 1909, Assistant Master Mechanic, G.T.P.R., Rivers, Man.

Gordon Grant, who has been appointed Chief Engineer National Transcontinental Ry. Commission, in succession to H. D. Lumsden, resigned, was born at Dufftown, Banffshire, Scotland, Jan. 2, 1865, and is a son of the late Peter Grant, a member of Sir Sandford Fleming's staff on the I.C.R. and the C.P.R. He was educated at Ottawa, and went to the Argentine Republic in 1881 with his uncle, W. B. Grant, Chief Engineer Buenos Ayres Southern Ry., remaining there for six years. Returning to Canada in 1887 he was engaged until 1890 upon the I.C.R. construction in Cape Breton; from 1890 to 1893 he was engaged on C.P.R. survey work east of Montreal; from 1893 to 1897 he was on construction work on the Flagler roads in the U.S., since when his record has been: 1897 to 1900, on construction Crow's Nest Pass Line, and Kootenay and Arrowhead Ry., for C.P.R.; 1900 to 1903, chief draughtsman construction department C.P.R., Montreal; May, 1904, to Feb., 1905, on C.P.R. location work in British Columbia; Feb., 1905, to Sept., 1906, on National Transcontinental location work northwest of Quebec; Sept., 1906, to May, 1907, assistant District Engineer National Transcontinental Ry., Quebec; May, 1907, to Aug., 1909, inspecting engineer, N.T.R. Commission.

C. E. Cartwright, Division Engineer C.P.R. Pacific Division, Vancouver, B.C., whose portrait appears on the first page of this issue, was born at Toronto, Oct. 14, 1864, but spent his early years at Kingston, Ont., and graduated at the Royal Military College there, June, 1884. He entered railway service in 1883, his subsequent record being:—1883, chain man on location, Great American and European Short Line, Nova Scotia; Oct., 1885, to July, 1888, location and construction, Pontiac and Pacific Jct. Ry., and Gatineau Valley Ry.; July, 1888, to Mar., 1890, draughtsman, Norfolk and Carolina Ry., and in charge of survey for Belt Line Ry., Norfolk, Va.; Mar., 1890, to Nov., 1892, in private practice; Nov., 1892, to July, 1896, in charge of preparation of right of way maps and changes of grade and alignment for Division Engineer, Peoria Division, Terre Haute and Indianapolis Rd.; Oct., 1896, to Apr., 1897, topographer and draughtsman through Adirondacks for New York and Ottawa Ry.; Apr., 1897, to Jan., 1899, Assistant Chief Engineer, Ottawa and New York Ry., Cornwall, Ont.; Apr. to Sept., 1899, Resident Engineer C.P.R. Kamloops and Laggan branches; Oct., 1899, to Apr., 1902, engineer of construction Vancouver and Lulu Island Ry.; Apr., 1902, to Jan., 1905, assistant to Division Engineer C.P.R., Vancouver, B.C.; Jan., 1905, to date, Division Engineer C.P.R., Vancouver, B.C.

H. D. Lumsden, who has resigned the position of Chief Engineer National Transcontinental Ry., was born at Belhelvie Lodge, Aberdeenshire, Scotland, Sept. 7, 1844. He was educated in Scotland and England, and came to Canada in 1861; was admitted a provincial land surveyor for Ontario in Jan., 1866, and remained in private practice as such up to 1870. He was elected Reeve of Eldon tp. and President Eldon Agricultural Society in 1870. In 1867 he obtained a Military School certificate and was gazetted a lieutenant in the 34th Batt.; was elected a member of the Institute of Civil Engineers, Eng., in 1885, a member of the Canadian Society of Civil Engineers in 1887, and for several years was a member of the council of the latter body and was also President. He has had a long and varied experience as an engineer commencing in Oct., 1870, when he was in charge of the location of the northerly portion of the Toronto and Nipissing Ry., under E. Wragge, C.E., since when he has been almost constantly employed in the location or construction of railways, amongst others the location of portions of the Credit Valley Ry., Toronto, Grey and Bruce Ry., Northern Ry., Georgian Bay branch C.P.R., etc., the location and construction of the Ontario and Quebec Ry., Toronto to Perth; the C.P.R., Smith's Falls, Ont., to Vaudreuil, Que.; St. John's to Lennoxville, Que.; and Holeb to Mattawamkeag, Me.; Supervising Engineer of the location and construction of the Qu'Appelle, Long Lake and Saskatchewan Ry., and Calgary and Edmonton Ry., in the Northwest Territories; the C.P.R. from Rigaud to Ottawa; the Crow's Nest Pass Ry., Lethbridge to Kootenay Landing, and numerous branches of the C.P.R. in other portions of the Dominion. In Aug., 1904, he was appointed Chief Engineer of the National Transcontinental Ry. He was married in Oct., 1885, to Mary Frederica, only daughter of J. W. G. Whitney, of Toronto. Shortly after his appointment as Chief Engineer of the N.T.R. he removed from Toronto, where he had lived for several years previously, to Ottawa. His summer home is Buchrome, Orillia, where Mrs. Lumsden and their two sons are now staying.

F. W. Dudley, Eastern Passenger Agent, Canadian Pacific Ry., New York City, writes:—"Your publication, The Railway & Marine World, is a most interesting one."

The hearing of the C.P.R. and G.T.R. appeals against the Board of Railway Commissioners' order to erect a viaduct along the Toronto waterfront has been set down for argument at the October sittings of the Supreme Court at Ottawa.

G. S. Potts, a Winnipeg barrister, has filed a claim in the Court of the King's Bench against the C.P.R. for $350 disbursements and $20,000 for labor and services performed. It is set forth in the statement of claim that he was actively and exclusively engaged by the company from Aug. 6 to Oct. 26, 1908, in conducting negotiations between the company and its employes, and that he succeeded in effecting a settlement and adjusting the differences which caused the strike of the C.P.R. mechanical employes.

TRANSPORTATION APPOINTMENTS.

The information under this head, which is almost entirely gathered from official sources, is compiled with the greatest care, so as to ensure absolute accuracy. Anyone who may notice any error in our announcements will confer a favor by advising us.

Canadian Government Railways Managing Board.—D. Pottinger, in addition to his duties as a member of the Board, is specially charged with the work of the office, such as approving and signing all vouchers on behalf of the Board, the preparation of returns for Parliament, the checking of pay rolls and vouchers, and the exercising of a general supervision over the Accounting Department. He acts for theBoar d as Chairman of the Provident Fund Board, and of the Insurance Association.

E. Tiffin, in addition to his duties as a member of the Board, exercises the power and authority of General Traffic Manager. All questions affecting traffic are dealt with by him.

F. P. Brady, in addition to his duties as a member of the Board, acts as General Superintendent. All matters affecting transportation are dealt with by him.

Canadian Northern Ry.—H. Williams has been appointed locomotive foreman, Kipling, Sask., vice A. W. McKenzie transferred.

A. W. McKenzie, heretofore locomotive foreman at Kipling, Sask., has been appointed locomotive foreman, Prince Albert, Sask.

Canadian Pacific Ry.—A. L. Smith, heretofore Superintendent District 2, Lake Superior Division, White River, Ont., has been appointed Superintendent District 1, Eastern Division, vice W. B. Cronk transferred. Office, Farnham, Que.

R. W. Burnett, heretofore Assistant Master Car Builder, has been appointed acting General Master Car Builder, W. E. Fowler, Master Car Builder, having resigned on account of ill health. Office, Montreal. The position of Assistant Master Car Builder has been abolished.

C. W. VanBuren, heretofore Divisional Car Foreman, Eastern Division, has been appointed Master Car Builder, Eastern Lines. Office, Montreal.

C. Kyle, heretofore Supervisor of Engines and Trains, has been appointed General Master Mechanic, Eastern Lines. Office, Montreal.

G. E. Smart, heretofore General Car Inspector, Eastern Lines, has been appointed Divisional Car Foreman, Eastern Division, vice C. W. VanBuren promoted. Office, Glen Yard, Montreal.

P. A. Crysler, heretofore Car Foreman, Place Viger, Montreal, has been appointed General Car Inspector, Eastern Lines, vice G. E. Smart promoted. Office, Montreal.

W. B. Cronk, Superintendent District 1, Eastern Division, Farnham, Que., is reported to have been appointed Superintendent District 2, Lake Superior Division, White River, Ont., vice A. L. Smith, transferred.

G. Gilbert, heretofore train dispatcher, Kenora, Ont., has been appointed Chief Train Dispatcher, District 1, Central Division, vice A. H. Mansfield transferred. Office, Kenora, Ont.

T. M. Fraser, heretofore Roadmaster, Minnedosa, Man., has been appointed temporarily Roadmaster, Souris section, during the absence of P. E. Barry. Office, Winnipeg.

R. J. Hood, heretofore Roadmaster, Brandon, Man., has been appointed Roadmaster, Minnedosa, Man., vice T. M. Fraser transferred.

J. M. Mack, heretofore locomotive fitter at Brandon, Man., has been appointed acting locomotive foreman at Minnedosa, Man., vice W. F. Lowe on leave of absence.

Drs. J. S. Matheson, J. I. Lynch and C. T. Templeton, have been appointed company's surgeons at Brandon, Man.

A. McDonald has been appointed Roadmaster, Rapid City section, Miniota and Lenore branches and Brandon yard, Brandon, Man., vice R. J. Hood transferred.

L. E. W. Bailey has been appointed District Master Mechanic, at Moose Jaw, Sask., vice F. W. Sadlier transferred.

W. H. Gordon, Travelling Freight Agent, Winnipeg, has been appointed acting District and Travelling Freight Agent, Saskatoon, Sask., during the absence of R. W. Drew as acting General Freight Agent at Nelson, B.C.

L. A. Warner, heretofore conductor, has been appointed Assistant Trainmaster, District 1, Pacific Division, with territory from Laggan to Field. Office, Field, B.C.

V. Anderson, Roadmaster, Revelstoke, B.C., has had his jurisdiction extended from Beavermouth to Laggan.

Jno. Anderson has been appointed Roadmaster, Shuswap section, including Shuswap and Okanagan branch, Pacific Division, vice W. Stormont resigned. Office, Revelstoke, B.C.

F. Olson has been appointed assistant Roadmaster, Field, B.C.

W. G. Cooper has been appointed Agent of Immigration and Atlantic Steamships, vice C. McLaughlin, who has been granted leave of absence on account of illness. Office, 1 Broadway, New York City.

W. B. Slattery, heretofore City Freight Agent, New York, has been appointed Travelling Freight Agent, with territory covering Eastern New York, Eastern Pennsylvania and the State of New Jersey.

C. R. Bishop has been appointed City Freight Agent, New York City, vice W. B. Slattery transferred.

Central Vermont Ry.—The jurisdiction of W. E. Costello, Superintendent, has been extended to include the Central Vermont Transportation Co.'s steamships New York and New London. Office, St. Albans, Vt.

Deleware and Hudson Co.—J. G. Eisele, General Coal Sales Agent, having resigned, the position has been abolished.

Chicago and North Western Ry.—F. H. Terry, heretofore Soliciting Freight Agent, G.T.R., Toronto, has been appointed Travelling Agent, C. & N.W.R., Toronto.

Intercolonial Ry.—W. Davidson has been appointed roundhouse foreman at Halifax, N.S.

National Transcontinental Ry. Commission.—Gordon Grant, heretofore Inspecting Engineer, has been appointed Chief Engineer, vice H. D. Lumsden resigned.

Niagara, St. Catharines and Toronto Navigation Co.—H. G. Wiltze, heretofore dispatcher N. St. C. and T. Ry., at St. Catharines, Ont., has been appointed General Agent at Toronto, vice E. H. Pepper, who has been transferred to the Canadian Northern Ry.'s service in the north-west , in the hope that he may regain his health in that climate.

Grand Trunk Pacific Ry.—J. G. Swalwell has been appointed Local Auditor in charge of Traffic Receipts. Office, Winnipeg. All reports and correspondence relating to business subsequent to July 1, previously sent by other companies and G.T.P.R. agents to Auditor of Freight Accounts and Auditor of Passenger Accounts, Montreal, and conductors' and train agents' reports and ticket collections sent to District Passenger Agent Duff, Winnipeg, are to be sent to Local Auditor, Winnipeg. Drafts on foreign roads for freight and passenger balances are drawn by Local Auditor. Agents' drafts in settlement of interchange freight balances are drawn on, and all remittances by foreign companies for freight and passenger balances are made to W. LeB. Ross, Local Treasurer, Winnipeg. No change will be made in the present method of handling car mileage accounts and settlement of same.

Grand Trunk Ry.—T. King, heretofore Agent at Lewiston, Me., has been appointed Travelling Passenger Agent, Montreal, vice C. W. Johnston, appointed chief clerk G.T.P.R. General Passenger Agent's office, Winnipeg.

E. R. Thorpe, heretofore Soliciting Freight Agent, Hamilton, Ont., has been appointed Soliciting Freight Agent, Toronto, vice F. H. Terry, who has resigned to take service with another company.

W. E. Kleinsteiber, heretofore rate clerk, Freight Traffic Office, Toronto, has been appointed Soliciting Freight Agent. Hamilton, Ont., vice E. R. Thorpe, transferred.

Consequent on the G.T.R. having assumed the supervision of the solicitation, in the west, of the Fast Freight Lines, as mentioned in our last issue, its agencies for the solicitation of freight traffic have been reorganized, as follows:—Chicago, Ill., H. E. Graves, Commercial Agent, formerly General Western Agent National Despatch-Great Eastern Line; T. A. Chappell, Assistant Commercial Agent, formerly Agent Lackawanna-Grand Trunk Line; Milwaukee, Wis., H. W. Ploss, Commercial Agent, formerly Contracting Freight Agent Reading Despatch; Minneapolis, Minn., T. C. Burgess, Commercial Agent; Omaha, Neb., A. Wallace, Commercial Agent, formerly Agent National Despatch-Great Eastern Line; Kansas City, Mo., H. Seeley, Commercial Agent; St. Louis, Mo., C. A. Gormaly, Commercial Agent; Los Angeles, Cal., W. H. Bullen, Pacific Coast Agent; San Francisco, Cal., F. H. Lord, Agent; Seattle, Wash., L. V. Druce, Commercial Agent, all reporting to R. L. Burnap, Assistant General Freight Agent, Chicago, Ill.; Detroit, Mich., W. H. Spicer, Commercial Agent, formerly Agent Lackawanna-Grand Trunk Line, Milwaukee, Wis.; Grand Rapids, Mich., A. Z. Mullins, Commercial Agent, formerly Agent Lackawanna-Grand Trunk Line, Detroit, Mich.; Saginaw, Mich., C. E. Wagner, Commercial Agent, formerly Agent National Despatch-Great Eastern Line, Detroit, Mich.; all reporting to C. Clarke, Division Freight Agent, Detroit, Mich.; Buffalo, N.Y., E. J. Hilliard, Commercial Agent; Toledo, Ohio, S. G. Wagstaff, Commercial Agent; Cincinnati, Ohio, W. K. Evans, Commercial Agent; Pittsburg, Pa., E. F. Flinn, Commercial Agent, formerly Manager Reading Despatch, Buffalo, N.Y., all reporting to I. W. Gantt, Assistant General Freight Agent, Buffalo, N.Y.

The following agents have been appointed:—Lyn, Ont., E. N. Granger;

MBOSSED ALUMINUM NUMBERS

Our Signs and Numbers are made of ALUMINUM and riveted with ALUMINUM RIVETS to a BLACK JAPANNED STEEL PLATE. The great benefit of our Numbers and Signs is. that being made of Aluminum they will never CRACK, RUST or TARNISH, and can be seen much better both by day and night than any other manufactured. The Light, Glistening Aluminum Figure standing out on the Black Background makes a PERFECT CONTRAST between the Number and the Plate.

Kingston, Ont., S. C. Wright; Whitby, Ont., S. McPhaden; Mariposa, Ont., J. S. Francis; La Salette, Ont., G. P. Robbins; Carlsbad Springs, Ont., J. M. Joynt; Rockland, Ont., G. W. Beriault (Acting); Rock Lake, Ont., J. E. Marchand (Acting); Algonquin Park, Ont., J. Armstrong; Kearney, Ont., H. G. Younkie.

Intercolonial Ry.—W. H. Estano, who has been acting Traffic Auditor since the retirement of J. R. Bruce, Dec., 1908, has been appointed Traffic Auditor. Office, Moncton, N.B.

See also Canadian Government Railways Managing Board.

Michigan Central Rd.—In our last issue it was stated that A. A. Ingram had been appointed Solicitor at St. Thomas vice W. B. Kingsmill, resigned. This was not quite correct. The M.C.R. solicitors in Canada are Kingsmill, Saunders, Torrance & Kingsmill, whose head office is in Toronto and who have a branch office at St. Thomas. They have sent A. A. Ingram from their Toronto office, where he has been for the past three years, to take charge of the St. Thomas office under W. B. Kingsmill, who will in future divide his time between the Toronto and St. Thomas offices.

Prince Edward Island Ry.—See Canadian Government Railways Managing Board.

Ottawa and New York Ry.—F. J. Balch, heretofore Assistant General Freight Agent, has been appointed General Freight Agent, vice G. H. Phillips, who was Superintendent and General Freight Agent and will in future discharge the duties of Superintendent only. Office, Ottawa. The position of Assistant General Freight Agent has been abolished.

Esquimalt & Nanaimo Ry.—Following is the official organization revised to date:—W. Whyte, Second Vice President, C.P.R., Winnipeg, President; R. Marpole, General Executive Assistant, C.P.R., Vancouver, B.C., Vice President; H. E. Beasley, Superintendent, Victoria, with full charge of operation of line, and representing the Vice President in connection with construction of new lines and land clearing operations; J. Goodfellow, Assistant Superintendent, Victoria; H. J. Cambie, Chief Engineer, Vancouver; R. A. Bainbridge, Division Engineer, Victoria, reporting to H. E. Beasley, Superintendent and to H. J. Cambie, Chief Engineer; A. R. Wilby, Resident Engineer, Victoria; M. S. Wheatley, Mechanical Foreman in charge of mechanical affairs, with office at Wellington, B.C., reporting to Superintendent; W. Newman, Roadmaster and Bridge and Building Master, Victoria; L. H. Armstrong, Dispatcher, Victoria; F. H. Clendenning, District Freight Agent, Victoria; L. D. Chetham, District Passenger Agent, Victoria.

The Toronto City Council in voting, July 16, for the sale of 23 acres of land and water lots, at Ashbridge's Bay, to an iron manufacturing company in process of organization, decided to retain a right of way through the land for a double track railway. The city is to provide a 14 ft. channel to the site, the company doing the piling and filling in of the water lots, in addition to paying $35,000 for the acreage, and expending $100,000 on buildings. The Polson Iron Works Co. is negotiating for a site in the same vicinity.

Canadian Northern Ry. Construction.

Canadian Northern Quebec Ry.—Two bridges on the line in the vicinity of Grand Mere were burned July 8, the fires, it is believed, being incendiary. The first fire destroyed one span of the bridge at Burrill Siding, and the second destroyed the bridge between Charett's Mills and St. Poulin. This bridge, of which 11 spans were destroyed is 150 feet high. Temporary repairs have been made, and traffic has been resumed.

Canadian Northern Ontario Ry.—The Board of Railway Commissioners, July 6, approved of the location plans for the extension into Ottawa of the company's line from Hawkesbury. The plan shows a line well to the south of the Rideau River, gradually curving around to a junction near Hardman's Bridge. It was decided that a separate order must be applied for to authorize connection with the C.P.R. and the Ottawa and New York Ry. The construction of this short piece of line into Ottawa will be carried out by Mackenzie, Mann & Co.'s own staff.

In connection with the development of the Ashbridge Bay district, Toronto, the mayor suggests that the council open negotiations with the C.N.O.R. so as to secure the location of the company's shops.

With further reference to the construction of the short section of line at Parry Sound, Ont., to connect up the C.N.R. and the C.P.R. with the water front, which was dealt with in our last issue, we are advised that the line has a total length of about two miles. Of this, the C.P.R. has under construction about three-quarters of a mile; of the remaining portion, the C.N.R. is constructing about three-quarters of a mile on its own account, and the balance on joint account. There is a good bit of rock work on the C.N.R. and the joint section. The work on the C.N.R. section includes the construction of a bridge across the river, which will consist of three spans, 85, 50 and 75 ft. respectively, on concrete piers and abutments. The contractor for the C.N.R. and the joint section is J. A. Johnston, Parry Sound.

Angus Sinclair, C.E., is the contractor for the extension of the C.N.O.R. from Selwood Junction northerly and westerly for 32 miles. Grading has been so far completed that it is expected tracklaying may be commenced at any time. This 32 miles of track will be all that will be done this season, but it will make a considerable reduction in the number of miles to be travelled by trail and stage into the Gowganda country.

On returning to Toronto, July 10, from England, where he secured the underwriting of £800,000 4% C.N.O.R. perpetual consolidated stock, W. Mackenzie, President, announced that work would be started in the near future on a line between Ottawa and Niagara Falls, via Toronto. The C.N.Q.R. has about completed the Quebec-Garneau cut-off, the line from Garneau to Hawkesbury, Ont., has been in operation for some time, and the C.N.O.R. between Hawkesbury and Ottawa is nearly completed. In a very short time through trains will be running between Quebec and Ottawa, also between Montreal and Ottawa, via Joliette. A short line between Hawkesbury and Montreal has been surveyed, so as to avoid going round by Joliette.

From Toronto east the route plan has been approved by the Minister of Railways as far as Verona, Frontenac county, 153 miles, and the question of the route from Verona to Ottawa is under the minister's consideration. The line as located leaves the C.N.O.R. Toronto-Sudbury line about five miles north-east of Toronto, near the Todmorden road crossing, runs up the Don east valley and crosses under the G.T.R. near Scarboro Jct. Thence it proceeds north-easterly, keeping north of the G.T.R., and passing through Cherrywood, Kinsale and Orono to Port Hope, thence via Colborne to Cobourg, crossing the G.T.R. at Brighton, and passing through Trenton to Belleville, thence via Shannonville and up the Salmon River to Verona. From Verona to Ottawa, two routes are under the minister's consideration, one via Portland and South Falls, south of Rideau Lakes, the other crossing the Rideau Lakes near Newboro', thence via Perth and Carleton Place. The Board of Railway Commissioners has approved of the location plans of practically the whole distance between Toronto and Verona, except through Trenton and Belleville where the company's engineers are endeavoring to improve the location. There is also likely to be a change of location at the Toronto end, where the location shows two crossings of the G.T.R. which will probably be reduced to one as above indicated.

From Toronto to Niagara Falls the railway will be built as much as possible on the right-of-way of the Electrical Development Co. of Ontario, in which W. Mackenzie has a controlling interest. That right-of-way may have to be deviated from at some points, particularly at the escarpment near Hamilton. It was expected that an electric railway would be built along the power route, but Mr. Mackenzie states that the railway will be a steam one, though it may be electrified later. It is suggested that an electric railway may be built alongside the steam one on the same right-of-way. A bridge will be built at or near Niagara Falls to connect with U.S. lines.

It is expected that final surveys both east and west from Toronto will be gone on with at once, and some grading may be done this year.

Canadian Northern Ry.—D. D. Mann, Vice President, had an interview with the Mayor and Corporation of Regina, Sask., July 6. He is reported to have told the council that the position of Regina was such that it had been decided to make it the chief divisional point on the C.N.R. system between Winnipeg and Calgary, and that it was proposed to develop a new line into Edmonton, using the present line from Winnipeg, via Brandon into Regina, as the first section; then using the Regina-Prince Albert line as far as Craik, and from there a new line would be constructed crossing the Saskatchewan at the elbow, and then running northwesterly into Edmonton. In connection with the developments in Regina, Mr. Mann asked for a site for a passenger station in the centre of the city. The council are favorable to granting this site, on condition that a union station be erected, but if the C.P.R. declines to join in the project, the council desire that the station be open to any other lines that might enter the city.

In Manitoba the company has under construction 70 miles of line, starting from Halboro, westerly through the centre of the province.

Track is laid on the Goose Lake extension to sec. 27, tp. 29, range 16, west of the third meridian, and grading is being pushed rapidly beyond that point.

Construction has been started on the branch from Maryfield, southwesterly, for which the Cowan Construction Co. have the contract.

Considerable progress has been made on the grading on the branch from Vegreville to Camrose, Sask. It is expected that tracklaying will be started at Vegreville early in Aug.

Alberta Midland Ry.—A company with this title was incorporated last session of the Alberta Legislature, the provisional directors being: W. Mackenzie, D. D. Mann, Z. A. Lash, D. B. Hanna and G. G. Ruel, Toronto. The company was given power to construct the following lines:—(1) From near Vermillion on the C.N.R., north-westerly to Whitford Lake, thence westerly to a junction with the C.N.R. main line near Bruderheim. (2) From between Morinville and the northern boundary of tp. 61, on the Edmonton and Slave Lake Ry., easterly keeping north of the North Saskatchewan River to the eastern boundary of the province. (3) From near Edmonton north-westerly to or near Slave Lake, thence to the Peace River. (4) From near Strathcona southerly, via Calgary, to the confluence of the Little Bow and Belly rivers, thence south-westerly to Lethbridge, with a branch line from near Bittern Lake north-easterly to Vegreville, and the following other branch lines: from the crossing of the Little Bow River via Macleod to the southern boundary of the province; from between Macleod and the crossing of the Belly River on the last mentioned line westerly to the western boundary of the province; from between Cardston and the southern boundary of the province westerly to the western boundary of the province; from Calgary westerly to Cochrane, Exshaw and Banff, and from Cochrane north to intersect the company's line near Pigeon Lake, and from Cochrane southerly to Nanton; from near Little Beaver Lake northwesterly to Wetaskiwin, thence north-westerly to connect with any proposed railway to be operated by the C.N.R. (5) From near Content on the last mentioned line westerly via Red Deer to tp. 39, range 7, west of the 5th meridian, at or near Rocky Mountain House. The capital stock is fixed at $5,000,000; bonds may be issued up to $25,000 a mile, and agreements may be made with the Canadian Northern Ry., the Qu'Appelle, Long Lake and Saskatchewan Rd. and Steamboat Co., and the Saskatchewan Northwestern Ry. Company.

The Legislature also passed an act confirming an agreement between the C.N.R. Co. and the Government, by which the Province guaranteed the company's bonds to not exceeding $13,000 a mile for the following lines which the A. M. Ry. is authorized to construct:—From Vermillion to Whitford Lake, 40 miles; from Morinville easterly for 40 miles; from Strathcona to Lethbridge, 355 miles; from Bittern Lake to Vegreville, 50 miles; from Little Bow River to the International boundary, 110 miles; from near Macleod to the Alberta-B.C. boundary, 65 miles; from Cardston to the Alberta-B.C. boundary, 35 miles; from Calgary to the eastern boundary of the Banff National Park, 50 miles; from Content westerly, 60 miles. The act also authorized a similar guarantee of bonds of the following lines which the C.N.R. has power to construct:—From near Edmonton towards Peace River for 50 miles; from Morinville northerly for about 65 miles to Athabasca Landing. Under a section of this act the C.N.R. has taken over the A. M. Ry. Co. and its powers are now merged with the C.N.R. Co. (July, pg. 501.)

Railway Rolling Stock Notes.

The I.C.R., between June 15 and July 20, received 3 baggage cars from the Crossen Car Mfg. Co., Cobourg, Ont.

The G.T.P.R., between June 14 and July 14, received 5 mogul locomotives from the Canadian Locomotive Co., Kingston, Ont.

At the Board of Railway Commissioners' sittings at Ottawa on Sept. 7 all railway companies subject to the Board's jurisdiction wil be asked to show cause why a general order should not issue requiring all snowplows to be equipped with automatic couplers.

The C.N.R. between June 15 and July 15 placed orders for the following rolling stock: 100 steel underframe flat cars with the Dominion Car and Foundry Co., Montreal; 15 cabooses with the Crossen Car Mfg. Co., Cobourg, Ont., and 3 sleeping cars in the U.S.

The Montreal Locomotive Works has made the following deliveries, recently: 11 Pacific type locomotives to the C.P.R., one 4-wheel to M. P. & J. T. Davis, 6 consolidation locomotives to the C.N.R., 2 mogul locomotives to the J.D. McArthur Co., and one 4-wheel locomotive to the Robertson Asbestos Co.

The C.N.R., between June 15 and July 15, received the following additions to rolling stock: 188 box cars from Rhodes, Curry & Co., Amherst, N.S.; 129 box cars from the Canada Car Co., Montreal; 4 box cars from the Crossen Car Mfg. Co., Cobourg, Ont.; and 8 consolidation locomotives from the Montreal Locomotive Works.

The Secretary of the Board of Railway Commissioners has given notice that railway companies subject to the Board's jurisdiction will be required, at the sittings to be held in Ottawa on Sept. 7, to show cause why all freight vans should not be equipped with coupler operating levers and with air gauge and air controlling valves to be located in the cupolas of the cabooses.

The C.P.R., between June 12 and July 14, placed orders for rolling stock, as follows: 2 tank locomotives, 1 Pacific locomotive, 5 freight locomotives, 10 box cars, 1 box baggage car, 5 freight refrigerator cars, 1 stock car and 15 flat cars at its Angus shops, Montreal; 1 van at its Farnham shops, Que.; and 125 steel flat cars and 3 steel coal cars at the Dominion Car and Foundry Co., Montreal.

Following are general dimensions of the 15 cabooses being built for the C.N.R. by the Crossen Car Mfg. Co., Cobourg, Ont.:—

Length over body end sills	30′ 0″
" " platform end sills	35′ 1½″
Width over side sills	9′ 1½″
Height from top of sill to bottom of plate	6′ 6″
Outside of end sill to centre of bolster	4′ 10″
Centre to centre of cross ties	5′ 4″
Height, top of rail to centre of drawbar	2′ 10½″
Wheel base of truck	5′ 0″
Couplers	Janney, all steel

The Canada Car Co., Montreal, has recently received orders for rolling stock as follows: 200 stock cars, 300 flat cars, 700 box cars and 200 refrigerator cars from the G.T.P.R.; 3 plow distributing cars, 125 Hart convertible cars and 10 Otis dump cars from the Hart-Otis Car Co., Montreal; 3 Lidgerwood unloaders from F. H. Hopkins and Co., Montreal; one 39-ton box car from the Hamilton Bridge Works Co., Hamilton, Ont., and 1 Lidgerwood unloader from the Allis-Chalmers Bullock Co., Montreal.

The C.P.R., between June 12 and July 14, received the following additions to rolling stock: 1 Mallet articulated compound locomotive, 7 observation cars, 6 mail and express cars, 4 second class cars, 16 box cars, 2 stock cars, 16 ballast cars, 6 freight refrigerator cars, 1 clearance car, from its Angus shops, Montreal; 8 vans from its Farnham shops, Que.; 324 steel coal cars from the Dominion Car and Foundry Co., Montreal; 4 locomotives from the Montreal Locomotive Works, and 2 locomotives from the American Locomotive Co.

The Montreal Locomotive Works has received an order from the Pacific Coast Coal Mines, Ltd., for one Columbia type locomotive, of which the following are the chief details:

Weight in working order	79,000 lbs.
Weight on drivers	58,000 lbs.
Weight on engine truck	9,000 lbs.
Weight on trailing truck	12,000 lbs.
Wheel base, driving	7′ 0″
Wheel base, engine	21′ 6″
Cylinders	14″ by 22″
Driving wheels, diar.	44″
Boiler, type	straight top
Boiler, diar.	42¾″
Boiler, pressure	160 lbs.
Firebox	42″ by 35″
Tubes, no. and diar.	92—2″
Tubes, length	10′ 6″
Brakes	Westinghouse-American
Capacity, water	1,075 gals.
Capacity, coal	½ ton

Following are the chief details of the hump switching locomotive which the C.P.R. is building at its Angus shops, Montreal, as mentioned in our July issue:—

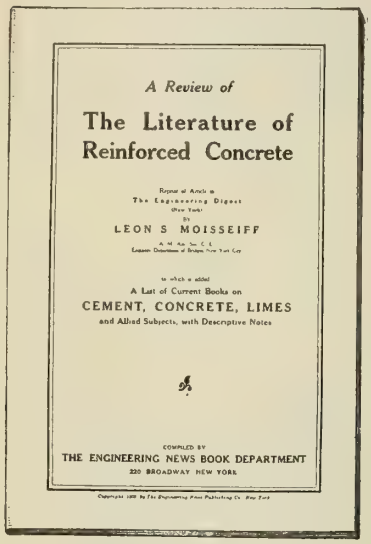
Weight	185,000 lbs.
Cylinders	22½″ by 28″
Drivers, diar.	52″
Working pressure	180 lbs.
Heating surface, tubes	2,305 sq. ft.
" " firebox	182 sq. ft.
Tubes, no. and diar.	349—2″
" length	12 ft. 7⅜″
Firebox	8′ 9⅞″ by 5′ 9¼″
Grate area	49.7 sq. ft.
Capacity, water	5,000 imp. gals.
" coal	10 tons
Air brakes	Westinghouse ET 6
Axles	Open hearth steel
Brake beams	Simplex, trussed for tender
Brake shoes	C.P.R. standard
Couplers	Tower
Journal bearings	C.P.R. standard
Springs	C.P.R. crucible steel
Tires	Krupp crucible steel
Driving wheel centres	Cast steel
Other " "	Cast iron

Following are additional particulars to those we gave in our July issue of the 22 observation cars which the C.P.R. has recently put into service on its western lines, and which were built at its Angus shops, Montreal:—

Body and underframe	Wood
Axles	5″ by 9″ M.C.B.
Bolsters	Double
Brake beams, Simplex, high speed with adj. head	
Brakes shoes	Unflanged steel back diamond S.
Brakes	Westinghouse air high speed
Couplers	Tower passenger
Heating system	Gold with Frumveller heater
Journal boxes	McCord with steel inserts
Platforms	Standard Coupler Co.'s steel
Roofs	Standard passenger covered with canvas
Seats	Movable arm chairs of 3 types
Springs	38″ duplex elliptic
Trucks	6 wheel with 5″ by 9″ journals
Vestibules	Pullman, wide
Wheels	36¼″ steel tired
Lighting	Pintsch gas

CEMENT AND CONCRETE

This 64-page Pamphlet



A Review of
The Literature of Reinforced Concrete
LEON S MOISSEIFF
A List of Current Books on
CEMENT, CONCRETE, LIMES
and Allied Subjects, with Descriptive Notes
THE ENGINEERING NEWS BOOK DEPARTMENT
220 BROADWAY NEW YORK

has been issued in an endeavor to answer the hundreds of letters we have received, requesting information on cement and concrete literature, and which could not be answered individually in detail.

More than 100 books have been listed and described sufficiently to permit the selection of the best books to suit any special requirements.

The pamphlet is of practical value to everyone interested in any way in this form of construction, and every Engineer, Contractor, Manufacturer and Builder should have a copy, which will be sent to any address on receipt of 5 cents, to cover cost of mailing. The supply is limited—if you want a copy, get it NOW. Use the attached coupon.

R.M.W. 89.

Send me pamphlet on Concrete Literature—5 cents enclosed for mailing. Also send me notices of new books on

..Civil Eng'g. ..Mining ..Cement and
..Electrical ..Municipal Concrete
..Mechanical ..Railroad ..Contracting
..Metallurgy

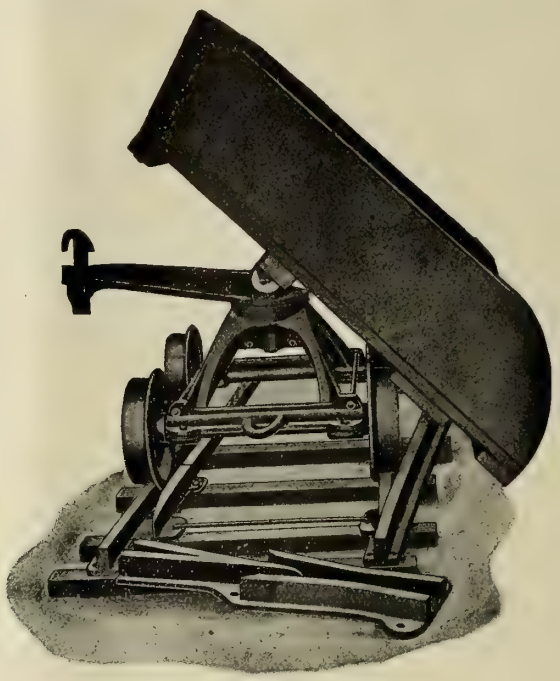
Champion Revolving Dump Car



The CHAMPION CAR is radically different from any now on the market. It is simple, strong, compact and being built entirely of iron except the bed, is extremely durable. The bed revolves and may be dumped on either side or end. Write for catalogue of cars and drums.

The Canadian Road Machine Co., Limited
HAMILTON, CANADA

New Ways To The Woods

The six railways of the Canadian Northern Railway system offer the widest choice of new territories for the fisherman, canoeist, camper and hunter.

IN NOVA SCOTIA the Halifax and Southwestern Railway, from Halifax to Yarmouth, serves seven hundred miles of ocean shore; two score generous trout streams and the famous Rossignol lake system.

IN CAPE BRETON, sixty miles of the Gulf of St. Lawrence shore is skirted by the Inverness Railway, which gives easy access to the Margaree valley—far-famed for its salmon fishing.

IN QUEBEC, the Canadian Northern, Quebec and Quebec, and Lake St. John Railways give easy access to the Saguenay, Upper St. Maurice, the Batiscan, the La Tuque game and fish preserve, and the valleys of the St. Lawrence and Ottawa. All good fishing waters, abounding with ouananiche, trout and bass.

IN ONTARIO, the entire range of the Muskokas, the Georgian Bay hinterland, the French, Pickerel, Still and Maganetawan rivers—well stocked with bass, mascalonge, and pickerel, are best reached by the Canadian Northern Ontario Railway.

IN WESTERN ONTARIO and the prairie provinces, the Canadian Northern Railway serves over three thousand miles of splendid territory. The Rainy River section follows the old Dawson fur trail, which is the finest canoe trip on the continent. There is an amplitude of sporting opportunities for the camera hunter, the fisherman and canoeist.

For literature and general or special information inquire of the information Bureau, Canadian Northern Railway System, Toronto.

Of the 22 cars, 11 have been built with 3 staterooms and drawing room, while the remainder have a smoking room, one state room and one drawing room. The cars are 72′ 8″ long, over end sills; 9′ 10½″ wide, over frame. The observation platform, 6′ 6″ long, at the rear end, is enclosed by a massive brass rail and gate, and has chair accommodation for 15 passengers. The observation room is 25′ 2″ long, provided with 18 chairs of three different designs in padouk, upholstered in morocco leather. The walls are also finished in padouk, a wood similar to Spanish mahogany, but of a deeper red. The writing room, situated between the observation room and the buffet, is provided with a writing desk and chair, and occupies a space 4′ 3″. The staterooms are each provided with toilets, and are each 6′ 4″, as is also the drawing room, which has an annex of 4′. The smoking room, which takes the place of two staterooms in 11 of the cars, is 12′ 8″ long, with 8 movable chairs and 2 movable tables. A special point is made of the windows in the rear of the observation room, which are arranged to reach to within 12″ of the floor, so that passengers may have an unbroken view of the scenery.

Following are general dimensions and chief particulars of the Pacific type simple superheater locomotive which the C.P.R. is building at its Angus shops, Montreal, for delivery in Nov.:—

Weight on drivers	136,000 lbs.
" total	215,000 lbs.
Cylinders	21″ by 28″
Drivers, diar.	69″
Boiler, type	Wagon top, radial stayed
" pressure	200 lbs.
Heating surface, total	2,952 sq. ft.
Tubes, no. and diar.	193—2¼″ and 22—5″
" length	19′ 6″
Firebox	94⅛″ by 70″
Grate area	45.6 sq. ft.
Capacity, water	5,000 imp. gals.
" coal	10 tons
Air brakes	Westinghouse ET 6
Axles	Krupp steel
Brake beams	Simplex trussed
Brake shoes	C.P.R. standard
Couplers	Tower
Headlight	Pyle National Electric
Journal bearings	Canadian Bronze Co.
Sight feed lubricators	Detroit 5-feed
Steam heat equipment	Gold system
Tires	Krupp crucible steel
Wheel centres	Cast steel
Superheater	Vaughan and Horsey

Following are the general dimensions and chief particulars of the 5 consolidation locomotives which the C.P.R. is building at its Angus shops, Montreal, for delivery in Oct. and Nov.:—

Weight on drivers	168,150 lbs.
" total	198,350 lbs.
Cylinders	22½″ by 28″
Drivers, diar.	56″
Boiler, type	Wagon top
" pressue	180 lbs.
Heating surface, total	2,797 sq. ft.
Tubes, no. and diar.	240—2″ and 24—5″
" length	14′ 1⅜″
Firebox	8′ 0⅝″ by 5′ 5¼″
Grate area	43 sq. ft.
Capacity, water	5,000 imp. gals.
" coal	10 tons
Air brakes	Westinghouse ET 6
Axles	Mild steel
Brake beams	Simplex truss
Brake shoes	C.P.R. standard
Couplers	Tower
Headlight	Pyle National Electric
Journal bearings	Canadian Bronze Co.
Sight feed lubricators	Detroit 5-feed
Springs	C.P.R. crucible steel
Steam heat equipment	Gold system
Tires, driving and truck wheels	Krupp crucible
" tender wheels	Cast iron
Wheel centres	Cast steel
Superheater	C.P.R.

The Canadian Locomotive Co., Kingston, Ont., has received an order for one mogul locomotive from O'Brien, Fowler and McDougall Bros., contractors, Ottawa, of which the following are the chief particulars:—

Weight on drivers	102,000 lbs.
" total	117,000 lbs.
Wheel base of engine, rigid	14′ 6″
" " total	22′ 0″
" " and tender	47′ 7″
Length over all, engine and tender	57′ 0″
Width "	10′ 0″
Height "	13′ 9″
Heating surface, firebox	11.9 sq. ft.
" " tubes	1,235 sq. ft.
" " total	1,354 sq. ft.
Driving wheels, diar.	50″
Driving wheel centres	Cast iron
Driving journals	9½″ by 10″
Cylinders	18″ by 24″
Boiler type	Extended wagon top, radial stayed
" pressure	180 lbs.
Tubes, no. and diar.	200—2″
" length	11′ 10″
Brakes	Westinghouse automatic
Weight of tender loaded	92,000 lbs.
Capacity, water	3,800 imp. gals.
" coal	8 tons
Truck, Type	4-wheel steel bolster
Truck wheels, diar.	33″
" " material	Chilled cast iron
Journal	5″ by 9″
Brake beams	Steel

G. T. R. Betterments, Construction Etc.

Montreal Track Elevation.—The question of the elevation of the G.T.R. tracks in the city was further discussed by the Montreal City Council, July 6. A resolution was passed referring the subject again to the civic level crossings committee with instructions to request the G.T.R. to submit without delay plans, specifications and estimates to be prepared in conjunction with the city engineer.

Ottawa Terminal Station and Hotel.—The contract for the new joint terminal station has been let to P. Lyall & Sons, Montreal. A member of the firm was in Ottawa on that day and stated that work would be started at once. It is stated that the operations must necessarily be on a small scale at first until the staff in the present building can be moved into the baggage annex, which is to be used as a station until the new building is completed. This annex is in course of erection, the shed framework is partly erected and the bricklaying has been commenced. It was expected that work would have been so far completed by Aug. 1, that a beginning could be made in moving the staff from the present station. The old station building is to be torn down, and the new building will cover the old site and some adjacent land. The new station will be 140 ft. wide and 228 ft. deep. It will be four storeys high, and will be connected with the proposed new hotel on Major's Hill Park by a subway. The proposed buildings were fully described and illustrated in our July, 1908, issue.

The contract for the hotel to be called Chateau Laurier, is reported let to G. A. Fuller & Co., New York. The contract price has not been announced, but it may be mentioned that the building will cost about $1,500,000.

Toronto Yards.—The Superintendent of Terminals at Toronto made an inspection of the yards in the vicinity of the Don River, July 16. On account of the straightening out of the Don River south of Queen St., by the City Council, the lay-out of the yards there will have to be changed somewhat, and it is desired, in connection with this work, to secure lands for an enlargement.

Toronto Belt Line.—Rumor is once more crediting the G.T.R. with having decided to reconstruct the old belt line round Toronto. The story now being circulated is that the reconstruction is to be undertaken so that it can be utilized for freight trains running between Mimico yards on the west, and York yards on the east.

London Improvements.—The Mayor of London, Ont., met a number of G.T.R. officials at Toronto, July 10, and discussed the question of track elevation, etc., with them. He says he is confident that the company and the city representatives will get together very shortly, and that some arrangement as to what is to be done will be arrived at.

Canada-United States Tunnels.—The G.T.R. has a single track tunnel connecting Sarnia, Ont., with Port Huron, Mich., the trains being hauled through it by electric locomotives; and the Michigan Central Rd. is constructing a double tube tunnel, to connect Windsor, Ont., with Detroit, Mich. Trains will also be hauled through this tunnel by electric locomotives. Press reports recently credited the G.T.R. with having surveys made for the construction of a second tunnel between Sarnia and Port Huron, and for the construction of a tunnel between Windsor and Detroit. We were officially advised, July 16, that the management is not aware of any such project, and that the company's St. Clair tunnel, between Sarnia, Ont., and Port Huron, Mich., meets all its present requirements.

Pipes in Rail Ingots.

E. C. Washburn writes from Minneapolis, Minn.:—"While Manager of the Washburn Steel Castings and Coupler Co., I had several difficult casting propositions; to wit, to secure sound castings without blow holes. One of the usual ways to overcome this difficulty is to use a larger riser, or head; and to secure enough molten metal from these heads to take care of the contraction in the cooling casting, is the question to be solved. It is customary to reduce the end or neck of the riser, where it meets the mold, so as to avoid heavy sawing in removing the feeder from the casting. But when this neck is reduced enough to make its removal practical, it is of such a small size that the sand will freeze or cool it and so cut off the necessary supply of molten metal in the riser or feeder. To overcome this difficulty, I designed a clay pot, patterned exactly on the order of a flower pot, but having a hole of sufficient diameter in the bottom for the hot metal to feed through. This pot was set directly on the pattern, and rammed up with the mold with the usual pouring gate. The result was that the hot metal, after filling the mold, passed up through the bottom of the pot until it was filled. In doing this it heated the clay of the bottom of the pot to practically the temperature of the steel. Then, as the casting cooled, the molten metal fed into the casting through this hole, at times drawing almost the entire inside from the riser, and giving an absolutely sound casting, connected to the riser by the neck, which being only two inches in diameter, was readily broken with a heavy sledge. This type of riser can be easily applied to rail-ingot molds by setting on the mold a metal casing, carrying a heavy fire-clay pot inside, which not only retains the heat in the head and gives a sound ingot its entire length, but does it in a very cheap and practical way.

Canadian Northern Ry. Earnings, Etc.

Gross earnings, working expenses, net profits, increases or decreases over 1907-08, from July 1, 1908:

	Earnings.	Expenses.	Net Earnings.	Net Increase or Decrease.
July	$ 728,500	$525,600	$202,900	$159,000 —
Aug.	747,400	561,300	186,100	30,400—
Sept.	901,700	650,600	251,100	42,000+
Oct.	1,172,700	752,600	420,100	110,200+
Nov.	1,156,900	744,300	412,600	144,300+
Dec.	927,900	642,800	285,100	42,400+
Jan.	526,200	425,900	100,300	15,400—
Feb.	502,600	409,200	93,400	9,700+
Mar.	738,700	534,200	204,500	32,600+
Apr.	741,200	517,300	223,900	63,200+
May	720,100	537,200	182,900	51,100+
June	805,000	572,500	232,500	20,700+
	$9,668,900	$8,873,500	$2,795,400	$311,400+
Inc.	$ 656,500	$ 345,100	$ 311,400	.....
or Dec.	.....	.....	.....	.....

Approximate earnings for 3 weeks ended July 21, $582,300 against $500,700 for same period 1908.

C.P.R. Earnings, Expenses, Etc.

Gross earnings, working expenses, net profits, increases or decreases over 1907-8, from July 1, 1908:

	Earnings.	Expenses.	Net Profits.	Net Increase or Decrease.
July	$6,292,889.82	$4,018,207.57	$2,274,573.24	$232,279.41 –
Aug.	6,385,956.69	3,807,057.98	2,578,898.71	8,623.56+
Sept.	6,391,672.48	4,277,064.71	2,114,607.77	36,745.58 –
Oct.	7,381,970.41	4,726,703.70	2,655,266.71	25,050.93 –
Nov.	7,303,303.20	5,082,223.85	2,221,079.35	223,954.86 –
Dec.	6,955,874.11	4,759,122.54	2,196,751.57	119,561.99+
Jan.	4,761,859.93	4,372,110.10	389,749.83	234,241.95 –
Feb.	4,966,208.14	4,204,063.36	762,144.78	405,048.17+
Mar.	6,518,763.14	4,715,055.01	1,803,708.13	502,678.64+
Apr.	6,384,038.32	4,240,530.80	2,143,507.52	421,273.08+
May.	6,420,640.04	4,493,779.55	1,926,860.49	245,365.25+
	$69,763,167.28	$48,693,019.17	$21,067,148.11	$950,277.96+
Inc.	$3,934,828.60	$2,984,550.64	$950,277.96	.....
or Dec.	.....	.....	.....	.....

Approximate earnings for June, $6,354,000, and for 2 weeks ended July 14, $3,232,000; against $5,458,000 and $2,806,000 for same periods 1908.

DULUTH, SOUTH SHORE AND ATLANTIC RY.—Gross revenue for May, $255,042.79; net revenue, $77,975.89, against $195,134.53 gross revenue and $37,503.91 net revenue for May, 1908. Aggregate gross revenue for 11 months ended May 31, $2,555,031.47; net revenue, $780,381.81, against $2,805,610.07 aggregate gross revenue and $763,301.75 net revenue for same period 1907-08. Approximate gross earnings for June, $280,151, against $206,763 for same period 1908.

MINERAL RANGE RD.—Gross revenue for May, $67,540.33; net revenue, $6,075.62, against $65,786.44 gross revenue and $6,106.33 net revenue for May, 1908. Aggregate gross revenue for 11 months ended May 31, $758,839.89; net revenue, $122,930.68, against $740,258.31 gross revenue and $110,977.17 net revenue for same period 1907-08. Approximate gross earnings for June, $66,026 against $68,786 for same period 1908.

MINNEAPOLIS, ST. PAUL AND SAULT STE. MARIE RY.—Gross earnings for May, $987,963.73; net earnings, $353,923.35; against $736,755.97 gross earnings; $88,927.38 net earnings for May, 1908. Aggregate gross earnings for 11 months ended May 31, $11,536,672.70; net earnings, $5,033,571.79; against $10,589,104.49 gross earnings, and $4,016,829.93 net earnings for same period 1907-08. Approximate gross earnings for June, $987,836, against $829,224 for same period 1908.

Grand Trunk Ry. Earnings, Expenses, Etc.

The following figures give the earnings of the G.T.R., the C.A.R., the G.T. Western Ry., and the D. G. H. & M. Ry., separately, for May, as compared with May, 1908:

	1909.	1908.
Earnings	$2,481,600	$2,472,986
Expenses	1,554,700	1,570,088
Net earnings	$926,900	$902,898

PEERLESS
The Fence that saves Expense

Because it saves repairs. It does not sag, bag, snap, or break, and when once put up it stays in good shape. Adjusts itself to all irregularities of the ground and resists weather—wear and stock especially well. Makes the best railroad fence you can possibly put up, both in appearance and lasting qualities. You can do no better than to erect Peerless Fencing. It will always be a standing example of your good judgment. The free book we are sending out is very interesting to people in your field. Shall we send you a copy—a postal request will bring one promptly.

Icebreaking Steamship Earl Grey.

The success of the ice-breaking and surveying steamship Lady Grey, built for the Dominion Government some three years ago, has encouraged further development in the same direction. This earlier vessel, Lady Grey, has done efficient work in breaking up the ice in the St. Lawrence River, and when not thus engaged has performed various duties for the Marine and Fisheries Department Board. The Government, therefore, decided to order another and larger vessel, and this one, which was launched by Vickers, Son and Maxim, Ltd., at Barrow-in-Furness, Eng., June 18, marks developments, especially in size and speed. The Marine Department officials decided, in the interests of economy, carefully to consider the uses to which such a vessel could be put when there was no ice. The problem was a difficult one, as the great strength necessary for ice-breaking involved a special form of hull, but the builders' experience enabled them to guarantee 17 knots, while forfeiting nothing of the essential qualities required for maintaining a free passage through ice. With the promise of this high speed, it was decided to fit the new vessel for passenger service, and she also has special quarters, so that she may be used as a yacht by the Governor-General, and is therefore appropriately named Earl Grey. In view of this, the designers have achieved very satisfactory success, so far as the appearance of the vessel is concerned. While the strength of the hull is obvious at a glance, grace has been lent to the appearance not only by fine shear, but by the adoption of a cut-water stem and a short bowsprit, an elliptical stern, and two steel pole-masts, which have a considerable rake and are schooner-rigged.

A closer examination shows that a consideration of strength has dominated the design of the hull, in order that effective work may be done amongst the heavy ice-fields of the Northumberland Straits and the Gulf of St. Lawrence. The frames are very closely spaced, in order to take up the thrust of the pack-ice, which will, at times, be piled around the vessel. The shell-plating is thicker than usual, and the outer skin is doubled along the water-line right fore and aft and to the bottom of the keel in the forebody, where the friction of the ice tends, in the case of ice-breaking steamers, to wear away the material faster than in ordinary marine practice. The procedure is to drive the ship forward until the fore body glides on to the floe sufficiently far to cause the ship's weight to crush the ice. In order that the weight may be increased at will large tanks are built into the structure, and the pumps for filling and emptying these tanks deal with 250 tons of water an hour. The vessel is also equipped for breaking ice when going astern, and the counter has been suitably strengthened to resist shocks. The rudder takes the form of the vessel, so that the movements of the ship are not in any way impeded by the ice floes.

The dimensions of the vessel and those of the earlier one, the Lady Grey, are as follows:—

	Lady Grey.	Earl Grey.
Length between perpendiculars	172 ft.	250 ft.
Breadth, moulded	32 ft.	47 ft. 6 in.
Depth, moulded	18 ft.	26 ft. 6 in.
Draught, normal	12 ft.	17 ft. 7 in.
Displacement	1,055 tons.	3,400 tons.
Speed	14 knots.	17 knots.

The arrangement for the accommodation of passengers is on the promenade, upper, and main decks, while above this is the bridge-deck, which contains quarters for the captain and navigating officers in the deck-house, the roof of which serves also for the navigating bridge. The apartments for the Governor-General, together with the smoking-room, are placed in the deck-house on the promenade deck, in which also there is arranged the entrance-hall and lounge for first-class passengers. A broad companionway leads down to the upper deck, where there are arranged state rooms for 50 first-class passengers, as well as the first-class dining-saloon, pantry, galley, etc. The chief engineer has his quarters close to the engine-room, and the petty officers of the ship are also accommodated on this deck. The mail-rooms are aft on this deck, and the seamen are accommodated forward. The second-class accommodation, which affords room for 20 passengers, is on the main deck, where also the remainder of the engineers and others of the crew of the ship have their accommodation. On this level, too, there is a hold for light cargo.

The vessel is sub-divided into numerous water-tight compartments, and the doors of the principal compartments are so constructed that they can be closed simultaneously from the navigating bridge. A water-tight bunker-bulkhead extends on each side of the vessel throughout the length of the boiler-rooms, and a double bottom is fitted for almost the entire length of the vessel. The vessel is lighted throughout with a complete system of electric light, and is heated by steam. Arrangements are provided for rapidly handling the cargo and for coaling expeditiously.

The machinery is of the triple-expansion three-crank type, and in the design the heavy stresses to which the vessel will be subjected in ice-breaking have had special consideration. Consequently, the shafting and the working parts are of considerably greater strength than usual. This also applies to the propellers, which are of the four-bladed built-up type. The blades, which, like the bosses, are of cast steel, are of exceptional strength for working through ice. The engine cylinders are 27½ in., 43 in., and 70 in. in diameter respectively, with a stroke of 39 in. Steam is supplied at a working pressure of 180 lbs. from four boilers of the cylindrical type, 15 ft. in diameter. Two of these are double-ended, being 21 ft. long, and two single-ended, 11 ft. long. The boilers are fitted with furnaces of the Morison suspension type, and work with a system of forced draught, the air being supplied by three fans driven by enclosed forced lubrication engines. The main condensers are cylindrical in form, and independent twin air-pumps are provided. There is also an auxiliary condenser capable of dealing with the whole of the steam from the auxiliary engines, and having separate air-pumps.

Special arrangements have been made in connection with the pumping plant, owing to the special duty of the ship in the ice-floes. In the event of the ordinary suction or discharge valves being choked with ice, the circulating water may be drawn from or discharged into a part of the double bottom, two frame-spaces being specially divided off for this purpose. In the way of these the outer skin of the ship is perforated in such a manner as to give a large area for the passage of the circulating water. Steam-jets are arranged on the branches of all sea inlet valves, to enable them to be cleared of ice as occasion arises. A ballast-pump of the centrifugal type, capable, as already stated, of dealing with 250 tons of water an hour, is fitted in the engine-room, with connections for transferring water between the forward and aft tanks when trimming the vessel for making its way through the ice. In addition to the usual feed, bilge, and sanitary pumps, the machinery department is fitted with evaporating plant, grease-extractor, feed-heater, and ash-expellers, the equipment generally embodying the latest up-to-date practice for this class of vessel. A workshop for repairing purposes is installed on the vessel, the lathes and other machines being driven by electric motor. The machinery, like the ship, has been built to the requirements of the Board of Trade, Lloyd's Registry of Shipping, and the Canadian Steamboat Inspection Act.

Preliminary descriptions of this vessel were published in our issues of April, 1908, and April, 1909, and an illustration of the profile in our issue of May, 1908.

Wythe—"I don't know what to do with my boy. He seems to know nothing. Cannot remember a thing, and is irritable and cross."

Smythe—"Why don't you get him in the bureau of information at some railway station?"

An order in council has been passed, rescinding article 9 of the regulations for the prevention of collisions at sea, and as to signals of distress, and substituting a new article applicable to all navigable waters within Canada, or within Dominion jurisdiction, excepting Lakes Superior and Huron, Georgian Bay, Lakes Erie and Ontario, their connecting and tributary waters, and the St. Lawrence River as far east as the lower exit of the Lachine canal and the Victoria Bridge, Montreal.

Protection or Elimination of Grade Crossings.

The Board of Railway Commissioners' Secretar, has issued the following circular:—"It is apparent from the legislation of last session, the discussion of Parliament, and the general expression of public opinion, that the Board is expected to initiate a definite movement towards the elimination of grade crossings and the protection of others that may be regarded as dangerous. It is the desire of the Board to deal with this important matter in a way that will not be unreasonably onerous upon the railway companies, but at the same time it fully appreciates the fact that little can be accomplished without large expenditure, and, therefore, it is particularly anxious that no mistakes shall be made,

and that no expense shall be incurred that is not fully warranted. The Board has for some time been collecting information and particulars regarding crossings that require protection, but before acting in the matter thought the proper course to pursue would be to ask the railway companies themselves to furnish a list of crossings upon their lines that in their opinion should be the ones to make a start at, as it would seem that those upon whom the responsibilities of railway operation rest should be the best informed as to the crossings upon their various lines that are the most dangerous. If this course is followed, it is felt that it will materially assist in directing expenditures at points where the greatest benefit to all concerned will ensue, but upon the other hand if the companies, or any of them, have objections to this suggestion, the Board trusts they will feel at perfect liberty to disregard it. If it is thought desirable to co-operate with the Board, the information given should cover crossings upon the whole system of each company and should not be confined to any one province or locality. Subject to hearing the views of the companies, it is the present intention of the Board to select a certain number of crossings each year, call all persons, corporations and companies that it may be thought should contribute, before the Board and after hearing all concerned, direct the character of the protection and apportion the cost. The Board will be glad to have suggestions from the companies upon this matter submitted in writing by, say, Oct. 1."

On July 23 the Board made its order under last session's legislation above referred to, in connection with which Parliament voted $200,000 for the current year, with the understanding that a similar sum will be voted for each of the succeeding four years. The crossing dealt with is at Raglan St., Renfrew, Ont. The Board has ordered its protection by gates, 20% of their cost be paid out of the Parliamentary vote, the balance by the C.P.R. The watchman's wages are to be paid equally by the C.P.R. and the town.

Fences, Gates and Cattle Guards.

The Board of Railway Commissioners of Canada has passed order 7473, dating it back to May 4:—Re complaints against railway companies for non-compliance with provisions of statute regarding fences and cattle guards and public highway crossings: Upon hearing complaints from many individuals, public bodies, and municipalities, that railway companies are not complying with the provisions of sec. 254 of the Railway Act, and that much hardship is caused by the exemption provided for in sub-sec. 4 of the said section; and upon request being made that the Board interevene as provided for by the said sub-section; and upon hearing what was said on behalf of the railway companies —It is ordered that all railway companies subject to the Board's jurisdiction, shall, as to all railway lines completed, owned, or operated by them, where the lands on either side of the railway are not enclosed, settled, or improved:

On or before Jan. 1, 1911, erect and maintain, on each side of the right of way, fences of a minimum height of 4½ ft., with swing gates, at farm crossings, with minimum height aforesaid, with

proper hinges or fastenings; and cattle guards on each side of the highway at every highway crossing, at rail level; provided that sliding or hurdle gates, constructed before Feb. 1, 1904, may be maintained.

The railway fences at every highway crossing shall be turned into the respective cattle guards on each side of the highway.

All fences, gates, and cattle guards shall be suitable and sufficient to prevent cattle and other animals from getting on the railway.

As to lines not yet completed or opened for traffic, or in course of construction, all such companies shall erect fences, gates, and cattle guards as aforesaid as the rails are laid. If not yet opened for traffic, then such fences, gates and cattle guards as aforesaid shall be erected and maintained before such railway shall be opened for traffic. Where the railway is being constructed through enclosed lands, it shall be the duty of the railway company to at once construct such fences or take such other steps that will prevent cattle and other animals escaping from such enclosed lands.

As to all railway lines completed, owned, or operated, where the lands on either side of the railway are enclosed, settled or improved, such company shall erect and maintain such fences, gates and cattle guards, and in all respects comply with sec. 254 of the Railway Act, on or before Oct. 15, 1909.

Where it shall be made to appear to the Board that no necessity exists for the fencing or other works hereinbefore directed, the company or companies may apply to the Board for exemption from fencing, and other works, and such exemptions may be made as the Board deems proper.

All railways now in operation shall, within the time aforesaid, construct and maintain suitable and proper highway crossings, except such as may have already been covered by previous orders apportioning cost of providing for liability for maintenance, at all such as are being used for travel, and additional ones at once upon such highways being from time to time opened and used for travel.

All railways not yet opened for traffic, or hereafter constructed, shall, before the same are opened for traffic, construct and maintain suitable and proper highway crossings at all such as are being used for travel, and additional ones at once upon such highways being from time to time opened and used for travel.

All such crossings shall comply with the standard conditions of the Board, in so far as the same may be applicable, which are as follows:—That unless otherwise ordered by the Board, the width of approaches to rural railway crossings over highways be 20 ft. road surface on concession and main roads and sixteen feet on side and bush roads. That a strong substantial fence or railing, 4½ ft., with a good post-cap, 4 x 4 ins, a middle piece of timber, 1½ x 6 ins., and a 10-in. board firmly nailed to the bottom of the posts to prevent snow from blowing off the elevated roadway, to be constructed on each side of every approach to a rural railway crossing where the height is six feet or more above the level of the adjacent ground, leaving always a clear road-surface 20 ft. wide. That the width of approaches to rural railway crossings made in cuttings be not

RAILWAY FREIGHT STATISTICS.

The following table shows the total tonnage of freight carried by Canadian railways during the year ended June 30, 1908, together with the tonnage originating on the several roads, and the tonnage received from connecting roads and other carriers.

less than 20 ft. clear from bank to bank. That, unless otherwise ordered by the Boafd, the planking or paving blocks, or broken stone topped with crushed rock screenings, on rural railway crossings over highways (between the rails and for a width of at least 8 ins. on the outer sides thereof) be 20 ft. long on concession and main roads, and 16 ft. on side and bush roads,

Leave may be reserved to each of the railway companies affected by this order to move to extend the time for compliance therewith.

Rhodes, Curry & Co., Limited, car builders, etc., Amherst, N.S., is being reorganized and additional capital introduced. Up to July 26 particulars had not been made public, but it is said that the stock will be offered to the public by C. Meredith & Co., Ltd., and the Royal Securities Co., of Montreal, and that W. B. Tennant and J. M. Robinson & Son, of St. John, N.B., are also interested. Press reports say that $1,850,000 of preferred stock and $1,000,000 of common stock will be issued, and that the preferred will be offered at 92½ with a bonus of 20% of common. While the introduction of additional capital will provide for the further extension of Rhodes, Curry & Co.'s already very extensive business, we have reason to believe that there will be no change in the management of the company or in its officers.

Notice is given that Rhodes Curry Company, Limited, has been incorporated under the Dominion Companies Act, with a capital stock of $3,000,000, divided into 30,000 shares of $100, and with head office at Amherst. The provisional directors named are E. F. Surveyer, K.C., G. V. Cousens, Manager, and F. C. Clarke, S. B. Hammond and H. G. Boyle, accountants, Montreal.

GRAND TRUNK PACIFIC TERMINAL ELEVATOR CO.'S ELEVATOR AT FORT WILLIAM, ONT.
The above is an illustration of the G.T.P.T.E. Co.'s grain elevator to be erected at Fort William, Ont., a full description of which appeared in our Jan. issue.

Railway Telegraph Superintendents' Association.

At the recent convention at Detroit, Mich., the retiring President, W. J. Camp, Superintendent C.P.R. Telegraphs, Montreal, referred to the death of four members of the Association which had occurred during his year of office, among them being those of P. W. Snider, Superintendent C.P.R. Telegraphs, St. John, N.B., and E. H. Millington, Superintendent M.C.R. Telegraphs, Detroit, Mich., which latter occurred at St. Thomas, Ont.

A number of changes were made in the constitution, among them being that regular meetings of the eastern division are to be held in Nov. and Mar., and of

The important saving in the power bill of the railroad shop effected by individual Motor drive

YOU are naturally interested in the problem of increasing the efficiency of your shops.

You want to get more and better work out of your shops and you want to get it at the lowest possible cost.

You realize that a saving of 25% in your power bill is a considerable item and one worth investigating.

Then you will be interested in the Western Electric Individual Motor Drive for the Railroad Shop.

Let us give you some facts—

First, with Western Electric Individual Motor Drive you pay only for the power used in actual production. There is no power wasted in turning idle pulleys, shafting, and slipping belts. From actual tests, this waste power amounts to from 25 to 50% of the total power delivered by the engine.

You know how important it is to perform every operation at the greatest possible speed. Now, on a belt driven lathe, the cone steps give speed variations of about 50% each. If the first speed is too high for the operation, the next choice of speed is 50% lower than necessary. With the Western Electric variable speed motor any desired speed can be maintained without inconvenience to the operator. Consequently the speed of the operation is greatly increased and the machine becomes much more productive.

The portable machine, an absolute necessity in operation on very large work, is made reliable and practical by means of the electric motor drive.

The saving in floor space and the ease and quickness with which any machine may be moved at any time are points which alone should recommend the direct motor drive system to you.

If you are interested—if you want to know more about this system just write us and we will gladly give you full information.

Write to-day for our Bulletin No. 714.

the western division in Sept. and Jan. each year; the addition of a second vice president, and the raising of the annual dues. The reports of the various committees and some papers were read and discussed as follows:—High Tension Wire Crossings; Efficiency of Office Organization; Preservation of Poles; Wire Testing and Care of Wires; Difference Between the Trouble Shooter and the Division Lineman; Telephone Construction; and Dry Batteries.

Among the new members elected were: J. McMillan, Superintendent C.P.R. Telegraphs, Calgary, Alta.; and J. Tait, Superintendent C.P.R. Telegraphs, Winnipeg. The Canadian visitors present included W. J. and Mrs. Camp, W. W. and Mrs. Ashald, A. B. Smith, G. T. Rooke, T. and Mrs. Rodger, H. D. Crouch, Montreal; I. McMichael, W. Marshall, W. J. Duckworth, A. W. and Mrs. Stanley, Toronto; J. and Mrs. McMillan, Calgary, Alta.; F. T. Jennings, North Bay, Ont.; C. E. Davies, Ottawa; E. Pope, Quebec.

The officers for the current year are:—President, J. L. Davis, Superintendent Chicago and Eastern Illinois Rd. Telegraphs, Chicago, Ill.; First Vice President, I. T. Dyer, Superintendent San Pedro, Los Angeles and Salt Lake Rd. Telegraphs, Los Angeles, Cal.; Second Vice President, G. A. Cellar, Superintendent Pennsylvania Rd. Telegraphs west of Pittsburg, Pittsburg, Pa.; Secretary and Treasurer, P. W. Drew, Superintendent Chicago Division Minneapolis, St. Paul and Sault Ste. Marie Ry. Telegraphs, Chicago, Ill.

Grain Elevator Notes.

The John Campbell Milling Co.'s elevator at Port Stanley, Ont., took fire July 1 and did damage to the extent of $500.

The Alameda Farmers' Elevator and Trading Co., Ltd., Alameda, Sask., has increased its capital from $20,000 to $80,000.

The West Coast Grain Co., Ltd., has been incorporated under the North West Territories Companies Ordinance, with office at Calgary, Alta.

The Melfort Farmers' Elevator Co., Ltd., has been incorporated under the North West Territories Companies Ordinance, with office at Melfort, Sask.

The Kinistino Milling and Elevator Co., Ltd., has been incorporated under the North West Territories Companies Ordinance, with office at Kinistino, Sask.

The Western Terminal Elevator Co., Ltd., incorporated under the Dominion Companies Act, has been licensed to carry on business in Ontario, with J. I. Irwin, Fort William, as its attorney.

The Northern Elevator Co.'s elevator at Arcola, Sask., caught fire recently. The damage to the structure was comparatively small, but the contents, about 5,000 bush. of wheat, were destroyed by water.

At a meeting of directors of the Montreal Grain Elevating Co., July 3, a resolution was adopted recording the sense of the loss the company had sustained through the death of A. T. Paterson, who was President for 8 years, and a director for 45 years.

It is reported that 56 elevators have already been erected in Saskatchewan this season, and it is said that before the end of the season 200 will have been erected with a capacity of 6,000,000 bush., increasing the total elevator capacity of the province to 24,139,500 bush.

The Carlyle Farmers' Elevator Co. at its recent annual meeting resolved to build an elevator of 25,000 bush. capacity, at a cost of about $6,000, to replace the one destroyed last winter by fire. It has not yet been decided whether it is to be built on the C.P.R. or the C.N.R.

The Cummings Grain Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $150,000 and office at Calgary, Alta., to construct, acquire and operate country and terminal elevators. The provisional directors are: W. K. Chandler, E. Lockington, H. Phillips, R. J. McClelland, E. A. Fletcher, Winnipeg.

The elevator which the Ogilvie Milling Co. is about to erect at Fort William, Ont., will consist of 16 concrete tanks, each 21 ft. diar., by 104 ft. high. It will be erected east of the company's present elevator and work house, and will give an additional 1,250,000 bush. capacity. The work, it is anticipated, will be completed by Nov. 15.

The British Empire Grain Co., Ltd., has been incorporated with a capital of $500,000 and office at Winnipeg, to own, operate and carry on a grain, milling, elevator and warehouse business, and to construct, own and operate all or any conveyances necessary for transportation of products by land and water. The provisional directors are: A. P. Stuart, E. S. Jaques, G. R. Crowe, P. J. Montague, W. S. Boyd, Winnipeg.

The Export Grain Co., Ltd., has been incorporated under the Manitoba Companies Act, with a capital of $200,000 and office at Brandon, Man., to carry on a general grain and flour manufacturing business, and in connection therewith to build and operate grain elevators, warehouses, etc. The provisional directors are: J. H. R. Gillespie, C. H. Lamontagne, C. E. McKay, W. Peacock, J. R. Brodie, Brandon, Man.

The Manitoba Grain Growers Association had another interview recently with the Manitoba Premier on the subject of the Government control of elevators. The association is circulating forms of petition respecting the Provincial ownership of interior and the Dominion ownership of terminal elevators throughout the province, with the view of having them presented to the Governments in December. The inter-provincial council has decided to engage counsel to appear before the Board of Railway Commissioners in support of the claim for a reduction of the storage charges at terminal elevators.

Black and Muirhead, Ltd., has been incorporated under the Ontario Companies' Act, with a capital of $100,000 and office at Fort William, to deal in cereals and cereal products, and in connection therewith to construct, purchase or otherwise acquire and operate elevators, machinery, appliances, warehouses, wharves, docks, etc., and to carry on the business of navigation for the purposes of the company, for which it may own and operate steam and other vessels, etc. The provisional directors are: D. W., E. C. and J. L. Black, W. D., and L. Muirhead, Fort William, Ont. A contract has been let to Barnett and McQueen Co., Fort William, for the erection of an elevator there, which will be accessible by three railways.

The question of handling grain at Vancouver was dealt with by the Board of Trade, at a meeting held there July 13.

The Board of Railway Commissioners heard the application of the Dominion Millers' Association, July 7, asking that the elevator rates charged by the C.P.R. at Fort William and Port Arthur, Ont., be reduced to the same scale as those charged at Owen Sound and other lake points. Some time ago the C.P.R. imposed ¼c. a bushel as an extra charge to cover the cost of insurance, but it was alleged that the company by that extra charge more than covered the cost of insurance. The company, however, showed that taking into account its capital investment of $2,500,000 and the cost of operation, no money was being made, if a reasonable amount was written off for depreciation of plant. It was claimed that the C.N.R. was clearing 8% on its elevator operation expenses, which were 33 1-3% of the gross receipts, whereas the C.P.R. expenses were 60% of the gross receipts. The C.P.R. accounted for this by saying that while it was operating five small elevators, the C.N.R. was running one large elevator. Chief Commissioner Mabee, in dismissing the application and holding the present rates as reasonable, said that it made no difference how badly the C.P.R. managed its business so long as the loss fell on the stockholders and not on the public, and so long as the charges were reasonable, it did not matter to the public if the C.N.R. was making money and the C.P.R. losing it, on the same basis.

ELECTRIC RAILWAYS.

Canadian Street Railway Association.

PRESIDENT, D. McDonald, Manager, Montreal St. Ry.; VICE-PRESIDENT, J. Anderson, Manager, Sandwich, Windsor and Amherstburg Ry.; SECRETARY TREASURER, Acton Burrows, Managing Director, Railway and Marine World.

ASSOCIATION'S OFFICE, 157 Bay St., Toronto.

EXECUTIVE COMMITTEE:—P. Dubee, Secretary, Montreal St. Ry.; E. A. Evans, General Manager, Quebec Ry. Light and Power Co.; R. J. Fleming, General Manager, Toronto Ry.; H. M. Hopper, Secretary-Treasurer, St. John Ry.; J. E. Hutcheson, Superintendent and Purchasing Agent, Ottawa Electric Ry.; C. B. King, Manager, London St. Ry.

ASSISTANT SECRETARY, Aubrey Acton Burrows, Secretary and Business Manager, Railway and Marine World.

Projects, Construction, Betterments, Etc.

Aroostook Valley Rd.—A Boston, Mass., despatch says:—The Aroostook Valley Rd. has been organized and is planning to build a first unit of track between Presque Isle and Washburn, Me., 12 miles, with an ultimate extension of 110 miles more, north to the St. John River. On the south the new road will connect with the C.P.R.. Its route will lie through the heart of the Bangor and Aroostook territory. The C.P.R. has agreed to guarantee interest for 20 years at 4½% on A.V.R. bonds up to $25,000 a mile. By virtue of a law conferring monopoly within its territory, the Bangor & Aroostook Rd. is protected from the invasion of steam railways, and the new road is therefore to be an electric one for both passengers and freight.

British Columbia Electric Ry.—The contract for the Fourth Avenue west extension of the Vancouver lines, from Granville St. to the west city limits, has been let to T. R. Nickson & Co. Plans have been approved by the Vancouver city council for several extensions of lines in the city.

A power house is in course of erection in Victoria. The contractors are Malcolm & Disdale. (July, pg. 521.)

Calgary, Alta.—The street railway constructed by the city council in Calgary was opened for traffic July 5. The section opened extends from First Street to the Fair grounds, and, as it was Fair time, a five-minute service was operated by two cars. The fares taken on the first day amounted to over $450, representing over 9,000 fares. (July, pg. 522.)

Dunnville, Wellandport and Beamsville Electric Ry.—Work was temporarily suspended July 10 on this projected railway between Dunnvile and Beamsville, Ont. Five miles of the grading is reported to have been completed. H. Lloyd has been in charge of the work.

The townships of Gainsboro and Maulton refused to pass by-laws last year giving bonuses to the company, but after further negotiations it was decided to re-submit the by-laws. The voting took place July 26. (June, pg. 447.)

Fort William, Ont.—The question of the crossing of the C.P.R. and the C.N.R. by the Mission extension of the street railway in Fort William, Ont., is under consideration by the Board of Railway Commissioners. The necessary material has been purchased, and the Mayor says that all that is required to allow of the starting of construction is the signing by the General Manager of the G.T. Pacific Ry. of the agreement for the right of way through the company's

C.P.R. LANDS

The Canadian Pacific Railway Company have 9,000,000 acres of selected lands for sale in Manitoba, Saskatchewan and Alberta.

Maps, as enumerated below, showing these lands in detail, will be sent free on application.

Map No. 1—Winnipeg to Second Meridian	$ 8.00 to $15.00 per acre.
Map No. 2—South-Eastern Saskatchewan, 2nd to 3rd Meridians	10.00 to 25.00 per acre.
Map No. 3—Main Line, 3rd Meridian to Range 10, W. 4th Meridian (generally)	8.00 to per acre.
Map No. 5 - South-Western Alberta	8.00 to 15.00 per acre.
Map No. 6—Part of Alberta, Edmonton, Battle and Saskatchewan Rivers Districts—4th Meridian to Range 7, West 5th Meridian	10.00 to 25.00 per acre.
Map No. 7—Part of Western Saskatchewan, 3rd to 4th Meridians	10.00 to 25.00 per acre

All prices are subject to change without notice.

TERMS OF PAYMENT

An actual settler may purchase not more than 640 acres on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal, with interest, in nine equal instalments annually thereafter, as shown in the following table:

160	Acres	at $	8.00	per acre,	cash payment	$191.70	first year's interest	$	65.28	and nine instalments of	$160.00
"	"		9.00	"	"	213.70	"	"	73.46	"	180.00
"	"		10.00	"	"	239.70	"	"	81 62	"	200.00
"	"		11.00	"	"	263.60	"	"	89.78	"	220.00
"	"		12.00	"	"	287.60	"	"	97.96	"	240.00
"	"		13.00	"	"	311.55	"	"	106.10	"	260.00
"	"		14.00	"	"	335.60	"	"	114.32	"	280.00
"	"		15.00	"	"	359.50	"	"	122.44	"	300.00

Purchasers who do not undertake to go into residence on the land are required to pay one-sixth of the purchase money down, balance in five equal annual instalments with interest at the rate of six per cent. per annum. Interest at six per cent. will be charged on overdue instalments.

F. T. GRIFFIN, Land Commissioner, Winnipeg.

CANADA NORTH-WEST LAND CO.

This Company has 525,000 acres of selected lands in Manitoba and Saskatchewan which offer excellent opportunities to settlers and investors who desire to secure good lands in well-selected districts. These lands are on sale at the Company's Office at Winnipeg, and at the various land agencies of the Canadian Pacific Railway Company.

F. T. GRIFFIN, Land Commissioner, Winnipeg.

Mission property. The route of the extension will be along the river, and it is hoped in time to carry it to the islands and back to the city over a bridge which is to be constructed at some future time by the C.P.R. (Jan., pg. 53.)

Goat River Water Power and Light Co.—The British Columbia Legislature last session passed an act incorporating a company with this title, with power among other things to construct a railway, to be operated by steam or electricity, and to carry passengers and freight, within a radius of 10 miles of Goat River Canyon, and to connect with the C.P.R. line from Creston to Kootenay Landing. The capital stock is to be $1,000,000, with power to increase as the shareholders may deem necessary. The head office of the company is to be at Creston, B.C., and the provisional directors are E. V. Bodwell, J. H. Lawson, Jr., H. G. Lawson, Victoria, B. C. (April, pg. 247.)

Hamilton, Waterloo and Guelph Ry.—The Board of Railway Commissioners, July 6, approved of the location plans of this projected railway from Sheffield to Galt, Ont. (Nov., 1908, pg. 817.)

Lacombe and Blindman Valley Electric Ry.—The Alberta Legislature last session incorporated a company with this title with power to construct a railway, "to be propelled by electricity or by any other motive or mechanical power approved of by the Minister of Public Works," from Lacombe Westerly to Bently, thence northwesterly to Rimbey. The company is authorized to carry passengers and freight, to establish works for the supply of electricity as motive power, and to sell the surplus power to the public; to maintain poles, etc., on highways and streets, subject to the consent of the municipal councils interested; to acquire townsites, and to acquire and hold real estate for development. The capital is fixed at $500,000; it may issue bonds for $14,000 a mile, and may construct telephone and telegraph lines as may be necessary; make agreements with other companies; and may issue paid-up shares in respect of the purchase of right of way, plant or materials, and also for the service of engineers, etc. The provisional directors are: W. B. McPherson, C. A. Putland, C. H. Whitworth, J. H. Morrison, L. E. Cole, J. H. Damron, of Bentley, Alta.; H. Thorp, T. A. Iddings, F. Symonds, R. B. Hilborn, S. D. Reed, F. Lee, of Rimbey, Alta.; F. Vickerson, G. H. Hubton, J. I. Poole, A. M. Campbell, R. J. Scott, W. Wiese, of Lacombe, Alta.

Lacombe, Bullocksville and Alix Electric Ry.—A company with this title was incorporated at the Alberta Legislature's last session for the purpose of constructing a railway to be operated by electricity or any other motive or mechanical power from Lacombe south-easterly to Red Deer River in tp. 38, range 23, west of the 4th meridan, thence north-easterly to Alix. The various sections of the act give it similar powers, with the like provisos, to the Lacombe and Blindman Valley Electric Ry. The provisional directors are: Hon. P. Talbot, H. M. Trimble, W. R. Wilson.

Nipissing Central Ry.—A contract has been let to the Lindsay Construction Co., Sydney, N.S., for the construction of a line of five miles from Cobalt to Haileybury, Ont. The line will run from the square at Cobalt, past the athletic field, along the Argentite road, crossing the Temiskaming and Northern Ontario Ry. by an overhead bridge midway between the two terminal points; through the centre of North Cobalt, along Lakeview and thence to Haileybury. The contract calls for the completion of the line ready for operation by Nov. 1. We were advised July 13 that nearly half of the grading had been completed, ready for the ties. C. G. Henry is the company's engineer in charge of construction. (July, pg. 523.)

Ottawa Electric Ry.—An inspection of the route of the proposed extension to the cemeteries, through Clarkston, was made June 30 by the members of the Eastwood Village council, and a special committee of the Ottawa city council. It is expected that the route will be approved at an early date. (July, pg. 523.)

People's Ry.—The taxpayers of Wellesley tp., Perth county, Ont., gave a majority, July 14, in favor of a by-law to take $15,000 of stock in this company. Engineers are making a survey of a route for the section of this projected line between New Hamburg and Stratford. (June, pg. 449.)

Quebec Ry. Light and Power Co.—The new directors of the company made an inspection of the lines and plant July 9 and 10. W. G. Ross, Montreal, the new President, said it was too early to give any definite idea as to the contemplated improvements to the entire system. However, these would be of a sufficiently progressive character to make the company's line an up-to-date one. R. Forget, who was the principal financial mover in bringing about the change of control, said a large sum of money would be spent in putting the whole system in perfect condition an in enlarging its present facilities. J. K. Greenshields stated that the whole system would be greatly improved; there would be an extension of lines and additional second tracking, and larger cars would be provided; that it is also intended to double the elevator capacity at Montmorency Falls to the Kent House. (April, pg. 283.)

The Toronto Suburban Ry. has completed considerable repairs to its tracks between West Toronto and Lambton, Ont. The roadbed has been improved, the tracks raised, and additional ballast put in. (June, pg. 450.)

Windsor, Essex and Lake Shore Rapid Ry.—An inspection of the company's line was made by representatives of British capitalists, July 8. It is possible that the inspection may result in the introduction of additional capital so as to enable the company to undertake the construction of an extension to Chatham, Ont. The line, it is hoped, will ultimately be extended to London, Ont. (Feb., pg. 137.)

Drinking Water on Interurban Railways.

The Ontario Railway and Municipal Board has passed the following regulation:—Every electric railway company in Ontario, subject to the Board's jurisdiction, shall provide in each passenger car which runs 20 miles or more, a suitable receptacle for water with a cup or drinking utensil attached upon or near such receptacle, and shall keep such receptacle, while the car is in use, constantly supplied with cool drinking water for the use of passengers and the conductor and motorman in charge of such car. This regulation shall not apply to street railways in towns or cities.

Electric Ry., Finance, Meetings, Etc.

British Columbia Electric Ry.—Gross earnings for May, $197,802; operating expenses, $116,000; net operating earnings, $81,802; renewal funds, $13,958; net earnings, $67,844; approximate income from investments, $13,550; net income, $81,394; against $161,212 gross earnings; $95,643 operating expenses; $65,569 net operating earnings; $10,750 renewal funds; $54,819 net earnings; $11,036 approximate income from investments, $65,855 net income for May, 1908. Aggregate gross earnings for 11 months ended May 31, $2,098,154; net earnings, $942,925; against $1,805,197 gross and $851,644 net for same period 1907-08.

Cape Breton Electric Co.—Gross earnings for 4 months ended Apr. 30, $67,196.77; expenses, $46,001.48; net earnings, $21,195.29; against $74,394.82 gross earnings; $6,743.41 expenses; $27,651.41 net earnings for same period 1908. This company owns a half share of the Sydney and Glace Bay Ry., half of the earnings of which are included in the figures quoted.

Edmonton Radial Ry.—The Alberta Legislature passed an act at its last session amending the charter of the city of Edmonton in various details. To Schedule A of the ordinance of 1900 two sections are added. The first provides that "works constructed or maintained under this ordinance" shall be construed to mean all municipal revenue earning works, within and without the city, including those acquired or constructed under the Strathcona Radial Tramway Ordinance of 1894, or the Edmonton Radial Tramway Act; and the second declares that sections 30 to 56 extends the borrowing powers so as to include the raising of money for street railway purposes. The sections of the Edmonton Radial Tramway Act of 1908 relating to borrowing are amended. The corporation may issue bonds to the extent of $10,000 a mile of railway, in denominations of not less than $100, bearing interest at not more than 6%. The other sections refer to the form of bond, mortgage, registration, etc. The borrowing powers under these sections are by sec. 17 "not to interfere with the general borrowing powers of the city."

Halifax Electric Tramway Co.—Gross earnings for June, $17,300.48, and for 2 weeks ended July 14, $8,648.09, against $16,215.65 and $8,995.10 for same periods 1908.

Kingston, Portsmouth and Cataraqui Electric Ry.—A letter was received by the Kingston City Council, July 8, stating that if no readjustment of the present condition of affairs can be made the company will discontinue giving a service. The company will not take a bonus to operate the line, but is prepared to sell at a price. If nothing can be arranged the service will be given up, and the company will take its loss to date.

London St. Ry.—Gross earnings for June, $21,366.69; operating expenses, $14,162.72; net earnings, $7,203.97; against $20,634.52 gross earnings; $14,131.43 operating expenses; $6,503.09 net earnings for June, 1908. Aggregate gross earnings for 6 months ended June 30, $111,175.94; operating expenses, $81,408.86; net earnings, $29,767.06; against $106,991.42 gross earnings; $81,060.02 operating expenses; $25,931.40 net earnings for same period 1908.

Montreal Central Terminal Co.—A meeting of shareholders has been called to be held Aug. 9, to authorize the issue of first mortgage bonds and to authorize agreements with other companies.

Montreal St. Ry.—Gross earnings for June, $354,917.59; expenses, $190,320.38; net earnings, $164,597.21; city percentage on earnings, $33,120.71; interest on bonds and loans, $14,514.96; rent leased lines, $498.67; surplus, $116,462.87; against $331,211.91 gross earnings; 166,083.56 expenses; $165,128.35 net earnings; $28,895 city percentage on earnings; $19,652.21 interest on bonds and loans; $443.43 rent leased lines; $116,135.83 surplus for June, 1908. Aggregate gross earnings for 9 months ended June 30, $2,791,973.27; expenses, $1,714,403.30; net earnings $1,977,569.97; total charges, $309,891.20; surplus, $767,678.77; against $2,672,763.53 gross earnings; $1,651,707.09 expenses; $1,021,056.44 net earnings; $319,563.57 total charges; $701,492.87 surplus for same period 1907-08.

St. John, N.B., Ry.—The question of the assessment of the company's lines was under consideration by the city council July 5, and was referred to the general committee, with power to engage expert assistance.

Southwestern Traction Co.—D. B. Hanna, Third Vice President Canadian Northern Ry., went over this line recently, which gave rise to a report that it was likely to be acquired in Mackenzie, Mann & Co.'s interests. The bonds are held in England, and it is altogether likely that they will change hands in the near future, in which case the company would probably be reorganized.

Toronto Ry.—The city council is claiming $1,320.30 from the company for arrears of mileage on account of 4,281 ft. of double track on Roncesvalles Ave. The company contends that this is merely a stub track and not part of the general system, and therefore exempt.

Gross earnings for May, $323,723; expenses, $149,565; net earnings, $174,158; against $296,209 gross earnings; $152,835 expenses; $143,374 net earnings for May, 1908. Aggregate gross earnings for 5 months ended May 31, $1,483,749; net earnings, $715,760; against $1,373,306 gross earnings, and $584,445 net earnings for same period 1908. Approximate gross earnings for June, $330,207.72, against $301,842.19 for June, 1908.

Winnipeg Electric Ry.—Gross earnings for May, $189,500; expenses, $96,000; net earnings, $93,000; against $167,300 gross earnings, $89,700 expenses, $77,600 net earnings for May, 1908. Aggregate gross earnings for 5 months ended May 31, $1,017,000; net earnings, $503,500; against $848,000 gross earnings, and $425,200 net earnings for same period 1908.

Electric Ry. Position Wanted.

WANTED.—Position with Canadian Electric Railway to take charge of traffic transportation or employment and inspection department. Capable of organizing and installing modern system in either. Fifteen years experience. At present employed by one of the largest American Electric Railway properties. References from present and past employers. Canadian citizen. Box 4325, care The Railway and Marine World.

THE CLIFTON HOTEL

NIAGARA FALLS, CANADA.

Rates $4 per day up, American Plan. For weekly rates and further information, address: GEORGE R. MAJOR, Manager.

OPEN THE YEAR ROUND

The only Hotel that Commands an Unrivalled View of Both Falls.

HOW TO REACH THE CLIFTON HOTEL.

Arriving on Grand Trunk Railway or Wabash Rd., at Niagara Falls, Ont. Hotel bus meets all trains or take trolley to hotel—7 minutes. Arriving on Michigan Central Rd., Canadian Pacific Railway, at Victoria Park station—Hotel bus meets all trains, only three minutes' walk from station to hotel.

International Railway (trolleys), connecting with Niagara Navigation Co. steamers at Queenston, to or from Toronto, pass the door.

IMPORTANT

Guests coming to the Hotel should see to it that they are taken to The Clifton Hotel, CANADIAN SIDE, and also that their mail is addressed "Care of The Clifton Hotel, Niagara Falls, CANADA." To insure prompt delivery, don't forget to make Canada plain in the address.

Height of Electric Car Steps.

The Ontario Railway and Municipal Board's decision on Dr. Helen MacMurchy's application respecting the height of car steps was published in full in our last issue. The Board has passed the following regulations to give effect to the judgment:—

"The steps on all cars hereafter constructed and used by the Toronto Ry. Co. and all other street and electric railways under this Board's jurisdiction shall hav steps conforming to the following regulations:

"On closed single truck cars the height of the first step above the ground shall be not less than 12 nor more than 15 in.

"On closed double truck cars the height of the first step above the ground shall be not less than 14 nor more than 16 in.

"On open single truck cars the height of the first step above the ground shall be not less than 12 nor more than 15 ins., and the distance between the first and second steps and the second step and the floor of the car shall measure 12 and 9 in., respectively.

"On open double truck cars the height of the first step above the ground shall be not less than 14 nor more than 16 ins., and the distance between the first and second steps and the second step and the floor of the car shall measure 12 ins. and 14 ins. respectively."

Ontario Electric Railway Merger.

There are good reasons for believing that negotiations have been going on for some time with a view of creating a merger of electric railway interests in a large portion of Ontario. It would appear that if the scheme contemplated can be carried to a successful issue the Toronto Railway will be the pivotal system, including the Toronto & York Radial Ry., which it also owns, and the Toronto Suburban Ry., which is believed to be owned by Mackenzie, Mann & Co.'s interests. The Niagara, St. Catharines & Toronto Ry. passed under the control of these interests some time ago. The proposed merger would probably embrace the following lines, or as many of them as can be secured:—Hamilton Radial Ry., Hamilton St. Ry., Hamilton & Dundas Ry., Hamilton and Brantford Ry., and Hamilton, Grimsby & Beamsville Ry., all of which are now controlled by the Dominion Power & Transmission Co.; the Grand Valley Ry., the London St. Ry., Southwestern Traction Co., Chatham, Wallaceburg and Lake Erie Ry., Windsor, Essex and Lake Shore Rapid Ry., and Sarnia St. Ry. and the Berlin and Bridgeport Electric St. Ry. This includes all the electric railways in Western Ontario except the Guelph Radial Ry. and the Berlin and Waterloo St. Ry., which are municipally owned; the Galt, Preston and Hespeler Ry., which is owned by the C.P.R., and the Sandwich, Windsor and Amherstburg Ry., which is part of the Detroit United System. East of Toronto, the Oshawa Ry., the Peterborough Radial Ry. and the Kingston, Portsmouth and Cataraqui Electric Ry. would also probably be secured.

The merger may not be accomplished, but that work has been going on for some time for the purpose of carrying it out we do not doubt. Its accomplishment would mean a valuable addition to the power users of the Electrical Development Co. of Ontario, which passed under Mr. Mackenzie's control recently, a more economical management, especially of the smaller companies, by bringing them under one general management and by standardizing rolling stock, etc., and in the end a public benefit by increased efficiency of service and a vigorous policy of betterment and extension.

Sandwich, Windsor and Amherstburg Ry.

The Ontario Railway and Municipal Board recently heard the case of the Town of Sandwich against the Sandwich, Windsor and Amherstburg Ry. Co. The town alleged that a proper service had not been furnished by the railway company, and asked that an agreement between the town and the company be construed. As the case developed it became apparent to the Board that the crucial question to be determined was the duration of the franchise, or the right of the company to operate its railway on the streets of Sandwich. The town alleged that the company's rights depend upon an agreement, dated May 27, 1891, between the town and the company, and that under it the company has merely a yearly license to occupy the streets, or in the alternative, that the franchise is controlled by the provisions of the Street Railway Act in force at that time, and extends only 20 or 25 years from the date of the agreement. The company alleged that there was an agreement anterior to May 27, 1891, which gave it a perpetual right to operate its railway on the town streets, and that it was not limited in its right to occupy the streets to 20 or 25 years.

The Board in its judgment held that the town did not grant the company a perpetual franchise; that the evidence, such as it was, was the other way; that the town had no power to grant a perpetual franchise, and that the company's right to use and occupy the streets of Sandwich with its railway and poles and wires will expire on Dec. 15, 1912. In order to give the company an opportunity to test this opinion in the Court of Appeal, the Board adjourned, sine die, the trial of the alleged breaches of the agreement to a date to be fixed, on the application of either party, on ten days notice to the other.

The Ontario Railway and Municipal Board will not sit again until Sept. 2. The Chairman, J. Leitch, K.C., has left Toronto for a rest. During the vacation one of the other members of the Board, A. B. Ingram or H. N. Kittson, will be available to attend to urgent applications.

Electric Railway Notes.

The Edmonton Radial Ry.'s double truck pay-as-you-enter cars were described in our Feb. issue. An illustration of one of the four built at Preston, Ont., is given on this page.

The Toronto city police force is now responsible for the direction of street car traffic at intersections, under a city by-law, which came in force July 1. The Toronto Ry., as a result, has withdrawn its roadmasters from these points.

The question of the payment for uniforms, which has been agitating the minds of Toronto Ry. employes for some time, has been settled. A conference was held July 15, when it was decided that the money paid by the men be refunded.

The Toronto Ry.'s officials, including roadmasters, inspectors, etc., were given an outing by the company, July 15. They visited the power plants at Niagara Falls, and went on to Buffalo, N.Y., where they had a special trip over the city electric lines.

A Vancouver, B.C., jury has awarded a painter, who was permanently injured in a collision on the B.C. Electric Ry. in September, 1908, $11,500 damages. He had previously earned $24 a week, and is now not able to do any manual work, by reason of his injuries, and his lack of education prevents him taking a clerical position.

The Niagara Falls Park & River Ry. has appealed to the Ontario Court of Appeal against the Ontario Railway and Municipal Board's judgment published in our June issue, which ordered the company to reduce its fares from 10c. to 5c. when the distance travelled did not exceed three miles. The appeal will probably be heard in September.

With respect to the offer of a London, Eng., firm to construct a system of underground tube railways in Toronto, the City Council, June 29, appointed a special committee to look into the question. The committee decided to obtain an engineer's report on the matter, and the Council, July 15, voted $500 for the preparation of a report, and decided to employ J. W. Moyes to prepare it.

The City of Hamilton applied to the Ontario Railway and Municipal Board recently to enable it to recover from the Hamilton St. Ry. Co. $2,418.45 for repairs to asphalt pavement on certain streets for 2 ft. outside the company's rails. The Board, in its judgment, holds that it has not the power to award damages and leaves the question of its jurisdiction to be settled by the Court of Appeal.

Sternpost Repaired in 35 Hours

This repair was made last month on a 4,000 ton ocean liner. The vessel went into drydock at 7.30 a.m. and at 6.00 p.m. the following day the sternpost had been welded and the boat was ready for service. If the repair had been made by any other method than the THERMIT PROCESS, the vessel would have been out of commission for weeks.

We weld sternposts, rudder stocks, rudder frames, crank shafts, anchors, locomotive frames, etc., and effect a big saving in time and expenses.

Care of Interburban Electric Railway Tracks.

By G. C. Royce, Manager Toronto Suburban Railway Company.

The maintenance of the earlier and more cheaply built tracks has demonstrated the fact, that it is economy to have tracks built with the best material, to have them well ballasted, ties and rails put in perfect condition of surface and alignment, and to preserve them in such condition. A poorly laid track poorly maintained, will be a source of menace to public safety, keep the claims agent busy and destroy rolling stock. An attractive right-of-way is an inducement to traffic, a rough slovenly track causes public comment and impairs traffic. The keeping of the track in perfect condition includes drainage, care of switches, bridges, culverts and crossings, the clearing of weeds in summer, snow and ice in winter, and track greasing.

An interburban track should be patrolled daily by a skilled trackman, whose duty it should be to see that bolts and spiking are in adjustment, switches and rails in order, drainage open, and, in fact, be a general inspector. Small defects can be easily remedied in this way, and accidents due to roadbed defects eliminated, and in a measure the safety of passengers and cars assured. The track foreman should be skilled in track work, and the handling of men, and should employ the best help obtainable for the work. Poor track help means a loss to the company employing it. Where the length of track warrants it, it should be divided into sections, and competition between the efficiency of sections should be encouraged.

Only first-class material should be purchased for track maintenance. Ties should be up to the standard, bolts the proper size and length. Much time can be wasted by placing unnecessarily large ties and bolts with too much thread. Up-to-date tools in good order should be used and the track foreman made responsible for them. A properly constructed tool box in which they can be locked away when not in use is a convenience in this respect. An up-to-date hand-car provides a quick way of getting both men and tools to the work, and of carrying light material.

It is hardly necessary for me to state that the proper bonding of a track is of vital importance and should be well looked after. On the smaller roads this work should be thoroughly understood by the track foreman, while on larger roads this can be included in the overhead line department. Periodical tests should be made. Tracks laid on a public highway suffer from defective bonding much more in the winter than in the summer, owing, both to the contraction of the rails and frozen condition of the ground. These defects show up especially during the heavy snow clearing operation, and frequently cause loss of time and interruptions to traffic during this process.

Track clearing includes the removing of snow, ice, mud and water, each more or less according to conditions. The modern practice for snow clearing in moderate storms is by the aid of scrapers attached to the cars, which if intelligently used are very effective. For heavy storms, a sweeper with proper flanging appliances is necessary. But it appears the only effective means of keeping a track open under the more severe conditions is by the use of a rotary plough, which properly equipped, will clear a very heavy fall of snow and break through heavy drifting. They are expensive and require a heavy supply of power for operation. A small road unable to afford such an expensive equipment, should have an up-to-date snow plough, and where express and freight business is handled, adjustable nose ploughs can be attached to the express cars whereby some very good results have been obtained. However, a great deal of snow fighting difficulties can be avoided by properly placed snow fences, and where it is possible they should be made permanent. Snow should not be allowed to pile close to the right-of-way, but should be well flanged back, and if this is well looked after, little trouble should be experienced in keeping the track open. Cuttings should be cleared out after each storm.

Under certain condition, weeds on the track are a nuisance, and expensive to destroy, they cause skidding of the wheels and catch drifting snow. Weeds can be destroyed in different ways; by manual labor, with grub, hoe and shovel, patent weed destroyers, by dragging long chains after a car, and where conditions warrant, by a weed burning car. Where roads are fortunate enough to be associated with gas companies, a cheap weed destroyer is obtained by using a by-product, namely: the light tar that is collected from the scrubbers and drips. This liquid can be applied with a common watering can, and also makes an excellent dust layer. Another good weed preventer is a liberal supply of soft coal ashes to be used as ballast. This also makes first-class ballast and is not affected by the frost, as the water sinks away from it very fast, this also makes a good filling for low spots in the track.

The removal of ice and frozen mud effects only such track as is laid on the travelled portion of an unpaved street or roadway. Many appliances have been tried, but I fail to find any to replace the pick.

All curved switches and points require greasing, and the general opinion appears to be that it pays to do this work. Personally speaking, I am satisfied it pays by the reduction of wear on the track and wheels, and saving in power.

Daily reports accurately kept are of value not only as to cost of work and material used, but for reference. Whenever necessary, these reports may be sub-divided into different parts, such as work on ties, steel, ballast, ditching, crossings, etc.

International Ry. and Development Co.—A company with this title has been incorporated under the B.C. Companies Act with a capital of $1,000,000 to construct and operate single or double track aerial or other tramways, with the necessary side tracks and turnouts for the passage of cars and other vehicles capable of being used on tramways, etc., to utilize any motive power now used or that may be discovered, for the operation of such tramways, to build, purchase, or otherwise acquire and operate steam and other vessels for the general transportation of passengers, etc.

The ratepayers of the townships of Moulton and Gainsboro, Ont., have passed by-laws granting a bonus of $5,000 in each case, to the Dunnville, Wellandport and Beamsville Electric Ry.

The St. Lawrence Route Upheld.

Capt. Alex. McDougall, of Duluth, Minn., wrote one of the members of the Shipping Federation of Canada recently as follows:—

"I have just arrived home from a trip to Liverpool, and then a trip up the Great Lakes and their connecting rivers, and I made a careful study of the trip to Montreal, and a comparative examination of the route through to Duluth, for the latter part of which I have a pilot's license. I had often read and heard of the St. Lawrence route being so dangerous or difficult to navigate as compared to the route from New York, which to some extent is so, for the New York route is exceptionally favorable the year round. In the navigation of the Gulf for its season, I could not see the reasons for so much dread of it, much of which I think will disappear as the shipping increases and the aids to navigation improve, and more men get better acquainted with the objectionable features in its navigation. I had been on the lower St. Lawrence before, and with some experience in dispatching ships in and out of the Gulf, so while on the s.s. Megantic on her first voyage as passenger to Montreal, I heard her officers say that she was the largest ship (565 ft.) that could navigate the St. Lawrence, and that a 600 footer would be too long for the narrow, crooked channels to Montreal. I asked the Captain to grant me the privilege to investigate the charts, and to allow me in a prominent place in the ship to best see the channel. I looked into the matter very carefully, and when I got to Montreal I was of the opinion that there was a channel that a ship 1,000 ft. long could navigate much better than our numerous 600-footers of the upper lakes can navigate the Detroit and St. Mary's Rivers, which in their whole length require about 1,200 buoys, beacons and aids to navigation, to show or tell how to enter and pass the intricate channels and bends of the route. From Buffalo to Duluth, 1,000 miles, where steamships of more than 600 ft. are more numerous than are the different kinds of craft on the St. Lawrence, they run and pass each other night and day in the present channels of our rivers and bays, sometimes drawing 19 or 20 ft., and only two or three inches to spare over the rocky bottom of the channel. Many of those 600-footers make from 20 to 25 round trips from May 1 to Dec. 10, and the captains and mates are the only pilots and also attend to all the other duties belonging to the ships' officers, and I think they could navigate ships 1,000 ft. long in our channels of the rivers that connect our lakes and bays, and which are not nearly so good as the channel

The man who buys an Underwood Typewriter does not bring the price into discussion.

He does not buy the Underwood on a price basis. He knows that to pay less is to get less—a great deal less.

He knows that in buying an Underwood he will get full value for every cent of the cost. And for this reason, Underwoods in Canada outnumber all other makes of typewriters combined.

UNITED TYPEWRITER CO. LTD.
Adelaide St. East, TORONTO.

from Montreal to the sea, and our fog, snow and thick weather is as bad or worse than on the St. Lawrence outlet. I think that if a committee of your Harbor Commission and pilots would make a trip of investigation and look over the route from Buffalo to Port Arthur or to Duluth, and see our channels night and day in the latter part of the season, when the traffic is greatest, and nights the longest and darkest, they would learn some points of interest to themselves, and of great value to Montreal. I think the Canadian Government has been doing splendid work improving the lower St. Lawrence, which work will be moderately permanent, for the St. Lawrence has but little or no sedimnet. If I were a citizen of Montreal I would endeavor to stop the general shipping gossip that the channel is not good enough for larger ships, and I would urge the Government to still improve the good work it had been doing. About a month ago I was on the bridge with the pilot going up and down the River Scheldt to Antwerp, where not long ago a great deal of talk in shipping circles against that channel was hurtful to the port. But of late, I am told, as they improve the channel the shipping is increasing, and there is a much better sentiment for the port, as I hope you will soon have for Montreal, for I think you will be the outlet for an enormous tonnage in the future."

The Pellat-Hanlan Collision.

L. A. Demers, Acting Dominion Wreck Commissioner, has given the following judgment re the collision between the s.s. H. M. Pellatt and the steamboat John Hanlan at Toronto, June 30. "By the evidence adduced, it is found that the second engineer being on duty, under the impression that the captain, who was then on deck in charge of the ship, had finished with the engine-room, he left the oiler, Joncas, in charge of the engine, while he personally attended to the closing of the exhaust valve, claiming that his attention was necessarily required to it at the time. All the witnesses agree that the second engineer is a capable man and thoroughly sober, and has always performed his duties satisfactorily in the past. Although every testimonial was given in his favor, the court cannot condone his action in leaving the engine-room or his post under the impression that his duties were probably no longer required at the throttle valve. If proper steps had been taken to educate the assistant, the oiler, to attend to the closing of this exhaust valve, which appears to be a necessity every time the vessel comes into harbor, and the winches are working, the engineer would have been found at his post, and the mistake, which was absolutely that of the oiler to put the lever ahead instead of astern, according to the signals, would probably not have occurred. In view of the fact that the engineer left his post when he should have been attending to the working of the engines, the court holds him guilty of culpable error of judgment, and therefore, suspends his certificate for three months, from July 17 to Oct. 17, 1909. No fault is found with the captain, who seems to have acted in seamanlike fashion, taking every means and measures to prevent a casualty."

The second engineer who has been suspended is O. Lamoureux.

Northern Navigation Co.'s s. s. Hamonic.

The Northern Navigation Co. of Ontario has issued a booklet illustrating the various steps in the construction of the Hamonic, from the assembling of the materials and the laying of the keel, to the actual placing of the vessel in service. In addition to the various illustrations, which include several showing the elaborately fitted interior, a number of interesting facts relative to the actual construction of the vessel are given. The keel was laid May 26, 1908, and the hull was launched Nov. 26, in the same year; the first trial trip took place May 12, 1909; speed and endurance trials, May 24; owner's official trial trip, June 12, and the first regular trip, June 23. The steel used in building weighed 2,000 tons; the weight of the vessel when launched was 3,000 tons, and when completed, 4,000 tons. The boiler plate is 1¾ ins. thick, and the total steel used in the boilers is 320 tons. The engines are 37 ft. long, 25 ft. high, and weigh 220 tons. The propeller wheel is 16½ ft. diar., and weighs 12 tons. The dimensions of the vessel are: length, 365 ft.; beam, 50 ft.; depth, molded, 27 ft.; tonnage, 5,240 gross; horsepower, 7,000.

Stranding of the s. s. Campana.

An investigation was held at Quebec June 26 and July 2 and 3 before Capt. L. A. Demers, F.R.A.S., Chief Examiner of Masters and Mates, assisted by R. Baquet, President Quebec Corporation of Pilots, and Capt. Bain, into the circumstances attending the grounding and eventual abandonment and total loss of the s.s. Campana near Pointe St. Michel, St. Lawrence River. The court found that Capt. L. Lachance was guilty of a culpable error in judgment and therefore adjudged that his certificate be suspended for 9 months from July 3, 1909, to April 3, 1910.

The Department of Marine has issued lists of the lights and fog signals on the inland waters of the Dominion and on the Pacific coast, corrected to Apr. 1.

Notices to Mariners

We solicit the enquiry of Contractors in the Dominion, assuring them of prompt attention; the released equipment we offer is dependable. We have special bargains in locomotives, dump cars, air compressors, drills, crushers, hoisting engines, concrete mixers, etc., and we issue a printed list of our offerings with prices and location given. Send for it and let us know your requirements in our line.

WILLIS SHAW MACHINERY COMPANY

No. 171 La Salle St., Chicago, Ill.

James Thomson, Pres. and Mang. Director. J. G. Allan, Vice-President. James A. Thomson, Secretary. Alex. L. Gartshore, Treasurer.

THE GARTSHORE-THOMSON PIPE & FOUNDRY CO. LIMITED

MANUFACTURERS OF

CAST IRON PIPE

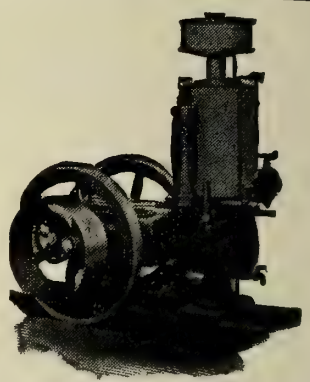
3 Inches to 60 Inches diameter

FLEXIBLE AND FLANGE PIPE AND SPECIAL CASTINGS

FOR WATER, GAS, CULVERT AND SEWER

HAMILTON, ONT.

GASOLINE ENGINES



The "STICKNEY" ENGINE is something unique

The most ECONOMICAL ENGINE for RAILWAY PUMPING

The GOVERNOR is so sensitive that it never wastes fuel

Constructed without any useless frills but made to stand hard work.

Sizes from 1 H.P. to 25 H.P.

We state size of Cylinder, and are prepared to guarantee power developed.

ONTARIO WIND ENGINE AND PUMP CO. LIMITED

WINNIPEG, MAN. TORONTO. MONTREAL, QUE.

The "DILLON"

is a Hinge-Stay fence made of extra quality wire, either all No. 9, or lighter if required.

"MONARCH"

fence is made of No. 9 Hard wire throughout, and is of the regular straight-stay style

ENQUIRY SOLICITED

The Owen Sound Wire Fence Co. LIMITED

OWEN SOUND, ONTARIO

SESSIONS-STANDARD

Friction Draft Gear

Simplest and Best

Both Made by Standard Coupler Co.

STANDARD STEEL PLATFORMS

Used by all Canadian Railways

Atlantic and Pacific Ocean Marine.

The Reford Line's s.s. Spheroid, which recently grounded between Montreal and Three Rivers, was released without damage.

The barkentines Rachel Emery and Allan Wylde, which arrived at Montreal, July 4, from Porto Rico, are the first ocean-going sailing vessels to enter the port of Montreal for some years.

R. M. Coulter, Deputy Postmaster General for Canada, who went to Australia and New Zealand, on behalf of the Government in connection with the proposals for the establishment of the "all red route," has returned to Canada.

The Donaldson Line s.s. Cassandra, which arrived at Montreal July 13, was the first passenger boat to pass the Straits of Belle Isle this season. Several freight vessels had already taken this route, inward, but the Cassandra was the first passenger vessel to arrive by the northern route.

The White Star-Dominion Line s.s. Megantic, which arrived at Montreal re-

SUCCESSORS TO
THE MAIL JOB PRINTING CO.

Kingston and Pembroke Railway Company.

Notice to Shareholders.

The Annual General Meeting of the Shareholders of this Company will be held on Wednesday, 11th day of August next, at the Head Office of the Company in Kingston at eleven o'clock a.m. for the purpose of electing Directors and transacting other business.

The Stock Transfer Books will close in New York on Saturday, 31st day of July, 1909, at 1 p.m. All books will be re-opened on Thursday, 12th day of August, 1909.

ARCHIBALD MCNAUGHTON,
Secretary and Treasurer.

Kingston, July 10th, 1909.

cently on her maiden voyage, completed the voyage from Liverpool in 7 days, 9 hrs. 27 mins., having been delayed twice by fog. She was not pushed at all, the highest speed in one day reaching 17½ knots an hour.

The Montreal Harbor Commissioners' revenue for June was $51,329.84, and from the opening of navigation to June 30, $88,054.68, against $54,491.20 and $89,710.71 for same periods 1908. Up to June 30 this year, 224 vessels of a tonnage of 622,649 arrived at the port, against 246 vessels of a tonnage of 655,155 for the same period 1908.

The schooner Drusie, of Paspebiac, Que., is reported to have been wrecked while homeward bound from the Barbadoes, July 11. The crew were rescued by an Italian liner and taken to New York, while the wreck was set on fire. The Drusie was built at Liverpool, N.S., in 1905, her dimensions being: length, 100.3 ft.; breadth, 25.5 ft.; depth, 9.5 ft.; tonnage, 99 register.

The Osaka Marine Court (Japan) has given judgment in the enquiry into the stranding of the C.P.R. s.s. Empress of China, in the Japan Sea, holding that the pilot, Capt. J. S. Stevenson, was guilty of negligence in not taking soundings when the vessel was carried out of its course owing to the abnormal set of the current, and, in addition to reprimanding him, ordered that he pay the costs of the hearing.

The Thomson Steamship Line is about to increase its service, by the addition of passenger vessels, to operate between Montreal and Naples during the summer, and between some other port, not yet selected, and Naples in the winter. An order has been placed on the Tyne for the construction of the first vessel for this service, to be named Tortona, and the first sailing from Montreal, it is announced, will take place in Nov.

The Hudson Bay Co.'s s.s. Pelican on her annual voyage from England to Hudson Bay ports, arrived at Montreal recently, and subsequently sailed for the north. During the next four months she will be engaged in delivering stores at the company's various stations. The first stop after leaving Montreal will be Cartwright, about 200 miles north of Belle Isle Straits, after which calls will be made at Rigollette, Davis Inlet and York Factory.

The Department of Trade and Commerce has decided that the subsidy of $100,000, half of which is paid by Canada, and half by New Zealand, to the R. A. Alley Steamship Line for a service between the Pacific coast and New Zealand, be discontinued at the end of the present agreement. The New Zealand Government has declined to renew its share in view of the existing trade conditions, and the Canadian Government does not think it advisable to maintain the service alone.

The appeal of the Allan Steamship Line against the decision of the British Admiralty Court, in the case of the collision of the company's s.s. Corinthian with the s.s. Malin Head last fall, was heard before the Court of Appeal in England recently, and the judgment of the lower court, whereby the Corinthian was held to be solely responsible for the accident, was varied, and the blame was distributed between both vessels. Each side was directed to pay its own costs of the litigation, and each will have to pay a moiety of the other's assessed damages.

It is reported that the Allan, Thomson and Donaldson Steamship Lines have recently drawn up a schedule of rates for the carriage of grain to Glasgow, Scotland, each company binding itself not to accept cargoes at a lower rate than named in the schedule. The rate on wheat is said to be 1s. 3d. a quarter, which is quoted against the rate of 9d. a quarter to Glasgow from Boston and New York. This, it is claimed has affected the shipments of grain from Montreal to Glasgow, to a considerable extent, and the Montreal Board of Trade has taken the matter up with the Government.

Sir Thos. G. Shaughnessy, President C.P.R., who arived at his summer home, St. Andrews, July 11, in the course of an interview with the representative of a St. John paper, regarding new steamships for the C.P.R. Atlantic service, is reported to have said that the company had had in mind some radical changes. Its Pacific trade was demanding a larger and better type of steamer, and it was contemplated to transfer some of the large boats from the Atlantic. The character of the new vessels which would be placed on the Atlantic to take the place of those transferred would be of the best, with a capacity of about 20 or 21 knots an hour. The company did not care to make any change in this respect until it found out what the policy of the Governments concerned was regarding the future of the Atlantic service. It might turn out that after the company had entered upon the project, that the Governments would give a subsidy to a competing line, and for this reason the C.P.R. had not made any move in the direction of ordering larger vessels.

Maritime Provinces and Newfoundland.

C. H. Harvey has been appointed agent Department of Marine at Halifax, succeeding J. F. L. Parsons, who died there recently.

The sinking the fourth crib in the construction of the South Rodney wharf extension at St. John, N.B., was completed July 5.

F. Curran, F. Ferguson, W. E. Forbes and R. O'Leary have been appointed Pilotage Commissioners for Richibucto district, N.B.

The U.S. schooner Arthur Binney, which stranded at Fourchu, N.S., recently, is to be sold by auction, the efforts to release her having failed.

The s.s. King Edward, which ran ashore at Anticosti Island, last fall, and was subsequently abandoned to the underwriters, was raised and floated off, July 6.

The work of constructing ice piers at Annapolis Royal, N.S., is proceeding. The contractors are the Nova Scotia Construction Co., Sydney, and the total amount of the contract is $46,736.

The Quebec Steamship Co.'s s.s. Trinidad has replaced the recently wrecked s.s. Campana, and sailed for Gaspe, Charlottetown and Pictou for the first time, July 5.

The St. John, N.B., city council has instructed the city engineer to report on the condition of the ferry steamboat Ludlow's machinery, on receipt of which tenders may be called for for the necessary repairs.

Capt. W. Livingston, who died at Bras d'Or, N.S., recently, aged 74, sailed on his first voyage in 1854 in the brigantine Carradock, which he had assisted his father to build. He subsequently served through the Indian Mutiny and the American Civil War, and after engaging in transatlantic business for some years, he settled in the coasting trade in which he was engaged for 30 years.

Arrangements are reported to be in progress for the construction, at Harbor Grace, Nfld., of a dock consisting of two marine railway slips, 24 ft. apart, each divided in two, making four sections, each to accommodate a vessel. Two sections will take boats of from 95 to 110 tons, and the other two, vessels of from 50 to 60 tons. The cost is estimated at about $40,000, and it is stated that the Government will guarantee 5% interest on the stock for 10 years.

The order in council discontinuing the coasting privileges granted to foreign vessels came into force July 1. According to Halifax reports, the effects of the partial embargo upon foreign coasting have already been felt in the province. It is stated that vessels which have been laid up for some time are now being utilized, and Canadian bottoms engaged elsewhere have been attracted home and a number of new vessels are being built, the first steel vessel ever built in the maritime provinces being now under construction at Yarmouth, N.S.

L. Coste, of the Department of Public Works engineering staff, was in St. John, N.B., July 6, in connection with the proposed transfer of foreshore lots at Sand Point, for railway connections with the wharves. Among the new points to be incorporated in the transfer is that the spur lines to be constructed in connection with the proposed facilities shall be regarded as common property and that the terms of the lease shall provide that any railway desiring to connect with the wharves may obtain the use thereof. It was also announced that the G.T.P.R. would construct terminal facilities on the St. John side of Courtenay Bay.

In referring to the recent announcement regarding the tariff preference to British manufactured goods, which is to apply only to such goods as are shipped direct to Canadian ports, the Minister of Public Works said recently at St. John, N.B.: "This announcement is in accordance with the settled policy of the Government approved by Parliament in 1907, when a clause was inserted in the tariff act providing that after a date to be fixed by the Governor General in council the British preference shall be limited to importations to Canada in vessels direct to Canadian ports. At the time the act was passed, the Premier announced that the date for bringing it in force would be when the National Transcontinental Ry. was completed, and I presume that the Minister of Marine intends by his announcement to refer to the date of completion of the railway as the time when this policy will be carried into effect. I regard this as a matter of the very greatest importance for the development of Canadian ports and more especially the ports of the Maritime Provinces, which in the winter season suffer keen competition with Portland, Boston and New York. It would be one of the greatest levers that could be brought to bear in directing Canadian trade through Canadian channels."

Province of Quebec Marine

Montreal reports state that freights for outgoing vessels are, up to the present, very light, and that about half of the longshoremen are unemployed.

The Dominion Government, some years ago, obtained $135,717.20 of Quebec harbor debenture stock, which, notwithstanding that the investment has been unremunerative, has been carried in the public accounts as an asset at par value. This amount has been eliminated, as a result of the investigation into Dominion assets by a committee appointed by the House of Commons last session.

The Montreal Harbor Commissioners' floating crane, Montreal No. 1, was tested, in the harbor, July 10, by F. W. Cowie, Chief Engineer. This is the crane which broke adrift from the tug which was towing her from England last year. The letting of the contract for the towing of her across the ocean this year to a Dutch firm, has given rise to some severe comment in England.

The Erne Shipping Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $32,000, and office at Montreal to purchase, build, or otherwise acquire and operate steam and other vessels, and to carry on the business of common carriers on the high seas and inland waters. The provisional directors are:—N. M. Ward, Orange, N.J.; G. I. Dewar, Ottawa; W. A. Taft and W. A. Taft, jr., Arlington, Mass.

The King Edward Park Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $1,000,000 and office at Montreal, to establish pleasure parks, etc., and in connection therewith to build, purchase, or otherwise acquire and operate steam and other vessels for the transportation of passengers and merchandise. The provisional directors are:—J. Gravel, E. C. dit Saint-Amour, L. A. Taillon, J. W. Blanchet, Montreal; N. M. Cantin, St. Joseph, Ont.

The steel screw tugboat Sin-Mac, illustrated on this page, and which has been built for the Sincennes-McNaughton Line, Montreal, by Archd. McMillan & Son, Dumbarton, Scotland, was launched there May 12, and, after having her machinery fitted on board, proceeded on trial on June 3, when a speed of 14¼ miles per hour was attained, which was considered very satisfactory. The vessel is of the following dimensions:—Length, 138 ft.; breadth, 26 ft.; depth, 14 ft. She is fitted with triple expansion engines, having cylinders 17½", 28" and 46" x 30" stroke, supplied with steam at 185 lbs. pressure from one large boiler fitted with forced draught. She has all latest improvements for quick handling of vessels under tow, including a large steam towing winch, and is also fitted with salvage apparatus as well as appliances for extinguishing fires in harbors. The accommodation is of a very superior nature, the rooms being large and well furnished, and she is fitted throughout with electric light. Water ballast is arranged for in cellular double bottom under engine space and also in fore and after peaks. This is the second and larger of two such vessels built by McMillan & Son for the same owners. The Sin-Mac arrived at Montreal recently, and has been put into service. Her first tow was performed by bringing up the first sailing vessels to enter Montreal for several years.

Ontario and the Great Lakes.

The Hamilton longshoremen struck work, July 8, for an increase of pay from 25c. to 37c. an hour.

The Inland Navigation Co.'s steamboat Dunelm, bound from Fort William to Montreal, ran aground at Presqu'Ile Bay, July 9.

The Farrar Transportation Co.'s steamboat Collingwood was docked at Collingwood, July 6, for bottom repairs, after grounding at Michipocoten harbor.

Representatives of the Belgian Government visiting Canada inspected the Welland Canal, July 9, paying particular attention to the operation of the locks.

The coal handling record at Fort William was broken in May, when about 200,000 tons was handled at the C.P.R. docks. This is about 20,000 tons ahead of any previous month.

Capt. John Ellison, well known on the lakes as a builder of vessels, wharves and harbors, and as a vessel captain, died at Port Stanley, recently, aged 66. He was a Fenian Raid veteran.

The C.P.R. s.s. Assiniboia is again on her route after being overhauled and having 17 plates and 7 frames straightened. The damage was caused in the recent accident at the Sault Ste. Marie locks.

F. King, Counsel Dominion Marine Association, has been apointed a member of the Great Lakes and St. Lawrence Navigation and Improvement Association, which is taking up the question of deepening the Welland and other canals on that route.

The Northern Navigation Co.'s s.s. Hamonic was presented with a Canadian ensign in silk, and the captain with an illuminated address, on her arrival at Port Arthur recently on her maiden trip. Civic welcomes were accorded at Port Arthur and Fort William.

An order in council has been passed exempting all Canadian fishing vessels, whilst employed exclusively in fishing, from paying side wharfage, and all fish, on being landed, whether fresh, partly or wholly cured, if of the ship's catch, from paying top wharfage..

The C.P.R. is pushing forward the construction of its docks at Victoria Harbor, and Government dredges are at work there. It is anticipated that though the work will not be completed this year, that sufficient will be done to enable grain to be handled by this route in the fall.

Frank Plummer and C. H. F. Plummer have formed a partnership as Plummer & Plummer, vessel owners, etc., to manage The Canadian Lake Transportation Co., Ltd., The Canadian Lake Line and other steamship interests. Their offices are at 18 Wellington St. East, Toronto.

The C.P.R. upper lake service, which was put in full force July 4, consists of the Assiniboia, Keewatin, Manitoba, Alberta and Athabasca. A five days a week service is being operated each way between Owen Sound and Fort William, an increase of two sailings each way over previous service.

The Lake Carriers Association has issued a notice that the dredging plant operating in the middle Neebish Channel is now engaged in the south channel, or west of the centre line, between Mud Lake and Hay Lake, and cautioning vessels to keep in the east half of the channel, as indicated by lights and buoys along the centre line.

The Minister of Public Works, at a meeting of the Canadian Club at Fort William, recently, said that the harbor would be dredged to a depth of 25 ft., so that the largest lake vessels would be able to use it without danger, and that a deep channel to the G.T.P. elevator on the Mission River would be completed by September.

The Hamilton Ferry Co., which operates a summer park at Oaklands, will run the steamboats John R. and Ivan R. across Hamilton bay during the season. The John R., which has recently been reconstructed, is, according to a Toronto daily paper, to run between Toronto and Hamilton, but we are advised that she cannot operate outside Hamilton bay.

Following is a list of the vessels operated this season by the Upper Ontario Steamboat Co., together with the captains and chief engineers:—

Adrelexa	— Harris	P. Soul
Aileen	R. Hansen	J. McCaw
Britannia	H. A. Cartwright	T. Arbin
Gipsy	W. Hamilton	— Stoner
Lena May	H. P. Lawson	E. Spurway
S. & Y.	W. R. Reynolds	— Adams
St. Antoine	R. Rowlandson	G. Mongrain
Wenona	A. McLeod	C. Carrier

The effect of the wreck of the locks in the Sault Ste. Marie Canadian canal, early in June, is shown by the traffic returns given on another page. The num-

ber of vessel passages through the Canadian canal during June was 455, and through the U.S. canal, 1,895, against 688 and 1,264 respectively, for June, 1908. The total freight, however, shows a large increase, being 1,742,015 tons, against 988,384 tons for June, 1908.

An order in council has been passed, defining the limits of the port of Sarnia, as follows:—All the waters of the River St. Clair east of the international boundary line from a point on the beach, 500 yds. north of the north wall of the G.T.R. passenger station on the north, to the several outlets of the said river into Lake St. Clair on the south, including the whole of Sarnia bay, as well as any dredged channels at the mouths of the rivers.

The Canadian Lake and Ocean Navigation Co.'s steamboat H. M. Pellatt, which is being operated this season by the Merchants' Mutual Line, while docking at Toronto, June 30, collided with and sank the Toronto Ferry Co.'s steamboat John Hanlan, which was moored to the wharf. The John Hanlan was built at Port Dalhousie, Ont., in 1884, and has been on the Toronto ferry route since 1890. It is said that she is insured for about $5,000, representing half her value.

C. J. Smith, Manager Richelieu and Ontario Navigation Co., and President Dominion Marine Association, has been added to the committee of the Association of Passenger Steamboat Lines, which is investigating the workings of a co-operative insurance plan for vessels operating on the Great Lakes, etc., similar to that recently adopted by the lake freight lines. A report on the matter will be presented at the association's winter meeting at Washington, D.C.

The Mathews Steamship Co.'s steamboat Haddington, operated by the Merchants Mutual Line, Toronto, in passing through the Rapids to Montreal, recently, lost her rudder and shoe. She was towed to Kingston, where she was docked and a new rudder and shoe supplied by the Polson Iron Works, Toronto, were applied. A considerable time in completing the repair was saved by adopting the Goldschmidt Thermit process in effecting the adjustment.

T. J. Stockwell, Kingsville, Ont., recently sued the Doty Engine Works, Goderich, in conection with the sale of the steamboat Lincoln. The defendants had sold the steamboat to the plaintiff for $12,000, of which it was claimed $900 had been paid on account. It was also claimed that defendants had not carried out their contract as to rebuilding; that the workmanship was inferior and that the vessel had been seized and re-sold for $10,000. The claim was dismissed with costs.

The U.S. Lake Survey reports the stages of the great lakes for June in feet above tidewater as follows:—Superior, 601.93; Michigan and Huron, 581.07; Erie, 573.21; Ontario, 247.30. It was anticipated that, during July, Superior would rise 2¾ ins., Michigan and Huron, 2 ins.; Erie, ½ in., and Ontario, ½ in. Compared with the average June stages for the past 10 years, Superior was 9 ins. lower, Michigan and Huron, ¼ in. higher; Erie, 5¼ ins. higher; and Ontario, 7¾ ins. higher.

Capt. A. W. Crawford, who was connected with lake transportation for many years, died at Toronto, July 3, aged 55. Between 1893 and 1903 he was captain at different times of the Hamilton Steamboat Co.'s steamboats Macassa and Modjeska. He was one of the organizers of the Turbine Steamship Co., and brought the s.s. Turbinia over from England, and was the first commander. He retired from navigation business a few years ago. His son, H. Crawford, is manager Argyle Steamship Co.

The Prescott and Ogdensburg Ferry Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $50,000, and office at Prescott, Ont., to acquire and operate steam and other vessels and transfer plant for the purpose of conveying passengers, freight, railway cars with passengers and freight, mails and other traffic on the River St. Lawrence between Prescott, Ont., and Ogdensburg, N.Y., and for other purposes. The provisional directors are: J. E., F. W., E. M. and J. Dubrule, Jr., J. K. Dowsley, Prescott, Ont.

An order in council has been passed providing rules for the regulation of traffic at the Lime Kiln Crossing in the Lower Detroit River. The Lower Detroit River is defined to include all the limits of the port of Amherstburg, which shall be in charge of the harbor master, and the rules provide that no freight boat down-bound shall pass or approach another freight boat bound in the same direction, nearer than one-quarter mile, between the north limit of the port and the lower end of Bois Blanc Island; no passenger boat down-bound shall pass another boat down-bound between the south gas buoy 2, Ballard Reef channel, and the head of Bois Blanc Island; no vessel shall pass another going in the same direction or in the opposite direction, in the narrow portion of the channel at Lime Kiln Crossing, during the widening of the channel. Other provisions relate to the slowing down, signalling, etc., of vessels and the powers of the harbor master of the port.

Manitoba, Saskatchewan and Alberta.

Following are the vessels operated by the Northern Fish Co., Selkirk, Man., this season, with the names of the captains and chief engineers:—

Alert	J. Olson	A. Paquette
Balmoral	F. Joyce	B. Reid
Chieftain	J. Stevens	A. Sinclair
Highlander	W. P. Simpson	J. Black
Idell	S. Stefanson	W. Jarvis
Tempest	W. R. Thomas	J. Dewar
Wolverine	T. E. Pollock	J. Seaman

A suggestion was recently made by J. Conmee, M.P., that a canal should be constructed from the head of the lakes, by way of the Kaministikwia River and other waters, to the Saskatchewan River, thus connecting the Great Lakes with the foothills of the Rockies. He stated that the canal would be 2,000 miles long, with very little restricted water, and would be the cheapest canal for its length ever constructed.

The Hyland Navigation and Trading Co.'s steamboat Winnitoba was launched from J. L. Hyland & Co.'s yard, near the mouth of the Seine, St. Boniface, Man., July 6. The actual dimensions of the vessel are: length, 187½ ft.; breadth, 44 ft.; beam, 30 ft.; depth, 9 ft.; light draught, 5 ft.; loaded draught, 6½ ft. She is equipped with two 250 h.p. engines, for a speed of 19 miles an hour; lighted with electricity supplied by 25 kilowatt direct connected apparatus. She will be able to accommodate 1,500 river passengers, or 1,000 lake passengers, and has berth accommodation for 225. She will be operated on the Red River and Lake Winnipeg.

B.C. and Pacific Coast Marine.

The name of the schooner Selma has been changed by order in council to Elsie Bradford.

An order in council has been passed declaring Prince Rupert to be a port of registry for ships, etc.

Capt. D. McPhaiden, shipping master at Vancouver, and a well known coast seaman, died there recently, aged 81.

The steamboat Leebro sailed from Victoria recently with men and material for the construction of a second order lighthouse at the mouth of Quatsino Sound.

Capt. C. W. Seal, for many years chief officer of the C.P.R. s.s. Empress of Japan, died at Vancouver, recently, aged 56. He retired from the sea some years ago.

Nothing has, as yet, been done regarding the construction of the steel passenger steamer, which the C.P.R. recently decided to build for its Pacific coast service. The matter is said to be in abeyance.

An agreement is said to have been reached between the Nelson council and the C.P.R., whereby the company takes over the city dock at an annual rental, with a reasonable tariff for all users.

The Dominion Warehouse and Cartage Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $50,000, to carry on the business of warehousemen in all its branches, and in connection therewith to build, purchase or otherwise acquire and operate steam and other vessels and to carry passengers and goods.

The C.P.R. s.s. Princess Charlotte has been equipped with a system of wireless telegraphy, and it is stated that a portable equipment has been constructed for the s.s. Princess Royal, to be placed on the upper deck, but which can be transferred from vessel to vessel.

The North Vancouver City Ferries, Ld., has been incorporated under the B.C. Companies Act with a capital of $250,000, to carry into effect an agreement made with the city of North Vancouver, and in connection therewith to purchase, lease or otherwise acquire steam and other vessels for the conduct of ferries, etc., and to act as general carriers, shipowners, stevedores, forwarding agents, etc.

The Royal City Navigation Co., Ld., has been incorporated under the B.C. Companies Act, with a capital of $25,000, to build, purchase or otherwise acquire and operate steam and other vessels for the conveyance of passengers and merchandise and to carry on generally the business of carriers by land and water. The company, it is announced, has decided to acquire or build a steamboat to take the place of the Ramona on the up-river run.

During May, 6 employes were killed and 13 injured in the course of their work of navigation in Canada. Of the fatalities, 4 were due to drowning, and one each to a fall and to fire. Of the other accidents, 4 were due to a fire, 3 each to falling material and to falls, 2 to an explosion of gasolene and one to machinery.

St. Andrew's Lock and Dam.

The Minister of Public Works made an inspection trip over the works in connection with the construction of St. Andrew's lock and dam on the Red River, near Winnipeg, July 3. He announced that the work would be completed and in readiness for operation by the opening of navigation in the spring. The lock is similar in type to those on the Welland canal, and will accommodate a vessel 215 ft. long, 45 ft. wide, and having a draught of 9 ft. After the inspection, the minister said, that a warm tribute was due to the ability and zeal of the department's engineer in charge of the work, Mr. Dufresne, and to the contractors, Quinlan and Robertson, between whom and the department there had never been the least friction. What this work would mean to Winnipeg no man could estimate, for the great north land bordering Lake Winnipeg—the fifth largest lake in America—held resources as yet unknown. Something was known of the supplies of fuel, lumber, building stone, iron ore and gypsum, which then could be tapped, and it was pointed out that the saving of $1 a cord to the consumer on the cordwood likely to be brought up the river would alone represent a sum equal to the interest on the cost of the work. Exclusive of the sums spent in earlier years, prior to the abandonment of the work, the lock and dam had cost $1,100,000, and the speaker thought the character of the work before them, and the results likely to accrue, quite justified the expenditure of this sum. The change from stone work to concrete had been a good one, due to this it had been possible to push the work forward all winter, and the quality of the concrete in the piers before them was obviously of the finest. The placing in position of the rolling curtain dam would have the effect of raising the water level at Winnipeg 2 ft., giving 9 ft. of navigable water at that point. The dam before them was 800 ft. long and 25,000 cubic yards of concrete had entered into its construction. Some idea of the magnitude of the undertaking at St. Andrew's may be gained from the fact that upwards of 360 car-loads of cement have been used on the work and cement forms only about one-eighth part, by bulk, of the concrete, so that 100 trains of 30 cars to the train would be required to haul the dry matter, cement, sand, gravel and rock, that has entered into the concrete work alone. The steel superstructure is a feature of the present work. It is of the two-deck type. The lower level is for use in connection with the movable curtain dams. An electric travelling crane for raising and lowering them will run on this level, while the upper level will be used as a traffic bridge to connect the two sides of the river.

Statistics of Canadian Shipping.

The total number of vessels of all kinds on the Canadian register at Dec. 31, 1908, was 7,602, with a gross tonnage of 702,324 tons, an increase of 74 vessels and 3,636 tons over 1907. The number of steam vessels on the register is 3,084, with a gross tonnage of 483,031 tons, which at an assumed average value of $30 a ton, represents a total value of $21,069,720. The number of new vessels built and registered during 1908 was 304, with a register tonnage of 28,983 tons, which at an average value of $45 a ton shows a total value of $1,304,235 for new vessels. This shows a slight falling off as compared with 1907, as shipbuilding in Canada in 1908, as in other countries, was not so active as in the previous year. During 1908, 281 vessels were removed from the register. Of these, 12 were sold to foreigners, 29 wrecked, 12 stranded, 17 lost, 125 broken up, 7 abandoned, 2 wrecked in collision, 2 missing, 6 foundered, 17 burnt, 4 condemned, 15 transferred to Newfoundland, 12 transferred to Barbadoes, and 21 were reported out of existence. During the same period, the names of 20 vessels were changed by orders in council. The number of vessels and their tonnage, according to provinces, is as follows:—

	Sailing Ships and Steamers.	Steamers.	Gross tonnage of steamers.	Net tonnage of sailing ships and steamers.
Ontario	2,028	1,474	187,264	192,970
Quebec	1,384	432	114,711	172,975
Nova Scotia	2,053	236	31,153	164,919
Brit. Columbia	939	642	81,473	87,056
New Brunswick	938	184	54,295	66,402
P. E. Island.	154	20	4,492	10,387
Manitoba	87	79	6,149	4,341
Yukon District.	16	14	3,213	2,984
Saskatchewan	4	3	281	290
Totals	7,602	3,084	483,031	702,324
Totals, 1907.	7,528	3,007	471,795	698,688

The ports of registry are distributed as follows:—Ontario, 38; Nova Scotia, 21; New Brunswick, 7; Quebec, 6; British Columbia, 3; Prince Edward Island, Manitoba, Saskatchewan and the Yukon District, 1 each, while in Alberta no provision has been made for the registration of vessels. The ports having a net tonnage of 10,000 tons and over are:—

	Vessels. Sailing.	Steam.	Net. Tonnage.
Montreal	434	253	124,297
St. John, N.B.	232	101	51,282
Victoria	110	156	46,479
Quebec, Que.	463	161	42,826
Toronto	83	315	39,214
Windsor, N.S.	72	14	33,460
Ottawa	155	246	32,302
Vancouver, B.C.	113	375	29,409
Lunenburg, N.S.	272	11	22 686
Halifax	321	86	20,374
Parrsboro, N.S.	86	7	19,120
Yarmouth, N.S.	280	29	18,328
Kingston, Ont.	62	136	17,975
Collingwood, Ont.	3	77	11,832
Midland, Ont.	3	24	11,459
New Westminster, B.C.	74	111	11,168
Charlottetown, P.E.I.	134	20	10 387

In 1906 there were only 7 vessels on the register of 3,000 gross tons, or over, and in 1907 there were 24, while during 1908 the number was increased to 27. The new vessels built during 1908 are as follows, by provinces:—

	Vessels.	Tons.
Ontario	46	8,695
Quebec	62	7,279
Nova Scotia	80	6,600
British Columbia	76	4,778
New Brunswick	32	1,288
Prince Edward Island	5	254
Yukon District	2	80
Manitoba	1	9
Totals	304	28,983

The names, dimensions, etc., of these vessels were published in our columns monthly, during the year, and lists of the vessels registered during the current year are also appearing monthly, together with the names and tonnage of the vessels removed from the register, and the causes therefor.

Quebec Transportation Club. — The members of the club were the guests of the Richelieu and Ontario Navigation Co., July 3, when a party went by boat to Murray Bay, where they were met by H. W. Paterson, representing the company. Dinner was served at the Manior Richelieu, and was followed by a dance. The return to Quebec took place July 5. Among those present were: J. Mathews, City Agent, I.C.R.; F. M. Spaidal, General Superintendent, Canadian Northern Quebec and Quebec and Lake St. John Rys.; G. H. Stott, City Passenger and Ticket Agent, G.T.R.; W. J. Thompson, Manager Quebec and Levis Ferry Co.; J. A. Everell, Superintendent Quebec Ry. Light and Power Co.; F. S. Stocking, City Passenger and Ticket Agent, Quebec Central Ry.; M. P. Conolly, General Agent, R. and O. Nav. Co.; A. H. Davis, Chief Clerk, C.P.R.; W. Langford, Master Mechanic, J. S. Blanchet, Car Accountant, J. T. Cassels, Superintendent Overhead Construction, Quebec Ry. Light and Power Co.

Among the Express Companies.

A. C. Egan has been appointed Travelling Auditor Canadian Northern Ex. Co., vice L. F. Muncey, who has been transferred to other duties.

J. H. O'Connor has been appointed agent Dominion Ex. Co., Winnipeg, succeeding W. M. Gordon, General Agent, appointed Superintendent Western Division.

A Montreal despatch says express companies' employees are forming a union, and that a demand will be made for the longest run for messengers not to exceed ten hours, for a 9 hour day for drivers, porters and clerks, and for 10 days holiday annually with full pay.

F. P. Brady, General Superintendent Canadian Government Railways, and member of the C.G.R. Managing Board, is reported to have been in conference with V. G. R. Vickers, Superintendent Dominion Ex. Co., Montreal, recently at St. John, N.B., as to the handling of express matter by the I.C.R.

The Board of Railway Commissioners heard a complaint from the Niagara district fruit growers, July 7, against the Canadian Ex. Co., regarding rates from Queenston, which, it was stated, had been advanced from 30c. to 40c. per 100 lbs. In delivering judgment, Chief Commissioner Mabee said that the whole matter of express rates is under consideration, and it was understood that while the matter was pending the existing rates would be maintained. He continued that the Commission has no power to compel the express companies to accept freight, but would issue an order confirming the 30c. rate. The order is given on another page.

The Interstate Commerce Commission has decided, in the matter of contracts of express companies for free transportation of their men and material over railways, that a railway company may lawfully transport the men and supplies of an express company without reference to any tariff provision when employed or used in the business of the express company upon the line of the railway itself, and in the same manner an express company may lawfully transport the packages of a railway company between points upon that line of railway without reference to its tariff rates, and further that a railway company may not lawfully transport men and supplies of an express company when employed or used in the business of that company at points not on the line of railway, and an express company may not lawfully transport for a railway packages between points on its route but not on that particular line of railway.

Marconi Wireless Telegraph Co.

The annual meeting of the shareholders was held in London, Eng., June 28, when the report for the year 1908 was presented. During the year the company made substantial progress. The fresh capital obtained enabled the directors to meet current engagements and to provide for the expenditure required to complete the transatlantic stations at Clifden, Ireland, and Glace Bay, N.S., and in addition allowed the carrying out of the scheme of reorganization of the works which were now on a thoroughly profitable working basis. As soon as the British Post Office authorities give effect to the agreement relative to the acceptance and delivery of Marconi transatlantic messages at all telegraph offices in the United Kingdom, G. Marconi will visit Glace Bay preparatory to the completion and duplication of that station. The directors regret that they are not able to declare a dividend, but feel that the prospects and position of the company are highly satisfactory and promising, and confidently anticipate that the dividend paying period will be speedily entered upon. In closing their remarks the directors mention the enormous service that wireless telegraphy renders to ships in distress, mentioning the loss of the s.s. Republic and also the wreck of the s.s. Slavonia.

Telegraph and Cable Matters.

C. Mackay, President Mackay Companies, has denied that his company has secured control of the Western Union Telegraph Co.

The directors of the Montreal Telegraph Co. at a recent meeting adopted a resolution expressing their sorrow at the death of A. T. Paterson, Vice President, and placing on record their appreciation of his services.

Sir Sandford Fleming, who sailed for England on the C.P.R. s.s. Empress of Ireland, July 2, will, it is reported, consult the British Government on the question of an additional, or cheaper, cable communication as discussed at the recent Imperial Press Conference there.

It is reported that satisfactory progress has been made with the extension of the Government telegraph line from Athabasca Landing, Alta., westward to Lesser Slave Lake. During last winter, poles were cut for the entire distance and the work of erecting them and stringing wires was commenced early in June, and about 20 miles completed about the middle of the month.

An experiment is reported to be contemplated to establish a wireless telegraph station on the Peel River, about 2,000 miles north of Edmonton, Alta., to provide direct communication between the Arctic circle east of the divide and other centres. The report states the communication will take place between Warn's Camp at Peel River and Seattle, Wash., by relays at Eagle, Valdez and Vancouver.

G. Marconi, in speaking at a meeting of the Marconi Wireless Telegraph Co. in London, Eng., recently, is reported to have said that no doubt a very great extension of the trans-atlantic service might be anticipated. As soon as the duplicate station in Canada was completed his company would be able to accept from 15,000 to 20,000 words a day.

The work of laying an extension cable of 300 miles from Newfoundland to join an existing Atlantic cable of the Commercial Cable Co. has been taken in hand. The cable ship Colonia is in charge of the operation. The company has completed an insurance in connection with the work of £185,000, which, added to the insurance already in force on the vessel, makes a total insurance of £300,000.

At the recent Imperial Press Conference in London, Eng., G. Marconi said that the cost of equipping two stations for communication over a distance, already tested, of 3,000 miles would be £100,000. The speed of transmission at present is 25 words a minute, but he hoped by duplexing to double it. His company, he stated, would, if the service increased, be prepared to reduce the cost of press messages to 2d. a word.

The Late O. S. Wood.

O. S. Wood, who recently died at Turner, N.Y., aged 91, was, in 1847, Superintendent Montreal Telegraph Co., and subsequently General Superintendent until 1866, when he engaged in similar work in the U.S. In referring to Mr. Wood's death, in the Telegraph Age, H. P. Dwight, President G.N.W. Telegraph Co., Toronto, writes as follows:—"I came as a very youthful operator to Mr. Wood, who had been appointed Superintendent of the Montreal Telegraph Co.'s line just erected between Montreal and Toronto, in August, 1847, and remained with him in the Montreal office until 1850, when he sent me to take charge of the Toronto office and the western extensions which were being started in different directions—the beginning of a system since grown to be a network of lines covering the Province of Ontario. Mr. Wood received his instructions as an operator directly from Professor Morse in 1844, and was his first pupil—an honor and privilege which his after life fully justified—and it may be properly said that every Morse operator living may feel honored in the memory of such irreproachable characters as those of Professor Morse and O. S. Wood, the first and chief progenitors of a business since grown to such a marvellous extent, and which has done so much to facilitate the business and promote the happiness of the world. Although it is half a century since Mr. Wood's retirement from the Canadian business and his return to the U.S., his memory is still cherished not only by the very few still living who had the honor of his personal acquaintance, but his name is still a familiar household word among the Canadian telegraph fraternity, who never saw him, and only know of him by tradition. I am sometimes called by the Canadian papers of these latter days 'the Father of Canadian Telegraphs,' but I never fail to tell my friends that whatever may be said in this respect, the Grandfather of the Canadian telegraph system was O. S. Wood."

Dominion Telegraph Company.

Following is the balance sheet for the year ended June 30, 1909, presented at the 40th annual meeting, at Toronto, July 14:—

ASSETS.

Capital expenditure	$1,281,819 47
Toronto, Grey and Bruce Ry. Co. 1983 bonds and interest thereon	1.596 24
Cash in bank and on hand	26.935 73
	$1,310,351 44

LIABILITIES.

Capital stock paid up	$1,000,000 00
Dividends unclaimed	1,399 90
Dividend payable July 15, 1909	15,000 00
Suspense	97 13
	$1,016,497 03
Balance at credit of profit and loss	293,854 41
	$1,310,354 44

The directors reported that payment had been made quarterly, in advance, for the past 30 years, of the guaranteed interest of 6% per annum on the capital stock of the company, by the Western Union Telegraph Co., lessees, and distributed quarterly to the shareholders. The lease is for 99 years from July 1, 1879, to June 30, 1978, inclusive.

The officers and directors for the current year are: President, T. Swinyard; Vice President, Sir Henry M. Pellatt; other directors, B. Brooks, T. F. Clark, R. C. Clowry, Æ. Jarvis, C. O'Reilly, and A. G. Ramsay; Secretary and Treasurer, F. Roper.

Instruction of Railway Shop Apprentices.

By S. J. Hungerford, Superintendent C.P.R. Winnipeg Shops

Apprenticeship in connection with wood and iron working trades has existed in some form from time immemorial, probably ever since men first began to fashion these materials into articles for use and comfort. During the middle ages it was thoroughly established as an institution and very stringent regulations were adopted in some countries to ensure the proper observance of their obligations by the apprentices, and heavy penalties were provided for any violation on their part, but as a rule they did not bear very heavily on the employer when he was at fault. The usual term of apprenticeship was seven years, and during that time the apprentices were subject to the will of the master in almost everything, and they generally lived in his house, as industrial establishments were for the most part small, employing but a few hands. This arrangement possessed the advantage of giving the apprentices the personal supervision of the master, who, having a direct financial interest in making the boys as efficient as possible, took great pains to instruct them carefully in the different processes of the trade.

With the advent of the steam engine and the industrial revolution that followed, this old system passed away. The establishments became much larger, so that it was no longer possible for the owner to give his personal attention to the minor details of the business, and the supervision of the apprentices was therefore delegated to the foremen, who, having no such financial interest in the ability of the boys to perform work efficiently, and generally looking upon them more as a source of bother to themselves than anything else, too frequently placed them at some work of a simple nature and left them at it, rather than incur the personal trouble of teaching them other lines of work. With the further growth of industrial establishments this unsatisfactory feature of the apprentice system became still more pronounced, and some employers went so far as to abolish the system altogether, while others merely tolerated it as a necessary evil. During the latter part of the last century some enterprising employers in Great Britain and on the European Continent began an effort to educate apprentices in their employ, this generally taking the form of a free night school, but it is only in recent years that the importance of the matter has been widely appreciated and any really serious effort made to meet the requirements.

In America apprenticeship systems have followed the same general lines as in Europe, but the rules and regulations have not been nearly as uniform, or as rigidly enforced, while the term has been somewhat shorter, ranging between three and five years. The same abuses and unsatisfactory features have existed here also, and many firms abandoned the system and had recourse to the plan of educating unskilled men to perform a single operation, or run one kind of machine, and then keeping them at that particular work for all time. By this means a class of operatives was developed that was highly efficient upon its special lines of work, and the whole proposition looked exceedingly attractive to employers, but with the exception of certain lines of work which may be said to be auxiliary to certain trades, the general effect was vicious in the final analysis. This, together with the general absence of proper systems for the education of apprentices, is probably responsible for the alleged deterioration among mechanics and the difficulty in obtaining men who are capable of doing everything connected with their respective trades, about which we have heard so much of late. It is likely that on the whole railways have suffered most in this connection, and within the past three or four years a few progressive railway managements have established more or less comprehensive educational systems, and this movement appears to be spreading rapidly at the present time, as all railway mechanical officers are agreed that special instruction outside the shop is necessary, there being only a diversity of opinion as to how this instruction should be given.

C. MURPHY

General Superintendent Eastern Division Canadian Pacific Railway.

About a year and a half ago the C.P.R. management established apprentice classes in the Angus shops at Montreal, and last winter a complete educational scheme was adopted at the Winnipeg shops, following the same general lines, the details being modified, however, to meet the local conditions and also where experience had shown that alterations might be made to advantage. The following is an outline of the system: All applicants are required to pass a physical as well as an educational examination before being engaged. All apprentices receive instruction in both practice and theory during working hours whilst under pay, which can be conveniently divided into two parts, viz., shop instruction and class instruction.

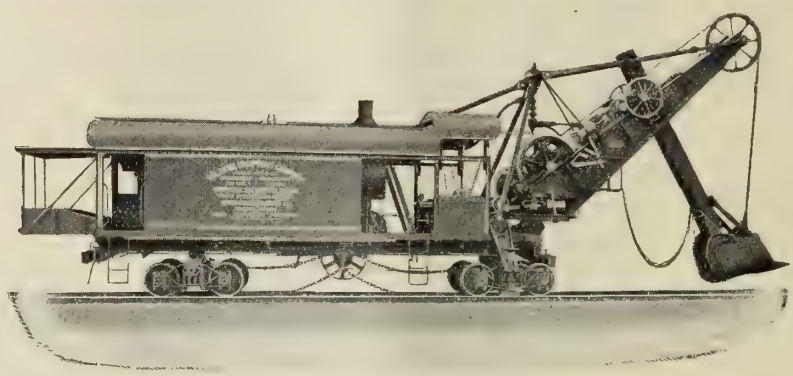
In the machine and erecting shops the boys are placed directly under the supervision of a shop instructor who is an expert machinist, and who personally instructs them how to perform the various operations properly, explains the reasons therefor and also looks after their general conduct. It is also his duty to see that their occupation is changed in accordance with an authorized schedule prepared by the management, this matter not being left to the convenience of the shop foremen, but adhered to as closely as circumstances will permit. The different foremen actually assign the work to them, the inspector merely directing their methods and conduct, and reporting concerning these matters to the supervisor of apprentices, who carefully re-

LOCOMOTIVES FOR ALL CLASSES OF SERVICE

Consolidation Type Freight Locomotive, Built for Eastern British Columbia Railway.

Total weight of engine in working order, 186,310 pounds. Weight on driving wheels, 166,100 pounds. Diameter of driving wheels, 51 inches. Boiler pressure, 210 pounds. Cylinders, 20 x 28 inches. Maximum tractive power, 39,200 pounds.

ATLANTIC STEAM SHOVEL



Direct wire rope hoist with but one sheave, instead of chain hoist with from five to seven sheaves, reduces delays and loss of time due to breakdowns, increases the efficiency of the engines, and reduces repair bills as well as fuel consumption.

Finished, interchangeable spare parts always on hand at works.

BANK OF OTTAWA BUILDING, MONTREAL, CANADA

cords same and shows progress on charts which are posted up in the class room. In shops other than the machine and erecting shops, where the number of apprentices is comparatively small, the respective foremen are expected to supervise their work and follow as closely as possible the schedule prepared.

A large and well lighted class room is provided, suitably equipped with tables, stools, etc., where the boys are given instruction in arithmetic, free-hand sketching of shop objects, mechanical drawing, railway history and geography, the class work being intended to associate as closely as possible with their actual work in the shop. For convenience, the apprentices are arranged in classes in the usual way, being grouped together in accordance with their respective educational qualifications. Boys serving their first year are only required to attend one session, two hours in duration, per week, but those serving their second year or upwards must attend two sessions of the same length per week until qualified. It was thought by some that taking the boys from the shop during working hours would prove very awkward, as machines and operations would necessarily have to stop during the period, but this has not been found to be a serious matter in practice, and all concerned are now agreed that class work should be performed during working hours, while the boys are mentally and physically fit and subject to regular discipline, rather than in the evening when tired and usually desirous of finding different amusement.

This class work is under a special instructor, who devotes his entire time to conducting the classes, checking the boys' papers, preparing new matter and posting up the progress charts, which are open to inspection and show graphically the relative progress and standing of each one, thereby putting each boy into competition with every other boy. As far as possible, the classes sit during the first two working hours of the day, as this has been found to be the most satisfactory period. Instruction papers, stationery, etc., are furnished free of charge, and a set of drawing instruments, including tee and set squares, board, etc., are loaned to each one during his apprenticeship and are presented to him upon the completion of his term, if his services have been satisfactory. An apprentice supervisor has general charge of all apprentice matters and attends personally to the examination of applicants, application of discipline in shop and class, preparing of courses of study and posting of records.

On the whole the plan has worked out most satisfactorily as the boys have almost without exception taken the greatest interest in the work; the foremen and mechanics are sympathetic, and the increased efficiency of the apprentices in the shops has fully justified the management in incurring the initial expense, while the ultimate benefit, both to the future mechanics and the railway company, will undoubtedly be great.

A press report from Calgary, Alta., recently stated that the C.P.R., during the latter part of July, sold 100,000 acres of land in the irrigation belt, at an average of $25 an acre.

September Birthdays.

Many happy returns of the day to:—

G. W. Alexander, Local Treasurer G.T.R. Western Lines, Detroit, Mich., born at Lightcliff, Yorks, Eng., Sept. 10, 1859.

W. B. Bamford, District Freight Agent C.P.R., London, Ont., born at Belleville, Ont., Sept. 10, 1863.

W. D. Barclay General Manager Canadian Northern Quebec Ry., Quebec and Lake St. John Ry., Halifax and Southwestern Ry., and Inverness Ry. and Coal Co., Quebec, Que., born at Campbellton, N.B., Sept. 23, 1852.

G. T. Bell, Assistant Passenger Traffic Manager G.T.R., and G.T.P.R., Montreal, born there, Sept. 7, 1861.

W. H. Biggar, K.C., General Solicitor G.T.R., and Solicitor G.T.P.R., Montreal, born at the Carrying Place, near Trenton, Ont., Sept. 19, 1852.

E. R. Bremner, ex-Division Freight Agent G.T.R. Ottawa Division, Ottawa, born at Toronto, Sept. 9, 1875.

M. H. Brown, General Freight Agent C.P.R. Ontario Division, Toronto, born at Victoria Square, Ont., Sept. 2, 1866.

W. G. Brownlee, General Transportation Manager G.T.R., Montreal, born at Lawrenceville, Ill., Sept. 9, 1858.

J. R. Bruce, ex-Traffic Auditor Intercolonial Ry., Moncton, N.B., born at Portsoy, Banffshire, Scotland, Sept. 23, 1848.

W. B. Bulling, Assistant Freight Traffic Manager C.P.R. Eastern Lines, Montreal, born there, Sept. 16, 1858.

C. F. Burns, Auditor of Disbursements Intercolonial Ry., Moncton, N.B., born at Clements Port, N.S., Sept. 10, 1854.

A. D. Cartwright, Secretary Board of Railway Commissioners, Ottawa, born at Kingston, Ont., Sept. 20, 1864.

W. F. Egg, ex-City Passenger Agent C.P.R., Montreal, born at Plymouth, Eng., Sept. 7, 1859.

W. H. Estano, Traffic Auditor Intercolonial Ry., Moncton, N.B., born at Halifax, N.S., Sept. 29, 1874.

C. B. Foster, Assistant General Passenger Agent C.P.R., Vancouver, B.C., born at Kingston, N.B., Sept. 30, 1871.

L. A. Hamilton, ex-Land Commissioner C.P.R., born at Penetanguishene, Ont., Sept. 30, 1852.

D. W. Hatch, Travelling Agent Atcheson, Topeka and Santa Fe Ry., Montreal, born at Bedford, Que., Sept. 1, 1841.

L. B. Howland, President and General Manager Irondale, Bancroft and Ottawa Ry., Irondale, Ont., born at Lambton Mills, Ont., Sept. 2, 1869.

J. E. Hutcheson, Superintendent and Purchasing Agent Ottawa Electric Ry., born at Brockville, Ont., Sept. 15, 1858.

J. F. Kane, Fuel Agent C.P.R. Western Division, Calgary, Alta., born at Toronto, Sept. 8, 1884.

W. H. Kelson, ex-General Storekeeper C.P.R., now of the W. H. Kelson Co., Montreal, born at Bath, Eng., Sept. 5, 1850.

C. B. King, Manager London St. Ry., London, Ont., born at Galena, Ind., Sept. 12, 1871.

V. Kistler, District Freight and Passenger Agent Great Northern Ry., Grand Forks, B.C., born at Clyde, Ohio, Sept. 4, 1881.

R. E. Larmour, General Freight Agent C.P.R. Central Division, Winnipeg, born at Brantford, Ont., Sept. 26, 1868.

H. D. Lumsden, C.E., ex-Chief Engineer National Transcontinental Ry., Ottawa, born at Belhaire, Scotland, Sept. 7, 1844.

J. Bruce Macdonald, Director Niagara Navigation Co., Toronto, born at Glengarry, Ont., Sept. 19, 1850.

F. J. Mahon, Superintendent Telegraphs C.P.R. Atlantic Division, St. John, N.B., born at Montreal, Sept. 18, 1865.

J. F. Mundle, City Freight Agent C.P.R., Montreal, born at Prescott, Ont., Sept. 20, 1857.

B. S. Murray, Route Agent Canadian Express Co., London, Ont., born at Glenwood, N.Y., Sept. 17, 1856.

J. Oborne, General Superintendent C.P.R. Ontario Division, Toronto, born at Montreal, Sept. 19, 1861.

S. S. Oliver, Engineer of Maintenance Canadian Northern Quebec Ry., and Quebec and Lake St. John Ry., Quebec, Que., born there, Sept. 9, 1858.

S. N. Parent, Chairman National Transcontinental Ry. Commission, Ottawa, born at Quebec, Sept. 12, 1855.

J. Paul, General Freight Agent Niagara, St. Catharines and Toronto Ry., born in Euphrasia Tp., Grey Co., Ont., Sept. 13, 1858.

R. P. Perry, C.P.R. Ticket Agent, Bracebridge, Ont., born at Whitby, Ont., Sept. 2, 1850.

C. S. Richardson, District Freight Agent C.P.R., Buffalo, N.Y., born at New York City, Sept. 26, 1870.

W. D. Robb, Superintendent of Motive Power G.T.R., Montreal, born at Longueuil, Que., Sept. 21, 1857.

W. H. Rosevear, ex-General Car Accountant G.T.R., Montreal, born at Wadebridge, Cornwall, Eng., Sept. 26, 1837.

E. W. Taylor, General Freight Agent Reid Newfoundland Co., born at Carbonear, Nfld., Sept. 8, 1870.

W. Whyte, Second Vice President C.P.R., Winnipeg, born at Charleston, Scotland, Sept. 15, 1843.

H. A. Young, Traffic Manager Canadian Lake Line, Toronto, born at Brooklyn, N.Y., Sept. 1, 1864.

Assistance to Ladies Debarking.—F. P. Brady, General Superintendent Intercolonial and Prince Edward Island Rys., has issued the following circular:—"I notice almost entire neglect on the part of brakemen on passenger trains to assist ladies debarking from trains. In future brakemen will give lady passengers every possible attention, and will assist them with their children and hand baggage in getting on and off trains. Conductors will see that these instructions are carried out, and will advise the superintendent if there is any failure on the part of the brakemen."

The annual meeting of the American Association of General Passenger and Ticket Agents, which was to have been held Oct. 19, at Toledo, Ohio, will be held there, Sept. 14 and 15. G. T. Bell, Assistant Passenger Traffic Manager G.T.R., and G.T.P.R., Montreal, is President of the Association.

E. J. Chamberlin, Vice President and General Manager G.T.P.R., recently said that though labor had been plentiful all the season, he expected that railway construction operations would be almost paralyzed until harvesting was over, as farmers were offering higher rates of pay and inducing men to leave the railways.

Canadian Northern Winnipeg Shops.

The accompanying plan shows the layout of the C.N.R. shops completed recently at Winnipeg. The company has provided in the location and construction of the buildings everything in the line of convenience and facility for handling cars and locomotives, and the new shops are up to date in every respect. They are located on the company's main line, just west of Pembina St., Fort Rouge, Winnipeg, and within easy reach of the new Fort Garry terminal station in the city. They are built of concrete, brick and steel and of the latest type of fire resisting materials. The height of the buildings range from 20 to 60 ft., giving ample room for the handling of large locomotives, coaches, etc. All the buildings are provided with large iron and wired glass skylights, and the latest type of ventilators; also inside gutters to take off condensation, thus providing for the most essential features of railway shops, namely, ample light and ventilation. Space has been arranged for future extension of all buildings. The lighting throughout is electric. All machinery is electric driven with separate motors to each machine. The buildings throughout are heated by a vacuum heating system. The mains, air lines and returns are carried on overhead trestles and are therefore easily accessible at all points.

THE COAL CHUTES are operated by the gravity bucket system and are so constructed that locomotives may be coaled on either side of chute.

ASH PITS.—The two ash pits are each 80 ft. long with fire brick floor and walls. Through tracks are carried on cast iron pedestals with depressed tracks for handling cinders on either side.

THE ENGINE HOUSE has 21 stalls, which can be increased to a 40-stall capacity with annexes for repair rooms. The locomotive foreman's offices are situated near the incoming and outgoing tracks from locomotive house, giving complete oversight of incoming and outgoing locomotives.

THE MACHINE ERECTING SHOP is 164 ft. by 572 ft. long, with annexes for air brake equipment, tool room and lavatories, and is one of the most complete buildings of its kind, having all the facilities necessary for the complete overhauling and repairing of the heaviest type of locomotives. It has a capacity of 25 locomotives in the west bay in connection with the electrically controlled transfer table. On this side there is a 120-ton locomotive hoist, also five 2½-ton hand cranes running full length of building. The centre bay has a 7½-ton crane the full length of building, and the east bay has two 3½-ton cranes. These cranes are so arranged that all parts of a locomotive can be quickly distributed to the various repairing machines. Adjoining this shop, on the east side, is the tube shop annex complete with rumbler.

THE BLACKSMITH SHOP, 140 x 100 ft., is accessible to machine erecting shop and equipped with steam hammers, forges, etc. Forges are operated by forced draught.

THE FOUNDRY is 130 x 100 ft., and is situated east of the blacksmith shop. It contains a complete equipment for moulding, casting, brass work, etc., and is provided with a 10-ton crane in centre bay running full length of building.

THE STORES BUILDING, two stories and basement, is 150 x 90 ft. long, and is conveniently located for communication with all shops and transfer table so that all necessary material may be quickly distributed to the various departments. A portion of the main floor is laid out for General Storekeeper's offices. At the east of the building on the main floor is the oil supply room with large storage tanks for different kinds of oil in basement. The Bowser system, complete with pumps, gauges, etc., has been installed. Surrounding the stores building is a large storage and distributing platform 600 by 120 ft., complete with lorry tracks and turntables. Another special feature is the scrap bins which are located at the east end of the platform with storage and sales tracks on each side.

THE FREIGHT CAR REPAIR SHOP, 200 by 100 ft. is at west end of yard and connected with freight car repair tracks.

THE PLANING MILL, 145 x 100 ft., is situated between the freight car repair shop and power house, and is complete with wood working machines and shaving exhaust system connected to boilers in power house.

THE POWER HOUSE, including boilers and compressors, 125 x 55 ft., has two batteries of boilers equipped with economizers and forced draught system. The compressor room has motor generators, transformers, switch board and air compressor, etc.

WATER SUPPLY.—The water for tanks and general use throughout the shops is taken from the Red River, with hydrants throughout the yard, and fire hose connection in all shops, giving complete fire protection to both inside and outside of buildings. For drinking purposes there is an independent supply from the city to all shops, with emergency fire equipment and connections, so that yards and buildings have two complete systems of fire protection.

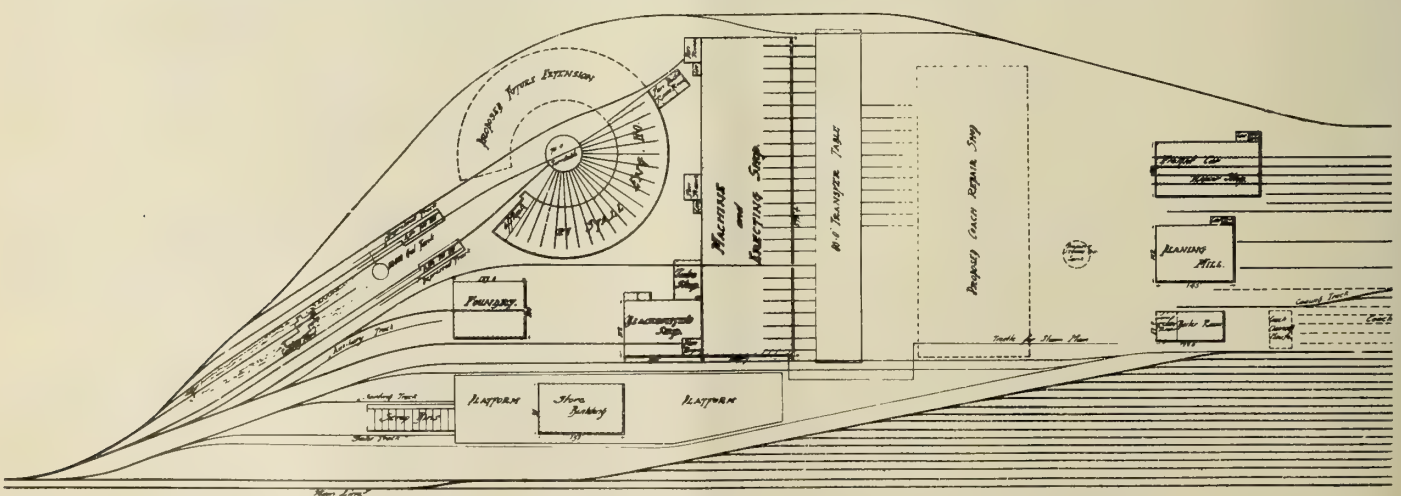
The proposed boiler, tank, coach, repair and paint shop will be situated on the west side of transfer table and so arranged that it can be served by transfer table adjoining machine erecting shop.

West of the shops are located the distributing and sorting yards for east and west bound freight, with ample grounds for future extension of yards.

The yard layout and shop were prepared and designed by R. B. Pratt, Railway Architect, and under the direction of M. H. MacLeod, General Manager and Chief Engineer.

H. & S. W. R. Ore-Handling Plant.

The Halifax and South-Western Ry., in conjunction with the Canada Iron Corporation, is about to construct a large ore-handling plant at Port Wade, N.S. The first part of the work consists of the construction of a branch line of 4 miles from Nictaux, a station on the line 4 miles from Middleton, on the old Nova Scotia Central Ry., to the Canada Iron Corporation Iron mines. The ore will be carried over the H. and S.W.R. to Port Wade, 47 miles from the mines, where it will be shipped. The ore handling plant, which it is proposed to erect at Port Wade, will be the largest and most modern in America, and will contain features not to be found in any other similar plant. It will consist of three parts, the storage pocket, the conveyor system, and the loading pocket. Generally speaking, it will be planned on the same principle as that operated by the Nova Scotia Steel and Coal Co. in Newfoundland. The storage pocket will be built on the shore, at the point where the Dominion Government pier commences. It will be a timber structure 150 ft. long, and will have a capacity of 7,800 tons. For filling this pocket a short spur will be constructed from the main line. This spur will have considerable curvature, but will not have a gradient of more than 1.5%. Leading from this spur to the top of the pocket will be two tracks,



CANADIAN NORTHERN RY. SHOPS AND YARDS, WINNIPEG. SEE CONTINUANCE OF PLAN ON PAGE 663.

laid with 28 lb. steel rails. When filled, the storage pocket will contain a body of ore 150 ft. long 50 ft. wide and 32 ft. high, above the ports leading to the conveyors. Running along the middle of the pocket, at the bottom, will be an A-shaped construction for taking the pressure of the ore from the ports leading to the conveyors. These ports will be 15 ft. apart, one on each side of the A. The A will be sufficiently large to permit a man to walk through, so that when loading is going on a man may be going backwards and forwards watching the process, and clearing away any blocking of ore there may be, through the port holes. The loading pocket is to be constructed at the angle of the wharf, which is to be considerably strengthened at this point to carry the weight. The pocket will have a capacity of 270 tons, and will be 50 ft. high from the floor of the wharf. It will be divided into three compartments, one above another, so as to permit loading to be carried on at all stages of the tide. It is in this feature that the divergence from any existing ore loading plant is apparent. The depth of water at the wharf at the lowest stage of the tide is 25 ft., and the tide has a rise and fall of 27 ft. Ore may be dropped into either of the compartments from the conveyor system, and the loading can be proceeded with from whichever compartment suits the state of the tide. Each compartment is to be provided with a loading port and an apron to connect it with the self-trimming loading chute. This chute may be raised or lowered as required, on a track running up and down the front of the structure. At low tide, the lowest port will be used, and at high tide the loading will take place from the topmost port. At the end of the chute there will be a steel trimmer, which may be so adjusted that the load in the vessel's hold may be trimmed without the necessity of employing men. The ore will be conveyed from the storage pocket to the loading pocket by means of two conveyors, which will run under the storage pocket in a tunnel, and will be carried along the wharf on the level for 150 ft., and then by a 33% gradient to the top of the loading pocket. The conveyor buckets will each be 3 ft. by 3 ft. 9 in. by 2 ft. 4 in. and will have a capacity of 11.2 cubic ft., or 1,680 lbs. of ore. The conveyors wil carry from 2,400 to 3,400 tons an hour. The plant will be driven by engines to which steam will be delivered by boilers capable of developing 170 h.p.

The plans for the plant have been prepared by D. O. Lewis, of Mackenzie, Mann & Co.'s offices, Toronto. The details have been carefully worked out, and when completed the plant will be one of the most compact and substantial operated in conjunction with any ore-producing property. It has been designed to suit the capacity of the most modern of the Three Island elevated side tank ore-carrying steamers of which the Admiral Borensen is the latest type. The dimensions of this steamer are: capacity, 6,700 tons; loaded draught, 23 ft.; light draught, 7¾ ft.; length, 375 ft.; breadth, 50¼ ft.; width of hatch, 18 ft.; height of hatch above bottom, 32 ft.

No contracts have yet been placed for the construction of the line or the plant, but it is expected that tenders will be invited at an early date.

The Railway Grade Crossing Fund.

The Board of Railway Commissioners passed the following order 7591, July 29, which is of considerable importance, as it is the first order passed under the legislation of last session establishing a railway grade crossing fund:—Re the dangerous condition of crossing of Raglan St., Renfrew, Ont., by C.P.R. and Kingston and Pembroke Ry. tracks. Upon hearing what was alleged by counsel for the Town of Renfrew, and considering the reports of officials of the Board, it is ordered that the railway companies erect and maintain gates at their crossing of Raglan St., in said town; that the railway companies submit a plan of proposed gates for the approval of an engineer of the Board, on or before Aug. 10, 1909, and erect and commence to operate said gates within 30 days from the date of the approval of the plan by an engineer of the Board; that a gateman, to be employed by the railway companies, be in charge of said gates at all times; that 20% of the cost of the construction of the said gates be paid out of "The Railway Grade Crossing Fund," provided by 8-9 Edward VII., Cap. 32; that one-third of the wages of the men in charge of said gates be paid by the Town of Renfrew, accounts for same to be rendered quarterly by the railway companies; that the railway companies remove the bell at present in use at Raglan St. to Argyle St.

Uniform Code of Operating Rules.

The Board of Railway Commissioners passed the following order, July 27:—Re the memorial of the Trainmen's Association of Canada, for the adoption of certain regulations by the Board, having in view the protection of employes of railway companies subject to the Board's jurisdiction, upon the report of the Board's operating officials and upon hearing the representatives of the railway companies and of the employes, and in pursuance of the powers conferred upon it by sec. 30, 268 and 269 of the Railway Act, and of all other powers possessed by the Board in that behalf, it is ordered that the train rules attached hereto marked "A" and designated as the proposed Uniform Code for Canadian Railways be approved.

We are advised that the proposed rules do not differ materially from the rules already in effect on railways using the Standard Code of rules, there being no radical changes in the Uniform Code adopted.

There is reason to believe that the Uniform Code will also be adopted on the Intercolonial Ry. and the P. E. Island Ry.

Railway Lands Patented.—Letters patent covering lands situated in Manitoba, Saskatchewan, Alberta, and British Columbia, were issued during May, as follows:

	Acres.
Calgary and Edmonton Ry.	4,135.00
Canadian Northern Ry.	3,959.32
Canadian Pacific Ry.	412.18
Grand Trunk Pacific Ry.	209.80
Qu'Appelle, Long Lake and Saskatchewan Rd. and Steamboat Co.	247.00
Total	8,963.30

The Board of Railway Commissioners has approved of the Quebec Ry., Light and Power Co.'s Standard Local Passenger Tariff, C.R.C. 8, compiled on the basis of 2½c. a mile.

The conciliation board appointed to enquire into the differences between the G.T.P.R. and its employes, consisting of Hon. R. F. Sutherland, chairman, F. H. McGuigan, representing the company, and J. G. O'Donoghue, representing the men, has completed its work and submitted its report to the Minister of Labor. It is understood that the finding of the board will meet with the approval of all the parties concerned.

Alberta Railway and Irrigation Co.

In the case of the Cardston Board of Trade vs. the Alberta Ry. and Irrigation Co., J. P. Mabee, Chief Railway Commissioner, gave the following judgment recently:—The complaint in this matter alleges excessive passenger and freight charges, excessive express charges, want of proper train accommodation and facilities. The respondents operate a railway in Southern Alberta running southerly from Lethbridge; they own large areas of land that are being irrigated under an extensive system in course of construction by them; they own and operate coal mines and have large numbers of town lots in Lethbridge and Raymond. The present corporation is the result of an amalgamation in July, 1904, of four corporations, viz., The Alberta Ry. and Coal Co., The Canadian Northwest Irrigation Co., The St. Marys River Ry. Co., and The Alberta Ry. and Irrigation Co. At the hearing, the Board was furnished with but little information as to the financial position of the company, or of the organization, financial history, and capitalization of the four companies prior to the amalgamation. Since the hearing, the amalgamation agreement of July, 1904, and the directors' report for the year ended June 30, 1908, have been filed, and we have been left to spell out the position as best we may. The documents that have been given us, and such information as we were furnished with at the hearing, in no way present, with any minute detail, the financial history of this organization. Counsel told us at the hearing that all the outstanding stock, both common and debenture, represented actual cash invested. This may be quite true, and we have no doubt counsel was so instructed and fully believed to be the fact, but it is something that could be so easily proved and is of so much importance that we take the liberty of thinking should not have been left open to question. There are many complicated matters in the amalgamation agreement that do not explain themselves, and while desiring to studiously avoid in any way injuring the amalgamated corporation, it is difficult to approach a consideration of this matter without feeling that it is strange that there are so many points that have been left open and unexplained to the Board. Owing to the variety of the corporation's interests and its various sources of revenue, each having its own incidental expense of production, it was more than ordinarily necessary that the Board should be furnished with the fullest details.

The attack is made here upon the railway portion of the respondents' business. The report of June 30, 1908, has this item, "Net revenue from colliery, railways, canals, land sales, etc., $322,493.23." Earlier in the report it is stated that coal sales of the year amounted to 208,016 tons as compared with 122,947 for the previous year; the gross earnings of the railway were $228,775.07 as compared with $197,608.09 for the previous year; the land sales aggregated 125,202 acres and realized $712,644.00; there was also sold during the year 3,206 acres in which the company had an interest with the C.P.R. Co.; the profit from the sale of town lots was $9,594.00; also that in connection with land sales there was in reserve $941,574.31; the receipts for the year from water rentals were $24,635.41, as compared with $18,969.78 for the previous year. It is stated that on June 30, 1908, the company had on hand 427,981 acres remaining unsold, in addition to many lots in Lethbridge and Raymond. The following extracts are taken from this same report:—

"Generally the company's prospects are very encouraging. The crops of the district have proved most satisfactory; the lands sold by the company are being occupied and cultivated by well-to-do settlers, tending to increased railway earnings, to coal sales, and to enhancement of the value of the company's lands and town lots. The C.P.R. in its annual report this year, mentions that it has managed to secure such an interest in the company as will constitute a substantial control; and the report adds that their investment will prove a profitable one. Your directors congratulate the shareholders on the C.P.R. on having become largely interested in the company, thus securing the active co-operation of that powerful and successful corporation."

A statement sent to the Board subsequent to the hearing shows the earnings from the operation of the railway for the year ended June 30, 1908, to have been, including $10,046.69 earnings from "telegraph, telephone, and other sources," $204,094.07 and not $228,775.07, as shown in the directors' report, and this difference of $24,681.00 is to the extent of $23,914.41 explained in this way:—"The company, for the purpose of showing the railway earnings to better advantage, made a book-keeping entry debiting the colliery with the switching charge of 12½c. a ton on the total output for the year, and crediting the railway with the same." Now in one aspect of the situation this is an entirely domestic matter, and something that the public have no business to inquire about, but as it arises here, it ceases to be a private booking matter of the company and becomes one that the public is largely concerned in. The attack is that the freight and passenger tolls charged the public are too high; the answer is that the railway does not pay. It then appears that the railway hauls large quantities of coal, the property of the company, and that someone thought it was only fair to the railway to credit it with $23,914.41, being 12½c. a ton, as a "switching charge" for the coal output. We are not informed what this switching movement consisted of, and have no means of knowing whether 12½c. a ton is too much or too little, or whether there are other services that might properly be credited to the railway or not. This is given as an illustration of why, in a case like the present, it is so necessary to be informed of all details of the company's business, and we think the company should have furnished such information.

Again, we were not informed of the total capital that was invested in the railways and terminals, as a separate undertaking from the other branches of the company's activities. The absence of this and other information which will readily suggest itself as being useful, hampers the Board in disposing of this case. The report shows the company to be prosperous. A newspaper clipping was put in at the trial containing the following statement, to which no objection has since been taken:

"The following clipping is taken from the annual report of the C.P.R. Co. for the year ended June 30, 1908: 'The Alberta R. and Irrigation Co., owning 113 miles of railway in Southern Alberta, as well as an important colliery and about 425,000 acres of land, part of which is served by irrigation ditches, was operated by its owners as a close friendly connection of your company, yielding to our lines a large revenue from traffic interchanged, and furnishing the company and settlers along the railway a supply of coal. To insure a continuance of this desirable connection, your directors deem it prudent for the company to secure such an interest in the property as will constitute a substantial control, and they have arranged to do this at an approximate cost of $2,000,000. Apart from the traffic advantages thereby safeguarded, the investment itself will prove a profitable one.'"

This also indicates prosperity. Counsel told us at the hearing that "the things paying are being used for the support of the railway and irrigation ends that are not paying. That is the size of it. Land and coal cover the deficits." I endeavored as far as possible at the hearing to get at the bottom of the matter, and although I have again gone over the notes of argument and the documents subsequently filed, I am unable to find evidence that there are deficits in the operations of the "railway and irrigation ends." In the first place, we are not furnished with the figures showing receipts and expenditures of each of these enterprises separately, and until that is done, as well as an intimate knowledge of capitalization acquired, we can make no finding of fact as to which, if any, are the weak sisters in this family, and treated as a whole, both the directors of the respondent corporation, and the C.P.R., the recent purchasers of a controlling interest, regard the holdings as desirable; and treating the corporation as a whole, which is the way the matter is left upon our hands, we have no doubt that the views of the directors, and the purchasers of the stock, were well founded. At the hearing, I endeavored to get some idea of the amount of capital that was employed in this railway and its equipment, but was told no apportionment had ever been made, although the Department of Railways had repeatedly called for it, and the respondents have had much trouble from time to time over that matter. We regard the control acquired over this road by the C.P.R. Co., a very material factor in this case. It was stated at the hearing, not by counsel for the respondent, but by a gentleman who should know, that the C.P.R. Co. had acquired 66% to 70% of the stock. This, of course, would place it in "substantial control." Now, the only connection the respondent has in Canada is with the C.P.R., and it has always been much dependent upon that company for its existence.

In addressing the last annual meeting of the shareholders, the President of the respondent company said that the demand for coal throughout the country exceeded the company's productive capacity and that the tonnage sold depends wholly upon the C.P.R.'s car supply; and at the hearing the General Manager said the company had "seven locomotives, six passenger coaches, several cabooses and box cars and coal cars. As far as the equipment is concerned, through freight business, is usually carried in through cars, cars of foreign roads; we allow none of our equipment off our own road;" and again, when asked how many box cars the company had, he said, "we have probably 10 of our own; they are in service very little." It is naturally to be supposed now that the C.P.R is in control of the respondent corporation; that the facilities upon this railway will be greatly improved, and so far as the complaint covers deficient car service and insufficient passenger facilities, it may remain in abeyance, so that an op-

portunity may be given for improvement by the management, and after, say, six months, upon application by the complainants, if they find the course necessary, the Board will send one of its operating officials over the road, and will be guided by his report in directing any changes or improvements in train service and otherwise that may be reasonable.

There is no separate express company operating over this railway, but express matter is handled by the company on its freight and mixed trains. No express tariffs have been filed, and it was said the same charges are made as are shown in the Dominion Express Co.'s tariffs. Express packages are gathered and delivered in Lethbridge by the Dominion Express Co.'s wagons, and respondents pay the latter for this service; the basis of such payments was not given to us. The company is in default regarding its express business. The law is imperative in its provisions regarding the filing of express tariffs, and provides that no goods shall be carried by express unless and until the tariff of express tolls has been submitted to and filed with the Board. And express toll means any toll, rate, or charge to be charged by the company, or any person or corporation other than the company to any persons for hire, or otherwise, for or in connection with the collecting, receiving, caring for, or handling of any goods for the purpose of being transported by express, or for any service incidental thereto. The whole express situation is now being considered by the Board, and its result will be applicable to this company's express business, and nothing more need now be said as to this feature of the complaint, except that the company must at once prepare and file its tariff of express tolls and comply generally with the Act's tariff clauses.

The questions then remain as to the complaints regarding charges made for transportation of passengers and freight. Prior to 1907, the company had been charging 5c. a mile, and by the Board's order of July 26, 1907, the company was directed to reduce its standard tariff to the basis of 4c. a mile with return fares at 1⅔ times the rate for the single journey, and I understand the company has since been charging upon that basis. On March 16, 1907, the Board's Chief Traffic Officer expressed the opinion that passenger fares should be reduced to 3½c. a mile, round-trip tickets to be one-sixth less. The passenger earnings for the year ended June 30, 1906, were $38,740.29; and for the year ending June 30, 1908, $52,516.85. The section of the country through which this road operates is rapidly being settled and the population is increasing, and we see no reason why the passenger fares south of Lethbridge over this line should be higher than those north of Lethbridge over the C.P.R.; the passenger fares must be reduced to 3c. a mile, round-trip tickets to be one-sixth less, and standard passenger tariffs must be at once filed carrying these reductions into effect.

The Board's Chief Traffic Officer reports that "the territory in which the A.R. & I. Co. operates is in all respects similar to that of the C.P.R. in Southern Alberta, and it is my view that the A.R. & I. Co.'s freight rates, both standard and special, should not exceed those in effect for similar distances, and on similar commodities on the C.P.R. between the Crow's Nest Pass and its connection with that company's main line near Medicine Hat." The impression I formed of the situation as developed during the argument, and from a perusal of the file, and the great amount of correspondence attached to it, as well as Mr. Hardwell's former reports, is in entire accord with his recommendation; and I have no doubt that it would have been much to the advantage of this company had it granted reasonable concessions upon some, at least, of the matters covered by the complaint.

The Board's order will be: That passenger fares shall not exceed 3c. a mile; round trip tickets to be sold by the company at one-sixth less. Standard passenger tariff to be filed carrying this direction into effect. That the respondent company be required, where it has not already done so, to publish and file special tariffs of freight rates between all its stations on bases that shall not exceed those of the C.P.R. for the same or similar distances and on the same commodities, as are or may be put into effect on the Canadian Pacific Ry. between the Crow's Nest Pass and Coleridge on its main line. That the respondent company be required to put into effect a special tariff of class rates from Lethbridge to all of its stations, which shall not be higher than the C.P.R. special class rate tariff from Lethbridge for the same or for the nearest equivalent distances. The foregoing tariff to be prepared, filed and published within 30 days. That the complaints relating to the express service and charges, furnished and made, by the respondents shall stand for disposition when the general express enquiry is dealt with; but the respondents must forthwith file their express tariff of tolls as required by the Railway Act. That if the complainants find such steps necessary, they may at the expiration of six months, renew their complaints regarding deficient car service and passenger facilities.

Loading Long Materials and Stone.

The Board of Railway Commissioners passed order 7599, July 24, as follows:—Whereas the Board's attention has been called to a number of accidents—in some instances fatal—caused by defects in flat and open railway cars used for shipments of long materials and stone, not affording proper safeguards for the handling of such traffic, it is ordered that every railway company subject to the legislative authority of the Parliament of Canada, operating a railway by steam power, shall strictly conform to the rules and regulations from time to time approved by the M.C.B. Association governing the loading of lumber, logs and stone on flat and open cars. That if the load on a car shifts in transit, the train crew shall see that it is re-adjusted in accordance with this order before the same is allowed to proceed. That shippers and the railway companies and their operators and employes shall see that all open and flat cars are loaded, and the loads protected in accordance with the terms of this order. That every such railway company shall be liable to a penalty not exceeding $50 for every failure to comply with the foregoing regulations. That every employe of such railway company, and every shipper, shall be liable to a penalty not exceeding $25 for every failure to comply with the foregoing regulations.

Commissioner McLean gave the following judgment:—The draft order proposing regulations in connection with the loading of long materials and stone in open and in flat cars was the outcome of various accident investigations which showed a lack of proper safeguards for the handling of such traffic. The matter had already been dealt with in order 5888, clause 8 of which provided that the M.C.B. Association's rules and regulations should apply in regard to the loading of lumber, logs, and stone in open cars, and the loading and carrying of structural material, plates, rails, and girders. Reference to the M.C.B. rules shows that all the matters covered by the present draft order and more are covered by these rules. The provisions of the draft order follow those of the M.C.B. rules with few variations; where there are variations these are in the nature of being more drastic. These changes are experimental, and as the correspondence on file shows, would in some instances work a hardship on the shippers. The M.C.B. rules on the other hand have been built up on a large body of experience which has continuously developed since 1890. Practically all Canadian railways are now operating under these rules. Representatives of the lumber shippers raised at the hearing, as well as in correspondence with the Board, the question of placing on the railways the expense of supplying stakes for the flat cars. This is a rate question which should if developed be dealt with aside from the order which is concerned with operating.

During the hearing, exception was taken by P. Johnson, Manager of the Dominion Bridge Co., to the provisions of clause 8 of order 5888, in so far as this clause deals with "structural material" and "girders." A method of loading used by his company and other bridge companies in Canada was illustrated by model. It was shown that this method had been in use for years. The method submitted by him appeared to be safe and satisfactory. But the Board must consider the advantage of uniformity. If we had any assurance that this was the only method of loading such material, outside of that prescribed by the M.C.B. rules, which would be offered, we might authorize its use. But we have no such assurance. The advantage of having uniformity of practice throughout Canada in this regard as well as the necessity of uniformity in regard to international traffic is so manifest that I am constrained, while recognizing merits in Mr. Johnson's contention, to hold the opinion that clause 8 of order 5888 should stand.

During June, 23 employes were killed and 26 injured, in the course of their work on Canadian railways. Of the fatalities, 11 were due to being run over, 6 to collisions, 2 to drowning, and one each to being struck by an object in passing, to a dynamite explosion, to electric shock and to a fall; while of the non-fatal accidents, 7 were due to falls, 4 each to collisions and to being run over, 3 to derailments, 2 each to being caught between cars, to falling material, to burns or scalds, and one each to being struck by a locomotive, and to machinery.

SALES AGENTS: THE CANADIAN FAIRBANKS COMPANY LIMITED

Offices:—Montreal, Toronto, Winnipeg, Vancouver, Calgary, St. John.

C. P. R. Betterments, Construction, Etc.

Tobique and Campbellton Ry.—J. E. Stewart, Andover, N.B., stated in St. John, Aug. 4, that the contract for the construction of this railway would be let early in the fall, and that work would be gone on with during the winter. The new railway is an extension of the Tobique Valley Ry., operated by the C.P.R., which now terminates at Plaster Rock, to Riley Brook, about 28 miles. A contract for its operation by the C.P.R. has been arranged and is ready for signature. The route is along the Tobique River valley through a thickly settled district, crossing the National Transcontinental Ry. a short distance from Plaster Rock. It is the company's intention to extend it at a future date to the International Ry. of New Brunswick. The bond issue, it is stated, has been arranged for, the Dominion Government has voted the usual subsidy, and it is expected that the N. B. Legislature will grant an additional subsidy.

Aroostook Valley Ry.—A company with this title has been incorporated in the State of Maine to construct a railway from Presqu'Ile to Washburn, Me., 12 miles, with the intention of extending it to the St. John River, a further 110 miles. The line will connect with the C.P.R. at Presqu'Ile, and will run through territory at present served by the Bangor and Aroostook Rd. We are advised that in consideration of a traffic agreement the C.P.R. has undertaken to guarantee the payment of the company's bonds to the amount of $300,000. It is stated that the Bangor and Aroostook Rd. is protected by law from the invasion of steam railways, and, therefore, the new line will be operated by electricity for both passenger and freight traffic.

Aroostook Jct., Me.—Press reports state that contracts have been let for the construction of various buildings at Aroostook Jct., Me., the company's new divisional point. A 6-stall engine house, a foundation for a turntable, and two cottages will be built by J. H. Hague, St. John, and a boarding house, with bunk quarters, by H. Post, Woodstock, N.B. The company's men will construct the new freight shed.

Sherbrooke, Que.—An agreement has been entered into between the C.P.R. and the city of Sherbrooke under which the company agrees to spend at least $130,000 upon improvements within the next 12 months. The improvements to be made consist of the erection of a new station and freight shed, a roundhouse, coal chutes, machine shop, etc., and the laying of some additional tracks in the yards. A contract was let for the work, Aug. 10, to the Sherbrooke Construction Co., and work was started on the following day.

Northern Colonization Ry.—The Board of Railway Commissioners has approved the revised location plans for the extension of this line from about 15 miles northwesterly from Nomining for 5 miles.

Branch lines at Lachine.—Application is being made to the Board of Railway Commissioners for authority to construct a branch line in Lachine, from the Lachine Canal South Bank branch of the company's line southwesterly along the canal about 5,100 ft.; and a second branch in the vicinity for about 1,440 ft.

Kingston and Pembroke Ry.—W. R. Baker, Vice-President and General Manager, accompanied the directors over the line, Aug. 11. It was subsequently stated that the growth of business necessitated the undertaking of some further improvements and extensions. The matter is now under consideration.

Georgian Bay and Seaboard Ry.—The Board of Railway Commissioners has approved the revised location of this projected line from mileage 41.95 to 48.05 and of location plans from mileage 48.05 to 63.42. The company has deposited with the Department of Public Works plans and description of the site of a 160 ft. h.d.p.g. swing span bridge, which it is proposed to construct across the narrows of Lake Couchiching near Orillia, Ont.

Guelph and Goderich Ry.—The Guelph, Ont., Board of Trade has passed a resolution urging upon the company the necessity of constructing a branch from Weisenburg, to Elora, on the Credit Valley Ry., also operated by the C.P.R. The length of the suggested branch is 7 miles.

Schreiber, Ont.—A contract is reported let to F. Munroe, Westmount, Que., for excavation, concrete and steel work of a subway at Schreiber, Ont. The Board of Railway Commissioners has approved the plans for the subway.

Fort William Union Station.—We are advised that excavating for the foundations of the union station at Fort William, Ont., has been commenced by the C.P.R. The plans for the superstructure are under consideration by the company's executive and will be approved at an early date.

Fort William—Winnipeg Second track.—The Board of Railway Commissioners has passed an order authorizing the company to open for traffic the new track between mileage 115.1 and 120.8, Fort William section, and from mileage 119.8 to 120, Ignace section.

Sheho to Prince Albert.—Work was started July 26 on the extension of the Manitoba and Northwestern Ry. from Sheho, Sask., to Prince Albert. Press reports state that 1,500 men were set to work and that 600 more were expected to be started at the Prince Albert end within a week. A temporary bridge will be constructed across the South Saskatchewan River at once and a permanent bridge will be erected during the winter.

Saskatoon to Wetaskiwin.—The grading on the short line to Edmonton, Alta., is reported completed. The line branches off from the old Manitoba and Northwestern Ry. (which for years terminated at Yorkton, Sask, at Sheho, and runs to Lanigan, where it is joined by the Pheasant Hills branch starting from Kirkella, Man., and then runs into Saskatoon. From there it runs westerly to Wilkie, where it connects with a Calgary and Edmonton Ry. branch running easterly from Wetaskiwin, Alta. It is expected that the work remaining between Sedgwick and Wilkie to be done to complete the connection will be finished by Oct. 1.

Weyburn to Lethbridge.—In connection with the construction of this projected line, the Lethbridge Board of Trade recently wrote to W. Whyte, Second Vice-President, asking that construction be started at that end at an early date. In reply Mr. Whyte said he hardly expected that anything would be done from the Lethbridge end this year. He assured the Board, however, that the matter would be given consideration when the construction programme for 1910 was being laid out.

Langdon Branch.—Some grading is reported to have been done on this branch. The line has been located for 80 miles, and the plans have been approved for that distance by the Board of Railway Commissioners. The present objective point is Alix, about 40 miles northerly from Langdon, Alta.

Lethbridge-Macleod Cut-off.—It is expected that track-laying, ballasting, and other work on this cut-off will be completed by the end of Sept., and that the line will then be opened for traffic.

Lethbridge Northerly.—A considerable amount of grading has been done on the line under construction from Lethbridge to the Calgary and Edmonton Ry. near High River or Aldersyde, Alta. It is expected that grading will have been completed as far as Carmangay by the middle of Sept.

Lacombe Branch.—Grading is reported completed on the Calgary and Edmonton Ry. branch at present being operated from Lacombe to Stettler, easterly to Castor, Alta. This line is to be connected with the line at present under construction from Moose Jaw, which is in operation as far as Conan.

Strathcona-Edmonton Bridge.—We are advised that the company's engineering staff is designing a bridge, which it is proposed to erect at the crossing of the Saskatchewan River, on a piece of line to connect the Calgary and Edmonton Ry., now terminating at Strathcona, with Edmonton. The original plans were for a high level railway bridge only, but, in order to meet the wishes of the Strathcona and Edmonton Councils, the engineers are revising the plans to provide for the accommodation of general as well as railway traffic. It will be some time before the plans are sufficiently advanced to be submitted to the two councils.

Hope Mountains.—Press reports state that the C.P.R. has commenced surveys for a railway through the Hope Mountains, B.C. It is said that the line will start from the neighborhood of Hope, on the main line, run to Penticton and from there to Okanagan Landing. It is also said that surveys will be made for a line from Penticton to connect with the company's lines in the boundary country.

Vancouver and Lulu Island Ry.—The construction of an extension of this line from Eburne, at the crossing of the north arm of the Fraser River, into New Westminster, B.C., 9.65 miles, has been completed. The line follows the north arm of the Fraser River, passing through a market garden section, and its proximity to the river gives access to a number of factory sites. Grading was done by J. B. Bright and tracklaying and ballasting by the C.P.R. The extension is being electrified by the B. C. Electric Ry., which will operate over it, as well as over the rest of the V. and L.I. Ry.

Esquimalt and Nanaimo Ry.—The Board of Railway Commissioners has approved a book of reference showing change of location of the extension of the line to Alberni, from mileage 100 to 127, and of the location of the Comox

Galena-Signal Oil Company

Maintain EXPERT DEPARTMENT, which is an organization of skilled railway mechanics of wide and varied experience. Services of Experts furnished free of charge to patrons interested in the economical use of oils.

STREET RAILWAY LUBRICATION A SPECIALTY

Galena Railway Safety Oil

Made especially for use in Headlights, Cab, Classification and Tail-lights, and for Switch and Semaphore Lamps. Burns equally well with the long time as with the one day burner, with or without chimney, as the burner requires.

Is pure water white in color; high fire test; low cold test, and splendid gravity.

Please write to home office for further particulars.

CHARLES MILLER,

PRESIDENT

extension from Union Bay to Black Creek, through Nelson and Comox districts.

Minneapolis, St. Paul and Sault Ste. Marie Ry.—Tracklaying was completed July 30 on the extension from Brooton to Superior, Minn. The line is expected to be opened for traffic early in Sept. Since construction was started, the company has obtained a lease of the Wisconsin Central Ry., with terminals in Superior, and it is stated that the terminals of the two lines will be consolidated.

A press report quotes an officer of the company as saying that work will be begun at once on shortening the line in Minneapolis, upon which the company expected to spend $500,000 this year and an additional $500,000 later. (Aug., pg. 585.)

Motor Cars on the C. P. R.

H. H. Vaughan, Assistant to the Vice President, C.P.R., in the course of a discussion on motor cars at the recent meeting of the American Railway Master Mechanics Association at Atlantic City, said:—"We have had some experience with the motor car. Before we got a motor car, the passenger business of the road depended on our developing a motor car. After we got a motor car we could not find any place in which we wanted to use it. That has been our experience for the last three years. Personally, I do not believe, unless the gasolene motor car can be made a satisfactory car, that there is anything in a motor car for railway service. The whole matter of the combining of a steam engine in a passenger coach is, to my mind, radically wrong. The proper place to put a passenger coach at night is in the passenger car yard. The proper place to put a steam engine at night is in the roundhouse. If you put a passenger car in the roundhouse, which is full of smoke, the car becomes dirty and grimy and you have to send car cleaners from the car yard to the roundhouse to clean the motor car. If you put the car in the passenger car yard, you must send men from the roundhouse to the passenger car yard to repair the engine. There is nothing radical about a motor car. It is simply a small steam engine; it takes about as much coal per mile as any other engine, possibly a little more; it is easier to fire, because it is small, and its capacity is limited. We have had cases where our people thought the motor car should pull two or three trailers with ease, and the car will not do it. It is simply applicable for a light service, which, in most of our conditions, which are, of course, rather different from those further south, can be handled by mixed trains better than they can be by motor car service. You must, in the majority of cases, run three men, an engineer, a fireman and a conductor, and it seems to me that a very much better solution of the question is to build a little tank engine with a baggage compartment on it, in which you can get a fireman to attend to the baggage and let the conductor look after the tickets. We have prepared designs for such a car, and now await the passenger department to find a place where they want to run it. The motor car question is going along very quietly with us and we are not spending any money on it."

Railway Finance, Meetings, Etc.

Alberta Ry. and Irrigation Co.—Approximate net profits from all sources, exclusive of land sales, for June, $16,263, against $21,394 for June, 1908. Aggregate net profits for 12 months ended June 30, $364,395. Railway traffic receipts for July, $27,041, against $20,557 for July, 1908.

Buffalo and Lake Huron Ry.—The report for the half year ended June 30, shows that after providing for interest on 1st and 2nd mortgage bonds, the available balance, including the amount brought forward from the previous half year, was £14,757 14s., enabling the payment of the usual dividend of 5s. 3d. a share and leaving a balance of £973 0s. 9d. to be carried forward. The line is leased to the G.T.R. The directors are, M. H. Maxwell, Chairman; E. Ashton, Liverpool, and J. M. Synge, Westerham, Eng.

Canada Atlantic Ry.—A discharge of the mortgage of $3,450,000, dated Jan. 2, 1889, to the Farmers' Loan and Trust Co., trustee for the bondholders, and a reconveyance of the property to the C.A.R. Co. was deposited with the Secretary of State at Ottawa, July 14.

Central Counties Ry.—A special meeting of shareholders was held at Ottawa, Aug. 25, to authorize the issue of first mortgage A bonds upon sections 1 and 3 of the railway, to the extent of $475,000, being at the rate of $12,500 a mile, and to ratify a mortgage deed to secure the bonds.

Dominion Atlantic Ry.—Gross earnings for June, $112,500, against $106,125 for June, 1908. Aggregate gross earnings for 6 months ended June 30, $486,150, against $470,598 for same period 1908.

Dominion Lime Co.—By an act passed at the last session of the Quebec Legislature the capital of the D. L. Co., which owns a short line from Dudswell Jct. to Lime Ridge, Que., was reduced to $225,000, the new shares to be allotted to the present shareholders at the rate of fifty per cent. of their present holdings. It was also provided that the stock may be further reduced upon a by-law approved by a majority of the shareholders at a meeting convened for that purpose.

Great North West Central Ry.—An action in which J. Codd sought to recover certain monies, in connection with the promotion of the Great North West Central Ry., now a part of the C.P.R., which has been before the courts in London, Eng., for over eleven years, was dismissed July 30.

Kingston and Pembroke Ry.—The annual meeting was held at Kingston, Ont., Aug. 11. The report showed that the business done during the year was satisfactory, and that considerable improvements had been made. The road is operated by the C.P.R., W. R. Baker, Secretary C.P.R., being Vice President and General Manager.

Minneapolis, St. Paul and Sault Ste. Marie Ry.—The directors have declared out of the earnings of 1908, a semi-annual dividend of 3½% on the preferred stock, and 3% on the common stock, payable Oct. 16, to stockholders of record Oct. 1.

New Brunswick Ry.—The annual meeting was held at St. John, N.B., Aug. 5. The directors were re-elected as follows: R. Meighen, F. S. Meighen, W. T. Whitehead and J. Turnbull. Apart from the formal business transacted, it was decided to increase the stumpage rates by 25c., on all lumber cut on the company's lands.

Quebec and Lake St. John Ry.—Gross earnings for July, $54,388.32, against $71,057.16 for July, 1908. Aggregate gross earnings for 7 months ended July 31, $332,409.88, against $328,996.78 for same period 1908.

Quebec Central Ry.—Gross earnings for June, $92,103.60; expenses, $65,591.84; net earnings, $26,511.76, against $111,117.00 gross earnings; $88,792.79 expenses; $22,324.21 net earnings for June, 1908. Aggregate gross earnings for 12 months ended June 30, $1,019,488.25; expenses, $724,227.93; net earnings, $295,260.32, against $1,110,724.38 gross earnings; $787,293.15 expenses; $323,431.23 net earnings for same period 1907-08.

Salisbury and Harvey Ry.—A meeting of shareholders has been called to be held at Hillsborough, N.B., Sept. 2, for the election of directors, to authorize the issue of bonds, and to execute a mortgage upon the railway and other property of the company to secure the bond issue. The notice calling the meeting is signed by J. D. Newton, D. E. Bergen, J. D. Hazen, D. K. Hazen, E. P. Raymond, provisional directors.

Temiscouata Ry.—Total earnings for June, $18,350.58. Aggregate for year ended June 30, $230,154.89. Total earnings for July, $20,922.55.

Western Canadian Collieries.—Application was made to the Board of Railway Commissioners, Aug. 26, for an order recommending the Governor in council to sanction an agreement for the sale and transfer of the franchises, rights, powers, railway and undertakings of the United Coal Fields of British Columbia to the Western Canadian Collieries. The railway referred to extends from Frank to Grassy Mountain, Alta., about 7 miles, and was badly damaged by the landslide in 1903. It has not been operated since, but the Board of Railway Commissioners, Aug. 5, approved a book of reference showing amended location of the line.

White Pass and Yukon Ry.—Gross earnings for the year ended June 30, $1,255,027.

Railway to Hudson Bay.

The last party of engineers engaged on the surveys being made for the Dominion Government to enable it to decide on the feasibility of constructing a railway to Hudson Bay returned to Winnipeg Aug. 13. They report having located a route from Split Lake to Fort Churchill, about 200 miles, upon which they found that there would not be any serious difficulties in the way of construction. They also made an inspection of the harborage at Port Nelson and report that a good harbor can be secured there, as well as at Fort Churchill, the terminal point of the other suggested route. M. J. Butler, Deputy Minister of Railways and Canals, who is on a trip of inspection of railways in the West, had a conference with the engineers while in Winnipeg. The complete reports of the engineers is being prepared and it is expected will be ready for presentation at the next session of Parliament.

Orders by the Railway Commissioners.

Beginning with June, 1904, we have published in each issue summaries of orders passed by the Board of Railway Commissioners, so that subscribers who have filed our paper have a continuous record of the Board's proceedings. No other paper has done this.

The dates given of orders, immediately following the numbers, are those on which the hearings took place and not those on which the orders were issued. In many cases orders are not issued for a considerable time after the date assigned to them.

7527. July 13.—Authorizing City of Toronto to lay water pipe under G.T.R., at Front St. East.

7528. July 13.—Authorizing Bell Telephone Company to erect wires across C.P.R., near Waterloo station, Que.

7529. July 10.—Rescinding order 7298, of June 19, which dismissed application of C.P.R. for order directing G.T.R. to receive C.P.R. passenger and baggage cars at the junction between the two railways near Sappers' bridge, Ottawa, the application to be set down for hearing at the sittings at Ottawa in Sept., unless before that time the matter has been settled between the companies.

7530. July 15.—Authorizing C.P.R. to construct a bridge on Laggan section and three bridges on Red Deer section, Western Division.

7531. July 16.—Authorizing C.P.R. to build spur line to Imperial Oil Co.'s premises, Delorimier, Que.

7532. July 16.—Authorizing C.P.R. to construct two spur lines to the Canadian Pacific Lumber Co.'s premises, Port Moody, B.C.

7533. July 16.—Authorizing C.P.R. to construct two spur lines to the International Harvester Company and T. H. Blow's premises, Calgary, Alberta.

7534. July 16.—Authorizing C.P.R. to construct spur line from south limit of 24th St. to south limit of lot 15, Saskatoon, Sask., upon consent of Enterprise Hardware Co., A. Carruthers & Co., and City Council of Saskatoon.

7535. July 16.—Authorizing C.P.R. to construct a branch line into the Corporation yard, Princess St., Toronto.

7536. July 16.—Authorizing Montreal Park and Island Ry. to construct spur line to the Lakefield Cement Co.'s premises, Longue Pointe, Que.

7537. July 16.—Authorizing Government of Alberta to erect telephone wires across C.N.R. at Raith.

7538, 7539. July 16.—Authorizing Bell Telephone Co. to erect wires across G.T.R. near Unionville station and at Clifford station, Ont.

7540. July 16.—Authorizing Creston Power, Light & Telephone Co., of Creston, B.C., to erect wires across C.P.R.

7541, 7542. July 17.—Authorizing Bell Telephone Co. to erect wires across C.P.R. at public crossing near Streetsville Jct. and near Streetsville station, Ont.

7543. July 20.—Authorizing the C.P.R. to build spur line to the Western Canada Agency's premises, Lethbridge, Alta.

7544. July 20.—Authorizing C.P.R. to build spur line to J. D. Clark & Co.'s premises, Winnipeg, Man.

7545. July 20.—Authorizing G.T.R. to build temporary branch line from its Lakefield branch, Douro tsp., Ont., westerly to property of Water Commissioners, City of Peterboro, Ont.

7546. July 20.—Authorizing Town of Boissevain, Man., to erect electric light wires across C.P.R. on Cook St.

7547. July 20.—Authorizing the C.P.R. to construct bridge 12.89 on its St. John section, Atlantic Division.

7548. July 20.—Authorizing F. Karlenzig to erect telephone wires across C.P.R. at Lemberg, Sask.

7549. July 20.—Authorizing Village of Ste. Anne de Beaupre, Que., to lay waterpipe under Quebec Ry. Light & Power Co.'s track.

7550. July 20.—Authorizing Town of Parry Sound, Ont., to lay water pipe under C.N.O.R.

7551. July 21.—Authorizing Tilbury Telephone Co. to erect telephone wires across Pere Marquette Rd., near Glenwood station, Ont.

7552. July 7.—Directing Bedlington & Nelson Ry. Co. to refund to C. P. Riel excess freight charges on railway ties from Rykerts, B.C., to Portage la Prairie, Man. This order is given in full on another page.

7553. July 20.—Authorizing G.T.R. to construct spur line to Thornbury Transportation & Reduction Co.'s premises, Thornbury, Ont.

7554. July 6.—Refusing application of G.T.R. for approval of revised location of the Brunswick, Balke & Collender Co.'s spur on Pacific Ave., Toronto.

7555. July 6.—Approving location of C.N.O.R. through Gloucester and Nepean tsps., Ontario, from mileage 53.91 to 57.42 west from Hawkesbury, Ont.

7556. July 21.—Approving location of Esquimalt & Nanaimo Ry., Comox extension, Union Bay to Black Creek, through Nelson and Comox Districts, B.C.

7557. July 21.—Approving location of C.N.R., from near the mouth of North Thompson River, sec. 24, tp. 20, range 17, west 6th meridan, to sec. 4, twp. 22, range 17, west 6th meridian, 10 miles.

7558 to 7560. July 21.—Approving location and plans of C.P.R. stations at Canford, Haney and Meritt, B.C.

7561. Mar. 22.—Authorizing C.P.R. to construct its railway across highways on Piapot to Maple Creek main line grade division, Sask., mileage 67.3 to 80.7.

7562. July 15.—Approving two forms of bill of lading for joint use in Canada.

7563. July 12.—Approving uniform code of operating rules for Canadian railways.

7564, 7565. July 6.—Authorizing G.T. Pacific Ry. Co. to make corrections on plans on the main line with respect to Marsan and Girouard's property, in connection with location of railway through Edmonton, Alta.

7566. July 22.—Authorizing C.P.R. to construct spur from its right of way between Young and Scott sts westerly, crossing lots B and A along Eighth Ave., to the easterly limit of Broad St., and ten spurs from the first named, across parts of blocks 184 to 190 and 23 to 25, Regina, Sask.

7567. July 15.—Refusing application of C.P.R. to construct spur from its station grounds, Fort William, Ont., to a point west of the western limit of Bethune St.

7568. July 21.—Authorizing C.P.R. to construct spur to Columbia Flour Mill Co.'s premises, Enderby, B.C.

7569. July 22.—Approving Marconi Wireless Telegraph Co.'s by-law authorizing H. G. Matthews, Secretary-Treasurer, to prepare and issue tariffs of tolls.

7570. July 15.—Refusing application of C.P.R. to construct branch line across Hardisty St., Fort William, Ont.

7571. July 21.—Approving location and detail plans of C.P.R. station, Mission Jct., B. C.

7572. July 21.—Extending until Oct. 6 time, by order 6803, within which inter-

Orders by Railway Commissioners Continued.

locking plant is to be provided by C.P.R. and G.T.R. at Brampton, Ont.

7573. July 22.—Authorizing North Regina Rural Telephone Co. to carry wires across C.N.R., Regina, Sask.

7574. July 22.—Authorizing Fairview Rural Telephone Co. to carry wires across C.N.R., Fairview, Sask.

7575. July 21.—Authorizing Erie Telephone Co. to carry wires across M.C. Rd., Townsend station, Ont.

7576. July 21.—Authorizing Kootenay Telephone Co. to carry wires across C.P.R., Cranbrook, B.C.

7577, 7578. July 22.—Authorizing Commissioner of Railways and Telephones of Saskatchewan to carry wires across C.N.R. at two points, Aylesbury, Sask.

7579, 7580. July 21.—Authorizing Manitoba Government Telephones to carry wires across C.P.R. at two points near Varcoe station.

7581 to 7583. July 22.—Authorizing Bell Telephone Co. to carry wires across G.T.R. at Port Hope, Moose Creek and Maxville, Ont.

7584. July 22.—Authorizing Vancouver, Victoria & Eastern Ry. and Navigation Co. to construct branch to connect its main line with International boundary, near Myncaster, B.C.

7585. July 23.—Ordering Alberta Ry. and Irrigation Co. to file tariffs, etc. This order is given in full on another page.

7586. July 23.—Approving plans of M.C. Rd. Co.'s proposed subway at Tecumseh road, Sandwich West tp., Ont.

7587. July 21.—Authorizing Bell Telephone Co. to carry wires across C.P.R. near Streetsville station, Ont.

7588 to 7590. Mar. 22.—Authorizing C.P.R. to construct railway across 8 highways in its authorized main line grade division between Gull Lake and Carmichael; across 9 highways in Medicine Hat section, and across 8 highways between Seward and Antelope, Sask.

7591. July 6.—Ordering C.P.R. and Kingston and Pembroke Ry., to erect and maintain gates at their Raglan St. crossing, Renfrew, Ont.; gateman to be employed by the companies and be in charge at all times; 20% of cost of construction to be paid out of the Railway Grade Crossing Fund; one third of the wages of men to be paid by the Town of Renfrew. The bell at present in use there to be moved to Argyle street.

7592. July 23.—Approving location and detail plans of the C.N. Ontario Ry.'s proposed station at Sudbury, Ont.

7593. July 22.—Authorizing city of Edmonton, Alta., to cross with its electric railway the Edmonton, Yukon and Pacific Ry.

7594. July 23.—Reinstating for hearing complaint of F. W. Godsal, Cowley, Alta., against excessive passenger rates on C.P.R. steamers between ports of call on the Kootenay and Arrow Lakes, B.C., and the Nelson Board of Trade in support. This order is given in full on another page.

7595. July 23.—Approving C.N.R. local standard passenger tariff, C.R.C. 503, between stations on its branch line from Hudson Bay Jct., Sask., to Pas Mission, Keewatin Territory.

7596. July 24.—Rescinding order of June 10 which approved amalgamation agreement between C.N.R. and Edmonton & Slave Lake Ry. Cos.

7597. July 24.—Authorizing C.N.R. to use crossing with the Ottawa and Prescott Ry., mileage 56.6 west from Hawkesbury, Ont., for construction purposes only, pending installation of interlocking plant provided for in order 7490.

7598. July 22.—Approving plan showing footbridge proposed to be constructed by Saskatoon corporation over C.N.R. yard at Twentieth St.

7599. July 24.—Ordering that railways subject to the Board's jurisdiction shall conform to the rules and regulations from time to time approved by Master Car Builders' Association governing the loading of lumber, logs and stone on flat and open cars. This order is given in full on another page.

7600. July 27.—Approving location of the Nipissing Central Ry., from Cobalt to Haileybury, 5.1 miles, through Buck and Coleman tps., Ont.

7601. July 15.—Authorizing city of Fort William, Ont., to cross C.N.R. with its electric railway at Fredericka St.

7602. July 23.—Ordering that C.P.R. and C.N.R. publish and file joint class and commodity tariff of rates on freight traffic in classes 6 to 10, inclusive, of the Canadian Classification, between certain points in Alberta. This order is given in full on another page.

7603. July 15.—Approving revised location of the Fort William Terminal Ry. and Bridge Co.'s line from near Christina St., crossing the Kaministikwia River and Islands 1 and 2, Fort William, Ont.

7604. July 22.—Authorizing G.T.P.R. to use Edmonton & Slave Lake Ry. crossing in sec. 15, tp. 55, r. 25, w. 4th meridian, Alta., for construction purposes only, until Nov. 30, pending installation of interlocking plant provided for by order 4672.

7605. July 24.—Approving location of C.P.R. Langdon North branch, mileage 60 to 80, from sec. 34, tp. 31, r. 24, w. 4th mer., to sec. 35, tp. 34, r. 25, w. 4th mer., Alta.

7606 to 7608. July 24.—Authorizing C.N. Ontario Ry. to construct tracks across Russell road, across Cyrville road, and across Concession road, Gloucester tp., mileage 56.78, 55.46 and 55.22 respectively, west from Hawkesbury, Ont.

7609. July 24.—Authorizing C.P.R. to change location of its station at Putnam, Ont.

7610. July 24.—Authorizing city of Woodstock, Ont., to lay drain under G.T.R. at Beale St.

7611. July 24.—Authorizing Guelph Water Commissioners to lay conduit under C.P.R., Guelph Jct. branch, Ont., and rescinding order 6295, Feb. 19.

7612. July 24.—Authorizing Guelph Water Commissioners to lay water main across C.P.R., on Metcalfe St., Guelph, Ont.

7613. July 22.—Ordering G.T.R. to file for approval of the Board, within 30 days from date of order, plans for station to be constructed near where company's line crosses town line between Clinton and Louth tps., Lincoln Co., on its line from Hamilton to Niagara Falls, Ont.

7614. July 23.—Ordering C.N.R. to remove by Apr. 1, 1910, to the satisfaction of the Board's Engineer, and in compliance with sec. 230 of the Railway Act, all obstructions placed by the company at Coulter's Narrows, Muskoka Dist., Ont.

7615. July 24.—Authorizing C.P.R. to construct spur to Johnston & Gill's premises, Kamloops, B.C.

7616. July 24.—Authorizing C.P.R. to construct spur to Peter Lyall & Sons' premises, Notre Dame de Grace, Que.

7617. July 24.—Authorizing C.P.R. to construct 2 branch lines to E. N. Heney's premises, Delorimier, Que.

7618. July 26.—Authorizing C.P.R. to construct branch to I. L. Lafleur's premises, Cote St. Pierre, Que.

7619. July 26.—Authorizing G.T.R. to construct spur to J. R. Eaton & Sons' premises, Orillia, Ont.

7620. July 15.—Approving location of G.T.P.R. through Fort William, Ont., subject to terms and conditions of an agreement between the G.T.P.R. and C.P.R., and subject to the condition that the G.T.P.R. shall do as little damage as possible and make full compensation to all persons interested for all damage sustained by them by reason of the railway along any street in Fort William, as provided in the agreement.

7621. July 24.—Authorizing C.N. Ontario Ry. to operate interlocking plant at crossing with G.T.R. spur line to Edwards Mills, Rockland, Ont.

7622. July 26.—Approving construction of 8 bridges on the Atlantic, Quebec & Western Ry.

7623. July 24.—Authorizing C.P.R. to construct spur to Watt Milling and Feed Co.'s premises, Toronto.

7624. July 26.—Authorizing Bethel Rural Telephone Co. to cross C.P.R. near con. 3, lot 211, Proton tp., Ont.

7625. July 26.—Authorizing Ivy-Thornton Mutual Telephone Association to erect wires across G.T.R. between lots 15 and 16, Essa tp., Ont.

7626 to 7631. July 26.—Authorizing the Alberta Government to erect wires across C.N.R. at 6 points.

7632 to 7636. July 26.—Authorizing Bell Telephone Co. to erect wires across G.T.R. and C.P.R. at 5 points in Ontario.

7637. July 26.—Authorizing Bethel Rural Telephone Co. to cross C.P.R. at lot 216, Proton tp., Ont.

7638. July 26.—Authorizing G.T.R. to construct spur to Dain Manufacturing Co.'s premises, Humberstone tp., Welland Co., Ont.

7639, 7640. July 27.—Authorizing C.P.R. to use 9 bridges, on its eastern lines.

7641, 7642. July 26.—Authorizing city of Guelph, Ont., to lay sewer pipe under G.T.R. and C.P.R., at Marcon St., and under G.T.R. at Norwich St.

7643. July 22.—Authorizing Citizens Telephone Co. to erect wires across C.P.R. south of Cowansville station, Que.

7644. July 26.—Authorizing Bell Telephone Co. to carry wires across Toronto, Hamilton & Buffalo Ry., 2½ miles west of Stoney Creek station, Ont.

7645. July 27.—Authorizing Brantford Gas Co. to lay gas main under Toronto, Hamilton and Buffalo Ry., Oak St., Brantford, Ont.

7646. July 23.—Ordering C.P.R. to forthwith erect station known as its standard no. 6, at Wattsburg, B.C.

7647. July 27.—Approving basis of Quebec Railway, Light and Power Co.'s Standard Passenger Tariff, C.R.C. 8, at 2½c. per mile.

7648, 7649. July 26.—Authorizing city of Toronto to lay water pipe under G.T.R. and C.P.R. at Royce Ave.

7650. July 27.—Authorizing Pere Marquette Rd. to remove east derail at Walkerville Jct., Ont., 495 ft. from the crossing.

7651. July 27.—Approving plan and profile of proposed crossing of the municipality of Johnston, Tarbutt and Tarbutt Additional over C.P.R., near milepost 148, between lots 4 and 5, con. 6, Johnston tp., Ont.

7652. July 27.—Extending until Dec. 1 time fixed by order 6804, Apr. 6, for installation of C.P.R. interlocking plant at Drumbo, Ont.

7653. July 26.—Refusing application of city of Toronto for leave to construct additional bridge across C.P.R. and G.T.R. at Dundas St.

7654. July 26.—Authorizing C.P.R. to construct two spurs into R. Gordon's premises, Arcola, Sask.

7655. July 22.—Reopening for consideration at first sitting of Board in Hamilton or Brantford, Ont., application of Toronto, Hamilton & Buffalo Ry. for order to reconstruct highway bridge under which it crosses public highway about 3 miles east of Brantford.

7656. July 27.—Approving location of C.N.R. mileage 0 to 16.09 through tps. 10-9, r. 30-32, w. p. m., Sask.

7657 to 7670. July 24.—Approving tariffs of Sleeping and Parlor Car Rates of C.N.Q.R., C.P.R., M.C. Rd., G.N.R., Rutland Rd., and Toronto, Hamilton and Buffalo Ry.; Maximum Parlor Car Tolls of C.N.O.R., G.T.R., Q. Ry. L. and P. Co., Esquimalt and Nanaimo Ry., and Wabash Rd.; Berth and Seat Rates of C.N.R., Central Vermont Ry., and Pullman Co.

7671. July 26.—Authorizing Vancouver & Lulu Island Ry. to construct line across Granville St., Point Grey, B.C., such authority to be in force only for 3 months from date, pending a further hearing in Vancouver.

7672. July 23.—Approving plans for superstructure of bridge carrying Dominion Atlantic Ry. across Sissiboo River at Weymouth, N.S.

7673. July 29.—Ordering G.N.R. to forthwith provide station accommodation at old stopping place adjoining spur into the mill at Hazelmere, B.C.

7674. July 23.—Extending until Sept. 7, time within which G.T.R. and Bay of Quinte Ry. shall establish through joint rate on bituminous coal to Marlbank, Ont.

7675. Aug. 3.—Authorizing C.N.Q.R. to construct bridge to replace wooden structure near Stonefield station, Que.

7676. Aug. 3.—Authorizing C.P.R. to open for traffic that portion of the second track of its Ignace section, mileage 119.8 to 120.0.

7677. July 30.—Authorizing C.P.R. to open for traffic the double track portion of its Ignace section, mileage 115.1 to 120.8, Fort William section, Ont.

7678. July 30.—Authorizing Bethesda and Stouffville Telephone Co. to install instruments in G.T.R. stations at Stouffville and Unionville, Ont.

7679. July 30.—Approving New Brunswick Southern Ry. plan for construction of bridge at West Waweig, N.B.

7680. July 30.—Approving detail plan of C.P.R. subway at Winnipeg St., Schreiber, Ont.

7681. July 30.—Approving plans of the proposed C.N.Q.R. bridge over Blanche River near Montcalm station.

7682. Aug. 3.—Authorizing C.N.Q.R. to construct its line across public road be-

Successors late James Cooper

Montreal

tween lots 213 and 147, St. Severin parish, mileage 71.44 west from Quebec bridge.

7683 to 7686. July 16.—Authorizing C.N.Q.R. to construct its line across public roads between lots 345 and 344, 344-a and 346, mileage 62.23 west from Quebec bridge; between lots 336 and 331, 332, 334 and 335, mileage 61.0; between lots 324 and 317 and 318, mileage 60.11; and between lots 429 and 430, 431 and 432 in St. Prosper parish, Que.

7687, 7688. Aug. 3.—Authorizing C.N.Q.R. to construct line across the public roads on northeast side of lots 9 and 10, and on the northeast side of lot 130 E., southwest of St. Severin station, mileage 73.77 and 73.51 west from the Quebec bridge.

7689. July 29.—Authorizing C.N.Q.R. to open for traffic the portion of its line from its connection with the Q. and L. St. J. Ry. at Quebec to Garneau Jct., 78.76 miles.

7690. Aug. 3.—Approving revised location of the Chemin de Fer de Colonization du Nord, mileage 15 to 20 northwesterly from Nomining, Que.

7691. July 16.—Authorizing Montreal Terminal Ry. to construct branch line on Lakefield Cement Co.'s premises, Longue Point, Que.

7692. Aug. 3.—Authorizing Bolton Telephone Co. to carry wires across C.P.R., Albion tp., Ont.

7693. Aug. 4.—Authorizing council of Maidstone, Ont., to carry wires across G.T.R. at Puce station.

7694. Aug. 3.—Authorizing Oro Telephone Co. to carry wires across G.T.R., Oro tp., Ont.

7695. Aug. 3.—Authorizing Fingal Telephone Co. to carry wires across Pere Marquette Rd., near St. Thomas, Ont.

7696. Aug. 3.—Authorizing Oro Telephone Co. to carry wires across G.T.R., Oro tp., Ont.

7697. Aug. 3.—Authorizing Maidstone municipality to carry wires across C.P.R. about 3 miles west of Belle River station, Ont.

7698. Aug. 3.—Authorizing C.P.R. to construct spur to Wood McNab Lumber Co.'s premises on the B.C. Southern Ry., East Kootenay District, B.C.

7699. Aug. 3.—Authorizing G.T.R. to construct 5 bridges between Chatham and Windsor, Ont.

7700. Aug. 3.—Authorizing Atlantic, Quebec & Western Ry. to construct bridge at Grand River crossing, sec. 6, mileage 51.

7701. Aug. 3.—Authorizing C.P.R. to construct branch to Ontario Lime Association's premises, Dupont St., Toronto.

7702. Aug. 3.—Authorizing C.N.O.R. to construct bridge over Vermillion River, mileage 26.66 from Sudbury Jct., Ont.

7703. Aug. 5.—Temporarily approving agreements with six rural telephone companies, pending the final determination by the Board, of the tariffs of tolls which Bell Telephone Co. be authorized to charge.

7704. Aug. 3.—Authorizing C.P.R. to construct bridge 77.7, Moose Jaw section, Western Division.

7705. Aug. 3.—Authorizing C.P.R. to construct bridge 9.4, north branch Michel Creek, Cranbrook section, B.C.

7706. Aug. 3.—Authorizing G.T.R. to construct branch from its station yard, Oakville, Ont., northeasterly to the north side of the Seventh Line road.

7707. Aug. 5.—Authorizing Hamilton Cataract Power, Light & Traction Co. to carry power wires across Toronto, Hamilton & Buffalo Ry. at Horning Mountain road, Ancaster tp.

7708. Aug. 5.—Recommending to the Governor in council for sanction C.N.Q.R. by-law re spitting and smoking in cars and on premises.

7709. Aug. 5.—Recommending to the Governor in council for sanction lease of St. Mary's & Western Ontario Ry. to C.P.R., dated Feb. 25, 1909.

7710. Aug. 5.—Recommending to the Governor in council for sanction C.N.O.R. by-law re spitting and smoking in cars and on premises.

7711. Aug. 5.—Approving location of C.N.R. through sec. 4, tp. 22, r. 17, w. 6th mer., to 5 miles beyond the railway belt, mileage 10 to 24, B.C.

7712. Aug. 4.—Approving location and detail plans of C.P.R. station, Indian Head, Sask.

7713. Aug. 5.—Extending until Oct. 1 time for the installation of gates at C.P.R. crossings at Columbia Ave., Vancouver, B.C.

7714. July 15.—Authorizing city of Fort William, Ont., to cross C.P.R. with its electric railway at the intersection of the line with Pacific Ave.

7715. Aug. 5.—Ordering the National Transcontinental Ry. Commissioners to provide an interlocking plant at crossing of Temiscouata Ry., Grand Falls, N.B., and authorizing operation of trains at crossing for construction purposes only pending installation of interlocking system.

7716. Aug. 5.—Approving book of reference of United Coal Fields of British Columbia, Ltd., showing amended location of line from Frank to Grassy Mountain, B.C.

7717. Aug. 5.—Approving Esquimalt and Nanaimo Ry.'s book of reference showing change in location of line from mileage 100 to 107 and 107 to 127.

7718. Aug. 5.—Approving location of Georgian Bay & Seaboard Ry. from lot 17, con. 1, Eldon tp., to lot 23, con. 12, Mariposa tp., mileage 48.05 to 63.42, Ont.

7719. Aug. 5.—Approving revised location of Georgian Bay & Seaboard Ry. from lot 10, con. 2, Mara tp., to lot 1, con. 8, Thorah tp., mileage 41.95 to 48.05, Ont.

7720. July 28.—Approving exceptions to rating of silver ore to the official classifications as incorporated in G.T.R. freight tariffs, C.R.C. E-1599 and 1600, and C.P.R. freight tariffs, C.R.C. E-1422 and 1450, applying from North Bay, Ont., to certain points in the U.S.

7721. Aug. 3.—Authorizing Maidstone municipality to carry wires across C.P.R. 3 miles west of Belle River station, Ont.

7722. July 30.—Authorizing city of Brandon, Man., to carry water main under C.P.R. and G.N.R. on Twenty-Sixth St.

7723 to 7728. Aug. 3.—Authorizing Bell Telephone Co. to carry wires across C.P.R. at 6 points in Ontario.

7729. Aug. 3.—Authorizing Bell Telephone Co. to carry wires across Central Vermont Ry., Lake Street, Waterloo, Que.

7730, 7731. Aug. 3.—Authorizing Bell Telephone Co. to carry its wires across C.P.R. at 2 points in Ontario.

7732. July 31.—Authorizing Caradoc and Ekfrid Telephone Co. to carry wires across C.P.R. between Caradoc and Ekfrid, Ont.

Great Northern Ry., Lines in Canada.

Midland Ry.—J. Fisher, K.C., President, together with a number of officers of the Great Northern Ry., St. Paul, Minn,. met the Railway Committee of the city of Winnipeg, Aug. 3, to discuss the question of the entrance of the various G.N.R. subsidiary lines in Manitoba, into Winnipeg. The plans, which were filed with the Board of Railway Commissioners in 1906, show an entrance from the city boundary on lot 56 to a site on Paulin St., between Ross and Pacific avenues, west of Princess St. At that time it was intended that a passenger station would be constructed on Paulin St. It is now proposed that the site be used for a freight shed and yard only, and that the passenger traffic come in over the Canadian Northern Ry. from Fort Whyte, and be deposited at the Fort Garry station. The land purchased in Winnipeg in the interests of the G.N.R. comprises blocks A, B, and C, 110 acres. It is said that according to the original plans, the property between Ross and Pacific avenues will be used for tracks, crossing Leonard, Ellen, Isabel and Nena streets. The track will pass between Ross and Pacific until about midway between Nena and Tecumseh, then it will swing south, crossing Ross and Elgin avenues diagonally. After Tecumseh the line will run along the north tier of lots between Elgin and William streets. It will cross Tecumseh, Brant and McPhillips streets and join the old roadbed of the Manitoba and Southwest Colonization Ry., now owned by the C.P.R., crossing Notre Dame St. on river lot 50, and continue along the old route to lot 45. It will then run south, adjoining the C.P.R. Pembina branch, to the Assiniboine River. Adjacent to the river it will turn east to approach a swing bridge across the river, which will be necessary to provide for the passage of steamers. On the other side of the river it will enter lot 56, pass through the Borebank property and parallel the C.P.R. to the city limits. The shops and yards will be on the west side of McPhillips St., on the n.w. quarter of sec. 7, tp. 11, range 3, east. The conference was private, but it is understood that the company's engineers and the City Engineer will go over the plans, and consider the question of subways, crossings, etc., before another conference takes place.

Vancouver, Victoria and Eastern Ry. and Navigation Co.—The Board of Railway Commissioners has approved of the company's plans for a branch line to connect its main line with the line it owns south of the international boundary. The negotiations between the company and the Vancouver city council with respect to the improvement of False Creek by dredging have been practically settled. As soon as the necessary papers have been drawn up and signed the company will be enabled to go ahead with the construction of its passenger station, freight sheds, and deep water shipping, pier, etc. (Aug., pg. 577.)

A party of British engineering students arrived in Canada recently, for the purpose of studying a number of the most important engineering plants and features in the Dominion. Among the places to be visited are Quebec, Montreal, Toronto, Ottawa, Peterboro, Cobalt, Muskoka, St. Catharines, Stratford, Sarnia, London, Brantford, and Hamilton.

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction Betterments.

Algoma Central and Hudson Bay Ry.—J. M. Shanley, C.E., Montreal, returned there, July 27, from a trip of inspection over the route of the proposed extension of the line to the National Transcontinental Ry. He states that the company has 180 miles of grading completed and that track has been laid upon 90 miles. This mileage includes the main line from Sault Ste. Marie and the branch lines from Michipicoten to the Helen and other iron mines. The other 90 miles, upon which grading has been done, extends from Pangissin towards a junction with the C.P.R. He stated that there is nothing in the country between the present track end and the Transcontinental Ry. to make construction difficult, although there are a good many bridges to be constructed, both on the graded section and the section north of the C.P.R. (June, pg. 413.)

Angus Short Line Co.—The Quebec Legislature recently incorporated a company with this title to construct a railway from East Angus, Compton county, through Westbury and Eaton tps., to Cookshire. The company is authorised to construct the line in sections, and to operate it by steam, electric or other motive power, and to enter into agreements of various kinds with other similar companies. The offices are to be at Sherbrooke; the capital is $200,000, and power is given to issue mortgage bonds. The company is empowered to acquire land, water powers, and other property necessary for its business. The Brompton Pulp and Paper Co. is authorised to become a shareholder of the company. The provisional directors are: F. M. McCrea, Sherbrooke; G. Vandyke, E. P. Lindsay, Boston, Mass.; C. C. Wilson, W. N. Munroe, Auburn, Mass.

Atlantic, Quebec and Western Ry.—Rapid progress is reported to have been made with the construction of this line between Paspebiac and Gaspe, Que. It is practically completed to Pabos, 20 miles beyond Port Daniel, and the contractors have 1,800 men at work on the remaining 60 miles into Gaspe. There are a large number of bridges to be constructed on this section of the line. The Board of Railway Commissioners has just approved of plans for the construction of the bridge at Grand River crossing, sec. 6, mileage 51.

C. B. K. Carpenter, Managing Director of the New Canadian Co., London, Eng., contractors for the line, stated recently, that as soon as the line is finished, and linked up with the Intercolonial Ry. at Metapedia, arrangements will be made with one of the steamship companies running out of the St. Lawrence or New York to place a fast steamer on the Gaspe route, to ascertain the time to be made between Liverpool and Gaspe harbor. It is believed that one of the fast steamers can do the distance in 3½ days. An interesting fact in connection with this statement is the announcement that the Department of Public Works is about to ask for tenders for the construction of a wharf at Gaspe, to be used in connection with the railway, as soon as it is ready for traffic. The wharf will be about 600 ft. long to a water depth of about 45 ft., sufficient to allow the largest steamers to approach at all stages of the tide. (See Atlantic and Lake Superior Ry., July, pg. 473.)

Canada Western Ry.—The surveys for this projected line are being pushed forward rapidly. On July 30 the survey party had reached Pincher Creek, Alta., where they spent some time looking over possible routes for entering the town. It is said that the route for the line will be as follows: starting from Calgary, it will run south, a few miles west of the Calgary and Edmonton Ry., as far as De Winton, then veer west, crossing High River, about 25 miles west of that town, at the Bar ranch, then through the pass at the head of Willow Creek, south through the Walrond ranch in the valley between the Porcupine and Livingstone ranges, crossing the north fork of the Old Man river and the C.P.R. Crow's Nest Pass line near Cowley, then on to Pincher Creek. From Pincher Creek the line will pass through the Yarrow and Twin Butte valleys to Cardston, and on to the International boundary at Whiskey Pass. From Walrond ranch a spur line will be constructed to the coal mines in the Livingstone range and extended to Michel and Elk River. (Aug., pg. 573.)

Dominion Atlantic Ry.—The Board of Railway Commissioners has approved plans for the superstructure of a bridge over the Sissibo River at Weymouth, N.S. (Sept., 1908, pg. 615.)

Farmers Ry.—There was a gathering at Melfort, Sask., recently when there was some ceremony in connection with the cutting of the first sod of this railway to Regina. A despatch from Melfort, Sask., Aug. 14, says the grading done was started at Flett Springs and that 1.5 miles had been completed. The work is being done by farmers in the vicinity, who are taking payment in stock of the company. Work has been suspended for the present, owing to the harvest, but as soon as this is over it will be resumed and it is expected that grading will be completed into Melfort, a distance of 18 miles, by the fall. (June, pg. 415.)

Fort William Terminal Ry. and Bridge Co.—The Board of Railway Commissioners has approved the revised location of this projected railway, from Christina St., Fort William, Ont., crossing the Kaministikwia River and Islands 1 and 2. (Aug., pg. 573.)

Grand Lake and Bell River Ry. Co.—The Quebec Legislature at its last session incorporated a company with this title to construct a line from the National Transcontinental Ry., near Bell River, along the valley of the river to Twenty-one Mile Bay, an arm of Grand Lake, or to Rabbit Lake, on the Ottawa River, in Pontiac county. The work of construction is to be commenced within 6 months after the completion of the N.T.R. to Bell River, and to be completed within 5 years thereafter. The company is authorised to enter into agreements with other companies, to construct telephone and telegraph lines, to build and operate boarding houses for its employes and for travellers, to carry on a general navigation business on waters reached by its line, and to construct or acquire docks, wharves, etc. The capital is fixed at $500,000 and bonds to the extent of $20,000 a mile may be issued. The provisional directors are: J. B. Fraser, J. Riopelle, W. H. A. Fraser, Ottawa; Hon. W. Gibson, Beamsville, Ont.; A. Barnett, Renfrew, Ont.; Hon. G. Bryson, Fort Coulonge, Que. (June, pg. 413.)

Indian River Ry.—Surveys are being made from the north end of Lake Megantic southerly to the international boundary near Riviere Morte. One route has already been surveyed southerly and east of Louise mountain and Lake Maccanamac, but it was found to be almost impracticable and another route is being sought for through Woburn and Louise via Three Lakes to Lake Megantic. These surveys are expected to be completed during the current month, and the plans prepared for consideration by the directors. The engineer in charge of the surveys is — Bushmer. The company has power to connect its line with the Rumford Falls and Rangeley Lakes Rd. or the Portland and Rumford Falls Ry. in the United States. The former of these lines terminates at Oquossoc, Me., and the latter at Rangeley, Me., and both are operated by the Maine Central Rd. Press reports state that the charter has been acquired by the Boston and Maine Rd. L. Tuttle, President of the B. and M. Rd., is also president of the M. C. Ry.

The Quebec Legislature in 1908 voted a land subsidy in aid of construction. The officers and directors formerly included: President, M. P. Davis; Vice-President and General Manager, W. Tettengill, Rumford Falls; other directors, W. P. Davis, L. A. Cannon, G. Parent; Treasurer, G. W. York, Portland, Me. (July, pg. 447.)

Intercolonial Ry.—We are advised that the freight car and passenger car repair shop, which it is proposed to erect at St. John, N.B., will be near the locomotive house and other buildings erected at the Island yard during the past five years. The new shop will be 125 by 45 ft. It will be constructed of wood, and be used for the making of light repairs to freight and passenger cars. (Aug., pg. 573.)

International Ry. of New Brunswick.—Grading has been completed from Campbellton for about 80 miles, and from St. Leonards, towards Campbellton, for about 22 miles, leaving about 12 miles to be graded to complete the line. It is expected to complete the grading by the end of Sept. There are at present about 1,000 men engaged upon the work. Track has been laid from Campbellton on the whole of the 80 miles, and as fast as grading operations will permit tracklaying will be proceeded with towards St. Leonards. It is hoped to have track laid from Campbellton to the St. John River at St. Leonards by the end of Sept. or early in Oct. A supply train, with passenger car attached, is being run daily from Campbellton for a distance of 67 miles. It is expected to start a regular freight and passenger service over the whole line in Oct. At St. Leonards connection will be made with the C.P.R. The company has power to construct a bridge across the St. John River at St. Leonards. On the Maine shore of the river connection will be made with the Bangor and Aroostook Rd. at or near Van Buren. The bridge will have a length of about 800 ft. and will be of steel on concrete piers and abutments. Work will probably be started on the bridge during the winter.

The line from Campbellton to St.

Leonards is being constructed to a high standard. There are no wooden bridge structures on the whole line, with the exception of small culverts. There are altogether 26 bridges, all of steel on concrete piers and abutments. Of these bridges 19 were erected by the Dominion Bridge Co. and seven by Duncan and McLellan, of Campbellton.

At the Campbellton end the Interprovincial Bridge Co. of New Brunswick, which is under the same ownership, is authorized to construct a railway and passenger bridge over the Restigouche River to connect Combellton with the mission on the Quebec side. The construction of the bridge will enable a connection to be made with the Atlantic and Lake Superior Ry. It is probable that work will be started on this bridge at an early date. (April, pg. 247.)

International Ry. of New Brunswick.—Some arbitration proceedings in connection with the expropriation of the right of way for this railway have just been completed. For about 28.50 miles the right of way passes through land owned by the New Brunswick Ry. Co., and the arbitration proceedings had to do with the fixing of the value of this strip of land. The company offered $900, but this was refused on the ground that the timber was worth more. Arbitration was resorted to with the result that the New Brunswick Ry. has been awarded $3,000 for the land, and costs, which are said to amount to $4,500. The I. Ry. of N.B. has given notice of appeal.

Irondale, Bancroft and Ottawa Ry.—The company has power to extend its line from the present terminus at Bird Creek, Ont., to Renfrew, and the matter of starting work on this extension is at present under consideration. The route of the proposed extension has been looked over by the Ontario Railway and Municipal Board. We are advised that in addition to extending the line the company intends to improve the existing line between its junction with the G.T.R. near Kinmount and Bird Creek. (Sept., 1908, pg. 617.)

Manitoulin and North Shore Ry.—The contract for the extension of the line from Gertrude mines to Crane Hill mine, Ont., has been let to the O'Boyle Bros. Construction Co., Sault Ste. Marie, Ont. The work is in progress, and the contractors expect to complete the first 8 miles this year. C. LeB. Miles, C.E., is superintending construction for the contractors. (July, pg. 479.)

Matane and Gaspe Ry.—See Canada and Gulf Terminal Ry.

New Brunswick Southern Ry.—A new station building and a 90 ft. platform are being erected at Spruce Lake. The old station has been removed across the track, and will be used as a car shed and a section workshop. The Board of Railway Commissioners has approved plans for the construction of a bridge at West Waweig, N.B.

North Eastern Ry.—The Quebec Legislature last session granted this company an extension of 3 years within which it may commence the construction, and 10 years within which it may complete its projected line of railway. (Feb., pg. 103.)

Northern New Brunswick and Seaboard Ry.—It was reported in Montreal, July 31, that the contractors for the construction of the Canada Iron Corporation's railway from its Gloucester county iron mines to Bathurst, N.B., had 400 men engaged on the work, that grading had been completed on over 4 miles, and that the line would be completed in November. (Aug., pg. 573.)

Quebec Eastern Ry.—We are advised that it is intended to start construction at the southern end of the Quebec bridge and to run to Sherbrooke, with a branch line in the vicinity of Inverness, connecting with the Lotbiniere and Megantic Ry. at Lyster, Que. W. G. Campbell is engineer in charge of surveys. It has not been decided when construction will be started. (Aug., pg. 575.)

Temiskaming and Northern Ontario Ry.—The Commissioners and principal officers returned to Toronto recently, having completed an inspection of the line between North Bay and Cochrane, for which purpose they left Toronto, Aug. 6. The construction of a second track between Cobalt and Haileybury is in progress, and it is expected that it will be completed early in Sept. Press reports state it is intended to operate this section between Cobalt and Haileybury by electricity, but we are advised that this is a question that has not yet come up for consideration.

The work of laying out the extensive yards at Cochrane, the point of junction with the National Transcontinental Railway, is being progressed with rapidly. The grading has been almost completed and it is expected that track will be laid within a few weeks.

A contract has been let to S. F. Whitham, Toronto, for the erection of the new station at Cobalt. The building will be 148 by 32 ft., and will have a public waiting room 65 ft. long. There will be a platfrom around the whole building. The platform will have a length along the line of 500 ft. The foundations of the structure will be of concrete and the building itself of hard burned vitrified brick. The waiting room will be lined with enameled brick dado and pressed brick. The roof will be of timber and green slate. Along the ends and sides will be a verandah hood. The interior finish will be of red oak. The general waiting room, ticket and telegraph offices, baggage room and lavatories will be on the main floor, and on the first floor will be offices for the telegraphers and engineers.

The entire telephone system on the line between North Bay and New Liskeard is being reconstructed. Two gangs are engaged on the work, and it is expected it will be completed by the end of Sept. The new system will have the most modern improvements, and will be extended so as to give a service to the mines in the vicinity of the railway. The line is to be extended along the Kerr Lake branch, and, it is expected it will also be extended to the present railway terminus at Cochrane. (Aug., pg. 575.)

The C.N.R. is reported to have entered into a new wages agreement with its maintenance of way employes, whereby a general increase has been granted. The advances average from 10 to 15c. a day, with the exception of to the laborers, whose rate remains unchanged. The new schedule became effective Aug. 11, and is terminable at 60 days' notice from either side.

G. T. R. Betterments, Construction Etc.

Ottawa Station and Hotel.—T. T. Amos, representative in Ottawa of the Geo. A. Fuller Co. of New York, said recently that the company will take over the excavation work commenced by the G.T.R. on the hotel site and push it to a conclusion. This would take two or three months to complete on account of the hard rock bed.

Lindsay Roundhouse.—It is reported that a new roundhouse is to be erected at Lindsay, Ont., in the near future, in connection with the construction of a second track on the old Midland Ry. between Port Hope and Midland, which it is said will be undertaken at an early date.

Toronto Union Station.—In an interview at Toronto Aug. 5, Sir C. Rivers Wilson, President, said he had been discussing the question of the elevation of the tracks with C. M. Hays, Second Vice-President, as they came along from Montreal. He looked at the matter first of all from the financial point of view, but the company had also to look at it from the view of the people. Under the circumstances, as far as he could see, a satisfactory arrangement had been made and the company must bow to the inevitable.

Toronto Roundhouse.—Plans have been prepared for the erection of a new roundhouse at Toronto, and the question of just where it is to be erected is under consideration. The present roundhouse, which has a capacity for 26 locomotives, is situated at the foot of Spadina ave., and it is said that, since the Board of Railway Commissioners has ordered the building of a viaduct along the water front, the company's officials have been considering the removal of the structure to another site, so as not to interfere with any future building operations in the local yards. Three sites have been under consideration: one at the foot of Bathurst street, one at Parkdale, and one at Mimico. The company erected a large roundhouse at Mimico about five years ago in connection with the freight yards which it laid out there. It is considered likely that the site chosen for the proposed house will be at the foot of Bathurst St., that being the most convenient point for housing the passenger locomotives. The plans provide for a 50-stall roundhouse, with all the most modern appliances. No decision has been reached as to when or where it will be erected.

Terminals at North Bay.—Press reports state that the company has completed arrangements with the Commissioners of the Temiskaming and Northern Ontario Ry. for the use of its terminals at North Bay, Ont.

Guelph Station.—The Board of Railway Commissioners' order directing the erection of a new station at Guelph, Ont., requires that it must be completed by Sept. 1, 1910, and that the company provide a 40 ft. subway at Gordon St., and an 8 ft. one at Huskisson St. The question of a subway at Neave St. is to be settled later. The company is given Jubilee park as a site.

Bridge Construction, Chatham to Windsor.—The Board of Railway Commissioners has authorized the company to reconstruct five bridges at different points between Chatham and Windsor, Ont. (Aug., pg. 599.)

National Transcontinental Ry.

An accident occurred, Aug. 14, at Mullin's Brook, N.B., where there is under construction a trestle 1,500 ft. long and 50 ft. high. The trestle is on a curve, and it will take 40,000 yards of material to fill it in. While an engine with seven cars of material were on the structure six of the twelve spans gave way and the engine and cars were hurled to the bottom. One man was crushed by a car and killed and several were severely injured. The loss will fall entirely on the contractors, the Toronto Construction Co., the Superintendent of which, H. F. McLean, says that the cause of the accident was the melting of snow and ice beneath the foundations, the structure having been put up during the winter.

In connection with the appointment of additional engineers to consult with the Commission of three engineers appointed to prepare plans for the reconstruction of the bridge over the St. Lawrence at Quebec, it is stated that there are no insurmountable differences between the commissioners, but that there are problems arising which render it advisable that other opinions be obtained before a decision is arrived at. The questions to be dealt with by H. Holgate, Montreal, and A. Noble, New York, who have been appointed in a consultative capacity, have to do with the substructure. Some matters relating to the superstructure have been referred to Phelps Johnson, of the Dominion Bridge Co., and P. Wolfel, of Pittsburg, Pa. The opinions of these gentlemen on the points referred to them will be considered by the bridge commissioners and by the Minister of Railways before a final decision is arrived at. It is reported as not being improbable that the commissioners will recommend that the bridge be constructed on the suspension principle, and not as a cantilever structure, as provided for in the old plans.

A large area of land is reported to have been purchased by the N.T.R. Commissioners at St. Perpetue, Que., upon which it is proposed to erect workshops for the eastern section of the line. Plans are being prepared and it is expected that tenders will be asked for at an early date.

On the sections east and west of Abitibi grading is reported to be going along very rapidly. Some steel has been laid, and it is expected that by the end of the year a good many miles will be laid both east and west from Cochrane. Rapid progress is also being made with the bridge across the Abitibi River. The track has been laid up to this point, eight miles from Cochrane. The bridge to be constructed will be 840 ft. long and 96 ft. above the water. The two principal spans will be of 210 ft. each. It is expected to be completed by the end of the year. West from Cochrane 14 miles of track have been laid.

Some trouble was given to the tracklaying gang on the section of the line between Superior Jct., Ont., and Winnipeg, by a sinkhole 49 miles west of Superior Junction. The dump at the point in question was reported to have sunk 18 ft. The difficulty was got over Aug. 1 and track laid over the new dump. Tracklaying was expected to be finished so as to connect up the G. T. Pacific Ry.'s branch to Fort William with the line from Winnipeg to Edmonton, Alta., by Sept. 1.

It was reported Aug. 10 that the Commissioners had issued orders holding payment of progress estimates of contractors where charges of overclassification had been made. These matters are to be enquired into by G. Grant, the new Chief Engineer.

At the site of the shops and yards, on the Springfield road, near Winnipeg, several parallel lines of track have been laid in the receiving and classification yard. On the north of these tracks a 24-stall roundhouse is practically completed, and a good deal of preliminary work has been done on the other buildings, for which the J. D. McArthur Co. has the contract.

The foundation work for the various shop buildings is also being proceeded with rapidly. The foundations for the locomotive and machine shop have been completed and the steel work is being erected. In addition to the foundation work to carry the building it was necessary to put in large masses of concrete to form bases for the heavy machines to be installed. The contractors for these buildings are Haney, Quinlan and Robinson.

The Commissioners propose to lay a pipe line, five miles long, from the Red River to supply water at the shops and to erect a tank with a capacity of 200,000 gallons.

The selection of the route from St. Boniface was finally determined upon Aug. 13, at a conference at which W. Mackenzie, President Canadian Northern Ry., and C. A. Young, one of the Commissioners, were present. Mr. Young subsequently saw W. Whyte, Second Vice-President C.P.R., and closed up the matter so far as that company was concerned.

Work on the bridge across the Red River between St. Boniface and Winnipeg is well under way. Excavations have been completed for the pier on the east side of the river and the concrete work has been started. Steel piles are being driven at the foot of Lombard St., Winnipeg, to form a caisson, where the pier on the west side of the river will be located. The contractors are Haney, Quinlan and Robinson.

GRAND TRUNK PACIFIC RAILWAY.

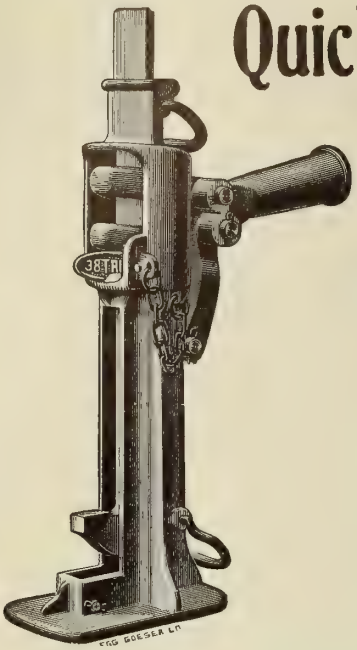
The Battle River viaduct, which is illustrated on this page, crosses Battle River valley 675.5 miles west of Winnipeg on the G.T.P.R. main line. The foundations were made in the usual way by means of open coffer dams and concrete forms. The substructure of plain concrete comprises two wing abutments, two river piers and 48 pairs of pedestals, nearly all resting on piles. The total amount of concrete used in the foundations was 11,300 cu. yds. The superstructure is composed of one 70 ft. and one 50 ft. end spans, fifty 50 ft. intermediate plate girder spans and one 150 ft. intermediate deck truss span, resting on 26 steel towers. The amount of steel used in the superstructure is 3,400 tons. The total length of this viaduct between parapets is 2,772 ft., and the distance from base of rail to low water is about 184 ft. The average height between base of rail and ground line is about 139 ft. Work was begun on the substructure in Oct., 1907, and the entire structure completed in Dec., 1908.

The first passenger train over the G.T.P.R. from Winnipeg to Edmonton, Alta., ran into the Canadian Northern Ry. station in the latter city Aug. 13. The train left Winnipeg at nine o'clock on Wednesday morning and reached Edmonton at 1.45 on Friday afternoon. The regular train service between the two points was inaugurated Aug. 15. For the present the company will use the C.N.R. tracks into Edmonton. A divisional point will be located there, and it is expected that work will be commenced this fall on the roundhouse and other necessary buildings.

West of Edmonton the tracklaying gang had reached Stoney Plains Aug. 6, and it was expected that track would be laid to 40 miles west of Edmonton by Sept. 1. It is desired to have the track laid as far as the crossing of the Pembina River, 75 miles west of Edmonton, this fall. Within easy distance of the Pembina River are the coal areas which are being developed by the Pacific Pass Coal Co. The company has control of about 5,000 acres upon which considerable prospecting has been done, and some seams are being developed. Large quantities of machinery are being forwarded, and will be delivered as soon as the railway is open to the river. The coal company expects to be in a position to be able to deliver about 10,000 tons of coal a day by the end of the year. The erection of the bridge across the Pembina River will be gone on with as soon as track is laid to the river. This bridge is

GRAND TRUNK PACIFIC RY. BRIDGE, BATTLE RIVER.

Quick Trip Track Jacks



TOGGLE JOINT TRACK JACK

The Joyce-Cridland Jacks shown herewith are specially designed for lining up tracks, the bases fitting between ties. In the toggle-joint jack, a square lifting bar is used; this gives strong wedging force so that it is impossible for the bar to slip. By taking short strokes with the lever in a horizontal position, tremendous lifting force can be applied, while long strokes give greater speed. By inserting the tripping wedge under the lower collar the bar can be quickly dropped.

In the automatic jack, the raising action is entirely automatic and the jack can be tripped by a slight touch of the lever.

Full description of these jacks given in Bulletins 33 and 35.

A. R. Williams Machinery Co., Limited

Toronto, Winnipeg and Vancouver. WILLIAMS & WILSON, Montreal

THE ELECTRIC HEADLIGHT

The following letter was received under date of May 8, 1908, from Mr. J. W. Cleary, Travelling Engineer Pyle-National Electric Headlight Co.:

"I learn from_____the Master Mechanic here, that an engineer running between_____ and_____discovered a broken rail with the Pyle-National Electric Headlight and made the stop without ditching his train. One or two pairs of wheels got off, but that was a small affair to what it would have been where a foot of the rail was broken off. Also an engineer running east of here found some cars shoved out on the main line. He saw them with the 'Electric' and made the stop without hitting them."

PYLE-NATIONAL ELECTRIC HEADLIGHT CO.

MONADNOCK, CHICAGO

a fairly large one, and its erection will enable tracklaying to be gone on with towards the crossing of the McLeod River at Wolfe Creek, which point it is hoped to reach by Dec. 1. A contract has been let to Foley, Welch and Stewart for the grading of 70 miles westerly from Wolfe Creek. This contract will carry the line to Tete Jaune Cache, about 50 miles beyond the Yellowhead Pass.

A press despatch from Prince Rupert, Aug. 20, says that a contract has been let to Foley, Welch and Stewart for a second section east of Prince Rupert. This section will cover 135 miles easterly from Copper River to Aldermere, B.C. The work on this section will be very heavy, it being calculated that there will be at least 1,500,000 cubic yards of rock to be taken out. With the letting of this contract there now remains about 350 miles of the line in British Columbia to be placed under contract.

A contract has been let to the May-Sharpe Construction Co. for the concrete work on the bridges over Wolfe Creek and the McLeod River. The substructure of the Wolfe Creek bridge is expected to be completed by March next and that for the McLeod River bridge a month later.

Collingwood Schreiber, Consulting Engineer for the Dominion Government, is making his annual inspection of the line. He left Winnipeg Aug. 3 and will not return to Ottawa until early in Sept.

GRAND TRUNK PACIFIC BRANCH LINES. —An announcement was made in Winnipeg Aug. 11 that it is intended to construct a line southerly from that point to Emerson, Man., where connection will be made with the Northern Pacific Ry. It is not expected that any construction will be done on this branch this year.

It is reported that construction will be started this year on a branch from Justice, Man., southeasterly to Brandon, Man., 18 miles.

As soon as the tracklaying gang has completed its work as far as the Pembina River it will come east to Melville and start work on the branch under construction northerly towards Hudson Bay. Grading on the branch under construction southerly from Melville to Regina is reported to be practically completed to Balcarres, 33 miles. Track will be laid on it as soon as grading has been completed. The question of the route to be followed from Balcarres to Regina has not been announced. One route surveyed is from Balcarres by way of Fort Qu'Appelle, and the other is to Indian Head and then west through Balgonie. As soon as the route has been decided upon a contract will probably be let. The Board of Railway Commissioners has approved plans for the location of a branch line from Regina southerly to Portal.

A contract is reported to have been awarded to J. D. McArthur for the construction of a branch line from Tofield to Calgary, Alta. The route is practically parallel with the Calgary and Edmonton Ry. Work was reported to have started on the line Aug. 5 by G. H. Webster, Edmonton, who is said to have secured a subcontract under the general contractor. E. J. Chamberlin, General Manager, said that it was hoped to have 50 miles of this line completed this fall. The contract for the substructure of the bridges on this 50 miles has been let to S. C. Hill and Sons, and their plant was delivered at Tofield, Aug. 12. (Aug., pg. 581.)

TRADE AND SUPPLY NOTES.

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

The Canadian Pilling Co., Montreal, supplied a compressed air turntable to the C.P.R. at Souris, Man., recently.

The Canadian Pilling Co., Montreal, has supplied an electrical tractor to turn the swing bridge over the Welland River at Thorold, Ont.

The Falls Hollow Staybolt Co., Cuyahoga Falls, Ohio, advises receipt of an order for a large quantity of Falls Hollow staybolt iron bars from the Northern Ry. of Costa Rica.

The Canadian Westinghouse Co., Hamilton, Ont., has issued circular 1079, relating to O.I.W.C. transformers, etc., with illustrations of the series supplied to the Shawinigan Water and Power Co., Shawinigan Falls, Que.

The B. Greening Wire Co., Hamilton, Ont., has instructed its architect to prepare plans for a new wire rope factory. It will be a one-storey concrete and brick structure, 124 ft. x 112 ft., with saw tooth roof construction. The flooring will be solid concrete so as to withstand the weights of heavy machinery and large reels of cable. It will be an up-to-date factory in every respect. Orders have been placed for additional rope machinery of the latest design. It is expected the new mill will be completed and machinery installed by Nov. next. The present rope mill will be used as an extension of the wire working branch of the business, and will provide much needed room for the rapidly growing demand for wire guards, garden fencing, and bordering, factory lockers, etc.

The American Locomotive Co. has recently issued pamphlet 10,034, containing a very complete and instructive paper on the articulated compound type of locomotive read by C. J. Mellin, the company's consulting engineer, before the American Society of Mechanical Engineers. The paper very fully describes the characteristic features of this type of locomotive, and the text is well illustrated by drawings of its special details as constructed by the company. Illustrations of the side elevations of a number of different designs of articulated compound locomotives are also included in the pamphlet, among which are two preliminary designs for passenger service. Extracts from the discussion of the paper, and half-tone illustrations of a number of locomotives of this type built in the U.S., are also given, with the principal specifications of each design shown.

C. P. R. Grade Revision in the Rockies.

With the completion of the spiral tunnels through the Rocky Mountains between Hector and Field, B.C., the C.P.R. is enabled to save considerably upon the cost of conducting transportation in that section, notwithstanding the fact that the line has been lengthened. The gradient on the route which is to be abandoned was 4.5% and required the use of special locomotives as well as pushers. The gradient of the new line is 2.2%, which will enable heavy trains to be hauled by a single locomotive.

A contract was let for the work to Macdonnell, Gzowski and Co. in Sept., 1907, and the work has been in progress since that time. In a recent interview with the Toronto Globe, Mr. Macdonnell gave the following interesting particulars of the work which had been done:—

"This improvement has meant 8.5 miles of work, of which 1.5 miles were tunnelled under mountains of 10,000 ft. or more in height. while it increases the length of the line by 4.25 miles, at a cost of about $1,500,000, it will mean the reduction of the gradient from 4.5% to 2.2% at the worst point, while the general grade will be less than 2%. The result of this will be that where on the old track with its big grade it took four engines to handle a train, now only two will be needed; and where the four used to be able to only make four or five miles an hour, the two on the new line will be able to make 25. In this way the cost of operating a train over this difficult piece of line will be cut to about one-third of the present cost, with an improvement in the time of running, while the element of danger, inseparable from high grades, has been practically eliminated. It is these factors which have induced the C.P.R. to go to such tremendous expense to cut out the famous 'Big Hill' grade.

"The conformation of the new track is most peculiar. Coming from the east, the road first enters the western corkscrew tunnel of 3,200 ft. under Cathedral Mountain. Emerging from the tunnel twist the track runs back east across the Kicking Horse River, and then enters the eastern spiral tunnel of 2,910 ft. under Wapta Mountain, and after describing an elliptic curve emerges to again cross the Kicking Horse westward. The whole thing is a perfect maze, the railway doubling back upon itself twice, tunnelling under mountains and crossing the river twice in order to cut down the gradient. The two tunnels alone involved an excavation of 130,000 cubic yards of rock, while over 500,000 yards were blasted out in the other cuttings.

"Put in brief, the work which has now been completed is as follows:—Length of two tunnels, 1.5 miles; length of cutting outside of tunnels, 7 miles; increase in length of track, 4.5 miles; reduction in grade, from 4.5% to 2.2%; approximate cost of work, $1,500,000; number of men employed, about 1,000, with complete outfit of steam equipment; time of work, 20 months, from Oct., 1907, to July, 1909; rock removed, about 650,000 cubic yards.

"To cut out this quantity of rock, of which there were 500,000 cubic yards in the open cutting and 150,000 cubic yards in the tunnelling, 75 carloads of dynamite were used, or upwards of 1,500,000 lbs., the cost of which was over $250,000.

"During the tunnel work the contractors operated steam shovels by compressed air, one of these machines being installed at the working ahead in each tunnel, the cutting being worked from opposite ends. Despite the complicated work caused by the spiral shape of the tunnels, they met practically exactly, and the work has been completed with marvellous exactness. This is not merely the greatest piece of tunnelling ever at-

A sketch plan showing the old and the new routes was given in our issue of Sept., 1907.

C. P. R. Articulated Locomotive.

A lot of silly twaddle has appeared in a number of daily papers in reference to the C.P.R. articulated compound locomotive which was fully described and illustrated in our last issue. Some papers went so far as to state that the locomotive was an entire failure, and that it would have to be sent to the scrap heap. This and other similarly ridiculous statements are entirely unfounded. On account of this locomotive having been constructed in a very short space of time, and being to a large extent of a novel type, its total weight was about 5% greater than was estimated. The C.P.R.'s policy is to take no chances whatever with regard to the weight of locomotives allowed to run over its bridges, and while it was endeavored to design a locomotive which would weigh as nearly as possible as much as the bridge engineers considered absolutely safe to run, when it was found that this allowed weight was exceeded, it was decided to return the locomotive to the shops and change it so as to bring it within the limit which had been set. This was not a difficult matter, as the front section of the boiler had been constructed of larger diameter than was actually necessary, in order to furnish the weight which was deemed necessary for adhesion, and the work is now under way. Apart from this, so far as the tests show, the locomotive is an entire success; it has developed rather more tractive power than had been expected, owing to the exceedingly good results obtained from the superheating arrangement, and the management considers that the locomotive is in every way satisfactory so far as could be developed from the two trips which were made as trials. It is expected as soon as the alterations are completed, which will reduce the weight about 10,000 lbs., to put the locomotive into regular service.

Brotherhood of Locomotive Firemen.

The Canadian Brotherhood of Locomotive Firemen and Enginemen commenced its convention at Winnipeg, Aug. 3, when the delegates were tendered a civic welcome. A letter was read from W. Whyte, Second Vice President C.P.R., regretting his inability to be present, a portion of which was read, as follows:—"I can assure you that I have a deep feeling of respect for the brotherhood, for during all the years of my railway career, which is the whole time of my life, because I started railway work when a stripling, the brotherhood of locomotive firemen and enginemen has caused me less inconvenience and worry than any other organization in the railway service. The reason of this may be set down to the fact that the chiefs and executive of this brotherhood have been broad-minded, reasonable and fair, not looking for trouble, but rather working in the interests of peace and harmony. And when that feeling obtains among the chiefs of the brotherhood and a similar feeling among the officials of a railway, there is very little likelihood of any serious difficulty arising. In other words, if the officers of a railway will give due consideration to the reasonable requests of the employes of the railway and the chiefs of the brotherhood will give the same consideration to the rights of the railway company, trouble is not likely to arise. What we all should aim at is to avoid taking an arbitrary position, but to respect the rights and reasonable demands of others. I sincerely trust that the good feeling that has existed in the past, and exists at the present time, may broaden and deepen in the future."

Railway Commissioners' Western Sittings.—The following are the approximate dates fixed for the Board's sittings during its western circuit: Winnipeg, Oct. 11 and 12; Brandon, Man., Oct. 13; Regina, Sask., Oct. 14; Saskatoon, Sask., Oct. 15; Prince Albert, Sask., Oct. 18; Edmonton, Alta., Oct. 20; Calgary, Alta., Oct. 22; Vancouver, B.C., Oct. 27; Victoria, B.C., Oct. 29; Nelson date to be fixed later on.

The Grand Trunk Railway's London, Eng., Offices.

The G.T.R. European Traffic Department is now housed in the company's own building at 17 to 19 Cockspur St., London, S.W. The site, which extends through from Cockspur St. to Warwick St., was secured from the London County Council. The public offices are on the ground floor, the principal feature being a room 40 ft. long by 18 ft. high. There is also a conference room on this floor. In the basement are offices and storerooms, the caretaker's apartments being located on the top floor. The building consists of six storeys, those situated between the ground and top floors, being let as general offices. The G.T.R. offices are intended to be used, not only for the transaction of the company's traffic business, but also for the convenience of Canadian travellers, the situation being convenient for all the centres of interest. The frontage of the building is faced with Portland stone, treated on broad lines, ornament being used only sparingly where the surrounding plain surfaces serve to emphasize its effect. The carvings include the coats of arms of the various Canadian provinces, and there are large emblematic figures of travel by land and sea, over the principal entrance. In the general office on the ground floor, there is a frieze showing the country through which the railway passes, with life size figures typical of Canadian life before and after the coming of the civilizing influence of the white man. The building is fully equipped with all modern conveniences, including electric light, hot water heating and vacuum cleaner plant.

ECONOMY

Those who have watched the operation of filling a locomotive tender with water will appreciate the many advantages of the

Sheffield Johnson Telescopic Standpipe Spout

It is the ideal standpipe construction.

It has a vertical range of over five feet and will reach the smallest tender or the largest.

No more wasted water or wet and uncomfortable firemen. Combine with this the

Fairbanks-Morse Gasoline Combined Pumper

for filling water tanks. Always ready to start at a moment's notice. No expense except when running. It saves fuel as well as workmen's time.

MAINLY ABOUT PEOPLE

W. Wainwright, Fourth Vice President G.T.R., returned to Canada from England, early in August.

G. A. Mitchell, of the Peter Lyall-Mitchell Construction Co., died at Winnipeg, from heart failure, Aug. 20.

J. P. Mabee, Chief Railway Commissioner and Mrs. Mabee, left Canada at the end of July for a trip to Europe. They will return early in Sept.

J. W. Pyke, of J. W. Pyke & Co., Montreal, has been elected President Mount Royal Spinning Co., in place of the late W. C. McIntyre.

Sir Wm. C. VanHorne has a number of exhibits for competition in the various cattle classes at the Canadian National Exhibition, Toronto.

Sir C. Rivers Wilson, President G.T.R., arrived in Montreal, July 30, by the s.s. Megantic, and proceeded on an inspection tour over the G.T.R. and G.T.P.R.

Sir Thomas Shaughnessy, President C.P.R., entertained the Rt. Hon. J. Bryce, British Ambassador to the U. S., at his summer home, St. Andrews, N.B., early in August.

C. W. VanBuren, Master Car Builder, C.P.R. Eastern Lines, Montreal, biographical details of whom we gave in our last issue, was born in Rensselar Co., N.Y., Oct. 15, 1867.

Among the passengers to arrive by the C.P.R. s.s. Empress of Ireland, at Quebec, Aug. 19, were Hon. G. P. Graham, Minister of Railways and Canals, and Sir Sandford Fleming.

D. D. Mann, Vice President Canadian Northern Ry., is reported as considering the question of entering politics. It is scarcely necessary to say that there is no ground for the rumor.

L. L. Buck, a well known civil engineer, died at Hastings, N.Y., recently aged 72. He was the designer of two steel bridges spanning the Niagara River, between Canada and the U.S.

A. J. Nixon, Assistant Superintendent G.T.R., London, Ont., was presented with two club bags, Aug. 21, by the G.T.R. trainmen at Hamilton, on the occasion of his leaving the company's service.

J. M. Egan, who was Superintendent of the C.P.R. in Winnipeg, in its early days, was visiting there at the end of July. He was on his way to Alaska, where he intends to spend some time.

F. E. P. Turner, C.E., who died at Bracondale, Ont., July 30, was engaged in 1887, by the Dominion Government, to report upon the Trent Valley Canal project.

H. R. Charlton, General Advertising Agent, G.T.R. and G.T.P.R., accompanied by J. W. Swan, official photographer, left Montreal, Aug. 11, for Prince Rupert, B.C.

D. McNicoll. Vice President C.P.R., left Montreal, Aug. 11, on a tour of inspection of the company's lines to the Pacific coast, intending to return early in September.

Lord Strathcona arrived in Canada in August, and during the time he will remain here, he has arranged to visit the principal centres of activity throughout the Dominion.

W. H. Estano, Traffic Auditor Intercolonial Ry., Moncton, N.B., was married Aug. 11, at West Aylmer, Ont., to Miss E. O. Terrill. The I.C.R. audit staff marked the occasion by the presentation of a china cabinet.

A. B. Ingram and H. N. Kittson of the Ontario Railway and Municipal Board, were in St. Thomas, Ont., Aug. 7, when they inspected the street railway there, and also went over the Southwestern Traction Co.'s line.

The engagement is announced of Mrs. A. W. Mackenzie, widow of the late A. W. Mackenzie, at one time Treasurer C.N.R. and subsidiary companies, to K. R. Marshall, Vice President Standard Fuel Co., Toronto.

D. B. Hanna, Third Vice President Canadian Northern Ry., accompanied by A. D. Davidson, C.N.R. Land Commissioner, sailed for England Aug. 5 on a business visit, and will return to Canada early in September.

A. A. Ingram, son of A. B. Ingram of the Ontario Railway and Municipal Board, and who is engaged in the St. Thomas office of Kingsmill, Saunders Torrance and Kingsmill, Solicitors for the Michigan Central Rd., has been appointed a Notary Public for Ontario.

Arthur Hawkes, Superintendent of Publicity, Canadian Northern Ry., Toronto, read a paper on "Advertising a Nation," at the 5th Annual Convention of the Associated Advertising Clubs of America, which was held at Louisville, Ky., Aug. 25 to 27.

H. D. Lumsden, who recently resigned the position of Chief Engineer National Transcontinental Ry. Commission, sailed for Great Britain on the C.P.R. s.s. Empress of Ireland, July 30, intending to return to Canada about the middle of September.

Among the provisional directors of the Kirchhoffer Shooting Club, recently incorporated in Manitoba, for the encouragement of the preservation of game, and to establish a shooting club, are, Sir Henry M. Pellatt, F. Nicholls and G. G. S. Lindsey, of Toronto.

G. H. Carter, railway contractor, who died at Guelph, Ont., Aug. 12, was interested in the construction of the Buffalo and Lake Huron Ry., at Goderich, and part of the old Great Western Ry., at St. George, both now forming part of the G.T.R. system.

J. Murray Gibbon, C.P.R. Advertising Agent, London, Eng., who was visiting Canada, during August, crossed the Atlantic in the company's s.s. Empress of Ireland as a steerage passenger to gain personal experience as to the general treatment of emigrants on these vessels.

H. Pellatt, who died at Orillia recently, was at one time Auditor of the old Northern Ry. Co., and at the time of his death was a director of the Dominion Telegraph Co. and of the Victoria Rolling Stock Co. He was father of Sir H. M. Pellatt, who is a director of a number of transportation companies.

Sir John Jackson, an English railway contractor, who has recently completed the construction of what is claimed to be the highest railway in the world, between La Paz, Bolivia and Arica, Chili, was in Montreal during August, when he was the guest of G. W. Stephens, Chairman of the Montreal Harbor Commission.

C. A. Saylor, who has been appointed Locomotive Foreman G.T.R., Hamilton, Ont., entered G.T.R. service at Point Edward, Nov., 1897, and with the exception of two intervals, from Nov., 1901, to June, 1902, and from July to Nov., 1902, he has been with that company ever since, at Battle Creek, Mich., and Sarnia tunnel.

Robt. Reid, member of the National Transcontinental Railway Commission, who died at Ogunquit, Me., Aug. 21, was born at London, Ont., July, 1855, and entered his father's wholesale stationery business there, and which was taken over by himself and a brother in 1878. He was appointed to the Commission Sept., 1904, on its formation.

Among the ticket agents who have joined the Canadian Ticket Agents Association recently are:—J. Ransford, G.T.R., Clinton, Ont.; H. MacDougall, G.T.R., Brampton, Ont.; W. R. Russell, G.N.R., Humboldt, Sask.; J. DeW. Randall, M.C.R., Niagara-on-the Lake, Ont.; D. A. Campbell, C.P.R., Gravenhurst, Ont.; F. J. Hutchins, C.P.R., Parkhill, Ont.

J. G. Swalwell, whose appointment as Local Auditor in charge of Traffic Receipts, G.T.P.R., Winnipeg, was announced in our last issue, was born at Montreal, July 3, 1867, and entered G.T.R. service Oct. 28, 1881, since when he has been, to Nov. 1, 1894, in various positions in the Freight Traffic Audit Office, Montreal, and from that date to June, 1909, Travelling Auditor.

S. Rothwell, Locomotive Foreman, Brockville, Westport and Northwestern Ry., died at Brockville, Ont., Aug. 14, aged 52. He was born at St. Catharines, Ont., but had lived in Brockville the greater part of his life. Prior to his service with the B.W. and N.W.R., he had been engaged with the G.T.R. and the C.P.R., having in the latter case been employed on the construction of the Rocky Mountain section.

G. Blackbird, who is said to be the oldest living ex-employe of the G.T.R., celebrated his 91st birthday recently at Richmond, Que. He was born at Newcastle, Eng., and after some years of service on the early English railways, he engaged with the firm who secured the contract for the construction of the G.T.R., and was sent to Canada in 1854. He was in charge of the first passenger train to run between Toronto and Port Hope.

John Saxby, the inventor of railway signals, recently celebrated his 89th birthday, at his home, Hassocks, Eng. He began life as a carpenters' apprentice, and was subsequently the inventor of the interlocking system of signalling, which has become universal. He was intimately associated with railways in their early days, and came into personal contact with Brunel and Stephenson, and also with railway men of a later date, such as Fowler and Baker. He is the head of the firm of Saxby and Farmer, Ltd.

John Date, who died at Montreal, July 26, aged 86, was probably the oldest master plumber in Canada, if not in America. He was born at Tavistock, Devonshire, Eng., came to Canada when about 20 years of age, and after being at Hamilton and Toronto for a time started business on Craig St., Montreal, as a plumber. He also began the manufacture of diving apparatus, which under his management has grown to large dimensions. He leaves a widow, three
